THE "CLARK" WIRE.

FOR SWITCHBOARD, RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

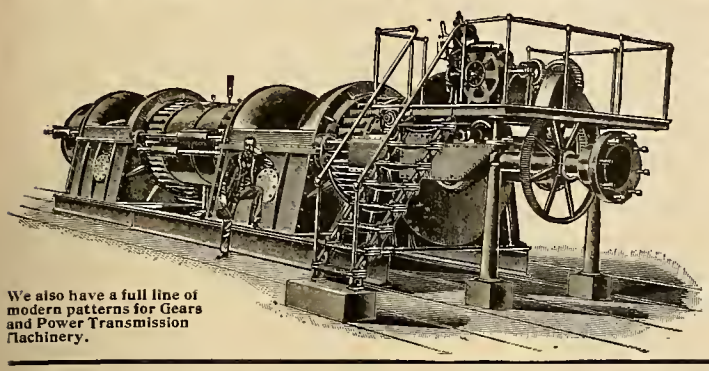
TRANSFORMERS, METERS AND ARC LAMPS.

NOTICE.—All machines are actually in stock ready for prompt delivery. All machines are guaranteed. Write for particulars and send for MONTHLY BARGAIN SHEET with net cash price.

Victor Turbines Operating Dynamos.



We also have a full line of modern patterns for Gears and Power Transmission Machinery.

That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.

FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

Machinery and Supplies at Bargain Prices.

We have the largest establishment of its kind on earth. Our plant and yards cover over a million feet of space. We are constantly buying factories and buildings. OUR MACHINERY HALL, a space 105x360 feet, is filled to overflowing with a complete assortment of machinery and electrical apparatus. WE PURCHASED THE OMAHA EXPOSITION, THE WORLD'S FAIR, THE CHICAGO POSTOFFICE BUILDINGS, ETC. Our facilities for rebuilding machinery are unsurpassed. We furnish a binding guarantee with all goods purchased. Our stock is constantly being added to. The following items are quoted, subject to prior sale:

One No. 8 Multipolar Machine, 75 K.W., 500-volt, speed 750, 150 to 160 h. p., Thomson-Houston.
One Allis Corliss engine, 26x48 in., 400 h. p.
One Replogle Electric Water-Wheel Governor.
One No. 1 Russell high-speed auto. engine, 7x16.
One 60 arc light Wood dynamo, 2,000 c. p.
One 620-light General Electric dynamo with 52-volt exciter.
38 assorted Transformers.
One Station Transformer and Ground Tester with three miles of Nos. 4 and 6 Weatherproof Wire.
One Westinghouse Alternator and Fan Motor, 16,000 alt., 100 volts.
One 14x24 Box Bed engine, shaft 8 ft. long, 6½ in. diam.
One M. P. 80 T.-H., 500-volt Railway Generator.
One D. 62 T.-H. 500-volt Railway Generator.
Two 25 S. S., v. 500, speed 900, Nos. 1041 and 1039 T.-H. Railway Generator.
One 15x14 Ideal engine.
One 14x14 Ideal engine.
One 12x18 Lansing engine.
One 25-light, 2,000 c. p. Westinghouse low-tension arc dynamo.
Two 50-light Standard arc dynamos.
One 20-light Sperry arc dynamo.
One 500-light, 100-volt Edison dynamo.
One 1,000-light 1,000-volt Wood Ft. Wayne alternating dynamo, complete with switchboard and exciter.
One 1,000-light, 1,000-volt Westinghouse dynamo, complete with switchboard and exciter.
One 1,200-light Slattery alternating dynamo.
One portable Weston ammeter, reading from 0 to 150.
Two Thompson alternating ammeters, reading from 0 to 100.
Fifty 10, 20, 40 and 80 ampere Westinghouse house meters.
200 series arc lamps, different makes.
Rubber-covered, weatherproof and bare copper wire.
5,000 assorted sizes clear and opal arc globes.
One 18x42 Frick Corliss engine.
One 20x32 Watertown automatic engine.
One 18x28 Watertown automatic engine.
One 12x20x14 Ball compound engine.
One 9½x16x14 Payne compound engine.
One Armington & Sims cross-compound condensing engine, 30x20x15.
One 15x14 Ideal automatic engine.
One 14½x13 Armington & Sims auto. engine.
One 12x21 Buckeye automatic engine.
One 12x12 Armington & Sims automatic engine.
One 12x12 Ideal automatic engine.
One 250 h. p. Baragwanath feed-water heater.
One Stilwell-Bierce live steam heater and purifier.
One 150 h. p. Berryman heater.
One 125 h. p. Baragwanath heater.
One 500 h. p. Hanover independent condenser.
Two 72x16 horizontal tubular boilers.
One 60x18 horizontal tubular boiler.
Two 60x16 horizontal tubular boilers.
Five 54x16 horizontal tubular boilers.
Two 54x14 horizontal tubular boilers.
Two 48x16 horizontal tubular boilers.
Two 48x14 horizontal tubular boilers.
Ten Hill friction-clutch pulleys, 52x22x6 inch bore, double arm, double crown, double belt.
3 Thompson recording wattmeters, 10 ampere.
2 Thompson recording wattmeters, 15 ampere.
2 Thompson recording wattmeters, 25 ampere.
1 12x24 engine made by Zeahm Bros.
1 20x22 Corliss engine.
1 9x12 center crank engine.
1 12x12 center crank engine.
1 7x10 slide valve center crank.
1 3x5 upright engine.
1 80 h. p. A. B. Farquahar Co. engine.
1 horizontal pattern Lansing engine, 12-in. stroke.
1 10x18 stationary engine.
1 12x20 Sinker & Davis engine.
1 diamond drill, Bullock Mfg. Co., capacity 1500 ft.
1 Crane passenger elevator.
1 14x24 box bed engine.
1 E. P. Allis coil heater for 80 h. p. engine.
1 25 h. p. Portable engine and boiler.
1 Atlas automatic engine, 9x14.
1 New York safety engine, 9x10.
1 30 h. p. stationary engine.
1 40 h. p. steel tubular boiler, 44x14.
1 9x14 Atlas automatic engine.

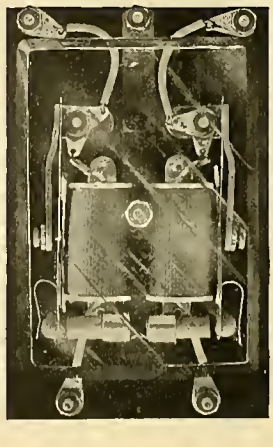
HIGH GRADE TELEPHONE APPARATUS

EXCLUSIVELY.

WRITE FOR 1900 CATALOGUE.

AUTOMATIC LIGHTNING ARRESTER.



Positive protection for telephones and switchboards against any abnormal current.

No fuse to burn out, line is never open, service never interrupted; it works automatically, is guaranteed not to burn out, requires no attention whatever after being installed.

It has less resistance than any other arrester, resistance being less than one ohm.

The working parts are mounted on porcelain base and are ornamental in appearance.

We put them up single for individual 'phones, and in cabinets for exchange use; the cabinets require but small floor space.

Protection without annoyance is what you want; try this device on some of your toll or worst lines and see for yourself what it will do.

Correspondence Solicited.

Butler-Taylor Co.,

Ravenna, Ohio.

ANNOUNCEMENT.

Factory Now Extended and Equipped to Handle Orders for

SMALL EXCHANGES.

For several years the Kellogg Switchboard and Supply Company, Chicago, has devoted its attention exclusively to the construction and engineering of large independent telephone exchanges. The building of the switchboards and telephones for such exchanges as St. Louis, Mo., 8,800 lines; Cleveland, O., 5,760 lines (increasing now to 9,600); Baltimore, Md., with branches, 5,760 lines; Pittsburg, Pa., with branches, 7,040 lines; Columbus, O., 4,160 lines and others, has fitted us in the best possible manner for the filling of small orders which, until we enlarged our facilities, we were unable to handle on account of our large contracts.

The Kellogg Common Battery System is the Best There Is! WE EXPLAIN IT FULLY TO PROSPECTIVE CUSTOMERS.

Our Factory Occupies ALL of These Buildings.

KELLOGG BRIDGING AND SERIES TELEPHONES STAND UNRIVALED.

We, therefore, announce that contrary to what has been the impression up to the present time, we are now in every way prepared for and solicit business from the smaller independent telephone companies of the United States.

By this announcement we wish to emphasize the fact that the smallest orders will receive just as careful and conscientious attention as the largest contract.

We will take orders for one telephone or ten thousand.

KELLOGG SWITCHBOARD AND SUPPLY COMPANY,

Magnet Wire

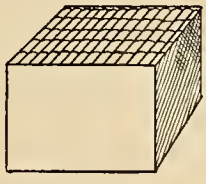
Our Specialty: The Best Stock of fine sizes of Single Silk Insulated Magnet Wire in the country. Also Double Silks.... Single and Double Cottons.

The McDermid Mfg. Co.,

207 S. CANAL STREET,

CHICAGO, ILL.

These 28 spools containing 91 lbs. of No.36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.



The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

WESTERN OFFICE: 505 Fisher Building, CHICAGO.

OKONITE IT NEVER DISAPPOINTS

A Complete Line of Electrical Supplies.

WE carry in Chicago stock a selected line of electrical supplies, each article superior in some essential point over other makes of the same class of goods.

That our goods give satisfaction, is evinced by the fact that our list of regular customers is steadily growing larger.

We cater to all classes of trade. We carry arc and incandescent lamp supplies, central station material, telephone and speaking tube essentials, house goods, construction material and tools, and electrical equipment for street railways and mines.

If you want special information on any article or class of equipment, write us and we will send trade literature covering the point.

Central Electric Company,

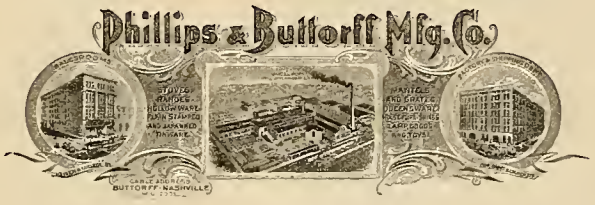
OUR SELF-STARTING SINGLE-PHASE A. C. MOTORS AND WHAT A CUSTOMER THINKS OF THEM.



Nashville, Tenn. June 1, 1900

Mr. Joel Shingleton,

Dear Sir—The Four Wagner Motors you installed in our Shop last Summer, have proven satisfactory in every respect, not requiring any attention whatever, and the current consumption has been remarkably low, exceeding our most sanguine expectations.

Yours Truly

Phillips & Buttorff Mfg. Co.

P. H. Buttorff

"FEDERAL SALT"

FOR CARBON CYLINDER AND CARBON-MANGANESE BATTERIES.

GIVES MORE CURRENT, LONGER LIFE, ABSOLUTELY NO CRYSTALS.

5c.

Package in case lots of 150 packages F. O. B. Bound Brook, N. J.

Both salts have a depolarizer in the mixture. Federal Salt No. 1 has more depolarizer than Federalite, and so will last longer. That's the only difference.

It's the DEPOLARIZER that INCREASES the STRENGTH, GIVES LONGER LIFE, and DOES AWAY ABSOLUTELY with CRYSTALIZATION and CREEPING SALTS.

MADE BY

FEDERAL BATTERY Co.,

11 PINE STREET, N. Y.

Please send references when ordering.

3c.

Package in case lots of 150 packages F. O. B. Bound Brook, N. J.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

BUCKNER-SAUNDERS LUMBER CO.,
MONADNOCK BLDG., CHICAGO,

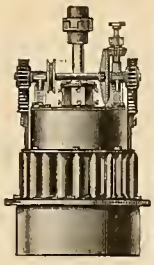
"O. K." Weatherproof Wire.
Slow-Burning Weatherproof and Slow-Burning Wire.

Prices and Samples on Application.

Phillips Insulated Wire Co.,

Office and Factory: PAWTUCKET, R. I.



M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. "ELECTROLYSIS CONQUERED."
Electrolysis Proof CONDUITS.
ASPHALT PAPER CONDUIT
An absolute non-conductor. Perfect insulation guaranteed.
Allows no moisture to accumulate. No scratching of cables. No weak joints. No breakage. No deterioration. Freight charges extremely light. Costs less to lay than other conduits Made in 7-foot lengths; 3-inch internal diameter; weight 21 lbs to foot. Manufacturers of Electrolysis Proof Insulating materials, Conduits, Laterals, Distributing Box and Post Linings, Moist Proof Manhole Linings, Pipe Covering, Etc.

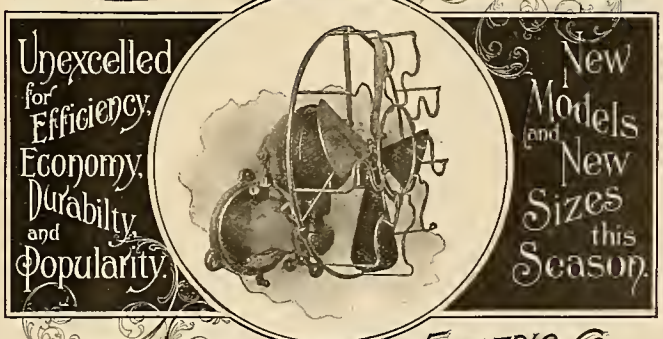
LUNDELL FANS
THOUSANDS IN USE.



CHICAGO. BOSTON. SPRAGUE ELECTRIC CO. NEW YORK.

BECAUSE YOU
Are "well up" in ELECTRICITY, are YOU as well posted in the matter of ECONOMY in your STEAM PLANT?

THE IMPROVED ROBERTSON THOMPSON INDICATOR will show you if engine is working economically and developing full power for amount of fuel consumed. The most modern. Fully guaranteed. One-third lower in price than others.
EUREKA PACKING makes a tighter joint with less friction, lasts two to three times longer, and costs no more than poor packing. EUREKA has the largest sale of any packing made.
HINE ELIMINATOR, the most successful device for separating water from live steam, and extracting oil from exhaust steam. Thousands in use. Sent out on approval. Prices very low.
ROBERTSON FEED WATER HEATER because of its return system will heat the water to 206 to 210° with exhaust steam, and shows more economy in fuel than any other. Moderate in price.

AUCTION SALE.——BANKRUPT SALE.

Entire Property of The Suburban Electric Co., Covington, Ky., Offered For Sale.

Notice is hereby given that pursuant to an order in bankruptcy, in the matter of the Suburban Electric Company, a corporation organized under the laws of the state of Kentucky, bankrupt, No. 276, in the District Court of the United States for the District of Kentucky, I will, on the 25th day of September, 1900, at 10 o'clock a. m., at the Scott street entrance of the United States Court in Covington, Ky., sell at public auction to the highest bidder, all the property, real and personal, of every kind and description belonging to the Suburban Electric Company, bankrupt, including all the rights, privileges and franchises, except the franchise to be a corporation, and also its electric lighting plant, power station, machinery, engines, boilers, dynamos, electric machines, electric lamps and other appliances and appurtenances, poles, lines, wires and all contracts, claims and demands, and all other property of every kind and description, also the following described real estate belonging to the said bankrupt, situated in the city of Covington, Kenton County, Kentucky, and bounded as follows:

1. Beginning at a point on the east line of Madison avenue at the northeast corner of Madison avenue and an alley running parallel to and between Fourth and Fifth streets; thence northwardly along the east line of said Madison avenue towards Fourth street ninety (90) feet; thence at right angles to Madison avenue one hundred and ninety (190) feet to another alley; thence with said other alley and at right angles to said first-named alley ninety (90) feet to said first-named alley; thence westwardly along the same one hundred and ninety (190) feet to the place of beginning.

And also the following described piece of real estate belonging to said bankrupt, situated in the city of Newport, Campbell County, Kentucky, to wit:

2. Lot No. 260 in the Cotes Brilliant Lot & Home Company's subdivision, fronting thirty (30) feet on the west side of Park avenue, and extending back one hundred and twenty (120) feet to an alley.

The first tract of real estate above described will be sold subject to such lien as Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, or either of them, may have upon said real estate, which lien is as yet undetermined in amount.

The property above described will be sold free from any and all liens or encumbrances, except the lien or encumbrance in favor of Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, upon the said first described real estate aforesaid.

The second piece of real estate described aforesaid will be sold separately.

All the balance of the real estate, and all the other property and assets of every kind, and the rights, privileges and franchises of the Suburban Electric Company will be sold as an entirety and as a going concern.

The terms of the sale will be one-third (⅓) cash, to be paid upon the confirmation of the sale, the balance in equal installments of six and twelve months from date of sale, deferred payments to draw six (6%) per cent interest and to be secured by lien upon the property sold and also by bond with sureties satisfactory to the referee in bankruptcy herein; or purchaser may pay cash for said property upon the confirmation of the sale. No bid for said property will be received from any bidder who shall not place in the hands of the undersigned at the time of making said bid, as a pledge that said bidder will make good his bid if the sale is confirmed, the sum of fifteen thousand ($15,000) dollars, which sum of fifteen thousand dollars will be credited upon the first payment of the purchase money for said sale.

Inspection of property invited. Full information given upon application at the office of the bankrupt in Covington, Ky.

1 80-light Wood, self-oiler.
1 110-light Edison, 6 K. W., compound.
1 90-light Westinghouse.
1 160-light Rockford.
1 210-light Triumph, self-oiler.
1 250-light Westinghouse, horizontal type.
1 250-light Commercial, comp., self-oiler.
1 250-light Siemens & Halske, 15 K. W., multipolar.
1 260-light National, compound, self-oiler.
1 270-light T.-H., comp., self-oiler.
3 270-light Westinghouse, M. P., slow speed.
1 340-light Eddy, self-oiler, compound.
2 350-light Hawkeye, comp. wound.
1 350-light National, self-oiler, compound.
1 360-light Rockford, self-oiler, compound.
1 350-light Edison, 20 K. W., shunt.
3 350-light Edison, 20 K. W., self-oilers.
1 350-light Edison, 20 K. W., self-oiler, compound.
1 400-light Wood, M. P., self-oiler, 25 K. W.
1 450-light Edison, 25 K. W., self-oiler.
1 450-light Rockford, self-oiler.
1 540-light Edison, 30 K. W.
4 540-light Edison, 30 K. W., self-oilers.
4 540-light Edison, 30 K. W., self-oilers, compound.
1 600-light Elckmeyer.
1 700-light Siemens & Halske, 40 K. W., multipolar, slow speed.
2 700-light Westinghouse, 10 pole, slow speed, 40 K. W., self-oilers.
1 800-light Rockford, self-oiler, new arm't.
4 800-light Edison, 45 K. W., self-oilers.
1 1350-light Waddell-Entz, 80 K. W., M. P., direct connected to 125 H. P., self-oiling, 14x14 engine.

220-Volt Generators.

1 9 K. W. Lundell, self-oiler.
1 10 K. W. Lundell, self-oiler, multipolar, slow speed.
1 12 K. W. Eddy, self-oiler, new arm't.
1 12 K. W. Westinghouse, multipolar, self oiler.
1 25 K. W. Edison, self-oiler.
1 35 K. W. E. & C., multipolar, slow speed.
1 45 K. W. Edison, self-oiler, new arm't, compound.
1 50 K. W. Westinghouse, self-oiler, horizontal type, compound.
1 200 K. W. Crocker-Wheeler, multipolar, slow speed, practically new.

500-Volt Generators.

2 15 K. W. Edison, self-oilers.
1 25 K. W. T.-H., self-oiler, D. 25, compound.
1 25 K. W. Edison, self-oiler.
1 30 K. W. Jenney, self-oiler.
1 35 K. W. Jenney, self-oiler, compound.
1 35 K. W. Mather, self-oiler.
1 45 K. W. Edison, compound, self-oiler.
1 150 K. W. Detroit (Rae), multipolar, compound, self-oiler.
1 100 H. P. 500-volt Westinghouse, Kodak set generator and comp. engine.

Alternating Generators.

1 350-light Thomson-Houston, A. 18, comp.
1 600-light Bain, 30 K. W., self-oiler, toothed armature.
2 600-light Thomson-Houston, A. 6, 30 K. W.
1 600-light Thomson-Houston, 30 K. W., two-phase.
1 600-light T.-H., 30 K. W., slotted armature, compound, self-oiler.
1 650-light Thomson-Houston, A. 35, s. o., composite wound.
2 750-light Westinghouse, self-oilers, 37½ K. W.
1 1000-light Wood, 50 K. W., self-oiler, toothed armature, comp.
1 1200-light Westinghouse, 60 K. W., self-oiler, compound, toothed arm't.
1 1200-light General Electric, A. 60, composite wound, toothed armature, self-oiler.
2 1300-light T.-H., A. 70, 1100 volts, self-oilers, compound wound.
2 1400-light Westinghouse, 70 K. W., brand new.
2 6000-light Westinghouse, 300 K. W., toothed armature, composite wound, self-oilers, outboard bearings.

Arc Dynamos.

1 20-light 2000 C. P. Western Electric.
1 25-light 2000 C. P. T.-H., ball armature.
1 25-light 2000 C. P. T.-H., ring armature.
1 30-light 2000 C. P. Western Electric,

Arc Dynamos.—Continued.

1 30-light 2000 C. P. Brush, No. 7, Steubenrausch commutator.
2 35-light 2000 C. P. T.-H., L. D. 2.
1 35-light 2000 C. P. T.-H., ring armature.
1 40-light 2000 C. P. Wood, No. 7.
2 40-light 2000 C. P. Western Electric, s. 9.
4 45-light 1200 C. P. T.-H., M. 12, ball armt.
1 45-light 1200 C. P. T.-H., M. 12, ring armt.
2 45-light 1200 C. P. Brush, No. 7, Steubenrausch commutator.
1 50-light 2000 C. P. Excelsior, latest type, newly rewound field and armature.
2 50-light 1200 C. P. T.-H., L. D. 12.
1 50-light 1200 C. P. T.-H., L. D., 12, new ring arm't, self-oiler.
1 50-light 2000 C. P. T.-H., M. D., 2, self-oiler, ring armature.
1 50-light 2000 C. P. West. Elec., self-oiler.
1 50-light 2000 C. P. Brush, No. 7½.
2 60-light 2000 C. P. West. Elec., self-oilers.
1 60-light 2000 C. P. Westinghouse, self-oiler.
3 60-light 2000 C. P. Wood, No. 8.
3 65-light 2000 C. P. Brush, No. 8, new armature, Steubenrausch commutaters.
1 75-light 1200 C. P. Standard, self-oiler, air insulated commutator.
2 75-light 2000 C. P. Westingh'se, self-oilers.
3 125-light 1200 C. P. Excelsior, latest type, self-oilers, fine.

110-Volt Motors.

1 ¼ H. P. Sprague.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

WM. R. HORNER,
Philadelphia, Pa.

$12 to $70, in Small Monthly Installments, pays for a Salary-Raising Education

In Electrical Engineering, Electric Light and Power, Telephony, Telegraphy, Steam, Mechanical, and Civil Engineering.

ESTABLISHED 1891. CAPITAL, $1,500,000.

Machinery and Supplies at Bargain Prices.

We have the largest establishment of its kind on earth. Our plant and yards cover over a million feet of space. We are constantly buying factories and buildings. OUR MACHINERY HALL, a space 105x360 feet, is filled to overflowing with a complete assortment of machinery and electrical apparatus. WE PURCHASED THE OMAHA EXPOSITION, THE WORLD'S FAIR, THE CHICAGO POSTOFFICE BUILDINGS, ETC. Our facilities for rebuilding machinery are unsurpassed. We furnish a binding guarantee with all goods purchased. Our stock is constantly being added to. The following items are quoted, subject to prior sale:

One No. 8 Multipolar Machine, 75 K. W., 500-volt, speed 750, 150 to 160 h. p., Thomson-Houston.
One Allis Corliss engine, 26x48 in., 400 h. p.
One Replogle Electric Water-Wheel Governor.
One No. 1 Russell high-speed auto. engine, 7x16.
One 60 arc light Wood dynamo, 2,000 c. p.
One 620-light General Electric dynamo with 52-volt exciter.
38 assorted Transformers.
One Station Transformer and Ground Tester with three miles of Nos. 4 and 6 Weatherproof Wire.
One Westinghouse Alternator and Fan Motor, 16,000 alt., 100 volts.
One 14x24 Box Bed engine, shaft 8 ft. long, 6½ in. diam.
One M. P. 80 T.-H., 500-volt Railway Generator.
One D. 62 T.-H. 500-volt Railway Generator.
Two 25 S. S., v. 500, speed 900, Nos. 1041 and 1039 T.-H. Railway Generator.
One 15x14 Ideal engine.
One 14x14 Ideal engine.
One 12x18 Lansing engine.
One 25-light, 2,000 c. p. Westinghouse low-tension arc dynamo.
Two 50-light Standard arc dynamos.
One 20-light Sperry arc dynamo.
One 500-light, 100-volt Edison dynamo.
One 1,000-light 1,000-volt Wood Ft. Wayne alternating dynamo, complete with switchboard and exciter.
One 1,000-light, 1,000-volt Westinghouse dynamo, complete with switchboard and exciter.
One 1,200-light Slattery alternating dynamo.
One portable Weston ammeter, reading from 0 to 150.
Two Thompson alternating ammeters, reading from 0 to 100.
Fifty 10, 20, 40 and 80 ampere Westinghouse house meters.
200 series arc lamps, different makes.
Rubber-covered, weatherproof and bare copper wire.
5,000 assorted sizes clear and opal arc globes.
One 18x42 Frick Corliss engine.
One 20x32 Watertown automatic engine.
One 18x28 Watertown automatic engine.
One 12x20x14 Ball compound engine.
One 9½x16x14 Payne compound engine.
One Armington & Sims cross-compound condensing engine, 30x20x15.
One 15x14 Ideal automatic engine.
One 14½x13 Armington & Sims auto. engine.
One 12x21 Buckeye automatic engine.
One 12x12 Armington & Sims automatic engine.
One 12x12 Ideal automatic engine.
One 250 h. p. Baragwanath feed-water heater.
One Stilwell-Bierce live steam heater and purifier.
One 150 h. p. Berryman heater.
One 125 h. p. Baragwanath heater.
One 500 h. p. Hanover independent condenser.
Two 72x16 horizontal tubular boilers.
One 60x18 horizontal tubular boiler.
Two 60x16 horizontal tubular boilers.
Five 54x16 horizontal tubular boilers.
Two 54x14 horizontal tubular boilers.
Two 48x16 horizontal tubular boilers.
Two 48x14 horizontal tubular boilers.
Ten Hill friction-clutch pulleys, 52x22x6 inch bore, double arm, double crown, double belt.
3 Thompson recording wattmeters, 10 ampere.
2 Thompson recording wattmeters, 15 ampere.
2 Thompson recording wattmeters, 25 ampere.
1 12x24 engine made by Zeahm Bros.
1 20x22 Corliss engine.
1 9x12 center crank engine.
1 12x12 center crank engine.
1 7x10 slide valve center crank.
1 3x5 upright engine.
1 80 h. p. A. B. Farquahar Co. engine.
1 horizontal pattern Lansing engine, 12-in. stroke.
1 10x18 stationary engine.
1 12x20 Sinker & Davis engine.
1 diamond drill, Bullock Mfg. Co., capacity 1500 ft.
1 Crane passenger elevator.
1 14x24 box bed engine.
1 E. P. Allis coil heater for 80 h. p. engine.
1 25 h. p. Portable engine and boiler.
1 Atlas automatic engine, 9x14.
1 New York safety engine, 9x10.
1 30 h. p. stationary engine.
1 40 h. p. steel tubular boiler, 44x14.
1 9x14 Atlas automatic engine.

No. 1900

AMERICAN ELECTRIC TELEPHONE CO.

36 to 50 Jackson Blvd., CHICAGO, ILL.

Our new No. 1900 Telephones with Disc Carbon Lightning Arrester for SERIES and BRIDGING work are winners. Try them.

OUR CENTRALIZED BATTERY SYSTEM is a great success; likewise our MULTIPLE SWITCHBOARDS.

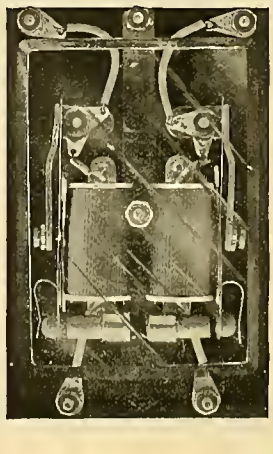
Telephone Apparatus Of All Kinds Manufactured.

CONSTRUCTION MATERIAL AND TOOLS LOWEST PRICES.

A BIG LOT OF SECOND-HAND PHONES, IN GOOD ORDER, CAN BE HAD FOR A SONG.

Let us tell you about them.

AUTOMATIC LIGHTNING ARRESTER.



Positive protection for telephones and switchboards against any abnormal current.

No fuse to burn out, line is never open, service never interrupted; it works automatically, is guaranteed not to burn out, requires no attention whatever after being installed.

It has less resistance than any other arrester, resistance being less than one ohm.

The working parts are mounted on porcelain base and are ornamental in appearance.

We put them up single for individual 'phones, and in cabinets for exchange use; the cabinets require but small floor space.

Protection without annoyance is what you want; try this device on some of your toll or worst lines and see for yourself what it will do.

Correspondence Solicited.

Butler-Taylor Co.,

Ravenna, Ohio.

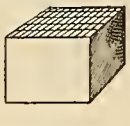
Common Battery and Magneto System for Small Exchanges.
Bridging Telephones—Series Telephones.

KELLOGG SWITCHBOARD & SUPPLY CO.,

229 S. GREEN STREET, CHICAGO.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 spools containing 91 lbs. of No.36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

PRACTICAL Guide for Firemen,

By W. H. WAKEMAN.

Price 75 Cents.

80 pages, 14 illustrations, bound in cloth.

An elementary treatise relating to the care and management of Steam Boilers, Pumps, Injectors, etc., and Steam Plants generally. Containing complete instructions, and many valuable suggestions for the safe, practical, and economical management of the Steam Plant.

Especially intended for those who seek promotion, and aspire to be something more than a "Coal hustler," and for the benefit of Firemen and Engineers who do not "know it all" and who are willing to profit by the suggestions, etc., of "one who has been there."

In writing this book it has been the aim of the author to give the duties of the fireman, or the one in charge of a steam plant, in as simple and concise a manner as the subject and the English language will admit of; and to furnish all the information required to enable them to take charge of and operate a steam plant successfully and economically.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Meter; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Bretheren, I say unto You

WHY

Throw away 85% of your coal when you can sell it for three times its cost by putting in our system of UNDERGROUND EXHAUST STEAM HEATING MAINS.

It is common for electric companies who are now operating EXHAUST STEAM HEATING PLANTS to pay their entire coal and labor bills for the year and 6% on investment for steam mains from sale of exhaust steam. Why cant you do the same? Write for our pamphlet. Mention Western Electrician.

EDISON DECORATIVE AND MINIATURE LAMP DEPARTMENT,
Harrison, N. J.

WHY IS IT
THAT
THE "BELDEN" SYSTEM
OF ARC LIGHTING
Is so far superior to any other system on the market?

BECAUSE
It embodies features that are not to be found in any other lamp.

We have convinced hundreds who have had arc lamp troubles. We can convince you.
Our catalog explains the fine points of the "Belden" and it will be sent on request.

THE "CLARK" WIRE.

FOR SWITCHBOARD RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

1 80-light Wood, self-oiler.
1 110-light Edison, 6 K. W., compound.
1 90-light Westinghouse.
1 160-light Rockford.
1 210-light Triumph, self-oiler.
1 250-light Westinghouse, horizontal type.
1 250-light Commercial, comp., self-oiler.
1 250-light Siemens & Halske, 15 K. W., multipolar.
1 260-light National, compound, self-oiler.
1 270-light T.-H., comp., self-oiler.
3 270-light Westinghouse, M. P., slow speed.
1 340-light Eddy, self-oiler, compound.
2 350-light Hawkeye, comp. wound.
1 350-light National, self-oiler, compound.
1 350-light Rockford, self-oiler, compound.
1 250-light Edison, 20 K. W., shunt.
3 250-light Edison, 20 K. W., self-oilers.
1 350-light Edison, 20 K. W., self-oiler, compound.
1 400-light Wood, M. P., self-oiler, 25 K. W.
1 450-light Edison, 25 K. W., self-oiler.
1 450-light Rockford, self-oiler.
1 540-light Edison, 30 K. W.
4 540-light Edison, 30 K. W., self-oilers.
4 540-light Edison, 30 K. W., self-oilers, compound.
1 660-light Eickmeyer.
1 700-light Siemens & Halske, 40 K. W., multipolar, slow speed.
2 700-light Westinghouse, 10 pole, slow speed, 40 K. W., self-oilers.
1 800-light Rockford, self-oiler, new arm't.
4 860-light Edison, 45 K. W., self-oilers.
1 1350-light Waddell-Entz, 80 K. W., M. P., direct connected to 125 H. P., self-oiling, 14x14 engine.

220-Volt Generators.

1 9 K. W. Lundell, self-oiler.
1 10 K. W. Lundell, self-oiler, multipolar, slow speed.
1 12 K. W. Eddy, self-oiler, new arm't.
1 12 K. W. Westinghouse, multipolar, self oiler.
1 25 K. W. Edison, self-oiler.
1 35 K. W. E. & C., multipolar, slow speed.
1 45 K. W. Edison, self-oiler, new arm't, compound.
1 50 K. W. Westinghouse, self-oiler, horizontal type, compound.
1 200 K. W. Crocker-Wheeler, multipolar, slow speed, practically new.

500-Volt Generators.

2 15 K. W. Edison, self-oilers.
1 25 K. W. T.-H., self-oiler, D. 25, compound.
1 25 K. W. Edison, self-oiler.
1 30 K. W. Jenney, self-oiler.
1 35 K. W. Jenney, self-oiler, compound.
1 35 K. W. Mather, self-oiler.
1 45 K. W. Edison, compound, self-oiler.
1 150 K. W. Detroit (Rae), multipolar, compound, self-oiler.
1 100 H. P. 500-volt Westinghouse, Kodak set generator and comp. engine.

Alternating Generators.

1 350-light Thomson-Houston, A. 18, comp.
1 600-light Bain, 30 K. W., self-oiler, toothed armature.
2 600-light Thomson-Houston, A. 6, 30 K. W.
1 600-light Thomson-Houston, 30 K. W., two-phase.
1 600-light T.-H., 30 K. W., slotted armature, compound, self-oiler.
1 650-light Thomson-Houston, A. 35, s. o., composite wound.
2 750-light Westinghouse, self-oilers, 37½ K. W.
1 1000-light Wood, 50 K. W., self-oiler, toothed armature, comp.
1 1200-light Westinghouse, 60 K. W., self-oiler, compound, toothed arm't.
1 1200-light General Electric, A. 60, composite wound, toothed armature, self-oiler.
2 1300-light T.-H., A. 70, 1100 volts, self-oilers, compound wound.
2 1400-light Westinghouse, 70 K. W., brand new.
2 6000-light Westinghouse, 300 K. W., toothed armature, composite wound, self-oilers, outboard bearings.

Arc Dynamos.

1 20-light 2000 C. P. Western Electric.

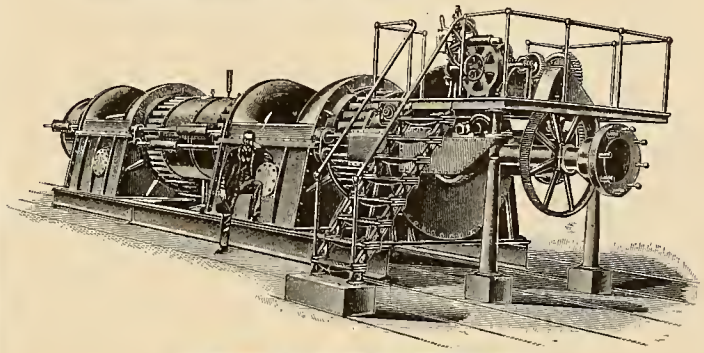
Victor Turbines Operating Dynamos.

That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.



FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

We also have a full line of modern patterns for Gears and Power Transmission Machinery.

Machinery and Supplies at Bargain Prices.

We have the largest establishment of its kind on earth. Our plant and yards cover over a million feet of space. We are constantly buying factories and buildings. OUR MACHINERY HALL, a space 105x360 feet, is filled to overflowing with a complete assortment of machinery and electrical apparatus. WE PURCHASED THE OMAHA EXPOSITION, THE WORLD'S FAIR, THE CHICAGO POSTOFFICE BUILDINGS, ETC. Our facilities for rebuilding machinery are unsurpassed. We furnish a binding guarantee with all goods purchased. Our stock is constantly being added to. The following items are quoted, subject to prior sale:

One No. 8 Mu'tipolar Machine, 75 K.W., 500-volt, speed 750, 150 to 160 h. p., Thomson-Houston.
One Allis Corliss engine, 26x48 in., 400 h. p.
One Replogle Electric Water-Wheel Governor.
One No. 1 Russell high-speed auto. engine, 7x16.
One 60 arc light Wood dynamo, 2,000 c. p.
One 620-light General Electric dynamo with 52-volt exciter.
38 assorted Transformers.
One Station Transformer and Ground Tester with three miles of Nos. 4 and 6 Weatherproof Wire.
One Westinghouse Alternator and Fan Motor, 16,000 alt., 100 volts.
One 14x24 Box Bed engine, shaft 8 ft. long, 6½ in. diam.
One M. P. 80 T.-H., 500-volt Railway Generator.
One D. 62 T.-H. 500-volt Railway Generator.
Two 25 S. S., v. 500, speed 900, Nos. 1041 and 1039 T.-H. Railway Generator.
One 15x14 Ideal engine.
One 14x14 Ideal engine.
One 12x18 Lansing engine.
One 25-light, 2,000 c. p. Westinghouse low-tension arc dynamo.
Two 50-light Standard arc dynamos.
One 20-light Sperry arc dynamo.
One 500-light, 100-volt Edison dynamo.
One 1,000-light 1,000-volt Wood Ft. Wayne alternating dynamo, complete with switchboard and exciter.
One 1,000-light, 1,000-volt Westinghouse dynamo, complete with switchboard and exciter.
One 1,200-light Slattery alternating dynamo.
One portable Weston ammeter, reading from 0 to 150.
Two Thompson alternating ammeters, reading from 0 to 100.
Fifty 10, 20, 40 and 80 ampere Westinghouse house meters.
200 series arc lamps, different makes.
Rubber-covered, weatherproof and bare copper wire.
5,000 assorted sizes clear and opal arc globes.
One 18x42 Frick Corliss engine.
One 20x32 Watertown automatic engine.
One 18x28 Watertown automatic engine.
One 12x20x14 Ball compound engine.
One 9½x16x14 Payne compound engine.
One Armington & Sims cross-compound condensing engine, 30x20x15.
One 15x14 Ideal automatic engine.
One 14½x13 Armington & Sims auto. engine.
One 12x21 Buckeye automatic engiue.
One 12x12 Armington & Sims automatic engine.
One 12x12 Ideal automatic engine.
One 250 h. p. Baragwanath feed-water heater.
One Stilwell-Bierce live steam heater and purifier.
One 150 h. p. Berryman heater.
One 125 h. p. Baragwanath heater.
One 500 h. p. Hanover independent condenser.
Two 72x16 horizontal tubular boilers.
One 60x18 horizontal tubular boiler.
Two 60x16 horizontal tubular boilers.
Five 54x16 horizontal tubular boilers.
Two 54x14 horizontal tubular boilers.
Two 48x16 horizontal tubular boilers.
Two 48x14 horizontal tubular boilers.
Ten Hill friction-clutch pulleys, 52x22x6 inch bore, double arm, double crown, double belt.
3 Thompson recording wattmeters, 10 ampere.
2 Thompson recording wattmeters, 15 ampere.
2 Thompson recording wattmeters, 25 ampere.
1 12x24 engine made by Zeahm Bros.
1 20x22 Corliss engine.
1 9x12 center crank engine.
1 12x12 center crank engine.
1 7x10 slide valve center crank.
1 3x5 upright engine.
1 80 h. p. A. B. Farquahar Co. engine.
1 horizontal pattern Lansing engine, 12-in. stroke.
1 10x18 stationary engine.
1 12x20 Sinker & Davis engine.
1 diamond drill, Bullock Mfg. Co., capacity 1500 ft.
1 Crane passenger elevator.
1 14x24 box bed engine.
1 E. P. Allis coil heater for 80 h. p. engine.
1 25 h. p. Portable engine and boiler.
1 Atlas automatic engine, 9x14.
1 New York safety engine, 9x10.
1 30 h. p. stationary engine.
1 40 h. p. steel tubular boiler, 44x14.
1 9x14 Atlas automatic engine.

No. 1900

AMERICAN ELECTRIC TELEPHONE CO.

36 to 50 Jackson Blvd., CHICAGO, ILL.

Our new No. 1900 Telephones with Disc Carbon Lightning Arrester for SERIES and BRIDGING work are winners. Try them.

OUR CENTRALIZED BATTERY SYSTEM is a great success; likewise our MULTIPLE SWITCHBOARDS.

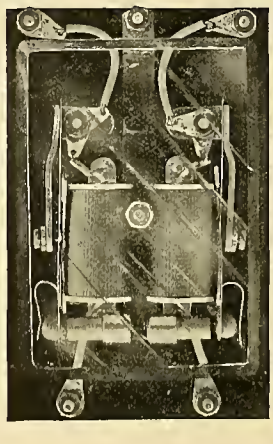
Telephone Apparatus Of All Kinds Manufactured.

CONSTRUCTION MATERIAL AND TOOLS LOWEST PRICES.

A BIG LOT OF SECOND-HAND PHONES, IN GOOD ORDER, CAN BE HAD FOR A SONG.

Let us tell you about them.

AUTOMATIC LIGHTNING ARRESTER.



Positive protection for telephones and switchboards against any abnormal current.

No fuse to burn out, line is never open, service never interrupted; it works automatically, is guaranteed not to burn out, requires no attention whatever after being installed.

It has less resistance than any other arrester, resistance being less than one ohm.

The working parts are mounted on porcelain base and are ornamental in appearance.

We put them up single for individual 'phones, and in cabinets for exchange use; the cabinets require but small floor space.

Protection without annoyance is what you want; try this device on some of your toll or worst lines and see for yourself what it will do.

Correspondence Solicited.

Butler-Taylor Co.,

Ravenna, Ohio.

ATTENTION INDEPENDENTS—NEW DEAL—NOT THE BELL THIS TIME.

The National Telephone Equipment Co.

OF DETROIT, MICH.,

Has purchased the patents and property of The Detroit Switchboard and Telephone Construction Co. of Detroit.

THE NATIONAL TELEPHONE EQUIPMENT CO. SOLICITS YOUR BUSINESS AND MAKES THE FOLLOWING STATEMENT TO THE TRADE:

We are pleased to announce to the Independent Telephone Companies that the National Telephone Equipment Co. of Detroit has purchased the entire property, patents, machinery, etc., of the Detroit Switchboard and Telephone Construction Co., which has in the past constructed and equipped the largest and most successful Independent telephone exchanges in the United States, with the most complete and improved system manufactured.

We are now in a position to contract for the construction and equipment of telephone plants, complete or in part. Our switchboards and instruments are in successful operation throughout the United States, and they are standing evidences of the perfect system we are prepared to manufacture and install. We have passed the experimental stage.

We are also in a position to make a specialty of quick repair work. Our plant is equipped with the most modern machinery and only experienced and competent workmen are employed. We can give you satisfaction in this line.

It will be our aim to merit the confidence and patronage of the Independent telephone trade by a fidelity to their interests and by furnishing superior apparatus at reasonable figures. We will also carry a complete line of supplies necessary for the maintenance of an up-to-date telephone plant.

We trust you will give us a share of your valuable patronage.

Very respectfully,
NATIONAL TELEPHONE EQUIPMENT CO.

P. S.—Don't forget we can show you NOW (not in the future) exchanges in successful operation equipped with our apparatus aggregating in capacity 20,000 'phones.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

WM. R. HORNER,
Philadelphia, Pa.

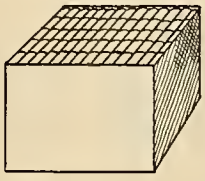
JEFFREY COAL-ASHES HANDLING MACHINERY.

SEND FOR CATALOGUE.
THE JEFFREY MFG. CO. Columbus, O.

These 28 spools containing 91 lbs. of No.36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.



The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

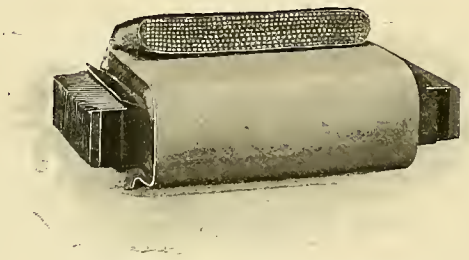
CHICAGO EDISON COMPANY, 139 ADAMS ST., CHICAGO.

FAN MOTORS

THE GENERAL ELECTRIC COMPANY'S

TYPE H

Oil Transformers



Coils of Type H Transformer.

Have compact form of winding which prevents vibration and presents large radiating surface to the oil. Therefore the insulation is permanent and the temperature rise small.

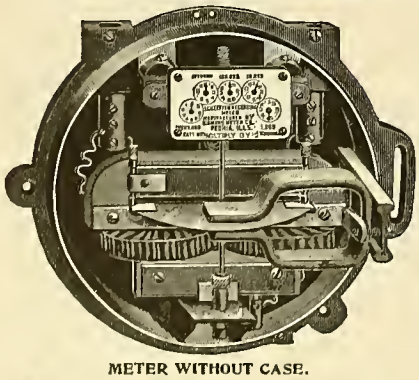
A careful test will reveal many other excellent qualities.

General Office: Schenectady, N. Y.

Sales Offices in All Large Cities.

Chicago Office, Monadnock Building.

SCHEEFFER RECORDING WATT-METERS.



METER WITHOUT CASE.

Accurate on All Loads.
Will Start and Register Correctly on 5 Watts.
Shunt loss LESS than one Watt on 60 Cycles.
Dust Proof.
Correct on All Inductive Loads.

DIAMOND METER CO.,

PEORIA, ILL., U. S. A.

METER WITH CASE.

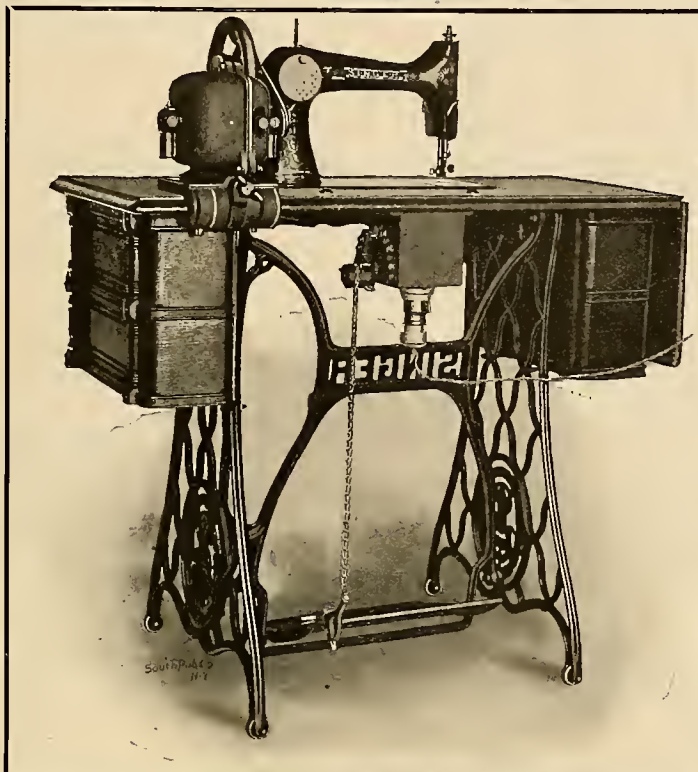
DIEHL SMALL MOTORS FOR SEWING MACHINES AND SPECIAL PURPOSES . . . DIEHL

Highly Efficient, Durable and Serviceable.

Iron Clad Armature.

Hard Drawn Copper Commutator Bars.

Self-Aligning and Self-Oiling Bronze Bearings.



Iron-Clad Motor Operating Sewing Machine. Different speeds obtained by pressing treadle downward. Current automatically cut off by removing pressure from treadle.

Applicable for any Purpose Where Small Machines Are Required.

Motor and Regulator Easily Installed On Any Make of Machine.

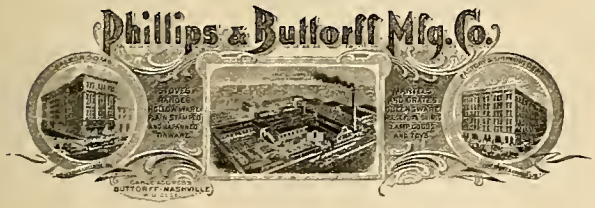
DIEHL MANUFACTURING CO.

OUR SELF-STARTING SINGLE-PHASE A. C. MOTORS AND WHAT A CUSTOMER THINKS OF THEM.



Nashville, Tenn. June 1, 1900

Mr. Joel Shrigley.
Dear Sir—The Four Wagner Motors you installed in our Cork Shop last Summer, have proven satisfactory in every respect, not requiring any attention whatever, and the current consumption has been remarkably low, exceeding our most sanguine expectations.

Yours Truly
Phillips & Buttorff Mfg. Co.

"FEDERAL SALT"

FOR CARBON CYLINDER AND CARBON-MANGANESE BATTERIES.

GIVES MORE CURRENT, LONGER LIFE, ABSOLUTELY NO CRYSTALS.

5c.

Package in case lots of 150 packages F. O. B. Bound Brook, N. J.

Both salts have a depolarizer in the mixture. Federal Salt No. 1 has more depolarizer than Federalite, and so will last longer. That's the only difference.

It's the DEPOLARIZER that INCREASES the STRENGTH, GIVES LONGER LIFE, and DOES AWAY ABSOLUTELY with CRYSTALIZATION and CREEPING SALTS.

MADE BY

FEDERAL BATTERY Co.,

11 PINE STREET, N. Y.

Please send references when ordering.

DO YOU USE SOLDER?

IF SO, HAVE YOU TRIED

CREAM FLUX,

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS?

Contains no acid or any element injurious to electrical connections.

So EASILY APPLIED that all CAN USE it.
So CHEAP that all SHOULD USE it.
So EFFICIENT that all MUST USE it.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS and all Users.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your *Cream Flux* severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,

AUCTION SALE.——BANKRUPT SALE.

Entire Property of The Suburban Electric Co., Covington, Ky., Offered For Sale.

Notice is hereby given that pursuant to an order in bankruptcy, in the matter of the Suburban Electric Company, a corporation organized under the laws of the state of Kentucky, bankrupt, No. 276, in the District Court of the United States for the District of Kentucky, I will, on the 25th day of September, 1900, at 10 o'clock a. m., at the Scott street entrance of the United States Court in Covington, Ky., sell at public auction to the highest bidder, all the property, real and personal, of every kind and description belonging to the Suburban Electric Company, bankrupt, including all the rights, privileges and franchises, except the franchise to be a corporation, and also its electric lighting plant, power station, machinery, engines, boilers, dynamos, electric machines, electric lamps and other appliances and appurtenances, poles, lines, wires and all contracts, claims and demands, and all other property of every kind and description, also the following described real estate belonging to the said bankrupt, situated in the city of Covington, Kenton County, Kentucky, and bounded as follows:

1. Beginning at a point on the east line of Madison avenue at the northeast corner of Madison avenue and an alley running parallel to and between Fourth and Fifth streets; thence northwardly along the east line of said Madison avenue towards Fourth street ninety (90) feet; thence at right angles to Madison avenue one hundred and ninety (190) feet to another alley; thence with said other alley and at right angles to said first-named alley ninety (90) feet to said first-named alley; thence westwardly along the same one hundred and ninety (190) feet to the place of beginning.

And also the following described piece of real estate belonging to said bankrupt, situated in the city of Newport, Campbell County, Kentucky, to wit:

2. Lot No. 260 in the Cotes Brilliaut Lot & Home Company's subdivision, fronting thirty (30) feet on the west side of Park avenue, and extending back one hundred and twenty (120) feet to an alley.

The first tract of real estate above described will be sold subject to such lien as Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, or either of them, may have upon said real estate, which lien is as yet undetermined in amount.

The property above described will be sold free from any and all liens or encumbrances, except the lien or encumbrance in favor of Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, upon the said first described real estate aforesaid.

The second piece of real estate described aforesaid will be sold separately.

All the balance of the real estate, and all the other property and assets of every kind, and the rights, privileges and franchises of the Suburban Electric Company will be sold as an entirety and as a going concern.

The terms of the sale will be one-third (⅓) cash, to be paid upon the confirmation of the sale, the balance in equal installments of six and twelve months from date of sale, deferred payments to draw six (6%) per cent interest and to be secured by lien upon the property sold and also by bond with sureties satisfactory to the referee in bankruptcy herein; or purchaser may pay cash for said property upon the confirmation of the sale. No bid for said property will be received from any bidder who shall not place in the hands of the undersigned at the time of making said bid, as a pledge that said bidder will make good his bid if the sale is confirmed, the sum of fifteen thousand ($15,000) dollars, which sum of fifteen thousand dollars will be credited upon the first payment of the purchase money for said sale.

Inspection of property invited. Full information given upon application at the office of the bankrupt in Covington, Ky.

CHARLES H. SHAW,

ELECTRICAL ENGINEERING TAUGHT BY MAIL

Thousands are successful and gaining better positions and salaries studying at home by our mail system. We teach Electrical Engineering, Mechanical Engineering, Mechanical Drawing, Electric Lighting, Telephony, Short Popular Electrical Course, etc., by mail. Study in spare time only. Institute endorsed by Thomas A. Edison and others. Catalogue free. Electrical Engineer Inst., Dept. K, 240-2 W. 23d St., New York.

BARGAINS in ELECTRICAL MACHINES.

The following list of thoroughly overhauled machines are in stock and ready for prompt delivery.

DYNAMOS—

110-Volt Incandescent.

One 12-light Elbridge.
One 50-light Nowotny, new.
One 100-light Daft.
One 250-light U. S.
One 350-light Davis.
One 800-light G. E.
One 1,800-light Ft. Wayne, new.

DYNAMOS—ARC.

One Brush, 1-light, 3,000 c. p.
One Brush, 3-light, 2,000 c. p.
One Amer. Wood, 20-light, 2,000 c. p.
One West. Elec., 30-light, 2,000 c. p.
One Ft. Wayne Wood, 35-light, 1,200 c. p.
One T. H. L. D., 35-light, 2,000 c. p.

ALTERNATORS.

One 3A Slattery.
One A60 G. E.

STEWART ELECTRICAL CO.,
S. E. Cor. Fifth and Sycamore,
CINCINNATI, O.

GENERATORS.

One Wood b. p., 500 v., 45 k. w.
One T.-H. m.p. 75,500 v., 75 k.w.
One Edison b.p., 500 v., 100 k.w.

110-VOLT MOTORS.

One Diehl, ½ h. p.
One Edison, ¾ h. p.
One Elbridge, ¾ h. p.
One Card, 1 h. p.
One Sprague, 1 h. p.
One Nowotny, 3 h. p.
One Daft, 10 h. p.
One U. S., 20 h. p.
One Q. C., 28 h. p.

Machinery and Supplies at Bargain Prices.

We have the largest establishment of its kind on earth. Our plant and yards cover over a million feet of space. We are constantly buying factories and buildings. OUR MACHINERY HALL, a space 105x360 feet, is filled to overflowing with a complete assortment of machinery and electrical apparatus. WE PURCHASED THE OMAHA EXPOSITION, THE WORLD'S FAIR, THE CHICAGO POSTOFFICE BUILDINGS, ETC. Our facilities for rebuilding machinery are unsurpassed. We furnish a binding guarantee with all goods purchased. Our stock is constantly being added to. The following items are quoted, subject to prior sale:

One No. 8 Multipolar Machine, 75 K.W., 500-volt, speed 750, 150 to 160 h. p., Thomson-Houston.
One Allis Corliss engine, 26x48 in., 400 h. p.
One Replogle Electric Water-Wheel Governor.
One No. 1 Russell high-speed auto. engine, 7x16.
One 60 arc light Wood dynamo, 2,000 c. p.
One 620-light General Electric dynamo with 52-volt exciter.
38 assorted Transformers.
One Station Transformer and Ground Tester with three miles of Nos. 4 and 6 Weatherproof Wire.
One Westinghouse Alternator and Fan Motor, 16,000 alt., 100 volts.
One 14x24 Box Bed engine, shaft 8 ft. long, 6½ in. diam.
One M. P. 80 T.-H., 500-volt Railway Generator.
One D. 62 T.-H. 500-volt Railway Generator.
Two 25 S. S., v. 500, speed 900, Nos. 1041 and 1039 T.-H. Railway Generator.
One 15x14 Ideal engine.
One 14x14 Ideal engine.
One 12x18 Lansing engine.
One 25-light, 2,000 c. p. Westinghouse low-tension arc dynamo.
Two 50-light Standard arc dynamos.
One 20-light Sperry arc dynamo.
One 500-light, 100-volt Edison dynamo.
One 1,000-light 1,000-volt Wood Ft. Wayne alternating dynamo, complete with switchboard and exciter.
One 1,000-light, 1,000-volt Westinghouse dynamo, complete with switchboard and exciter.
One 1,200-light Slattery alternating dynamo.
One portable Weston ammeter, reading from 0 to 150.
Two Thompson alternating ammeters, reading from 0 to 100.
Fifty 10, 20, 40 and 80 ampere Westinghouse house meters.
200 series arc lamps, different makes.
Rubber-covered, weatherproof and bare copper wire.
5,000 assorted sizes clear and opal arc globes.
One 18x42 Frick Corliss engine.
One 20x32 Watertown automatic engine.
One 18x28 Watertown automatic engine.
One 12x20x14 Ball compound engine.
One 9½x16x14 Payne compound engine.
One Armington & Sims cross-compound condensing engine, 30x20x15.
One 15x14 Ideal automatic engine.
One 14½x13 Armington & Sims auto. engine.
One 12x21 Buckeye automatic engine.
One 12x12 Armington & Sims automatic engine.
One 12x12 Ideal automatic engine.
One 250 h. p. Baragwanath feed-water heater.
One Stilwell-Bierce live steam heater and purifier.
One 150 h. p. Berryman heater.
One 125 h. p. Baragwanath heater.
One 500 h. p. Hanover independent condenser.
Two 72x16 horizontal tubular boilers.
One 60x18 horizontal tubular boiler.
Two 60x16 horizontal tubular boilers.
Five 54x16. horizontal tubular boilers.
Two 54x14 horizontal tubular boilers.
Two 48x16 horizontal tubular boilers.
Two 48x14 horizontal tubular boilers.
Ten Hill friction-clutch pulleys, 52x22x6 inch bore, double arm, double crown, double belt.
3 Thompson recording wattmeters, 10 ampere.
2 Thompson recording wattmeters, 15 ampere.
2 Thompson recording wattmeters, 25 ampere.
1 12x24 engine made by Zeahm Bros.
1 20x22 Corliss engine.
1 9x12 center crank engine.
1 12x12 center crank engine.
1 7x10 slide valve center crank.
1 3x5 upright engine.
1 80 h. p. A. B. Farquahar Co. engine.
1 horizontal pattern Lansing engine, 12-in. stroke.
1 10x18 stationary engine.
1 12x20 Sinker & Davis engine.
1 diamond drill, Bullock Mfg. Co., capacity 1500 ft.
1 Crane passenger elevator.
1 14x24 box bed engine.
1 E. P. Allis coil heater for 80 h. p. engine.
1 25 h. p. Portable engine and boiler.
1 Atlas automatic engine, 9x14.
1 New York safety engine, 9x10.
1 30 h. p. stationary engine.
1 40 h. p. steel tubular boiler, 44x14.
1 9x14 Atlas automatic engine.

Our new No. 1900 Telephones with Disc Carbon Lightning Arrester for **SERIES** and **BRIDGING** work are winners. Try them.

OUR CENTRALIZED BATTERY SYSTEM
is a great success; likewise our
MULTIPLE SWITCHBOARDS.

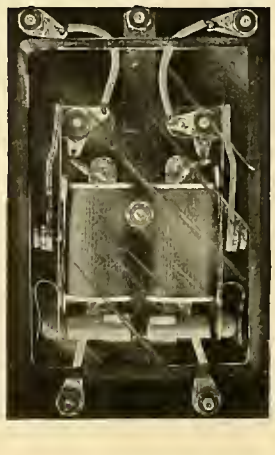
Telephone Apparatus Of All Kinds Manufactured.

CONSTRUCTION MATERIAL AND TOOLS LOWEST PRICES.

A BIG LOT OF SECOND-HAND PHONES, IN GOOD ORDER, CAN BE HAD FOR A SONG.

Let us tell you about them.

AUTOMATIC LIGHTNING ARRESTER.



Positive protection for telephones and switchboards against any abnormal current.

No fuse to burn out, line is never open, service never interrupted; it works automatically, is guaranteed not to burn out, requires no attention whatever after being installed.

It has less resistance than any other arrester, resistance being less than one ohm.

The working parts are mounted on porcelain base and are ornamental in appearance.

We put them up single for individual 'phones, and in cabinets for exchange use; the cabinets require but small floor space.

Protection without annoyance is what you want; try this device on some of your toll or worst lines and see for yourself what it will do.

Correspondence Solicited.

Butler-Taylor Co.,
Ravenna, Ohio.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

Central Telephone & Electric Co.,
909 MARKET STREET, ST. LOUIS, MO.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT

These 28 spools containing 91 lbs. of No. 36 single silk-covered wire will cost you $24 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

By F. B. BADT.

226 Pages, 140 Illustrations. Flexible Cloth Binding. Size of Type Page 5 1-2x3 inches. Price $1.00.

This is, as the name indicates, a NEW BOOK, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 9,000 copies of the old Dynamo Tenders' Hand-Book sold, and over 10,000 of the new.

M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.

Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. TORREY CEDAR CO.,
CLINTONVILLE, WIS.

Large Stock Constantly on Hand.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

BUCKNER-SAUNDERS LUMBER CO.,
MONADNOCK BLDG., CHICAGO,

Or the home office at Beaumont, Texas, is where you write for more information and a pretty and useful pamphlet.

PARAGON

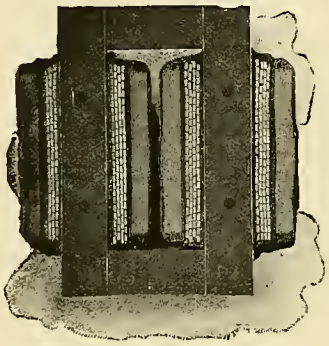
CHICAGO EDISON COMPANY, **FAN MOTORS**

139 ADAMS ST., CHICAGO.

THE GENERAL ELECTRIC COMPANY'S

TYPE H

Oil Transformer Coils



Section of Coils and Core.

Have no sharp corners and but one surface between the coils which is practically cylindrical, making possible the most effective insulation between the high and low potential windings.

General Office: Schenectady, N. Y.

Sales Offices in All Large Cities. Chicago Office, Monadnock Building.

There is No Higher-Class India-Rubber Insulation For Wires and Cables than

HABIRSHAW.

Authorized Manufacturers of the

ATTIX FLEXIBLE TUBE WIRE.

The India-Rubber and Gutta-Percha Insulating Co.,

MAIN OFFICE, Glenwood Works,

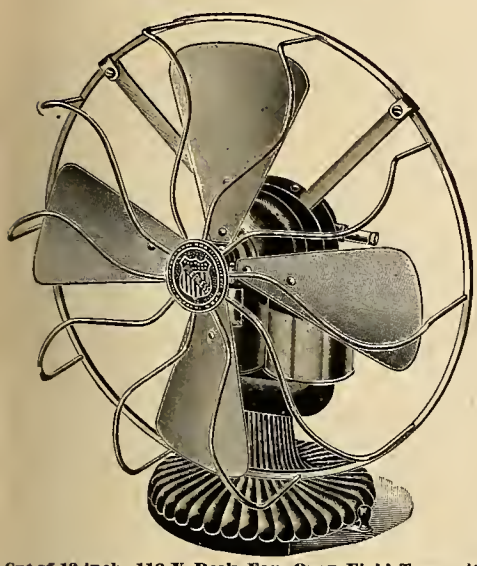
J. W. GODFREY, Manager Sales,
15 Cortlandt Street, NEW YORK.

YONKERS, N. Y.

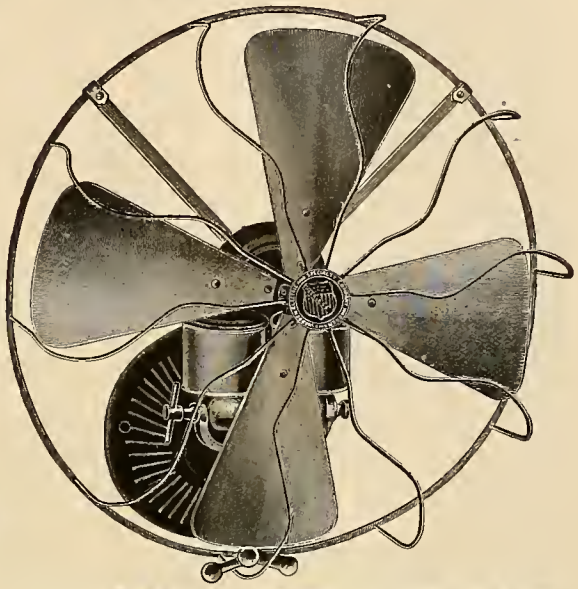
(10923)

PEERLESS

DIRECT-CURRENT DESK AND CEILING FANS.



Cut of 12-inch, 110-V. Desk Fan, Open Field Type with polished brass hoods and field coverings, the handsomest and most efficient Fan on the market.



Cut of 16-inch Wall Fan, same finish as 12-inch and having a swivel joint. By simply turning a handle this Fan can be adjusted to blow air up, down or on either side.

THE FOLLOWING SUPPLY HOUSES ARE AGENTS FOR PEERLESS FANS:

1. Stanley & Patterson, 32-34 Frankfort St., New York, N. Y.
2. Western Electrical Supply Co., 10-12 North 0th St., St. Louis, Mo.
3. Illinois Electric Co., 239 Madison St., Chicago, Ill.
4. Vallee Bros. & Co., 625 Arch St., Philadelphia, Pa.
5. Frank H. Stewart & Co., 35 North 7th St., Philadelphia, Pa.
6. Electric Supply & Mfg. Co., 62 Public Square, Cleveland, Ohio.
7. The Devere Electric Co., 430 Plum St., Cincinnati, O.
8. Doubleday-Hill Electric Co., 535 Wood St., Pittsburg, Pa.
9. Julius Andrae & Sons Co., 225 W. Water St., Milwaukee, Wis.
10. H. S. Sands El. & Mfg. Co., 1153 Market Street, Wheeling, W. Va.
11. Electric Supply & Const. Co., 80 E. Gay St., Columbus, O.
12. Robert L. McOnat, 125 S. Meridian St., Indianapolis, Ind.
13. W. G. Nagel & Co., 510 Adams St., Toledo, O.
14. Central Electric Co., 124 So. Jefferson St., Peoria, Ill.
15. Elect. Sup. & Eng. Co., 211 Jefferson Ave., Detroit, Mich.
16. Stuart-Howland Co., No. 283-285 Devonshire St., Boston, Mass.

THE WARREN ELECTRIC & SPECIALTY CO., - WARREN, OHIO, U. S. A.

Manufacturers PEERLESS Direct-Current Desk and Ceiling Fan Motors, Transformers, Incandescent Lamps.

Bretheren, I say unto You

WHY

Throw away 85% of your coal when you can sell it for three times its cost by putting in our system of UNDERGROUND EXHAUST STEAM HEATING MAINS.

It is common for electric companies who are now operating EXHAUST STEAM HEATING PLANTS to pay their entire coal and labor bills for the year and 6% on investment for steam mains from sale of exhaust steam. Why cant you do the same? Write for our pamphlet. Mention Western Electrician.

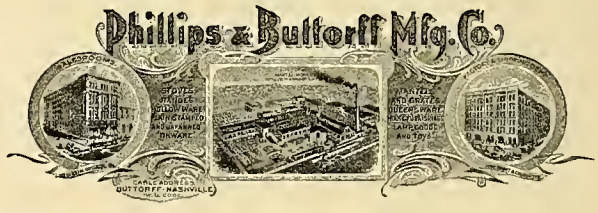
CHICAGO

OUR SELF-STARTING SINGLE-PHASE A. C. MOTORS AND WHAT A CUSTOMER THINKS OF THEM.



Nashville, Tenn. Jan 1, 1900

Mr. Jas Symington.
Dear Sir

The Four Wagner Motors you installed in our Dock shop last Summer, have proven satisfactory and very respect, not requiring any attention whatever, and the current consumption has been remarkably low, exceeding our most sanguine expectations.

Yours Truly
Phillips & Buttorff Mfg Co.
P. P. Buttorff

DO YOU USE SOLDER?

IF SO, HAVE YOU TRIED

CREAM FLUX,

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS?

Contains no acid or any element injurious to electrical connections.

So EASILY APPLIED that all CAN USE it.
So CHEAP that all SHOULD USE it.
So EFFICIENT that all MUST USE it.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS and all users.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. ***We guarantee it and if not satisfactory money will be refunded.***

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your *Cream Flux* severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
Per J. H. Goehst, Constr. Supt. CHICAGO EDISON CO."

NOTICE OF BIDS.

OFFICE OF THE CITY CLERK.

Kenton, Hardin County, Ohio.
August 2, 1900.

Notice is hereby given that the Council of the City of Kenton, County of Hardin and State of Ohio, will receive bids at the office of the City Clerk of said city, until 12 o'clock noon, on

Monday, September 3d, A. D. 1900,

for lighting the streets, alleys, squares, other public places and public buildings within the corporate limits of said city with not less than One Hundred and Ten (110) Electric Lights of Two Thousand (2,000) Candlepower properly placed and adjusted under supervision of the City Council. Said bids shall be for the term of five years. Said bids shall contain the name of the system of lighting proposed and shall state the amount per annum for which each light which is required will be erected and maintained during the hours of darkness, all night and every night.

Each bid must be accompanied by a good and sufficient guaranty that if the bid be accepted the bidder will enter into a contract and secure its performance by two disinterested sureties within thirty days after the acceptance of said bid.

Council reserves the right to reject any or all bids.

By order of the Council.

JOHN P. DUGAN,
City Clerk.

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sionx City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Rooney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅜-inch shafting.
No. S10 39 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6⅜-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅜x4⅞ flanged couplings.
No. S16 1 60x38x6⅜ in. double arm drive pulley.
No. S17 4 60x16x6⅜ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅜ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x43x8 in. iron pulley.
No. S21 2 6⅜x20 chain oiling pillow blocks.
No. S22 5 6⅜x15 chain oiling pillow blocks.
No. S23 1 4⅞x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 15 in. spur gear.
No. S27 10 8x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PUPCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16, 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeahm Bros.
No. S67 12x20 horizontal slide valve.
No. S205 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x15 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Cumner.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.
No. S208 17¾x24 pr. auto. Williams, coupled.
No. S82 18x30 250 H. P.
No. S83 20x22 Corliss.
No. S84 20x36 Corliss.
No. S85 20x42 Corliss.
No. S86 26x48 Corliss.
No. S87 20x24 horizontal, box bed.
No. S209 66x20 Chandler & Taylor.
No. S210 40 H. P. Rice automatic.
No. S211 35 H. P. Chandler & Taylor.
No. S88 22x42x48 Allis tandem condensing.
No. S89 14x20 Russell automatic.
No. S90 10 H. P. Davis & Rankin.
No. S91 10 H. P. slide valve.
No. S92 40 H. P. slide valve.
No. S93 60 H. P. slide valve.
No. S94 20 H. P. Milburn.
No. S95 No. 874 Racine automatic, 9-inch stroke.
No. S96 80 H. P. Farquhar.
No. S97 No. 1 Russell high-speed automatic.
No. S98 12 H. P. Giant.
No. S99 14 H. P. Giant.
No. S100 6 H. P. automatic Westinghouse.
No. S101 10 H. P. gas engine.
No. S102 13 H. P. Dayton gasoline.
No. S103 35 H. P. upright.
No. S104 40 H. P. Otto gas.
No. S105 50 H. P. Otto gas.
No. S106 19 H. P. Lewis gasoline.
No. S107 50 H. P. Raymond gasoline.
No. S172 68 H. P. Atlas.
No. S173 10x20 side crank.
No. S174 Otis furnace hoist engine, 2 cyl., 8x10.
No. S177 13x16 Twin engines, tandeu bed.
No. S179 7x14 Ames cylinder.
No. S273 16x30 balance wheel, 14 feet diam.
No. S274 1 H. P. gasoline.
No. S275 16½x30 Buckeye.
No. S276 6x12 horizontal slide valve.
No. S277 14x28 horizontal slide valve.
No. S278 12x24 marine oscillating.
No. S279 30x30 slide valve.
No. S280 36x42 slide valve.
No. S281 24x30 slide valve.
No. S282 10x15 center crank.
No. S283 6x8 box bed, side crank.
No. S284 16x36 Sinker & Davis.
No. S285 9x9 upright, center crank.
No. S286 9x14 horizontal, side crank
No. S287 9x12 Nagel.
No. S288 7x7 side crank.

MISCELLANEOUS.

110-VOLT INCANDESCENT DYNAMOS.

No. SM145 2 T.-H. 500-light, 110-volt, direct connected.
No. SM146 1 50-light Edison dynamo.
No. SM147 1 25-light C. & C. dynamo.
No. SM148 1 250-light Edison dynamo.
No. SM149 1 100-light Rockford dynamo.
No. SM150 2 500-light T.-H. dynamos.
No. SM151 1 150-light Eddy dynamo.
No. SM152 1 100-light, 110-volt, Weston dynamo.
No. SM153 1 250-light Hawkeye dynamo.

500-VOLT GENERATORS.

No. SM154 1 No. 8 T.-H., 75 K. W., 500-volt.

550-VOLT GENERATORS.

No. SM155 2 type U. S. Westinghouse bi-polar; 80 K. W.; 350 revolutions, 550-volt.

ALTERNATORS.

No. SM156 1 50 K. W.; 1,000-volt; Westinghouse; complete with switchboard, exciter, one extra brand new armature for exciter, two field coils.
No. SM157 1 500-light National; exciter on shaft.
No. SM158 1 500-light T.-H. alternator; 1,000-volt.
No. SM159 1 600-light T.-H.; 2,040-volt.
No. SM160 2 25 K. W. Westinghouse Alternators; 1,150-volt; 16,000 alternations; switchboard and instruments.

ARC DYNAMOS.

No. SM161 25-light; 2,000 c. p. low tension; one extra armature for same.
No. SM162 3 50-light; 2,000 c. p.; T.-H.
No. SM163 1 No. 8; 60-light; arc; 2,000 c. p.; Wood.
No. SM164 1 80-light Western Electric dynamo.
No. SM165 20-light, 2,000 c. p. Sperry; switchboard and instruments.

MOTORS.

No. SM166 1 20 H. P., 500-volt, Ft. Wayne.
No. SM167 1 3 H. P., 500-volt., T.-H.
No. S168 1 McGowan condenser, steam cyl., 8-inch.
No. S169 1 hoisting engine and boiler, 6x 12, made by Kendall & Bro.

PUMPS.

We carry over 350 different makes and sizes. Write for complete list.

BOILERS.

All kiuds of horizontal, tubular, firebox, etc. Our complete list on application.

SUPPLIES.

We carry all kinds of shafting, hangers, couplings, pulleys, belting; in fact, anything in the line of supplies.

A Wide-Awake Business Man

Is quick to avail himself of every improvement in method and every convenience of transacting business.

A Telephone Is acknowledged the greatest of modern aids in business work. The many lines of the Chicago Telephone Company constitute a vast system of trade channels. No business man is making the best of his opportunities without a telephone. A telephone will keep you in direct touch with your customers and with the firms with which you must often communicate, saving many hours of time every day and many long and useless trips. Instead of an expense, the telephone has become a factor of profit to the user.

At Little Cost, a trifle of 16 cents per day, and you can become an active member of the great league of twenty thousand users in Chicago. It will not cost anything to have us tell you all about the many advantages. A postal card request addressed to the Contract Department will receive prompt attention.

Chicago Telephone Company,

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

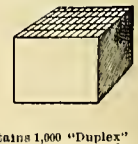
General Western Agents.

TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON— A PLAIN FACT



These 28 spools containing 91 lbs. of No. 36 single silk-covered wire will cost you $2.43 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $7.43.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

AUTOMATIC LIGHTNING ARRESTER.

Positive protection for telephones and switchboards against any abnormal current.

No fuse to burn out, line is never open, service never interrupted; it works automatically, is guaranteed not to burn out, requires no attention whatever after being installed.

It has less resistance than any other arrester, resistance being less than one ohm.

The working parts are mounted on porcelain base and are ornamental in appearance.

We put them up single for individual 'phones, and in cabinets for exchange use; the cabinets require but small floor space.

Protection without annoyance is what you want; try this device on some of your toll or worst lines and see for yourself what it will do.

Correspondence Solicited.

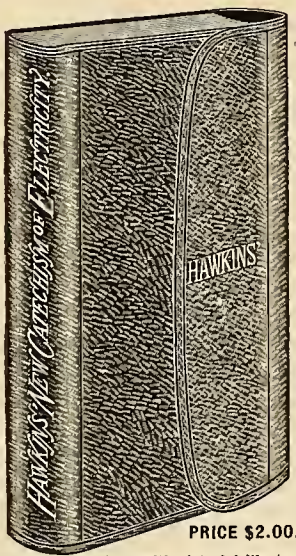
HAWKINS' NEW CATECHISM OF ELECTRICITY.

Plan of the Work, Contents, Etc.



PRICE $2.00.

The New Catechism of Electricity will be found to be surprisingly plain, and free from useless and ambiguous terms. The plan upon which it is arranged is unique.

The book is, first of all, intended to be plain and instructive; some 300 illustrations have been introduced, so that the mere pictures will afford almost a knowledge of the subjects.

It is a school book from the manner in which it proceeds from the simple facts to the abstract principles which the facts indicate; it is also a book of reference through the index of seventeen double columns of fine type pages; by means of this index a thousand items of practical importance are at once available.

It is an up-to date work, which has cost a large outlay of capital and time, and, in short, it is doubtful if any more attractive book has ever been issued—or one more useful.

The subjects treated upon are as follows: Dedication to Thomas A. Edison, with engraving of Mr. Edison; Preface and Introduction; Nature and Source of Electricity and Magnetism.

The Dynamo; Conductors and Non-Conductors; Symbols, abbreviations and definitions relating to electricity; Parts of the Dynamo; The Motor; The Care and Management of the Dynamo and Motor.

Electric Lighting; Wiring; The rules and requirements of the National Board of Underwriters in full; Electrical Measurements.

The Electric Railway; Line Work; Instruction and Cautions for Linemen and the Dynamo Room; Storage Batteries; Care and Management of the Street Car Motor; Electro Plating.

The Telephone and Telegraph; The Electric Elevator; Accidents and Emergencies, etc., etc.

The full one-third part of the whole work has been devoted to the explanation and illustrations of the dynamo, and particular directions relating to its care and management;—all the directions are given in the simplest and most kindly way to assist rather than confuse the learner. The names of the various parts of the machine are also given with pictorial illustrations of the same.

In the Catechism no less than 25 full page illustrations have been given of the various dynamo machines made in different parts of the country, and an equal number of part page illustrations.

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.
Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*
State your Head and send for 124 page pamphlet.

50-FOOT TO 80-FOOT POLES OUR SPECIALTY

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

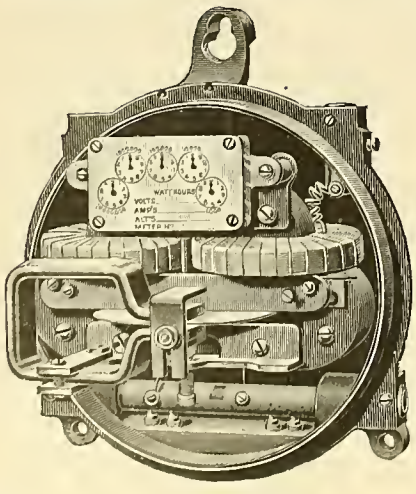
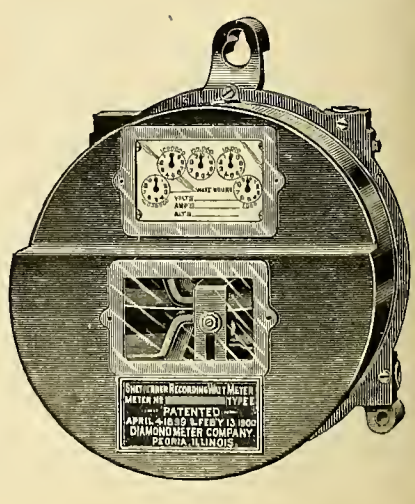
CHICAGO



Scheeffer Recording Wattmeter.

ROUND PATTERN TYPE "E." FOR ALTERNATING CURRENTS.

An Accurate and Sensitive Meter.
Improved Ball Bearing.



DIAMOND METER CO.

PEORIA, ILL., U. S. A.

THE EDISON LAMP

Embodies

20 Years

Of Experience, Growth and Development.

It Stands To-day Absolutely Unequaled—the Standard of the World.

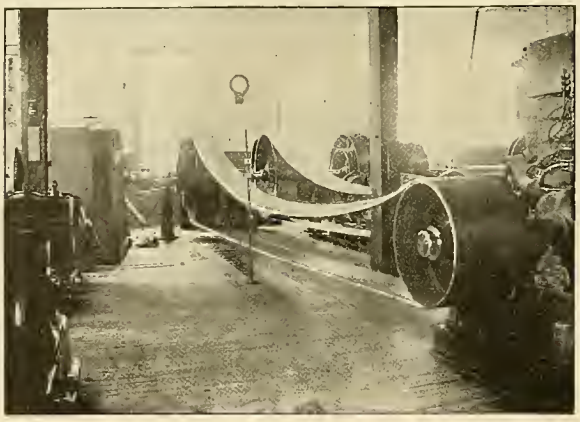
TRIED AND PROVEN BY TWENTY YEARS' UNEXCELLED SERVICE.

Commands the highest price—is the cheapest to use. By the experience of customers buying twelve million lamps a year.

15,000,000 lamps—yearly production. 5,000,000 lamps in stock. Prompt shipments, all kinds, any quantity.

THE GENERAL ELECTRIC COMPANY,

HARRISON, N. J.



CLING-SURFACE.

We guarantee these results from Cling-Surface:

Slipping stopped.

Belts made pliable and elastic.

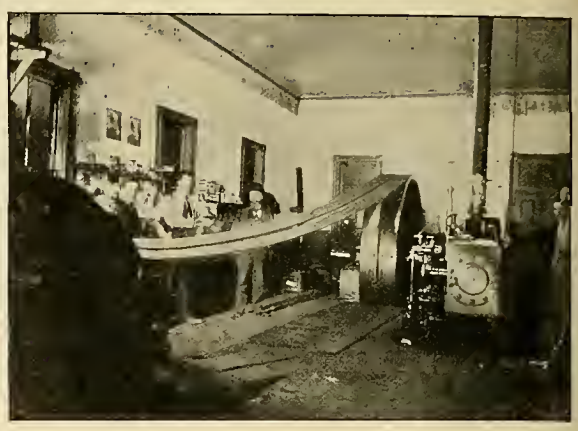
Power increased at least 15%.

Belts will run easy or slack.

ASK US FOR THE ONLY BOOKLET OF SLACK BELTS YOU EVER SAW.

CLING-SURFACE MFG. CO.,
177-182 Virginia St., BUFFALO, N.Y.

Chicago, St. Louis, New York, Boston, New Orleans.



ROCKLAND, ME., February 22, 1900.

Cling-Surface Mfg. Co., New England Branch, Boston.

GENTLEMEN:—These two 16-in. belts have been treated with Cling-Surface for some time. They run this way all the time. The load sometimes jumps from zero to full load, yet there is no slip.

ROCKLAND, THOMASTON & CAMDEN ST. RY. CO.

MOUND CITY, Mo., March 5, 1900.

Cling-Surface Mfg. Co.

GENTLEMEN:—Have used Cling-Surface four months. It has stopped all slipping. Belts 10 in., 30-ft. centers, run with 22-in. sag, yet carry full load, are pliable and in fine condition. Used to run very tight. We highly recommend Cling-Surface.

"FEDERAL SALT"

FOR CARBON CYLINDER AND CARBON-MANGANESE BATTERIES.

GIVES MORE CURRENT, LONGER LIFE, ABSOLUTELY NO CRYSTALS.

5c.

Package in case lots of 150 packages F. O. B. Bound Brook, N. J.

Both salts have a depolarizer in the mixture. Federal Salt No. 1 has more depolarizer than Federalite, and so will last longer. That's the only difference.

It's the DEPOLARIZER that INCREASES the STRENGTH, GIVES LONGER LIFE, and DOES AWAY ABSOLUTELY with CRYSTALIZATION and CREEPING SALTS.

MADE BY

FEDERAL BATTERY Co.,

11 PINE STREET, N. Y.

Please send references when ordering.

3c.

Package in case lots of 150 packages F. O. B. Bound Brook, N. J.

FEDERALITE SOLD IN BULK ALSO.

WHY IS IT

THAT

THE "BELDEN" SYSTEM

OF ARC LIGHTING

Is so far superior to any other system on the market?

BECAUSE

It embodies features that are not to be found in any other lamp.

We have convinced hundreds who have had arc lamp troubles. We can convince you.
Our catalog explains the fine points of the "Belden" and it will be sent on request.

CREAM FLUX
AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. ***We guarantee it and if not satisfactory money will be refunded.***

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your **Cream Flux** severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goehst, Constr. Supt. CHICAGO EDISON CO."

FREE REFERENCE BOOK,
BOUND IN CLOTH, CONTAINING
100 PAGES OF USEFUL INFORMATION.

I will send a copy of this book **FREE** on receipt of four cents postage, to anyone interested in the subjects enumerated, and who will appreciate the book; but it is not intended for waste basket distribution.

It is replete with concise tables, explicit formulæ, recognized rules, apt suggestions and standard data of inestimable value for constant everyday use to the Mechanic, Electrician, Engineer, Manufacturer, Inventor and other practical business men. A serviceable companion and a persistent educator.

A handsome morocco leather card-case and book cover, like above cut, for preserving this most valuable compendium of useful information, has been especially designed for this purpose and will be furnished at wholesale rates of 25 cents each.

AUCTION SALE.——BANKRUPT SALE.

Entire Property of The Suburban Electric Co., Covington, Ky., Offered For Sale.

Notice is hereby given that pursuant to an order in bankruptcy, in the matter of the Suburban Electric Company, a corporation organized under the laws of the state of Kentucky, bankrupt, No. 276, in the District Court of the United States for the District of Kentucky, I will, on the 25th day of September, 1900, at 10 o'clock a. m., at the Scott street entrance of the United States Court in Covington, Ky., sell at public auction to the highest bidder, all the property, real and personal, of every kind and description belonging to the Suburban Electric Company, bankrupt, including all the rights, privileges and franchises, except the franchise to be a corporation, and also its electric lighting plant, power station, machinery, engines, boilers, dynamos, electric machines, electric lamps and other appliances and appurtenances, poles, lines, wires and all contracts, claims and demands, and all other property of every kind and description, also the following described real estate belonging to the said bankrupt, situated in the city of Covington, Kenton County, Kentucky, and bounded as follows:

1. Beginning at a point on the east line of Madison avenue at the northeast corner of Madison avenue and an alley running parallel to and between Fourth and Fifth streets; thence northwardly along the east line of said Madison avenue towards Fourth street ninety (90) feet; thence at right angles to Madison avenue one hundred and ninety (190) feet to another alley; thence with said other alley and at right angles to said first-named alley ninety (90) feet to said first-named alley; thence westwardly along the same one hundred and ninety (190) feet to the place of beginning.

And also the following described piece of real estate belonging to said bankrupt, situated in the city of Newport, Campbell County, Kentucky, to wit:

2. Lot No. 260 in the Cotes Brilliant Lot & Home Company's subdivision, fronting thirty (30) feet on the west side of Park avenue, and extending back one hundred and twenty (120) feet to an alley.

The first tract of real estate above described will be sold subject to such lien as Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, or either of them, may have upon said real estate, which lien is as yet undetermined in amount.

The property above described will be sold free from any and all liens or encumbrances, except the lien or encumbrance in favor of Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, upon the said first described real estate aforesaid.

The second piece of real estate described aforesaid will be sold separately.

All the balance of the real estate, and all the other property and assets of every kind, and the rights, privileges and franchises of the Suburban Electric Company will be sold as an entirety and as a going concern.

The terms of the sale will be one-third (⅓) cash, to be paid upon the confirmation of the sale, the balance in equal installments of six and twelve months from date of sale, deferred payments to draw six (6%) per cent interest and to be secured by lien upon the property sold and also by bond with sureties satisfactory to the referee in bankruptcy herein; or purchaser may pay cash for said property upon the confirmation of the sale. No bid for said property will be received from any bidder who shall not place in the hands of the undersigned at the time of making said bid, as a pledge that said bidder will make good his bid if the sale is confirmed, the sum of fifteen thousand ($15,000) dollars, which sum of fifteen thousand dollars will be credited upon the first payment of the purchase money for said sale.

Inspection of property invited. Full information given upon application at the office of the bankrupt in Covington, Ky.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

NOTICE OF BIDS.

OFFICE OF THE CITY CLERK.

Kenton, Hardin County, Ohio.
August 2, 1900.

Notice is hereby given that the Council of the City of Kenton, County of Hardin and State of Ohio, will receive bids at the office of the City Clerk of said city, until 12 o'clock noon, on

Monday, September 3d, A. D. 1900,

for lighting the streets, alleys, squares, other public places and public buildings within the corporate limits of said city with not less than One Hundred and Ten (110) Electric Lights of Two Thousand (2,000) Candlepower properly placed and adjusted under supervision of the City Council. Said bids shall be for the term of five years. Said bids shall contain the name of the system of lighting proposed and shall state the amount per annum for which each light which is required will be erected and maintained during the hours of darkness, all night and every night.

Each bid must be accompanied by a good and sufficient guaranty that if the bid be accepted the bidder will enter into a contract and secure its performance by two disinterested sureties within thirty days after the acceptance of said bid.

Council reserves the right to reject any or all bids.

By order of the Council.

JOHN P. DUGAN,
City Clerk.

BATTERY JARS.

Machine-made Battery Jars are Better and stronger than the hand-blown, being more Uniform and of Equal Distribution.

One T.-H. m. p., 15, 90 h. p.
One Edison, 100 k. w., 120 h. p.

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅝-inch shafting.
No. S10 39 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6⅝-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅜x4⅞ flanged couplings.
No. S16 1 60x38x6⅜ in. double arm drive pulley.
No. S17 4 60x16x6⅜ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅜ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x42x8 in. iron pulley.
No. S21 2 6⅜x20 chain oiling pillow blocks.
No. S22 5 6⅜x15 chain oiling pillow blocks.
No. S23 1 4⅞x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 15 in. spur gear.
No. S27 10 8x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16. 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.
No. S328 2 25-light Ball arc dynamos.
No. S329 2 60x16 horizontal tubular boilers.
No. S330 2 66x16 horizontal tubular boilers.
Shafting, hangers, couplings, etc.

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeabm Bros.
No. S67 12x20 horizontal slide valve.
No. S205 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x15 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Cumner.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.
No. S208 17¾x24 pr. auto. Williams, coupled.
No. S82 18x30 250 H. P.
No. S83 20x22 Corliss.
No. S84 20x36 Corliss.
No. S85 20x42 Corliss.
No. S86 26x48 Corliss.
No. S87 20x24 horizontal, box bed.
No. S209 66x20 Chandler & Taylor.
No. S210 40 H. P. Rice automatic.
No. S211 35 H. P. Chandler & Taylor.
No. S88 22x42x48 Allis tandem condensing.
No. S89 14x20 Russell automatic.
No. S90 10 H. P. Davis & Rankin.
No. S91 10 H. P. slide valve.
No. S92 40 H. P. slide valve.
No. S93 60 H. P. slide valve.
No. S94 20 H. P. Milburn.
No. S95 No. 874 Racine automatic, 9-inch stroke.
No. S96 80 H. P. Farquhar.
No. S97 No. 1 Russell high-speed automatic.
No. S98 12 H. P. Giant.
No. S99 14 H. P. Giant.
No. S100 6 H. P. automatic Westinghouse.
No. S101 10 H. P. gas engine.
No. S102 13 H. P. Dayton gasoline.
No. S103 35 H. P. upright.
No. S104 40 H. P. Otto gas.
No. S105 50 H. P. Otto gas.
No. S106 13 H. P. Lewis gasoline.
No. S107 50 H. P. Raymond gasoline.
No. S172 68 H. P. Atlas.
No. S173 10x20 side crank.
No. S174 Otis furnace hoist engine, 2 cyl., 8x10.
No. S177 13x16 Twin engines, tandem bed.
No. S179 7x14 Ames cylinder.
No. S273 16x30 balance wheel, 14 feet diam.
No. S274 1 H. P. gasoline.
No. S275 16½x30 Buckeye.
No. S276 6x12 horizontal slide valve.
No. S277 14x28 horizontal slide valve.
No. S278 12x24 marine oscillating.
No. S279 30x30 slide valve.
No. S280 36x42 slide valve.
No. S281 24x30 slide valve.
No. S282 10x15 center crank.
No. S283 6x8 box bed, side crank.
No. S284 16x36 Sinker & Davis.
No. S285 9x9 upright, center crank.
No. S286 9x14 horizontal, side crank
No. S287 9x12 Nagel.
No. S288 7x7 side crank.

MISCELLANEOUS.

110-VOLT INCANDESCENT DYNAMOS.

No. SM145 2 T.-H. 500-light, 110-volt, direct connected.
No. SM146 1 50-light Edison dynamo.
No. SM147 1 25-light C. & C. dynamo.
No. SM148 1 250-light Edison dynamo.
No. SM149 1 100-light Rockford dynamo.
No. SM150 3 500-light T.-H. dynamos.
No. SM151 1 150-light Eddy dynamo.
No. SM152 1 100-light, 110-volt, Weston dynamo.
No. SM153 1 250-light Hawkeye dynamo.

500-VOLT GENERATORS.

No. SM154 1 No. 8 T.-H., 75 K. W., 500-volt.

550-VOLT GENERATORS.

No. SM155 2 type U. S. Westinghouse bi-polar; 80 K. W.; 350 revolutions, 550-volt.

ALTERNATORS.

No. SM156 1 50 K. W.; 1,000-volt; Westinghouse; complete with switchboard, exciter, one extra brand new armature for exciter, two field coils.
No. SM157 1 500-light National; exciter on shaft.
No. SM158 1 500-light T.-H. alternator; 1,000-volt.
No. SM159 1 600-light T.-H.; 2,040-volt.
No. SM160 2 25 K. W. Westinghouse Alternators; 1,150-volt; 16,000 alternations; switchboard and instruments.

ARC DYNAMOS.

No. SM161 25-light; 2,000 c. p. low tension; one extra armature for same.
No. SM162 3 50-light; 2,000 c. p.; T.-H.
No. SM163 1 No. 8; 60-light; arc; 2,000 c. p.; Wood.
No. SM164 1 80-light Western Electric dynamo.
No. SM165 20-light, 2,000 c. p. Sperry; switchboard and instruments.

MOTORS.

No. SM166 1 20 H. P., 500-volt, Ft. Wayne.
No. SM167 1 3 H. P., 500-volt., T.-H.
No. S168 1 McGowan condenser, steam cyl., 8-inch.
No. S169 1 hoisting engine and boiler, 6x 12, made by Kendall & Bro.

PUMPS.

We carry over 350 different makes and sizes. Write for complete list.

BOILERS.

All kinds of horizontal, tubular, fire-box, etc. Our complete list on application.

SUPPLIES.

We carry all kinds of shafting, hangers, couplings, pulleys, belting; in fact, anything in the line of supplies.

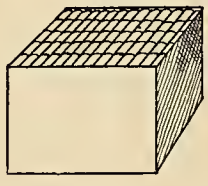
THE WARNER ELECTRIC CO., MUNCIE, IND.

These 28 spools containing 91 lbs. of No.36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.



The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyro, Neumoyer and Büttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.

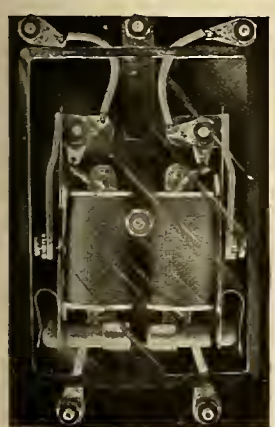
The Chicago Motor and Dynamo Co., Inc.,
39-43 WEST WASHINGTON ST., CHICAGO, ILL.

AUTOMATIC LIGHTNING ARRESTER.



Positive protection for telephones and switchboards against any abnormal current.

No fuse to burn out, line is never open, service never interrupted; it works automatically, is guaranteed not to burn out, requires no attention whatever after being installed.

It has less resistance than any other arrester, resistance being less than one ohm.

The working parts are mounted on porcelain base and are ornamental in appearance.

We put them up single for individual 'phones, and in cabinets for exchange use; the cabinets require but small floor space.

Protection without annoyance is what you want; try this device on some of your toll or worst lines and see for yourself what it will do.

Correspondence Solicited.

Butler-Taylor Co.,
Ravenna, Ohio.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

CHICAGO EDISON COMPANY,

FAN MOTORS

139 ADAMS ST., CHICAGO.

OUR SELF-STARTING SINGLE-PHASE A. C. MOTORS AND WHAT A CUSTOMER THINKS OF THEM.

Phillips & Buttorff Mfg. Co.

Nashville Tenn June 1, 1900

Mr. Jas Shingleton.

Dear Sir

The Four Wagner Motors you installed in our Cork shop last Summer, have proven satisfactory in every respect, not requiring any attention whatever, and the current consumption has been remarkably low, exceeding our most sanguine expectations.

Yours Truly

Phillips & Buttorff Mfg Co

P. H. Buttorff

Columbia Lamps.

Unequaled in Quality.

BEFORE placing your orders for fall and early winter requirements in Incandescent Lamps we respectfully invite the attention of Central Stations and Isolated Plants to the high quality of the Columbia. We guarantee the highest uniformity in initial readings as well as the highest maintenance of candlepower.

Special prices to consumers on future delivery orders for 1,000 or more covering full annual requirements.

Trial order solicited.

THE WARREN ELECTRIC & SPECIALTY CO., - WARREN, OHIO, U. S. A.

Manufacturers PEERLESS Direct-Current Desk and Ceiling Fan Motors, Transformers, Incandescent Lamps.

Bretheren, I say unto You

WHY

Throw away 85% of your coal when you can sell it for three times its cost by putting in our system of UNDERGROUND EXHAUST STEAM HEATING MAINS.

It is common for electric companies who are now operating EXHAUST STEAM HEATING PLANTS to pay their entire coal and labor bills for the year and 6% on investment for steam mains from sale of exhaust steam. Why cant you do the same? Write for our pamphlet. Mention Western Electrician.

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅞-inch shafting.
No. S10 39 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6⅞-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅝x4⅞ flanged couplings.
No. S16 1 60x33x6⅜ in. double arm drive pulley.
No. S17 4 60x16x6⅜ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅜ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x43x8 in. iron pulley.
No. S21 2 6⅜x20 chain oiling pillow blocks.
No. S22 5 6⅜x15 chain oiling pillow blocks.
No. S23 1 4⅜x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 15 in. spur gear.
No. S27 10 8x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.
No. S328 2 25-light Ball arc dynamos.
No. S329 2 60x16 horizontal tubular boilers.
No. S330 2 66x16 horizontal tubular boilers.
Shafting, hangers, couplings, etc.

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeahm Bros.
No. S67 12x20 horizontal slide valve.
No. S265 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x15 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Cumner.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.
No. S208 17¾x24 pr. auto. Williams, coupled.
No. S82 18x30 250 H. P.
No. S83 20x22 Corliss.
No. S84 20x36 Corliss.
No. S85 20x42 Corliss.
No. S86 26x48 Corliss.
No. S87 20x24 horizontal, box bed.
No. S209 66x20 Chandler & Taylor.
No. S210 40 H. P. Rice automatic.
No. S211 35 H. P. Chandler & Taylor.
No. S88 22x42x48 Allis tandem condensing.
No. S89 14x20 Russell automatic.
No. S90 10 H. P. Davis & Rankin.
No. S91 10 H. P. slide valve.
No. S92 40 H. P. slide valve.
No. S93 60 H. P. slide valve.
No. S94 20 H. P. Milburn.
No. S95 No. 874 Racine automatic, 9-inch stroke.
No. S96 80 H. P. Farquhar.
No. S97 No. 1 Russell high-speed automatic.
No. S98 12 H. P. Giant.
No. S99 14 H. P. Giant.
No. S100 6 H. P. automatic Westinghouse.
No. S101 10 H. P. gas engine.
No. S102 13 H. P. Dayton gasoline.
No. S103 35 H. P. upright.
No. S104 40 H. P. Otto gas.
No. S105 50 H. P. Otto gas.
No. S106 19 H. P. Lewis gasoline.
No. S107 50 H. P. Raymond gasoline.
No. S172 68 H. P. Atlas.
No. S173 10x20 side crank.
No. S174 Otis furnace hoist engine, 2 cyl., 8x10.
No. S177 13x16 Twin engines, tandem bed.
No. S179 7x14 Ames cylinder.
No. S273 16x30 balance wheel, 14 feet diam.
No. S274 1 H. P. gasoline.
No. S275 16½x30 Buckeye.
No. S276 6x12 horizontal slide valve.
No. S277 14x28 horizontal slide valve.
No. S278 12x24 marine oscillating.
No. S279 30x30 slide valve.
No. S280 36x42 slide valve.
No. S281 24x30 slide valve.
No. S282 10x15 center crank.
No. S283 6x8 box bed, side crank.
No. S284 16x36 Sinker & Davis.
No. S285 9x9 upright, center crank.
No. S286 9x14 horizontal, side crank
No. S287 9x12 Nagel.
No. S288 7x7 side crank.

MISCELLANEOUS.

110-VOLT INCANDESCENT DYNAMOS.

No. SM145 2 T.-H. 500-light, 110-volt, direct connected.
No. SM146 1 50-light Edison dynamo.
No. SM147 1 25-light C. & C. dynamo.
No. SM148 1 250-light Edison dynamo.
No. SM149 1 100-light Rockford dynamo.
No. SM150 2 500-light T.-H. dynamos.
No. SM151 1 150-light Eddy dynamo.
No. SM152 1 100-light, 110-volt, Weston dynamo.
No. SM153 1 250-light Haykeye dynamo.

500-VOLT GENERATORS.

No. SM154 1 No. 8 T.-H., 75 K. W., 500-volt.

550-VOLT GENERATORS.

No. SM155 2 type U. S. Westinghouse bi-polar; 80 K. W.; 350 revolutions, 550-volt.

ALTERNATORS.

No. SM156 1 50 K. W.; 1,000-volt; Westinghouse; complete with switchboard, exciter, one extra brand new armature for exciter, two field coils.
No. SM157 1 500-light National; exciter on shaft.
No. SM158 1 500-light T.-H. alternator; 1,000-volt.
No. SM159 1 600-light T.-H.; 2,040-volt.
No. SM160 2 25 K. W. Westinghouse Alternators; 1,150-volt; 16,000 alternations; switchboard and instruments.

ARC DYNAMOS.

No. SM161 25-light; 2,000 c. p. low tension; one extra armature for same.
No. SM162 3 50-light; 2,000 c. p.; T.-H.
No. SM163 1 No. 8; 60-light; arc; 2,000 c. p.; Wood.
No. SM164 1 80-light Western Electric dynamo.
No. SM165 20-light, 2,000 c. p. Sperry; switchboard and instruments.

MOTORS.

No. SM166 1 20 H. P., 500-volt, Ft. Wayne.
No. SM167 1 3 H. P., 500-volt., T.-H.
No. S168 1 McGowan condenser, steam cyl., 8-inch.
No. S169 1 hoisting engine and boiler, 6x 12, made by Kendall & Bro.

PUMPS.

We carry over 350 different makes and sizes. Write for complete list.

BOILERS.

All kinds of horizontal, tubular, firebox, etc. Our complete list on application.

SUPPLIES.

We carry all kinds of shafting, hangers, couplings, pulleys, belting; in fact, anything in the line of supplies.

OUR STUDENTS SUCCEED

INCREASED SALARY.
I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.
R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.
I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.
WM. R. HORNER,

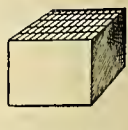
TELEPHONE MEN AND ALL USERS OF MAGNET COILS HAVE YOUR MAGNET COILS WOUND BY MACHINERY.

HERE'S THE OBJECT LESSON—
A PLAIN FACT



These 28 spools containing 91 lbs. of No. 36 single silk-covered wire will cost you $243 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $248.

The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $218.70 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

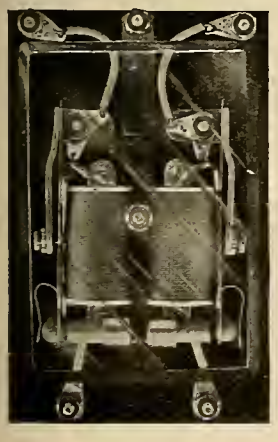
AUTOMATIC LIGHTNING ARRESTER.



Positive protection for telephones and switchboards against any abnormal current.

No fuse to burn out, line is never open, service never interrupted; it works automatically, is guaranteed not to burn out, requires no attention whatever after being installed.

It has less resistance than any other arrester, resistance being less than one ohm.

The working parts are mounted on porcelain base and are ornamental in appearance.

We put them up single for individual 'phones, and in cabinets for exchange use; the cabinets require but small floor space.

Protection without annoyance is what you want; try this device on some of your toll or worst lines and see for yourself what it will do.

Correspondence Solicited.

Butler-Taylor Co.,

Ravenna, Ohio.

TELEPHONES.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.
Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.
Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. STATE REQUIREMENTS AND SEND FOR CATALOGUE.
S. MORGAN SMITH CO., York, Pa.

GRAPHITE FOR RESISTANCE...
Made in almost any form required and of 1 ohm or 1,000,000 ohms as desired. We also make graphite boxes and crucibles resisting heats of 4,000 degrees.

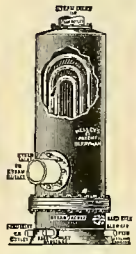
THE IMPROVED BERRYMAN
(KELLEY'S PATENT)
WATER TUBE



FEED WATER HEATER AND PURIFIER.
UNIQUE
in its effectiveness and up-to-date in every respect, at a price that will assure consideration. Vastly superior to any Feed Water Heater on the market.
Benj. F. Kelley & Son,
91 Liberty St., New York.
2d HAND Heaters, 2,000, 1,500, 1,200, 1,000, 800, 600, 300, 80 horse power and others. Largest stock in America. Mostly all taken in trade for our Improved Berryman.

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.
Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing.*
Tests show over 81 per cent. average efficiency with half to full water.
State your Head and send for 124 page pamphlet.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator; Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI. Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

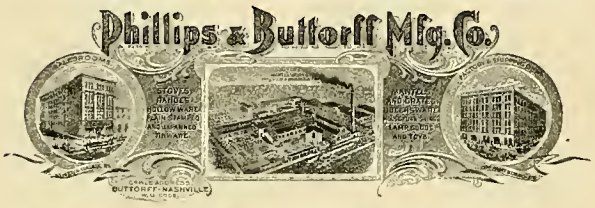
PARAGON

CHICAGO EDISON COMPANY, 139 ADAMS ST., CHICAGO.

FAN MOTORS

OUR SELF-STARTING SINGLE-PHASE A. C. MOTORS AND WHAT A CUSTOMER THINKS OF THEM.



Nashville, Tenn. June 1, 1900

Mr. Jas Shingleton.

Dear Sir—

The Four Wagner Motors you installed in our Work Shop last Summer, have proven satisfactory in every respect, not requiring any attention whatever, and the current consumption has been remarkably low, exceeding our most sanguine expectations.

Yours Truly

Phillips & Buttorff Mfg. Co.

P. P. Buttorff

WRITE FOR BULLETINS "Z 24, 35, 37 and 39."

Columbia Lamps.

Unequaled in Quality.

BEFORE placing your orders for fall and early winter requirements in Incandescent Lamps we respectfully invite the attention of Central Stations and Isolated Plants to the high quality of the Columbia. We guarantee the highest uniformity in initial readings as well as the highest maintenance of candlepower.

Special prices to consumers on future delivery orders for 1,000 or more covering full annual requirements.

Trial order solicited.

CENTRAL ELECTRIC COMPANY,

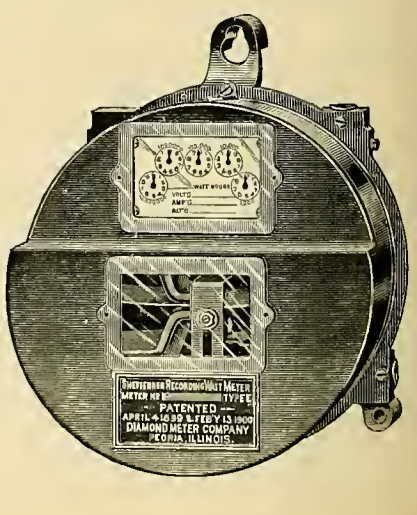
Improved Ball Bearing.



DIAMOND METER CO.

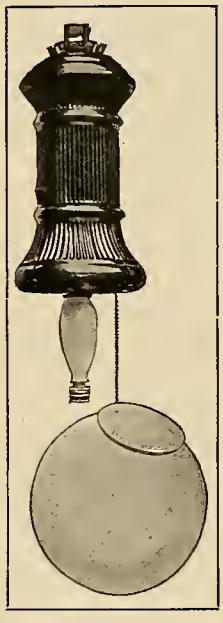
PEORIA, ILL., U. S. A.

SEASON AND REASON.

At this particular time the lighting question is interesting central station managers, manufacturers, and all who require artificial light.

And with it arises that ever-perplexing question of

WHAT LAMP TO BUY?



DON'T BUY

Any lamp before investigating the merits of

THE BELDEN SYSTEM,

Because it possesses features superior to anything on the market. A trial has convinced others and will do the same for you.

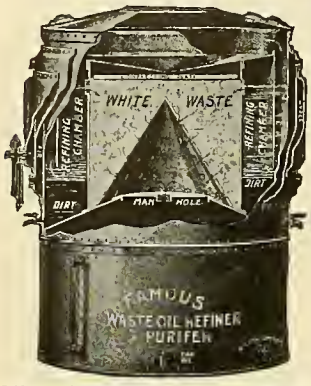
BELDEN-LARWILL ELECTRIC & MFG. CO.,

FORT WAYNE, IND.

Chicago Agents, M. B. Austin & Co., 56 W. Van Buren Street.

IS YOUR FILTER A FRAUD?

FAMOUS OIL FILTER.



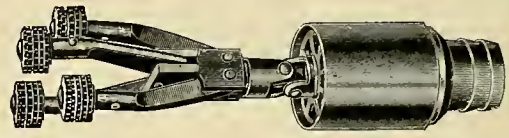
DETERMINE..... FOR YOURSELF

Whether it has any real filtering capacity or other substantial merit by examining the filtered oil with our Clean Oil Indicator. This microscopic device reveals the injurious grit and carbon found in most reused or filtered oils. Sent prepaid on receipt of 50 cents. Our FAMOUS FILTERS are continually replacing those of every other make, because they are the only ones designed upon correct principles, which you will note from the interior arrangement shown in the cut and fully described in the catalogue. They will, moreover, deliver an absolutely pure quality of oil, which it is impossible for any other filter to do.

Sent on approval to any responsible firm. Write for new booklet on Modern Engineering Practice as applied to Oil Filtration and Lubrication. It contains facts which may interest and surprise you.

CHICAGO BOILER CLEANER COMPANY, 321 Dearborn St., Chicago, Ill.

A WONDERFUL MACHINE.



A prominent bank in Kansas City made over 1,000 per cent. by investing in one of our TURBINE CLEANERS. It reduced its fuel bill from $450 to $200 per month.

New evidence of the superiority of this machine accumulates daily. We have just finished cleaning some water tube boilers where more than half of the tubes were totally filled with scale. This work required special drills which were inserted in place of the flexible head, but it easily did the work of a $1,500 power cleaner at only a fraction of the cost to buy, adjust, operate and maintain. It is not only the most rapid, economical and satisfactory apparatus for cleaning water tube boilers, but is practically the only one which will perform the work in most cases. Sent on approval. Boilers cleaned by contract.

CHICAGO BOILER CLEANER COMPANY,

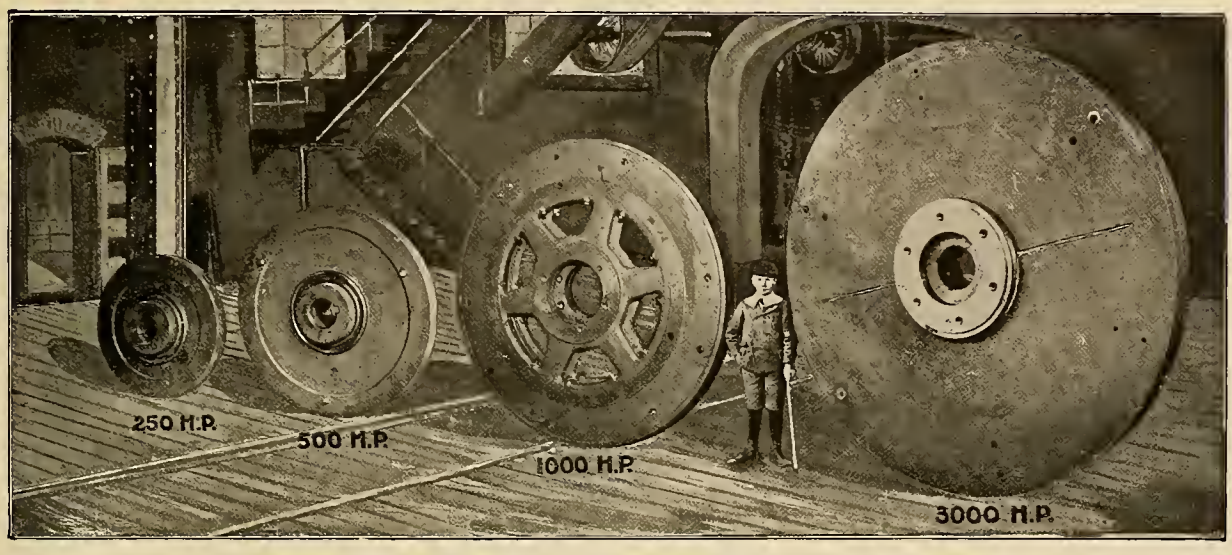
ANOTHER STEP IN ADVANCE

THE ARNOLD MAGNETIC CLUTCH.

(PATENTED.)



OF ANY SIZE. FOR ANY PURPOSE.

These clutches were designed by us for use in connection with the "Arnold System" of Power Station Construction but we have received so many inquiries in regard to their application in various places where it is desired to transmit power from one shaft to another that we have arranged for their manufacture.

THEY CAN BE USED on line shafting, so that different sections of the shaft can be thrown in or out of service by means of a switch.

To directly connect a generator to an engine so that it can be started or stopped without stopping the engine.

To connect a dynamo to a line shaft which may extend through the hollow quill upon which the generator armature is mounted.

To connect a motor to a machine in such a way that the motor may be disconnected at once in case of accident to the machine.

AND IN MANY OTHER WAYS.

A FEW POINTS:
ABOUT MAGNETIC CLUTCHES.

They can be operated by means of a conveniently placed electric switch.

Can be energized by a direct current of any voltage.

Require a small amount of energy. The 3,000 h. p. clutch used 200 watts or less than $\frac{1}{100}$ of 1 per cent of the power transmitted.

Are simpler and present a neater appearance than friction clutches.

Are easy to install, to operate and to keep in order.

We believe that engineers will appreciate at once the advantages of a successful magnetic clutch.

We would be pleased to correspond in regard to their application in connection with any power transmitting problem.

2 60-light 2000 C. P. West. Elec., self-oilers.
1 60-light 2000 C. P. Westinghouse.
2 60-light 2000 C. P. Wood, No. 8.
1 65-light 2000 C. P. Brush, No. 8, new armature.
2 75-light 1200 C. P. Wood.
2 75-light 1200 C. P. Standard, self-oilers.
2 75-light 2000 C. P. Westingh'se, self-oiler.
3 125-light 1200 C. P. Excelsior, latest type, self-oilers, fine.

220-Volt Motors.

1 1 H. P. Edison, self-oiler.
2 1 H. P. E. & C., new, self-oilers, M. P., slow speed.
1 3 H. P. Crocker - Wheeler, self-oiler, slow speed.
1 3 H. P. Gen. Elec., type I. B., self-oiler.
1 3 H. P. C. & C., self-oiler.
2 3 H. P. Card, slow speed, self-oilers.
1 5 H. P. Eddy, ring type, self-oiler.
1 5 H. P. Westinghouse, self-oiler.
1 7½ H. P. Roth, self-oiler.
1 7½ H. P. Eddy, self-oiler.
1 7½ H. P. Edison, self-oiler.
1 8 H. P. General Electric multipolar, self-oiler.
1 10 H. P. Keystone, self-oiler.
1 10 H. P. Elckmeyer, elevator motor, with controller.
1 10 H. P. Lundell, self-oiler.
1 12 H. P. Lundell, 10 K. W., multipolar, self-oiler, slow speed.
1 15 H. P. Eddy, self-oiler, new arm't.
1 18 H. P. Edison, self-oiler.

220 Volt Motors—Continued.

1 30 H. P. Edison, 25 K. W., self-oiler.
1 50 H. P. E. & C., multipolar, slow speed.
1 60 H. P. Northern, M. P., self-oiler, newly rewound throughout.
1 75 H. P. Sprague, self-oiler, new arm't.
1 225 H. P. Crocker-Wheeler, M. P.

500-Volt Motors.

1 ¼ H. P. Detroit, series wound.
1 1 H. P. Jenney, self-oiler.
1 1 H. P. Crocker - Wheeler, self-oiler, slow speed.
1 1 H. P. Lundell, self-oiler, slow speed.
1 1 H. P. C. & C., self-oiler.
1 3 H. P. Toledo, self-oiler.
1 3 H. P. Hobart, self-oiler.
1 3 H. P. Jenney, self-oiler.
2 3½ H. P. Rockford, ironclad, self-oilers.
1 10 H. P. Eddy, self-oiler, multipolar.
1 10 H. P. C. & C.
1 10 H. P. C. & C., self-oiler.
1 10 H. P. Commercial, self-oiler.
1 10 H. P. Card, M. P., self-oiler, slow sp.
1 15 H. P. Eddy, self-oiler.
1 18 H. P. Thomson-Houston, self-oiler.
2 18 H. P. Edison, 15 K. W., self-oilers.
2 18 H. P. C. & C., self-oilers
1 20 H. P. Commercial, self-oiler.
1 20 H. P. Card, self-oiler.
1 30 H. P. T.-H., self-oiler, D. 25.
1 30 H. P. Edison, 25 K. W., self-oiler.
1 35 H. P. Jenney, self-oiler.
1 40 H. P. Jenney, self-oiler.
1 40 H. P. Mather, self-oiler.
1 60 H. P. Edison, 45 K. W., self-oiler.

Alternating-Current Motors.

SINGLE PHASE.

1 ¼ H. P. Stanley, 100 volts, 16000 alternations, single-phase.
2 1 H. P. Ft. Wayne, 100 v., 125 cycle, self-oilers, single-phase.
1 2½ H. P. Ft. Wayne, 100 volts, self-oiler, single-phase.
1 5 H. P. Wagner, single-phase, 60 cycle, 200 volts.

Alternating Current Motors.

MULTIPHASE.

1 1 H. P. Westinghouse, self-oiler, 2-phase, 60-cycle, 100 volts.
1 10 H. P. Gen. Electric, self-oiler, 3-phase, type, 8-10-900, Form A, 60-cycle, 110 volts.

Automobiles.

1 Wood's electric runabout, with top, carries 2 persons, practically new.
1 Electric open phaeton, seats 3 persons, fine condition.
1 Electric "trap," carries 4 persons, new.

TRANSFORMERS, METERS AND ARC LAMPS.

NOTICE.—All machines are actually in stock ready for prompt delivery. All machines are guaranteed. Write for particulars and send for MONTHLY BARGAIN SHEET with net cash price.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

WM. R. HORNER,
Philadelphia, Pa.

$12 to $70, in Small Monthly Installments, pays for a

TECHNICAL EDUCATION

For the purpose of quickly introducing and demonstrating the superior merits of its courses, the Trustees of **The American School of Correspondence** have voted to award

A Free Scholarship

in **Steam, Electrical** or **Mechanical Engineering** (including a complete course in **Mechanical Drawing**) to a few well-recommended, ambitious men in each manufacturing plant in the United States.

The holders of these **Free Scholarships** will be asked to answer any inquiries as to the benefit and value of the instruction and also recommend the School to their friends, thus establishing an endless chain of enthusiastic students who will advertise the School more thoroughly than tons of printed matter or an army of agents. Application blank on request (mention Western Electrician).

One Edison, 100 k. w., 120 h. p.

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅜-inch shafting.
No. S10 29 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6⅜-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅜x4⅞ flanged couplings.
No. S16 1 60x28x6⅜ in. double arm drive pulley.
No. S17 4 60x16x6⅜ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅜ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x43x8 in. iron pulley.
No. S21 2 6⅜x20 chain oiling pillow blocks.
No. S22 5 6⅜x15 chain oiling pillow blocks.
No. S23 1 4⅞x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 16 in. spur gear.
No. S27 10 8x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16. 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.
No. S328 2 25-light Ball arc dynamos.
No. S329 2 60x16 horizontal tubular boilers.
No. S330 2 66x16 horizontal tubular boilers.
Shafting, hangers, couplings, etc.

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeahm Bros.
No. S67 12x20 horizontal slide valve.
No. S205 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x16 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Cumner.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.
No. S208 17¾x24 pr. auto. Williams, coupled.
No. S82 18x30 250 H. P.
No. S83 20x22 Corliss.
No. S84 20x36 Corliss.
No. S85 20x42 Corliss.
No. S86 26x48 Corliss.
No. S87 20x24 horizontal, box bed.
No. S209 66x20 Chandler & Taylor.
No. S210 40 H. P. Rice automatic.
No. S211 35 H. P. Chandler & Taylor.
No. S88 22x42x48 Allis tandem condensing.
No. S89 14x20 Russell automatic.
No. S90 10 H. P. Davis & Rankin.
No. S91 10 H. P. slide valve.
No. S92 40 H. P. slide valve.
No. S93 60 H. P. slide valve.
No. S94 20 H. P. Milburn.
No. S95 No. 874 Racine automatic, 9-inch stroke.
No. S96 80 H. P. Farquhar.
No. S97 No. 1 Russell high-speed automatic.
No. S98 12 H. P. Giant.
No. S99 14 H. P. Giant.
No. S100 6 H. P. automatic Westinghouse.
No. S101 10 H. P. gas engine.
No. S102 13 H. P. Dayton gasoline.
No. S103 35 H. P. upright.
No. S104 40 H. P. Otto gas.
No. S105 50 H. P. Otto gas.
No. S106 19 H. P. Lewis gasoline.
No. S107 50 H. P. Raymond gasoline.
No. S172 68 H. P. Atlas.
No. S173 10x20 side crank.
No. S174 Otis furnace hoist engine, 2 cyl., 8x10.
No. S177 13x16 Twin engines, tandem bed.
No. S179 7x14 Ames cylinder.
No. S273 16x30 balance wheel, 14 feet diam.
No. S274 1 H. P. gasoline.
No. S275 16½x30 Buckeye.
No. S276 6x12 horizontal slide valve.
No. S277 14x28 horizontal slide valve.
No. S278 12x24 marine oscillating.
No. S279 30x20 slide valve.
No. S280 36x42 slide valve.
No. S281 24x20 slide valve.
No. S282 10x15 center crank.
No. S283 6x8 box bed, side crank.
No. S284 16x36 Sloker & Davis.
No. S285 9x9 upright, center crank.
No. S286 9x14 horizontal, side crank
No. S287 9x12 Nagel.
No. S288 7x7 side crank.

MISCELLANEOUS.

110-VOLT INCANDESCENT DYNAMOS.

No. SM145 2 T.-H. 500-light, 110-volt, direct connected.
No. SM146 1 50-light Edison dynamo.
No. SM147 1 25-light C. & C. dynamo.
No. SM148 1 250-light Edison dynamo.
No. SM149 1 100-light Rockford dynamo.
No. SM150 2 500-light T.-H. dynamos.
No. SM151 1 150-light Eddy dynamo.
No. SM152 1 100-light, 110-volt, Weston dynamo.
No. SM153 1 250-light Hawkeye dynamo.

500-VOLT GENERATORS.

No. SM154 1 No. 8 T.-H., 75 K. W., 500-volt.

550-VOLT GENERATORS.

No. SM155 2 type U. S. Westinghouse bi-polar; 80 K. W.; 350 revolutions, 550-volt.

ALTERNATORS.

No. SM156 1 50 K. W.; 1,000-volt; Westinghouse; complete with switchboard, exciter, one extra brand new armature for exciter, two field coils.
No. SM157 1 600-light National; exciter on shaft.
No. SM158 1 500-light T.-H. alternator; 1,000-volt.
No. SM159 1 600-light T.-H.; 2,040-volt.
No. SM160 2 25 K. W. Westinghouse Alternators; 1,150-volt; 16,000 alternations; switchboard and instruments.

ARC DYNAMOS.

No. SM161 25-light; 2,000 c. p. low tension; one extra armature for same.
No. SM162 3 50-light; 2,000 c. p.; T.-H.
No. SM163 1 No. 8; 60-light; arc; 2,000 c. p.; Wood.
No. SM164 1 80-light Western Electric dynamo.
No. SM165 20-light, 2,000 c. p. Sperry; switchboard and instruments.

MOTORS.

No. SM166 1 20 H. P., 500-volt, Ft. Wayne.
No. SM167 1 3 H. P., 500-volt., T.-H.
No. S168 1 McGowan condenser, steam cyl., 8-inch.
No. S169 1 hoisting engine and boiler, 6x 12, made by Kendall & Bro.

PUMPS.

We carry over 350 different makes and sizes. Write for complete list.

BOILERS.

All kinds of horizontal, tubular, fire-box, etc. Our complete list on application.

SUPPLIES.

We carry all kinds of shafting, hangers, couplings, pulleys, belting; in fact, anything in the line of supplies.

American Telephone Practice

By KEMPSTER B. MILLER, M. E.

CONTENTS.

CHAPTER I.—History and Principles of the Magneto Telephone. II.—History and Principles of the Battery Transmitter. III.—The Telephone Receiver. IV.—Carbon Transmitters. V.—Induction Coils. VI.—Batteries. VII.—Calling Apparatus. VIII.—The Automatic Shunt. IX.—The Hook Switch, and Circuits of a Telephone. X.—Commercial Calling Apparatus. XI.—The Telephone Relay or Repeater. XII.—Self-Induction and Capacity. XIII.—Telephone Lines. XIV.—Simple Switchboards for Small Exchanges. XV.—Listening and Ringing Apparatus for Switchboards. XVI.—Self-Restoring Switchboard Drops. XVII.—Complete Switchboards for Small Exchanges. XVIII.—Lamp Signal Switchboards. XIX.—The Multiple Switchboard. XX.—Transfer Systems. XXI.—Common-Battery Systems. XXII.—House Systems. XXIII.—Protective Devices. XXIV.—Distributing Boards. XXV—Party Lines Non-Selective. XXVI.—Party Lines. Step by Step Selective Signaling. XXVII.—Selective Signaling by Strength and Polarity. XXVIII.—Harmonic Systems of Selective Signaling. XXIX.—Wire for Telephone Use. XXX.—Pole Line Construction. XXXI.—Overhead Cable Construction. XXXII.—Underground Cable Construction. XXXIII.—Testing. XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

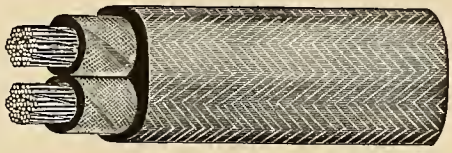
518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

INSULATED RUBBER WIRES AND CABLES.



JOHN A. ROEBLING'S SONS CO.

WORKS AT TRENTON, N. J.

Success

Comes only to those telephone exchanges which use the BEST material. If you use our goods success is assured.

We can supply EVERYTHING USED WITH TELEPHONES.

No order too small for attention or too large for our capacity. Rapid deliveries our rule, and each order filled with care. Large stocks always on hand.

Telephones, every style and grade. Long and short backboards. Elegant finish and design. Prices that will suit. Hard rubber receivers. Oak or walnut woodwork. New ideas in magneto bells. Each instrument guaranteed.

All kinds of telephone supplies. New parts for old telephones. Double-pole receivers.

Electricians' tools. Lightning arresters, carbon and fuse. Extension bells—standard and bridging. Circuit closers. Transmitters of various styles. Repeating coils, induction coils, construction material of all kinds.

NEW EDITION.

THE

TELEPHONE HAND-BOOK

BY HERBERT LAWS WEBB.

Containing a Chapter on "Recent Progress" which brings this practical book UP-TO-DATE.

The General Principles of

Telephony

Are Now Well Established.

The Telephone Hand-Book deals with them.
No matter what kind of Telephones and Switching Apparatus you use, or expect to use,

YOU WILL FIND IT USEFUL.

It is a Practical Book
for the Practical Man
and for the Student.

PRICE $1.00 POSTPAID.

ELECTRICIAN PUBLISHING CO.,

The Hewitt-Lindstrom Motor Co.

Have on exhibition a complete line of their commercial vehicles, including

Omnibus, Delivery Wagon, Brake, Runabout and Stanhope.

These vehicles have a **perfect motor suspension** and a **flexible running** gear, giving them the most **flexible perch** of any vehicle on the market.

Intending purchasers of Automobiles are cordially invited to ride and judge the superior qualities of these vehicles by inspection and tests.

The Hewitt-Lindstrom Motor Co.,

General Office, 75 North Clinton St., CHICAGO, ILL.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current, How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator; Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

A PRETTY STORY.
Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-band machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

ROCKWOOD MANUFACTURING COMPANY, *Paper Pulley Sales Dept., 330 So. Pennsylvania Street, Indianapolis, Indiana, U. S. A.*

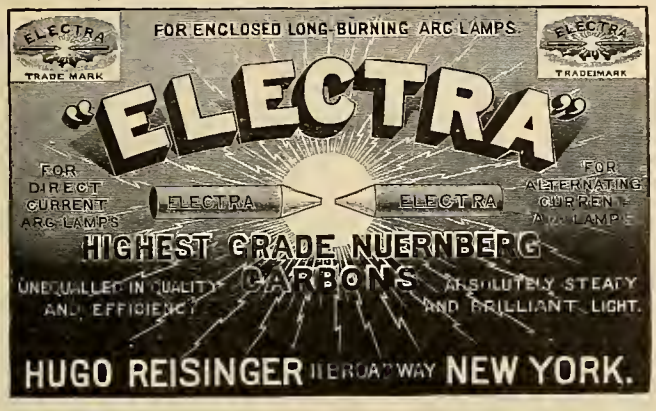
The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

MICA—India and Amber, all Sizes and Patterns.

MICABOND—Plates, Segments, Rings, Tubes, Slots, Cloth, Paper and Flexible.

CHAMPION CLOTH—Bond, Ropes and Express Paper.

CRYSTAL VERY ELASTIC. TRADE MARK CRYSTAL **VARNISH.** HARD FINISH.

CHAMPION INSULATING PAINTS (Blacks), Four Kinds. Also Other Insulating Materials.

Our Careful and Persistent Growth is Proof of the Quality of our Insulations. Prices and Quality Guaranteed. Write Us.

CHICAGO MICA CO.,
Main Office and Factory, VALPARAISO, IND.

New York Office, No. 59 W. 65th St., New York, N. Y.

DE DION-BOUTON "Motorette" COMPANY.

Boston Office, No. 268 Massachusetts Ave., Boston, Mass.

Sole Agents and Licensed Manufacturers in the United States of America for

De Dion-Bouton & Co., FRANCE.

Motors, Motorcycles, Motorettes.

Our New York Type Motorette, Weight 700 pounds. Capacity 3 Persons. Price $1,200.00.

SIMPLICITY, FLEXIBILITY, LIGHTNESS, STRENGTH, RELIABILITY, EASILY OPERATED, PERFECTLY CONTROLLED, ABSOLUTELY SAFE, ABSENCE OF ALL OIL AND DIRT, ECONOMY.

Not an EXPERIMENT, but a TRIED and PROVED SUCCESS.

Over 20,000 DE DION-BOUTON MOTORS operating Motorcycles and Motorettes.

GENERAL OFFICES AND FACTORY: CHURCH LANE AND 37TH ST., BROOKLYN, N. Y.

De Dion Motor Supplies and Batteries Always in Stock.

COLORED LACQUERS,
FOR INCANDESCENT LAMPS.
In brilliant rainbow colors. Easily applied. Will not peel or fade.
SAMPLES FREE.

DEAD BLACK LACQUER,
FOR METAL WORK.
Most Satisfactory Imitation of Bauer-Barff in the Market.
WRITE TO US.

Manufacturers PEERLESS Direct-Current Desk and Ceiling Fan Motors, Transformers, Incandescent Lamps.

Bretheren, I say unto You

WHY

Throw away 85% of your coal when you can sell it for three times its cost by putting in our system of UNDERGROUND EXHAUST STEAM HEATING MAINS.

It is common for electric companies who are now operating EXHAUST STEAM HEATING PLANTS to pay their entire coal and labor bills for the year and 6% on investment for steam mains from sale of exhaust steam. Why cant you do the same? Write for our pamphlet. Mention Western Electrician.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,

PROPOSALS FOR ELECTRIC LIGHT.

NOTICE IS HEREBY GIVEN that bids will be received by the City Council of the City of Billings, State of Montana, until 6 p. m. on Tuesday, October 2, 1900 at the office of the City Clerk, for the furnishing of fifty or more electric street lights in the City of Billings for a period extending from July 1, 1901, to March 1, 1907, according to specifications on file in the office of the City Clerk of said City, copies of which can be had upon application to the City Clerk. A certified check for $1,000 must accompany each bid, to be returned to the parties whose bids are rejected, and to the party receiving the contract on the furnishing of required bonds. The city reserves the right to reject any and all bids, and the successful bidder acquires the right under the City Ordinances to carry on a general electric lighting business in the City of Billings.

Dated August 28, 1900.

J. B. HERFORD, City Clerk,
Billings, Montana.

To Represent Manufacturers.

A gentleman of several years' experience in the electrical business and large acquaintance with the supply trade of the country, desiring to make a change, would like to represent several manufacturers in New York and the Eastern States. Good reference can be furnished. Address **"H. M.,"** care Electrical Review, New York, N. Y.

WANTED.

Electrical engineer competent to design small, efficient motors for automobiles. One with experience in this line or in street car work preferred. Applicants will please state experience in full and salary expected. Address "ELECAUTO," care Western Electrician, 510 Marquette Bldg., Chicago.

NOTICE TO CONTRACTORS.

Sealed proposals will be received by the Light Committee of the City of Sidney, Ohio, for the lighting of the streets of Sidney with arc lights of 2000 candle power, with a minimun of seventy-five lights, for the terms of ten, fifteen and twenty years, commencing August 1, 1901. Proposals will be received until 12 o'clock noon, September 22, 1900.

The right is reserved to reject any or all bids.

FRANKLIN MUMFORD,
Chairman Light Committee,
City of Sidney, Ohio.

FOR SALE.

An electric-light plant in a growing Indian Territory town of 4,500 population; perpetual franchise; plant has just been installed and is paying 10 per cent.; there is large demand for lights, and by Jan. 1st plant will be paying 20 per cent. Will take part cash and give time on balance, or will sell a part interest; good reason for selling. Address L. M. L., care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

Man experienced in the assembling and testing of direct-current dynamos and motors. Answer, giving experience and salary expected, addressing "MOTOR," care Western Electrician, 510 Marquette Building, Chicago.

WANTED.

Competent and practical man desires position as chief engineer or superintendent of central station. At liberty after October 1. Address "ENGINEER," care Western Electrician, 510 Marquette Bldg., Chicago.

JUST OUT.

220-Volt Motors.

1 1 H. P. Edison, self-oiler.
2 1 H. P. E. & C., new, self-oilers, M. P., slow speed.
1 3 H. P. Crocker Wheeler, self-oiler, slow speed.
1 3 H. P. Gen. Elec., type I. B., self-oiler.
1 3 H. P. C. & C., self-oiler.
2 3 H. P. Card, slow speed, self-oilers.
1 6 H. P. Eddy, ring type, self-oiler.
1 5 H. P. Westinghouse, self-oiler.
1 7½ H. P. Roth, self-oiler.
1 7½ H. P. Eddy, self-oiler.
1 7½ H. P. Edison, self-oiler.
1 8 H. P. General Electric multipolar, self-oiler.
1 10 H. P. Keystone, self-oiler.
1 10 H. P. Elekmeyer, elevator motor, with controller.
1 10 H. P. Lundell, self-oiler.
1 12 H. P. Lundell, 10 K. W., multipolar, self-oiler, slow speed.
1 15 H. P. Eddy, self-oiler, new arm't.
1 18 H. P. Edison, self-oiler.

220 Volt Motors—Continued.

1 30 H. P. Edison, 25 K. W., self-oiler.
1 50 H. P. E. & C., multipolar, slow speed.
1 50 H. P. Northern, M. P., self-oiler, newly rewound throughout.
1 75 H. P. Sprague, self-oiler, new arm't.
1 225 H. P. Crocker-Wheeler, M. P.

500-Volt Motors.

1 ¼ H. P. Detroit, series wound.
1 1 H. P. Jeuney, self-oiler.
1 1 H. P. Crocker-Wheeler, self-oiler, slow speed.
1 1 H. P. Lundell, self-oiler, slow speed.
1 1 H. P. C. & C., self-oiler.
1 3 H. P. Toledo, self-oiler.
1 3 H. P. Hobart, self-oiler.
1 3 H. P. Jeuney, self-oiler.
2 3½ H. P. Rockford, ironclad, self-oilers.
1 10 H. P. Eddy, self-oiler, multipolar.
1 10 H. P. C. & C.
1 10 H. P. C. & C., self-oiler.
1 10 H. P. Commercial, self-oiler.
1 10 H. P. Card, M. P., self-oiler, slow sp.
1 15 H. P. Eddy, self-oiler.
1 18 H. P. Thomson-Houston, self-oiler.
2 18 H. P. Edison, 15 K. W., self-oilers.
2 18 H. P. C. & C., self-oilers
1 20 H. P. Commercial, self-oiler.
1 20 H. P. Card, self-oiler.
1 20 H. P. T.-H., self-oiler, D. 25.
1 30 H. P. Edison, 25 K. W., self-oiler.
1 35 H. P. Jeuney, self-oiler.
1 40 H. P. Jeuney, self-oiler.
1 40 H. P. Mather, self-oiler.
1 60 H. P. Edison, 45 K. W., self-oiler.

Alternating-Current Motors.

SINGLE PHASE.

1 ¼ H. P. Stanley, 100 volts, 16000 alternations, single-phase.
2 1 H. P. Ft. Wayne, 100 v., 125 cycle, self-oilers, single-phase.
1 2½ H. P. Ft. Wayne, 100 volts, self-oiler, single-phase.
1 5 H. P. Wagner, single-phase, 60 cycle, 200 volts.

Alternating Current Motors.

MULTIPHASE.

1 1 H. P. Westinghouse, self-oiler, 2-phase, 60-cycle, 100 volts.
1 10 H. P. Gen. Electric, self-oiler, 2-phase, type, 8-10-900, Form A, 60-cycle, 110 volts.

Automobiles.

1 Wood's electric runabout, with top, carries 2 persons, practically new.
1 Electric open phaeton, seats 3 persons, fine condition.
1 Electric "trap," carries 4 persons, new.

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅞-inch shafting.
No. S10 39 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6¾-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅝x4⅞ flanged couplings.
No. S16 1 60x38x6⅝ in. double arm drive pulley.
No. S17 4 60x16x6⅝ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅝ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x42x8 in. iron pulley.
No. S21 2 6⅝x20 chain oiling pillow blocks.
No. S22 5 6⅝x15 chain oiling pillow blocks.
No. S23 1 4⅞x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 15 in. spur gear.
No. S27 10 8x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16. 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.
No. S328 2 25-light Ball arc dynamos.
No. S329 2 60x16 horizontal tubular boilers.
No. S330 2 66x16 horizontal tubular boilers.
Shafting, hangers, couplings, etc.

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeahm Bros.
No. S67 12x20 horizontal slide valve.
No. S205 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x15 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Cumner.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.
No. S208 17¾x24 pr. auto. Williams, coupled.
No. S82 18x30 250 H. P.
No. S83 20x22 Corliss.
No. S84 20x36 Corliss.
No. S85 20x42 Corliss.
No. S86 26x48 Corliss.
No. S87 20x24 horizontal, box bed.
No. S209 66x20 Chandler & Taylor.
No. S210 40 H. P. Rice automatic.
No. S211 25 H. P. Chandler & Taylor.
No. S88 22x42x48 Allis tandem condensing.
No. S89 14x20 Russell automatic.
No. S90 10 H. P. Davis & Rankin.
No. S91 10 H. P. slide valve.
No. S92 40 H. P. slide valve.
No. S93 60 H. P. slide valve.
No. S94 20 H. P. Milhorn.
No. S95 No. 874 Racine automatic, 9-inch stroke.
No. S96 80 H. P. Farquhar.
No. S97 No. 1 Russell high-speed automatic.
No. S98 12 H. P. Giant.
No. S99 14 H. P. Giant.
No. S100 6 H. P. automatic Westinghouse.
No. S101 10 H. P. gas engine.
No. S102 13 H. P. Dayton gasoline.
No. S103 35 H. P. upright.
No. S104 40 H. P. Otto gas.
No. S105 50 H. P. Otto gas.
No. S106 19 H. P. Lewis gasoline.
No. S107 50 H. P. Raymond gasoline.
No. S172 68 H. P. Atlas.
No. S173 10x20 side crank.
No. S174 Otis furnace hoist engine, 2 cyl., 8x10.
No. S177 13x16 Twin engines, tandem bed.
No. S179 7x14 Ames cylinder.
No. S273 16x30 balance wheel, 14 feet diam.
No. S274 1 H. P. gasoline.
No. S275 16½x30 Buckeye.
No. S276 6x12 horizontal slide valve.
No. S277 14x28 horizontal slide valve.
No. S278 12x24 marine oscillating.
No. S279 30x30 slide valve.
No. S280 36x42 slide valve.
No. S281 24x30 slide valve.
No. S282 10x15 center crank.
No. S283 6x8 box bed, side crank.
No. S284 16x36 Sinker & Davis.
No. S285 9x9 upright, center crank.
No. S286 9x14 horizontal, side crank
No. S287 9x12 Nagel.
No. S288 7x7 side crank.

No. SM146 1 50-light Edison dynamo.
No. SM147 1 25-light C. & C. dynamo.
No. SM148 1 250-light Edison dynamo.
No. SM149 1 100-light Rockford dynamo.
No. SM150 2 500-light T.-H. dynamos.
No. SM151 1 150-light Eddy dynamo.
No. SM152 1 100-light, 110-volt, Weston dynamo.
No. SM153 1 250-light Hawkeye dynamo.

500-VOLT GENERATORS.

No. SM154 1 No. 8 T.-H., 75 K. W., 500-volt.

550-VOLT GENERATORS.

No. SM155 2 type U. S. Westinghouse bi-polar; 80 K. W.; 350 revolutions, 550-volt.

ALTERNATORS.

No. SM156 1 50 K. W.; 1,000-volt; Westinghouse; complete with switchboard, exciter, one extra braid new armature for exciter, two field coils.
No. SM157 1 500-light National; exciter on shaft.
No. SM158 1 500-light T.-H. alternator; 1,000-volt.
No. SM159 1 600-light T.-H.; 2,040-volt.
No. SM160 2 25 K. W. Westinghouse Alternators; 1,150-volt; 16,000 alternations; switchboard and instruments.

ARC DYNAMOS.

No. SM161 25-light; 2,000 c. p. low tension; one extra armature for same.
No. SM162 3 50-light; 2,000 c. p.; T.-H.
No. SM163 1 No. 8; 60-light; arc; 2,000 c. p.; Wood.
No. SM164 1 80-light Western Electric dynamo.
No. SM165 20-light, 2,000 c. p. Sperry; switchboard and instruments.

MOTORS.

No. SM166 1 20 H. P., 500-volt, Ft. Wayne.
No. SM167 1 3 H. P., 500-volt., T.-H.
No. SM168 1 McGowan condenser, steam cyl., 8-inch.
No. SM169 1 hoisting engine and boiler, 6x 12, made by Kendall & Bro.

PUMPS.

We carry over 350 different makes and sizes. Write for complete list.

BOILERS.

All kinds of horizontal, tubular, fire-box, etc. Our complete list on application.

SUPPLIES.

We carry all kinds of shafting, hangers, couplings, pulleys, belting; in fact, anything in the line of supplies.

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

WM. R. HORNER,
Philadelphia, Pa.

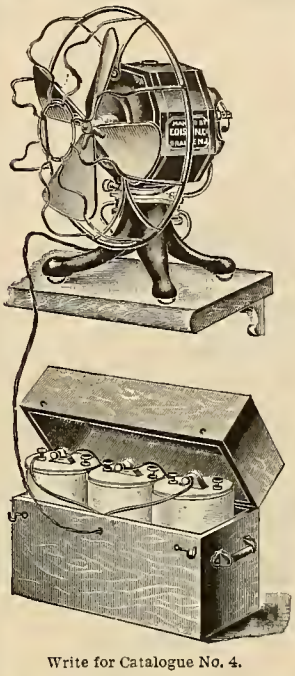
EDISON

BATTERY FAN OUTFITS
...WITH...
EDISON LALANDE CELLS

are the only efficient battery fan outfits on the market. Invaluable for the sick room.

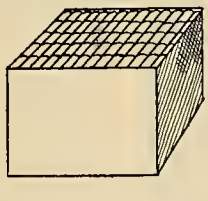


Write for Catalogue No. 4.

EDISON MFG. CO.,

135 5TH AVE., COR. 20TH ST.,
NEW YORK.

These 28 spools containing 91 lbs. of No. 36 single silk-covered wire will cost you $2.43 net at 50, 10, 10, 5 off list; and there is sufficient wire on these 28 spools to wind 1,000 500-ohm bridging-bell magnets. Your winding labor will cost you at least $5 additional, making a total cost of your own 1,000 magnets finished at factory, $2.48.



The above box contains 1,000 "Duplex" magnet windings. Each winding is made up of No. 36 wire, 500 ohms per winding, and each winding has 12 per cent. more turns than there are in the ordinary wound magnet. Price, $2.18.50 net. This is 10 per cent. less than your wire bill and we charge nothing for winding.

JAMES LEFFEL & CO., Springfield, Ohio, U. S. A.

THE TELEPHONE HAND-BOOK
NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.
BY HERBERT LAWS WEBB.
Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."
160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.
Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."
No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated. Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connectioos of No. 8 Brush Dynamo; Circuits of Compound Wound Constaot Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Curreot Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlliog Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket: Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamioation; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Coqverters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X; Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

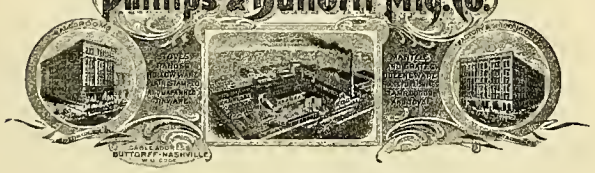
FAN MOTORS

OUR SELF-STARTING SINGLE-PHASE A. C. MOTORS AND WHAT A CUSTOMER THINKS OF THEM.

Phillips & Butterff Mfg. Co.



Nashville Tenn Jan 1, 1900

Mr. Jas Slaughter.

Dear Sir— The four Wagner Motors you installed in our Park shop last Summer, have proven satisfactory in every respect, not requiring any attention whatever, and the current consumption has been remarkably low, exceeding our most sanguine expectations.

Yours Truly

Phillips & Butterff Mfg Co.

O K Butterff

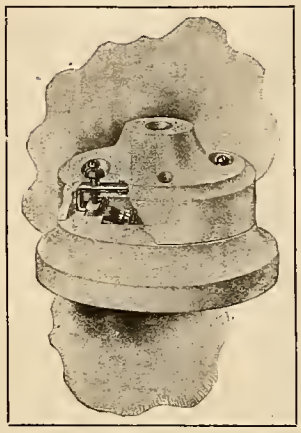
GENERAL OFFICES AND FACTORY: CHURCH LANE AND 37TH ST., BROOKLYN, N. Y.

De Dion Motor Supplies and Batteries Always in Stock.



P. K. ROSETTES.

2 KINDS IN 1.

Cap attached to base by quarter-turn, or cap rigidly fixed to base by screws.

A quarter-turn of the cap of the P. K. Rosette attaches it to the base by means of extra strong spring contact-arms, which lock the cap sufficiently for general work. Where rosettes are subject to vibrations, the lock-screws in the cap may be readily tightened (see illustration No. 811), so that the contact-arm connection is practically one piece.

The parts are few and strong, and the porcelain is of the ***highest grade and finish.*** The design is plain, and will not catch or hold the dust.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,

3 350-light Edison, 20 K. W., self-oilers.
1 360-light Duplex multipolar, self-oiler, compound, slow speed.
1 400-light Wood, M. P., self-oiler, 25 K. W.
1 450-light Edison, 25 K. W., self-oiler.
1 450-light Rockford, self-oiler.
4 540-light Edison, 30 K. W., self-oilers, compound.
1 600-light Eickmeyer.
1 700-light Siemens & Halske, 40 K. W., multipolar, slow speed.
2 700-light Westinghouse, 10-pole, slow speed, 40 K. W., self-oilers, new.
4 800-light Edison, 45 K. W., self-oilers.
1 1350-light Waddell-Enz, 80 K. W., M. P., for direct connection.

220-Volt Generators.

1 7½ K. W. General Electric, multipolar, self-oiler.
1 9 K. W. Lundell, self-oiler.
1 10 K. W. Lundell, self-oiler, multipolar, slow speed.
1 12 K. W. Eddy, self-oiler, new arm't.
1 18 K. W. Edison, compound, self-oiler.
1 25 K. W. Edison, self-oiler.
1 40 K. W. E. & O., multipolar, slow speed.
1 200 K. W. Crocker-Wheeler multipolar, slow speed, practically new.

500-Volt Generators.

2 15 K. W. Edison, self-oilers.
1 15 K. W. T.-H., self-oiler.
1 25 K. W. T.-H., self-oiler, D. 25, compound.
1 25 K. W. Edison, self-oiler.

500-Volt Generators—Continued.

1 30 K. W. Jenney, self-oiler.
1 35 K. W. Jenney, self-oiler, compound.
1 35 K. W. Mather, self-oiler.
3 45 K. W. Edison, compound, self-oilers.
1 75 K. W. Westinghouse, Kodak set Westinghouse generator and Westinghouse comp. engine, 14x24x14, all complete, fine.
1 150 K. W. Detroit (Rae) multipolar, compound, self-oiler, new armature.

Alternating Generators.

1 350-light Thomson-Houston, A. 18, comp. wound.
1 600-light Bain, 30 K. W., self-oiler, new toothed armature.
2 600-light Thomson-Houston, A. 6, 30 K. W., self-oilers.
1 600-light Thomson-Houston, 30 K. W., two-phase.
1 600-light T.-H., 30 K. W., slotted armature, compound, self-oiler.
2 650-light Thomson-Houston, A. 35, self-oilers, composite wound.
2 750-light Westinghouse, self-oilers, 37½ K. W.
1 1000-light Wood, 60 K. W., self-oiler, toothed armature, comp. wound.
1 1200-light Westinghouse, 60 K. W., self-oiler, toothed arm't.
1 1200-light T.-H., 60 K. W., self-oiler, toothed armature.
1 1200-light General Electric, A. 60, composite wound, toothed armature, self-oiler.
2 1300-light T.-H., A. 70, 1100 volts, self-oilers, compound wound.
1 6000-light Westinghouse, 300 K. W., toothed armature, composite wound, self-oiler.

Arc Dynamos.

1 20-light 2000 C. P. Western Electric.
1 30-light 2000 C. P. Western Electric, self-oiler.
1 30-light 2000 C. P. Brush, No. 7.

Arc Dynamos—Continued.

1 35-light 2000 C. P. T.-H., ring armature.
1 40-light 2000 C. P. Wood, No. 7.
2 40-light 2000 C. P. Western Electric, s. o.
1 45-light 1200 C. P. T.-H., M. 12, ball arm.
2 45-light 1200 C. P. Brush, No. 7, Steubenrausch commutator.
1 50-light 1200 C. P. T.-H., L. D. 12.
1 50-light 2000 C. P. T.-H., M. D., 2, self-oiler, ring armature.
1 60-light 2000 C. P. Brush, No. 7½.
2 60-light 2000 C. P. West. Elec., self-oilers.
1 60-light 2000 C. P. Westinghouse.
2 60-light 2000 C. P. Wood, No. 8.
1 65-light 2000 C. P. Brush, No. 8, new armature.
2 75-light 1200 C. P. Wood.
2 75-light 1200 C. P. Standard, self-oilers.
2 75-light 2000 C. P. Westingh'se, self-oiler.
3 125-light 1200 C. P. Excelsior, latest type, self-oilers, fine.

220-Volt Motors.

1 1 H. P. Edison, self-oiler.
2 1 H. P. E. & C., new, self-oilers, M. P., slow speed.
1 3 H. P. Crocker Wheeler, self-oiler, slow speed.
1 3 H. P. Gen. Elec., type I. B., self-oiler.
1 3 H. P. C. & C., self-oiler.
2 3 H. P. Card, slow speed, self-oilers.
1 6 H. P. Eddy, ring type, self-oiler.
1 5 H. P. Westinghouse, self-oiler.
1 7½ H. P. Both, self-oiler.
1 7½ H. P. Eddy, self-oiler.
1 7½ H. P. Edison, self-oiler.
1 8 H. P. General Electric multipolar, self-oiler.
1 10 H. P. Keystone, self-oiler.
1 10 H. P. Eickmeyer, elevator motor, with controller.
1 10 H. P. Lundell, self-oiler.
1 12 H. P. Lundell, 10 K. W., multipolar, self-oiler, slow speed.
1 15 H. P. Eddy, self-oiler, new arm't.
1 18 H. P. Edison, self-oiler.

220 Volt Motors—Continued.

1 30 H. P. Edison, 25 K. W., self-oiler.
1 50 H. P. E. & C., multipolar, slow speed.
1 50 H. P. Northern, M. P., self-oiler, newly rewound throughout.
1 75 H. P. Sprague, self-oiler, new arm't.
1 225 H. P. Crocker-Wheeler, M. P.

500-Volt Motors.

1 ¼ H. P. Detroit, series wound.
1 1 H. P. Jenney, self-oiler.
1 1 H. P. Crocker - Wheeler, self-oiler, slow speed.
1 1 H. P. Lundell, self-oiler, slow speed.
1 1 H. P. C. & C., self-oiler.
1 3 H. P. Toledo, self-oiler.
1 3 H. P. Hobart, self-oiler.
1 3 H. P. Jenney, self-oiler.
2 3½ H. P. Rockford, ironclad, self-oilers.
1 10 H. P. Eddy, self-oiler, multipolar.
1 10 H. P. C. & C.
1 10 H. P. C. & C., self-oiler.
1 10 H. P. Commercial, self-oiler.
1 10 H. P. Card, M. P., self-oiler, slow sp.
1 15 H. P. Eddy, self-oiler.
1 18 H. P. Thomson-Houston, self-oiler.
2 18 H. P. Edison, 15 K. W., self-oilers.
2 18 H. P. C. & C., self-oilers
1 20 H. P. Commercial, self-oiler.
1 20 H. P. Card, self-oiler.
1 30 H. P. T.-H., self-oiler, D. 25.
1 30 H. P. Edison, 25 K. W., self-oiler.
1 35 H. P. Jenney, self-oiler.
1 40 H. P. Jenney, self-oiler.
1 40 H. P. Mather, self-oiler.
1 60 H. P. Edison, 45 K. W., self-oiler.

Alternating-Current Motors.

SINGLE PHASE.

1 ¼ H. P. Stanley, 100 volts, 16000 alternations, single-phase.
2 1 H. P. Ft. Wayne, 100 v., 125 cycle, self-oilers, single-phase.
1 2½ H. P. Ft. Wayne, 100 volts, self-oiler, single-phase.
1 5 H. P. Wagner, single-phase, 60 cycle, 200 volts.

Alternating Current Motors.

MULTIPHASE.

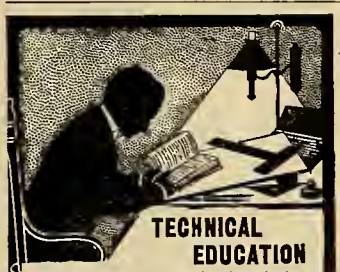
1 1 H. P. Westinghouse, self-oiler, 2-phase, 60-cycle, 100 volts.
1 10 H. P. Gen. Electric, self-oiler, 3-phase, type, 8-10-900, Form A, 60-cycle, 110 volts.

Automobiles.

1 Wood's electric runabout, with top, carries 2 persons, practically new.
1 Electric open phaeton, seats 3 persons, fine condition.
1 Electric "trap," carries 4 persons, new.

TRANSFORMERS, METERS AND ARC LAMPS.

NOTICE.—All machines are actually in stock ready for prompt delivery. All machines are guaranteed. Write for particulars and send for MONTHLY BARGAIN SHEET with net cash price.



TECHNICAL EDUCATION

For the purpose of quickly introducing and demonstrating the superior merits of its courses, the Trustees of THE AMERICAN SCHOOL OF CORRESPONDENCE have voted to award a

FREE SCHOLARSHIP IN
Electrical, Steam, Mechanical, Marine or Locomotive
ENGINEERING,

including a complete course in MECHANICAL DRAWING, to a few well-recommended, ambitious men in each manufacturing plant in the United States.

The holders of these FREE SCHOLARSHIPS will be asked to answer any inquiries as to the benefit and value of the instruction and also recommend the School to their friends, thus establishing an endless chain of enthusiastic students who will advertise the School more thoroughly than tons of printed matter or an army of agents. Application blank on request (mention WESTERN ELECTRICIAN).

American School of Correspondence,
(Chartered by the Commonwealth of Massachusetts)
Boston, Mass. U. S. A.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

WM. R. HORNER,
Philadelphia, Pa.

$12 to $70, in Small Monthly Installments, pays for a
Salary-Raising Education
In Electrical Engineering, Electric Light and Power, Telephony, Telegraphy, Steam, Mechanical, and Civil Engineering.

ESTABLISHED 1891. CAPITAL, $1,500,000.

BARGAINS in ELECTRICAL MACHINES.

The following list of thoroughly overhauled machines are in stock and ready for prompt delivery.

DYNAMOS—
110-Volt Incandescent.

One 12-light Elbridge.
One 50-light Nowotny, new.
One 100-light Daft.
One 250-light U. S.
One 350-light Davis.
One 800-light G. E.
One 1,800-light Ft. Wayne, new.

DYNAMOS—ARC.

One Brush, 1-light, 3,000 c. p.
One Brush, 3-light, 2,000 c. p.
One Amer. Wood, 20-light, 2,000 c. p.
One West. Elec., 30-light, 2,000 c. p.
One Ft. Wayne Wood, 35-light, 1,200 c. p.
One T. H. L. D., 35-light, 2,000 c. p.

ALTERNATORS.

One 3A Slattery.
One A60 G. E.

STEWART ELECTRICAL CO.,
S. E. Cor. Fifth and Sycamore,
CINCINNATI, O.

GENERATORS.

One Wood b. p., 500 v., 45 k. w.
One T.-H. m. p. 75, 500 v., 75 k. w.
One Edison b. p., 500 v., 100 k. w.

110-VOLT MOTORS.

One Diehl, ½ h. p.
One Edison, ¾ h. p.
One Elbridge, ¾ h. p.
One Card, 1 h. p.
One Sprague, 1 h. p.
One Nowotny, 3 h. p.
One Daft, 10 h. p.
One U. S., 20 h. p.
One Q. C., 28 h. p.

220-VOLT MOTORS.

One Nowotny, 1 h. p., new.
One Nowotny, 1 h. p.
One Davis, 5 h. p.
One Daft, 10 h. p.
One E. R. & C. C., 10 h. p.
One Edison b. p., 15 h. p.

500-VOLT MOTORS.

One Davis, 20 h. p.
One Brush, 25 h. p.
One Wood b. p., 60 h. p.
One T.-H. m. p. 15, 90 h. p.
One Edison, 100 k. w., 120 h. p.

MACHINERY AND SUPPLIES
AT BARGAIN PRICES.
FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6¾-inch shafting.
No. S10 29 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6¾-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6¾x4¾ flanged couplings.
No. S16 1 60x38x6⅜ in. double arm drive pulley.
No. S17 4 60x16x6⅜ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅜ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅜ in. iron pulley.
No. S20 1 14x43x8 in. iron pulley.
No. S21 2 6⅜x20 chain oiling pillow blocks.
No. S22 5 6⅜x15 chain oiling pillow blocks.
No. S23 1 4⅜x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 15 in. spur gear.
No. S27 10 8x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16. 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.
No. S328 2 25-light Ball arc dynamos.
No. S329 2 60x16 horizontal tubular boilers.
No. S330 2 66x16 horizontal tubular boilers.
Shafting, hangers, couplings, etc.

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeahm Bros.
No. S67 12x20 horizontal slide valve.
No. S205 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x15 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Cumner.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.
No. S208 17¾x24 pr. auto. Williams, coupled.
No. S82 18x30 250 H. P.
No. S83 20x22 Corliss.
No. S84 20x36 Corliss.
No. S85 20x42 Corliss.
No. S86 26x48 Corliss.
No. S87 20x24 horizontal, box bed.
No. S209 66x20 Chandler & Taylor.
No. S210 40 H. P. Rice automatic.
No. S211 35 H. P. Chandler & Taylor.
No. S88 22x42x48 Allis tandem condensing.
No. S89 14x20 Russell automatic.
No. S90 10 H. P. Davis & Rankin.
No. S91 10 H. P. slide valve.
No. S92 40 H. P. slide valve.
No. S93 60 H. P. slide valve.
No. S94 20 H. P. Milborn.
No. S95 No. 874 Racine automatic, 9-inch stroke.
No. S96 80 H. P. Farquhar.
No. S97 No. 1 Russell high-speed automatic.
No. S98 12 H. P. Giant.
No. S99 14 H. P. Giant.
No. S100 6 H. P. automatic Westinghouse.
No. S101 10 H. P. gas engine.
No. S102 13 H. P. Dayton gasoline.
No. S103 35 H. P. upright.
No. S104 40 H. P. Otto gas.
No. S105 50 H. P. Otto gas.
No. S106 19 H. P. Lewis gasoline.
No. S107 50 H. P. Raymond gasoline.
No. S172 68 H. P. Atlas.
No. S173 10x20 side crank.
No. S174 Otis furnace hoist engine, 2 cyl., 8x10.
No. S177 13x16 Twin engines, tandem bed.
No. S179 7x14 Ames cylinder.
No. S273 16x30 balance wheel, 14 feet diam.
No. S274 1 H. P. gasoline.
No. S275 16½x30 Buckeye.
No. S276 6x12 horizontal slide valve.
No. S277 14x28 horizontal slide valve.
No. S278 12x24 marine oscillating.
No. S279 30x30 slide valve.
No. S280 36x42 slide valve.
No. S281 24x30 slide valve.
No. S282 10x15 center crank.
No. S283 6x8 box bed, side crank.
No. S284 16x36 Sinker & Davis.
No. S285 9x9 upright, center crank.
No. S286 9x14 horizontal, side crank
No. S287 9x12 Nagel.
No. S288 7x7 side crank.

MISCELLANEOUS.

110-VOLT INCANDESCENT DYNAMOS.

No. SM145 2 T.-H. 600-light, 110-volt, direct connected.
No. SM146 1 50-light Edison dynamo.
No. SM147 1 25-light C. & C. dynamo.
No. SM148 1 250-light Edison dynamo.
No. SM149 1 100-light Rockford dynamo.
No. SM150 2 500-light T.-H. dynamos.
No. SM151 1 150-light Eddy dynamo.
No. SM152 1 100-light, 110-volt, Weston dynamo.
No. SM153 1 250-light Hawkeye dynamo.

500-VOLT GENERATORS.

No. SM154 1 No. 8 T.-H., 75 K. W., 500-volt.

650-VOLT GENERATORS.

No. SM155 2 type U. S. Westinghouse bi-polar; 80 K. W.; 350 revolutions, 550-volt.

ALTERNATORS.

No. SM156 1 60 K. W.; 1,000-volt; Westinghouse; complete with switchboard, exciter, one extra brand new armature for exciter, two field coils.
No. SM157 1 500-light National; exciter on shaft.
No. SM158 1 500-light T.-H. alternator; 1,000-volt.
No. SM159 1 600-light T.-H.; 2,040-volt.
No. SM160 2 25 K. W. Westinghouse Alternators; 1,150-volt; 16,000 alternations; switchboard and instruments.

ARC DYNAMOS.

No. SM161 25-light; 2,000 c. p. low tension; one extra armature for same.
No. SM162 3 50-light; 2,000 c. p.; T.-H.
No. SM163 1 No. 8; 60-light; arc; 2,000 c. p.; Wood.
No. SM164 1 80-light Western Electric dynamo.
No. SM165 20-light, 2,000 c. p. Sperry; switchboard and instruments.

MOTORS.

No. SM166 1 20 H. P., 500-volt, Ft. Wayne.
No. SM167 1 3 H. P., 500-volt., T.-H.
No. SM168 1 McGuwan condenser, steam cyl., 8-inch.
No. SM169 1 hoisting engine and boiler, 6x12, made by Kendall & Bro.

PUMPS.

We carry over 350 different makes and sizes. Write for complete list.

BOILERS.

All kinds of horizontal, tubular, firebox, etc. Our complete list on application.

SUPPLIES.

We carry all kinds of shafting, hangers, couplings, pulleys, belting; in fact, anything in the line of supplies.

Write for our complete catalogue No. 156.

CHICAGO HOUSE WRECKING CO.,
W. 35th and Iron Sts., Chicago.

We Cater to Those Who Demand the Best.

THE ONLY reasons that the most prominent telephone companies in the United States are using our telephones are—That they are better made, last longer, COST LESS FOR MAINTENANCE, show higher efficiency, make better appearance, please your subscribers better, and make collections easier than any other kind.

SWEDISH-AMERICAN TELEPHONE COMPANY

South Bend, Indiana.

IF YOU WANT YOUR EXCHANGE EQUIPPED WITH A

TWENTIETH CENTURY SWITCHBOARD AND TELEPHONES

embodying all the latest features of modern high-class apparatus, use the

KELLOGG CENTRAL BATTERY SYSTEM

with automatic calling and supervisory signals. It is the simplest, most economical and most efficient yet produced and is adapted for both

SMALL AND LARGE EXCHANGES.

New Bulletin just out. Send for it.

KELLOGG SWITCHBOARD AND SUPPLY COMPANY,
229 SOUTH GREEN ST., CHICAGO.

A Few Reasons Why You Should Use the
WARNER DRY BATTERY

RINGING OUTFIT.

BECAUSE:

No exchange is complete without one.
It is the cheapest way to secure power.
There are no bearings to oil.
There is no water to spill.
There are no delays or stops.
It is absolutely reliable under all conditions.
It will ring where all other ringers fail.
There are no belts to slip.
There are no commutators to keep clean.
There are no power bills to pay.
It is always ready for duty.

Your operators can give better service with a good signaling device.

Every Outfit is Shipped Complete Ready for Immediate Use.

XXVIII.—Harmonic Systems of Selective Signaling. XXIX.—Wire for Telephone Use. XXX.—Pole Line Construction. XXXI.—Overhead Cable Construction. XXXII.—Underground Cable Construction. XXXIII.—Testing. XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

P. K. ROSETTES.

2 KINDS IN 1.

Cap attached to base by quarter-turn, or cap rigidly fixed to base by screws.

A quarter-turn of the cap of the P. K. Rosette attaches it to the base by means of extra strong spring contact-arms, which lock the cap sufficiently for general work. Where rosettes are subject to vibrations, the lock-screws in the cap may be readily tightened (see illustration No. 811), so that the contact-arm connection is practically one piece.

The parts are few and strong, and the porcelain is of the ***highest grade and finish.*** The design is plain, and will not catch or hold the dust.

Std. Pkg.	List No.		List Price.

Bretheren, I say unto You

YOU are an Electric Lighting Company, or a Railway Company.

You are working for a profit in your business.

Your power plant is a great expense.

Your fuel bill is an important item, and you utilize not more than 15% of it.

The 85% is a waste product, which you can convert into enough money, by selling your Exhaust Steam, to pay your entire fuel bill for the year, and besides pay a good interest on your investment for steam mains.

If you should let this go to waste you are convicted of loose business methods and justly liable to the condemnation of your stockholders. Send for our pamphlet.

Address

WHY IS IT

THAT
THE "BELDEN" SYSTEM
OF ARC LIGHTING
Is so far superior to any other system on the market?

BECAUSE
It embodies features that are not to be found in any other lamp.

We have convinced hundreds who have had arc lamp troubles. We can convince you.
Our catalog explains the fine points of the "Belden" and it will be sent on request.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goobst, Constr. Supt. CHICAGO EDISON CO."

THE "CLARK" WIRE.

FOR SWITCHBOARD, RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

Telephone electrician desires position as manager or superintendent of telephone exchange. Seven years' experience as foreman, switchboard electrician, superintendent and manager. First-class references as to ability and character. Address "M. M." care Western Electrician, 510 Marquette Building, Chicago.

AN OPPORTUNITY.

I have for sale 30 shares of stock at $100 per share in the Texas Arm & Pin Co., the largest and most flourishing cross-arm institution in the United States. My customer is in very poor health and needs funds, which is the only reason for selling. Will furnish further particulars upon application.

J. T. BEATY, Lawyer, Beaumont, Tex.

WE BUY AND SELL

SECOND-HAND ELECTRICAL MACHINERY.
WALSH'S SONS & CO.,
160 WASHINGTON ST., NEWARK, N. J.

AUCTION SALE.

Postponed Till Nov. 10.——Bankrupt Sale.

Entire Property of The Suburban Electric Co., Covington, Ky., Offered For Sale.

Notice is hereby given that pursuant to an order in bankruptcy, in the matter of the Suburban Electric Company, a corporation organized under the laws of the state of Kentucky, bankrupt, No. 276, in the District Court of the United States for the District of Kentucky, I will, on the 10th day of November, 1900, at 10 o'clock a. m., at the Scott street entrance of the United States Court in Covington, Ky., sell at public auction to the highest bidder, all the property, real and personal, of every kind and description belonging to the Suburban Electric Company, bankrupt, including all the rights, privileges and franchises, except the franchise to be a corporation, and also its electric lighting plant, power station, machinery, engines, boilers, dynamos, electric machine, electric lamps and other appliances and appurtenances, poles, lines, wires and all contracts, claims and demands, and all other property of every kind and description, also the following described real estate belonging to the said bankrupt, situated in the city of Covington, Kenton County, Kentucky, and bounded as follows:

1. Beginning at a point on the east line of Madison avenue at the northeast corner of Madison avenue and an alley running parallel to and between Fourth and Fifth streets; thence northwardly along the east line of said Madison avenue toward Fourth street ninety (90) feet; thence at right angles to Madison avenue one hundred and ninety (190) feet to another alley; thence with said other alley and at right angles to said first-named alley ninety (90) feet to said first-named alley; thence westwardly along the same one hundred and ninety (190) feet to the place of beginning.

And also the following described piece of real estate belonging to said bankrupt, situated in the city of Newport, Campbell County, Kentucky, to wit:

2. Lot No. 280 in the Cote Brilliant Lot & Home Company's subdivision, fronting thirty (30) feet on the west side of Park avenue, and extending back one hundred and twenty (120) feet to an alley.

The first tract of real estate above described will be sold subject to such lien as Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, or either of them, may have upon said real estate, which lien is as yet undetermined in amount.

The property above described will be sold free from any and all liens or encumbrances, except the lien or encumbrance in favor of Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, upon the said first described real estate aforesaid.

The second piece of real estate described aforesaid will be sold separately.

All the balance of the real estate, and all the other property and assets of every kind, and the rights, privileges and franchises of the Suburban Electric Company will be sold as an entirety and as a going concern.

The terms of the sale will be one-third (⅓) cash, to be paid upon the confirmation of the sale, the balance in equal installments of six and twelve months from date of sale, deferred payments to draw six (6) per cent interest and to be secured by lien upon the property sold and also by bond with sureties satisfactory to the referee in bankruptcy herein; or purchaser may pay cash for said property upon the confirmation of the sale. No bid for said property will be received from any bidder who shall not place in the hands of the undersigned at the time of making said bid, as a pledge that said bidder will make good his bid if the sale is confirmed, the sum of fifteen thousand ($15,000) dollars, which sum of fifteen thousand dollars will be credited upon the first payment of the purchase-money for said sale.

Inspection of property invited. Full information given upon application at the office of the bankrupt in Covington, Ky.

CHARLES H. SHAW,
Trustee in Bankruptcy of the Suburban Electric Company.

--FOR SALE--

110-Volt Incandescent Dynamos.

1 12-light Hartley, self-oiler, multipolar.
2 12-light Edison, ¾ K. W.
1 26-light Perrett.
1 50-light Hawkeye.
1 50-light Card, self-oiler.
1 50-light Nowotny, self-oiler.
1 50-light C. & C., self-oiler.
1 65-light Edison, 3 K. W., self-oiler, comp.
1 60-light Mather.
1 60-light Thomson-Houston, 75 v., comp. with extra armature.
1 75-light Thomson-Houston, D. 5.
1 75-light Wood, self-oiler.
1 90-light Westinghouse.
1 100-light Cutten.
1 100-light Jenney, comp.
1 210-light Triumph, self-oiler.
1 225-light United States.
1 250-light Westinghouse, horizontal type.
1 250-light Commercial, comp. self-oiler.
1 270-light T.-H., comp. self-oiler, D. 15.
3 270-light Westinghouse, M. P., slow speed, 15 K. W., October delivery.
1 300-light Columbian, multipolar, comp., self-oiler.
1 340-light Eddy, self-oiler, compound.
2 350-light Hawkeye, comp., wound.
1 350-light National, self-oiler, compound.
3 350-light Edison, 20 K. W., self-oilers.
1 360-light Duplex multipolar, self-oiler, compound, slow speed.
1 400-light Wood, M. P., self-oiler, 25 K. W.
1 450-light Edison, 25 K. W., self-oiler.
1 450-light Rockford, self-oiler.
4 540-light Edison, 30 K. W., self-oilers, compound.
1 600-light Elekmeyer.
1 700-light Siemens & Halske, 40 K. W., multipolar, slow speed.
2 700-light Westinghouse, 10-pole, slow speed, 40 K. W., self-oilers, new.
4 800-light Edison, 45 K. W., self-oilers.
1 1350-light Waddell-Entz, 80 K. W., M. P., for direct connection.

220-Volt Generators.

1 7½ K. W. General Electric, multipolar, self-oiler.
1 9 K. W. Lundell, self-oiler.
1 10 K. W. Lundell, self-oiler, multipolar, slow speed.
1 12 K. W. Eddy, self-oiler, new arm't.
1 15 K. W. Edison, compound, self-oiler.
1 25 K. W. Edison, self-oiler.
1 40 K. W. E. & C., multipolar, slow speed.
1 200 K. W. Crocker-Wheeler multipolar, slow speed, practically new.

500-Volt Generators.

2 15 K. W. Edison, self-oilers.
1 15 K. W. T.-H., self-oiler.
1 25 K. W. T.-H., self-oiler, D. 25, compound.
1 25 K. W. Edison, self-oiler.

500-Volt Generators—Continued.

1 30 K. W. Jenney, self-oiler.
1 35 K. W. Jenney, self-oiler, compound.
1 35 K. W. Mather, self-oiler.
3 45 K. W. Edison, compound, self-oilers.
1 75 K. W. Westinghouse, Kodak set Westinghouse generator and Westinghouse comp. engine, 14x24x14, all complete, fine.
1 150 K. W. Detroit (Rae) multipolar, compound, self-oiler, new armature.

Alternating Generstors.

1 350-light Thomson-Houston, A. 18, comp. wound.
1 600-light Bain, 30 K. W., self-oiler, new toothed armature.
2 600-light Thomson-Houston, A. 6, 30 K. W., self-oilers.
1 600-light Thomson-Houston, 30 K. W., two-phase.
1 600-light T.-H., 30 K. W., slotted armature, compound, self-oiler.
2 650-light Thomson-Houston, A. 35, self-oilers, composite wound.
2 750-light Westinghouse, self-oilers, 37½ K. W.
1 1000-light Wood, 60 K. W., self-oiler, toothed armature, comp. wound.
1 1200-light Westinghouse, 60 K. W., self-oiler, toothed arm't.
1 1200-light T.-H., 60 K. W., self-oiler, toothed armature.
1 1200-light General Electric, A. 60, composite wound, toothed armature, self-oiler.
2 1300-light T.-H., A. 70, 1100 volts, self-oilers, compound wound.
1 6000-light Westinghouse, 200 K. W., toothed armature, composite wound, self-oiler.

Arc Dynamos.

1 20-light 2000 C. P. Western Electric.
1 30-light 2000 C. P. Western Electric, self-oiler.
1 30-light 2000 C. P. Brush, No. 7.

Arc Dynamos—Continued.

1 35-light 2000 C. P. T.-H., ring armature.
1 40-light 2000 C. P. Wood, No. 7.
2 40-light 2000 C. P. Western Electric, s. o.
1 45-light 1200 C. P. T.-H., M. 12, ball arm.
2 45-light 1200 C. P. Brush, No. 7, Steubenrausch commutator.
1 50-light 1200 C. P. T.-H., L. D. 12.
1 50-light 2000 C. P. T.-H., M. D., 2, self-oiler, ring armature.
1 50-light 2000 C. P. Brush, No. 7½.
2 60-light 2000 C. P. West. Elec., self-oilers.
1 60-light 2000 C. P. Westinghouse.
2 60-light 2000 C. P. Wood, No. 8.
1 65-light 2000 C. P. Brush, No. 8, new armature.
2 75-light 1200 C. P. Wood.
2 75-light 1200 C. P. Standard, self-oilers.
2 75-light 2000 C. P. Westlogh'se, self-oiler.
3 125-light 1200 C. P. Excelsior, latest type, self-oilers, fine.

220-Volt Motors.

1 1 H. P. Edison, self-oiler.
2 1 H. P. E. & C., new, self-oilers, M. P., slow speed.
1 3 H. P. Crocker Wheeler, self-oiler, slow speed.
1 3 H. P. Gen. Elec., type I. B., self-oiler.
1 3 H. P. C. & C., self-oiler.
2 3 H. P. Card, slow speed, self-oilers.
1 6 H. P. Eddy, ring type, self-oiler.
1 5 H. P. Westinghouse, self-oiler.
1 7½ H. P. Roth, self-oiler.
1 7½ H. P. Eddy, self-oiler.
1 7½ H. P. Edison, self-oiler.
1 8 H. P. General Electric multipolar, self-oiler.
1 10 H. P. Keystone, self-oiler.
1 10 H. P. Elekmeyer, elevator motor, with controller.
1 10 H. P. Lundell, self-oiler.
1 12 H. P. Lundell, 10 K. W., multipolar, self-oiler, slow speed.
1 15 H. P. Eddy, self-oiler, new arm't.
1 18 H. P. Edison, self-oiler.

220 Volt Motors—Continued.

1 30 H. P. Edison, 25 K. W., self-oiler.
1 60 H. P. E. & C., multipolar, slow speed.
1 50 H. P. Northern, M. P., self-oiler, newly rewound throughout.
1 75 H. P. Sprague, self-oiler, new arm't.
1 225 H. P. Crocker-Wheeler, M. P.

500-Volt Motors.

1 ¼ H. P. Detroit, series wound.
1 1 H. P. Jenney, self-oiler.
1 1 H. P. Crocker - Wheeler, self-oiler, slow speed.
1 1 H. P. Lundell, self-oiler, slow speed.
1 1 H. P. C. & C., self-oiler.
1 3 H. P. Toledo, self-oiler.
1 3 H. P. Hobart, self-oiler.
1 3 H. P. Jenney, self-oiler.
2 3½ H. P. Rockford, ironclad, self-oilers.
1 10 H. P. Eddy, self-oiler, multipolar.
1 10 H. P. C. & C.
1 10 H. P. C. & C., self-oiler.
1 10 H. P. Commercial, self-oiler.
1 10 H. P. Card, M. P., self-oiler, slow sp.
1 15 H. P. Eddy, self-oiler.
1 18 H. P. Thomson-Houston, self-oiler.
2 18 H. P. Edison, 15 K. W., self-oilers.
2 18 H. P. C. & C., self-oilers
1 20 H. P. Commercial, self-oiler.
1 20 H. P. Card, self-oiler.
1 30 H. P. T.-H., self-oiler, D. 25.
1 30 H. P. Edison, 25 K. W., self-oiler.
1 35 H. P. Jenney, self-oiler.
1 40 H. P. Jenney, self-oiler.
1 40 H. P. Mather, self-oiler.
1 60 H. P. Edison, 45 K. W., self-oiler.

Alternating-Current Motors.

SINGLE PHASE.

1 ¼ H. P. Stanley, 100 volts, 16000 alternations, single-phase.
2 1 H. P. Ft. Wayne, 100 v., 125 cycle, self-oilers, single-phase.
1 2½ H. P. Ft. Wayne, 100 volts, self-oiler, single-phase.
1 5 H. P. Wagner, single-phase, 60 cycle, 200 volts.

Alternating Current Motors.

MULTIPHASE.

1 1 H. P. Westinghouse, self-oiler, 2-phase, 60-cycle, 100 volts.
1 10 H. P. Gen. Electric, self-oiler, 3-phase, type, 8-10-900, Form A, 60-cycle, 110 volts.

Automobiles.

1 Wood's electric runabout, with top, carries 2 persons, practically new.
1 Electric open phaeton, seats 3 persons, fine condition.
1 Electric "trap," carries 4 persons, new.

TRANSFORMERS, METERS AND ARC LAMPS.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅜-inch shafting.
No. S10 39 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6⅜-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅜x4⅞ flanged couplings.
No. S16 1 60x38x6⅜ in. double arm drive pulley.
No. S17 4 60x16x6⅜ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅜ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x43x8 in. iron pulley.
No. S21 2 6⅜x20 chain oiling pillow blocks.
No. S22 5 6⅜x15 chain oiling pillow blocks.
No. S23 1 4⅜x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 15 in. spur gear.
No. S27 10 5x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16. 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.
No. S328 2 25-light Ball arc dynamos.
No. S329 2 60x16 horizontal tubular boilers.
No. S330 2 66x16 horizontal tubular boilers.
Shafting, hangers, couplings, etc.

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeahm Bros.
No. S67 12x20 horizontal slide valve.
No. S205 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x15 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Gumaer.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.
No. S208 17¾x24 pr. auto. Williams, coupled.
No. S82 18x30 250 H. P.
No. S83 20x22 Corliss.
No. S84 20x36 Corliss.
No. S85 20x42 Corliss.
No. S86 26x48 Corliss.
No. S87 20x24 horizontal, box bed.
No. S209 66x20 Chandler & Taylor.
No. S210 40 H. P. Rice automatic.
No. S211 35 H. P. Chandler & Taylor.
No. S88 22x42x48 Allis tandem condensing.
No. S89 14x20 Russell automatic.
No. S90 10 H. P. Davis & Rankin.
No. S91 10 H. P. slide valve.

No. S103 35 H. P. upright.
No. S104 40 H. P. Otto gas.
No. S105 50 H. P. Otto gas.
No. S106 19 H. P. Lewis gasoline.
No. S107 60 H. P. Raymood gasoline.
No. S172 68 H. P. Atlas.
No. S173 10x20 side crank.
No. S174 Otis furnace hoist engine, 2 cyl., 8x10.
No. S177 13x16 Twin engines, tandem bed.
No. S179 7x14 Ames cylinder.
No. S273 16x30 balance wheel, 14 feet diam.
No. S274 1 H. P. gasoline.
No. S275 16½x30 Buckeye.
No. S276 6x12 horizontal slide valve.
No. S277 14x28 horizontal slide valve.
No. S278 12x24 marine oscillating.
No. S279 30x30 slide valve.
No. S280 36x42 slide valve.
No. S281 24x30 slide valve.
No. S282 10x15 center crank.
No. S283 6x8 box bed, side crank.
No. S284 16x36 Sinker & Davis.
No. S285 9x9 upright, center crank.
No. S286 9x14 horizontal, side crank
No. S287 9x12 Nagel.
No. S288 7x7 side crank.

MISCELLANEOUS.

110-VOLT INCANDESCENT DYNAMOS.

No. SM145 2 T.-H. 500-light, 110-volt, direct connected.
No. SM146 1 50-light Edison dynamo.
No. SM147 1 25-light C. & C. dynamo.
No. SM148 1 250-light Edison dynamo.
No. SM149 1 100-light Rockford dynamo.
No. SM150 2 500-light T.-H. dynamos.
No. SM151 1 150-light Eddy dynamo.
No. SM152 1 100-light, 110-volt, Weston dynamo.
No. SM153 1 250-light Hawkeye dynamo.

500-VOLT GENERATORS.

No. SM154 1 No. 8 T.-H., 75 K. W., 500-volt.

550-VOLT GENERATORS.

No. SM155 2 type U. S. Westinghouse bi-polar; 80 K. W.; 350 revolutions, 550-volt.

ALTERNATORS.

No. SM156 1 60 K. W.; 1,000-volt; Westinghouse; complete with switchboard, exciter, one extra braud new armature for exciter, two field coils.
No. SM157 1 500-light National; exciter on shaft.
No. SM158 1 600-light T.-H. alternator; 1,000-volt.
No. SM159 1 600-light T.-H.; 2,040-volt.
No. SM160 2 25 K. W. Westinghouse Alternators; 1,150-volt; 16,000 alterations; switchboard and instruments.

ARC DYNAMOS.

No. SM161 25-light; 2,000 c. p. low tension; one extra armature for same.
No. SM162 3 50-light; 2,000 c. p.; T.-H.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

Electrician Publishing Co., *510 Marquette Building, CHICAGO, ILLINOIS.*

PRACTICAL FEATURES OF TELEPHONE WORK.

By A. E. DOBBS.

Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.

THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.

This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

APPROVED BY FIRE UNDERWRITERS

A new apparatus, combiniog an overload and underload release, with time limit.

Automatic double-pole circuit-breaker, adjustable to any per cent. overload.

All mecbanisms mounted on one panel. No extra devices required.

LARGE SIZE. SWITCH CLOSED.

It is so constructed that the power may be transferred from one generator to another without stopping the motor.

Only one operating magnet.

No contacts to corrode.

No short circuiting devices used.

ABSOLUTELY PROTECTS YOUR MOTOR. EASILY INSTALLED.

OKONITE IT NEVER DISAPPOINTS

"FACTS ARE SOMETIMES STUBBORN THINGS."

OKONITE IT NEVER DISAPPOINTS

Okonite Wires and Cables.

Having been so long and favorably known to the trade, we respectfully call to their attention the following

FACTS

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES have the indorsement of the best electrical authorities in the world.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not deteriorate, but improve with age.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not crack when exposed to the severest changes in temperature.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not deteriorate when placed in lime or mortar.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are not affected when immersed in sulphuric acid.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will stand a greater amount of kinking and torsion without permanent injury to the insulation than any other wire in the market.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are submerged in water for three days (72 hours), and then carefully tested with Thompson's Reflecting Galvanometer.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are tested, in addition to the Galvanometer test, with a dynamo current of not less than 2,000 volts.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES, when used in constructing telephone, telegraph, electric light and railway lines or feeders, owing to their high insulating qualities and efficiency, prove a paying investment, though the original cost may be somewhat higher than for lines constructed of cheaper material.

As General Western Agents of the OKONITE COMPANY, LIMITED, we carry in Chicago stock a complete line of their products, and thus are in position to fill all orders promptly.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goebst, Constr. Supt. CHICAGO EDISON CO."

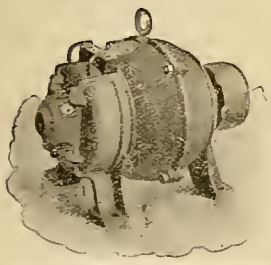
39-43 WEST WASHINGTON ST., CHICAGO, ILL.



A Lundell Motor

Is adapted to all sorts and conditions of use and is unsurpassed for actual efficiency, durability, regulation of speed, margin for overloads and large current, and general workmanship. It has a strong starting torque, is non-sparking, compact and reliable. The sizes run from $\frac{1}{20}$ H. P. up and can be shunt, series or compound wound. All parts are standard, interchangeable and easily replaced. Full description in catalogue No. 0358.

1 65-light 2000 C. P. Brush, No. 8, new armature.
2 75-light 1200 C. P. Wood.
2 75-light 1200 C. P. Standard, self-oilers.
2 75-light 2000 C. P. Westingh'se, self-oiler.
3 125-light 1200 C. P. Excelsior, intest type, self-oilers, fine.

220-Volt Motors.

1 1 H. P. Edison, self-oiler.
2 1 H. P. E. & C., new, self-oilers, M. P., slow speed.
1 3 H. P. Crocker Wheeler, self-oiler, slow speed.
1 3 H. P. Gen. Elec., type 1. B., self-oiler.
1 3 H. P. C. & C., self-oiler.
2 3 H. P. Card, slow speed, self-oilers.
1 5 H. P. Eddy, ring type, self-oiler.
1 5 H. P. Westinghouse, self-oiler.
1 7½ H. P. Roth, self-oiler.
1 7½ H. P. Eddy, self-oiler.
1 7½ H. P. Edison, self-oiler.
1 8 H. P. General Electric multipolar, self-oiler.
1 10 H. P. Keystone, self-oiler.
1 10 H. P. Elckmeyer, elevator motor, with controller.
1 10 H. P. Lundell, self-oiler.
1 12 H. P. Lundell, 10 K. W., multipolar, self-oiler, slow speed.
1 15 H. P. Eddy, self-oiler, new arm't.
1 18 H. P. Edison, self-oiler.

220 Volt Motors—Continued.

1 30 H. P. Edison, 25 K. W., self-oiler.
1 60 H. P. E. & C., multipolar, slow speed.
1 50 H. P. Northern, M. P., self-oiler, newly rewound throughout.
1 75 H. P. Sprague, self-oiler, new arm't.
1 225 H. P. Crocker-Wheeler, M. P.

500-Volt Motors.

1 ¼ H. P. Detroit, series wound.
1 1 H. P. Jenney, self-oiler.
1 1 H. P. Crocker - Wheeler, self-oiler, slow speed.
1 1 H. P. Lundell, self-oiler, slow speed.
1 1 H. P. C. & C., self-oiler.
1 3 H. P. Toledo, self-oiler.
1 3 H. P. Hobart, self-oiler.
1 3 H. P. Jenney, self-oiler.
2 3½ H. P. Rockford, ironclad, self-oilers.
1 10 H. P. Eddy, self-oiler, multipolar.
1 10 H. P. C. & C.
1 10 H. P. C. & C., self-oiler.
1 10 H. P. Commercial, self-oiler.
1 10 H. P. Card, M. P., self-oiler, slow sp.
1 15 H. P. Eddy, self-oiler.
1 18 H. P. Thomson-Hooston, self-oiler.
2 18 H. P. Edison, 15 K. W., self-oilers.
2 18 H. P. C. & C., self-oilers
1 20 H. P. Commercial, self-oiler.
1 20 H. P. Card, self-oiler.
1 30 H. P. T.-H., self-oiler, D. 25.
1 30 H. P. Edison, 25 K. W., self-oiler.
1 35 H. P. Jenney, self-oiler.
1 40 H. P. Jenney, self-oiler.
1 40 H. P. Mather, self-oiler.
1 60 H. P. Edison, 45 K. W., self-oiler.

Alternating-Current Motors.

SINGLE PHASE.

1 ¼ H. P. Stanley, 100 volts, 16000 alternations, single-phase.
2 1 H. P. Ft. Wayne, 100 v., 125 cycle, self-oilers, single-phase.
1 2½ H. P. Ft. Wayne, 100 volts, self-oiler, single-phase.
1 5 H. P. Wagner, single-phase, 60 cycle, 200 volts.

Alternating Current Motors.

MULTIPHASE.

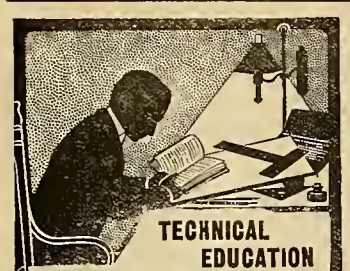
1 1 H. P. Westinghouse, self-oiler, 2-phase, 60-cycle, 100 volts.
1 10 H. P. Gen. Electric, self-oiler, 3-phase, type, 8-10-900, Form A, 60-cycle, 110 volts.

Automobiles.

1 Wood's electric runabout, with top, carries 2 persons, practically new.
1 Electric open phaeton, seats 3 persons, fine condition.
1 Electric "trap," carries 4 persons, new.

TRANSFORMERS, METERS AND ARC LAMPS.

NOTICE.—All machines are actually in stock ready for prompt delivery. All machines are guaranteed. Write for particulars and send for MONTHLY BARGAIN SHEET with net cash price.



TECHNICAL EDUCATION

For the purpose of quickly introducing and demonstrating the superior merits of its courses, the Trustees of THE AMERICAN SCHOOL OF CORRESPONDENCE have voted to award a

FREE SCHOLARSHIP IN

Electrical, Steam, Mechanical, Marine or Locomotive

ENGINEERING,

including a complete course in MECHANICAL DRAWING, to a few well-recommended, ambitious men in each manufacturing plant in the United States.

The holders of these FREE SCHOLARSHIPS will be asked to answer any inquiries as to the benefit and value of the instruction and also recommend the School to their friends, thus establishing an endless chain of enthusiastic students who will advertise the School more thoroughly than tons of printed matter or an army of agents. Application blank on request (mention WESTERN ELECTRICIAN).

American School of Correspondence,
(Chartered by the Commonwealth of Mass)
Boston, Mass. U. S. A.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

WM. R. HORNER,
Philadelphia, Pa.

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅝-inch shafting.
No. S10 39 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6⅜-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅜x4⅞ flanged couplings.
No. S16 1 60x38x6⅜ in. double arm drive pulley.
No. S17 4 60x16x6⅜ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅜ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x43x8 in. iron pulley.
No. S21 2 6⅜x20 chain oiling pillow blocks.
No. S22 5 6⅜x15 chain oiling pillow blocks.
No. S23 1 4⅞x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 16 in. spur gear.
No. S27 10 9x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16. 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.
No. S328 2 25-light Ball arc dynamos.
No. S329 2 60x16 horizontal tubular boilers.
No. S330 2 66x16 horizontal tubular boilers.
Shafting, hangers, couplings, etc.

ENGINES.

No. S64 12x20x12 Westinghouse automatic compound.
No. S65 12x20x14 Ball automatic compound.
No. S66 12x24 Zeahm Bros.
No. S67 12x20 horizontal slide valve.
No. S205 13x16 Twin engines, tandem bed.
No. S70 13x16 horizontal side crank.
No. S71 13x18 four valve Russell automatic.
No. S72 13x20x15 Armington & Sims cross compound condensing.
No. S73 13x16 Erie horizontal.
No. S74 14x14 automatic Ideal.
No. S75 14x24 Richards horizontal.
No. S76 14x24 box bed.
No. S77 14x20 Atlas automatic.
No. S78 14x24 Bay State.
No. S78 14x30 Cumner.
No. S79 14½x13 Armington & Sims automatic.
No. S80 15x14 automatic Ideal.
No. S81 16x14 Smith, Beggs & Rankin automatic.
No. S207 16x36 Woodruff & Beach.

A Few Reasons Why You Should Use the
WARNER DRY BATTERY

RINGING OUTFIT.

BECAUSE:

No exchange is complete without one.
It is the cheapest way to secure power.
There are no bearings to oil.
There is no water to spill.
There are no delays or stops.
It is absolutely reliable under all conditions.
It will ring where all other ringers fail.
There are no belts to slip.
There are no commutators to keep clean.
There are no power bills to pay.
It is always ready for duty.

Your operators can give better service with a good signaling device.

Every Outfit is Shipped Complete Ready for Immediate Use.

Every outfit is thoroughly tested and fully guaranteed. This machine is in use in some of the largest exchanges, both in this country and abroad. The net price for the complete outfit is

$45 F. O. B. Factory.

Prompt shipments guaranteed. For further information, address

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.
518 large octavo pages, 379 Illus. Price, $3.00.
This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.
Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil; Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.

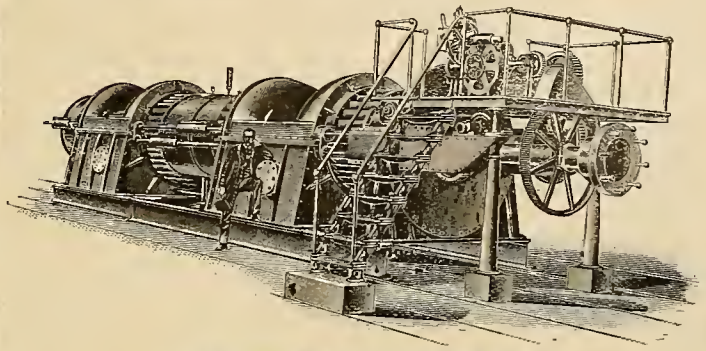
VICTOR TURBINES
OPERATING DYNAMOS.

That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.



FEATURES WORTH REMEMBERING:

High Speed, Close Regulation,
Great Capacity, High Efficiency,
Perfect Cylinder Gate, Steady Motion.

We Also Have a Full Line of Modern Patterns for Gears and Power Transmission Machinery.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have **four** factories with **new** and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

OUR

TYPE K INTEGRATING WATTMETER

Weighs less than 13 pounds and can be installed in a space

6 3-4 inches by 8 3-4 inches.

SOME INTERESTING POINTS.

This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.

It can be Quickly Adjusted for Either HIGH OR LOW FREQUENCY.

No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.

CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.

ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

For Street Railway Work

THERE ARE NO BETTER LAMPS THAN

KENTUCKY INCANDESCENT LAMPS.

OUR RAILWAY LAMP has a special filament, consuming 4 watts per candlepower, and cannot fail to meet the severe conditions imposed by railway service. They give a pure white light, have long life, their efficiency and maintained candlepower is guaranteed. Each lamp is individualiy exhausted, insuring a perfect vacuum.

All voltages from 45 to 125. All candlepowers from 4 to 50.

Barrel lots, 16 c. p., 17c each. Special prices on annual contracts.

A trial order solicited; it will convince you that our lamps are all we claim.

Look into the merits of KENTUCKY DYNAMOS and MOTORS before placing your orders.

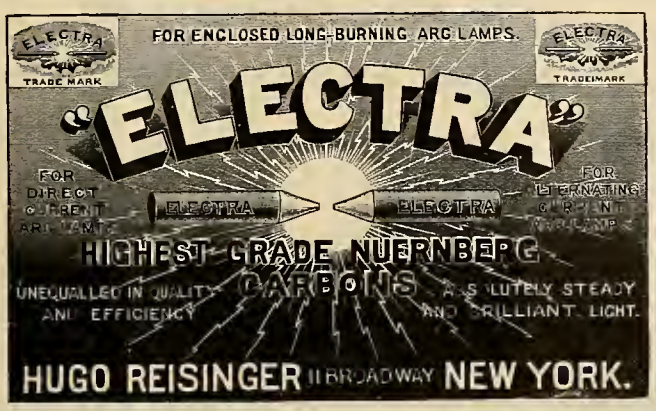
The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade-mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

ESTABLISHED 1878. INCORPORATED 1899.

THE "GEM" STRAIGHT LINE HANGER TO STOP THE LEAK ON YOUR TROLLEY LINES, AND
"OKONITE" WIRE TO STOP THAT LEAK IN YOUR CARS. JOIN THE COMBINATION AND YOU'LL HAVE NO LEAKS.

Central Electric Company, 264, 266, 268, 270 Fifth Ave., CHICAGO.

Bretheren, I say unto You

YOU are an Electric Lighting Company, or a Railway Company.

You are working for a profit in your business.

Your power plant is a great expense.

Your fuel bill is an important item, and you utilize not more than 15% of it.

The 85% is a waste product, which you can convert into enough money, by selling your Exhaust Steam, to pay your entire fuel bill for the year, and besides pay a good interest on your investment for steam mains.

If you should let this go to waste you are convicted of loose business methods and justly liable to the condemnation of your stockholders. Send for our pamphlet.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goebel, Constr. Supt. CHICAGO EDISON CO."

THE "CLARK" WIRE.

FOR SWITCHBOARD, RAILWAY and MOTOR USE.

All sizes of Stranded and Flexible Wire and Cables with Clark's Insulation

Inspector Boston Fire Underwriters' Union says:
"A thoroughly reliable and desirable wire in every respect."

The Clark wire has been before the public and in use for the past ten years, and has met with universal favor. We guarantee our insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class insulated wire. We shall be pleased to mail Catalogues, with terms and discounts for quantities.

EDGAR B. BENJAMIN, with Manufacturers' and Inventors' Electric Co., New York, says:—

——"I commenced my course just a year ago when earning a salary of $6.00 per week of 57 hours. Now I receive three times that per week of 45 hours. Could I claim to be dissatisfied when I have only heed about one-third way through my course?"

JOSEPH H. STOTT, Bryant Avenue Power Station, San Francisco, Cal., says:—

——"I received the Diploma and your letter, and feel very proud of both, but I must thank you and the instructors for the help you have given me. I hope to take another course with you in a short time and am sure I will get great benefit from it. I shall be only too glad to recommend our School to anyone."

E. J. FULLAM, Treasurer, The Fellows Gear-Shaper Co., Springfield, Vt., U. S. A., says:—

——"We are firm believers in the work which you are doing and will do everything possible to introduce it into our shop."

HENRY T. BOVEY, L.L.D., Dean, Faculty of Applied Science, McGill University, Montreal, says:—

——"I have much pleasure in stating that I have examined the literature, and consider the several instruction papers to be carefully prepared and full of interesting and valuable matter. The School of Correspondence can be heartily recommended to all who are unable to obtain the advantage of a scientific engineering education in a University. It would certainly prove a valuable assistance to those who are anxious to increase their technical knowledge."

1 Electric "trap," carries 4 persons, new.

TRANSFORMERS, METERS AND ARC LAMPS.

NOTICE.—All machines are actually in stock ready for prompt delivery. All machines are guaranteed. Write for particulars and send for MONTHLY BARGAIN SHEET with net cash price.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course, and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill

MACHINERY AND SUPPLIES

AT BARGAIN PRICES.

FOR SALE.

We are constantly purchasing entire factories and plants. We bought from the Sioux City Traction Co. the following:

No. S1 2 13x22x12 Westinghouse compound engines.
No. S2 1 pair 17¾x24 Williams automatic engines, coupled together.
No. S3 2 generators, type U. S. Westinghouse, bi-polar, size, 80 K. W.
No. S4 2 60x16 horizontal tubular boilers.
No. S5 1 450 H. P. Hazleton water tube boiler, 2 Roney furnaces with stokers.
No. S6 1 Worthington duplex pump, 6x4 x6.
No. S7 1 Koerschell heater, 2x9 feet.
No. S8 1 Hancock inspirator, 1¼ inches.
No. S9 38 feet 6⅞-inch shafting.
No. S10 39 feet 8-inch shafting.
No. S11 8 feet 4⅞-inch shafting.
No. S12 15 feet 10-inch shafting.
No. S13 2 6⅞-inch flanged couplings.
No. S14 1 8-inch flanged coupling.
No. S15 1 6⅞x4⅞ flanged couplings.
No. S16 1 60x38x6⅞ in. double arm drive pulley.
No. S17 4 60x16x6⅞ in. Hill friction clutch pulleys.
No. S18 1 60x28x6⅞ in. iron pulley, leather covered face.
No. S19 1 60x16x4⅞ in. iron pulley.
No. S20 1 14x43x8 in. iron pulley.
No. S21 2 6⅞x20 chain oiling pillow blocks.
No. S22 5 6⅞x15 chain oiling pillow blocks.
No. S23 1 4⅞x15 chain oiling pillow blocks.
No. S24 1 72x26x8 in. Dodge wood pulley.
No. S25 2 14 ft. x 16 in. cable drums; 6 grooves for 1¼-inch cable.
No. S26 1 12 ft. x 17 in. x 15 in. spur gear.
No. S27 10 8x18 in. pillow blocks.
No. S28 2 double ply dynamo belts, 16-inch width, 57 feet long.
No. S29 1 double ply dynamo belt, 14½-inch width; 71 feet long.
No. S30 1 double ply dynamo belt, 14½-inch width; 48 feet long.

WE PURCHASED FROM P. D. ARMOUR & CO., Union Stock Yards, their entire boiler outfit. Armour & Co. changed their motive power from steam to electricity at a cost of over $2,000,000, as a result of which they sold to us all their fine horizontal tubular boilers, consisting of 48—60x16. 12—54x16, 12—60x18.

They are all in excellent condition and have been thoroughly overhauled, all weak parts replaced.

We also purchased the HASTINGS, NEB., ELECTRIC PLANT, consisting of the following:

No. S326 1 9½x12 Armington & Sims engine.
No. S327 2 650-light incandescent dynamos.

JUST ISSUED.
MODERN ELECTRIC RAILWAY MOTORS.
BY GEO. T. HANCHETT, M. E.
FIRST PRACTICAL WORK ON RAILWAY MOTORS.
CONTENTS.—Chapter I.—Forms of Field Magnets. II.—Armature Winding Diagrams. III.—Field Coil Construction and Arrangement. IV.—Armature Construction. V.—Commutator and Brush Holder Construction. VI.—Motor Casings. VII.—Motor Suspensions. VIII.—Bearings and Gears. IX.—Lubrication. X.—General Dimensions and Data. XI.—Management and Repair. XII.—Railway Motor Design.
200 Pages. 157 Illustrations and Table. Price $2.00.
THIS is a book unique in its treatment of electric railway equipment. The first ten chapters are devoted to minute description of the details of electric railway motors that are in use to-day. Each organ of an electric railway motor is taken up in turn, described and illustrated by examples of present and past practice, and its operation explained in the light of practical experience. In short, the review of current practice is of such a nature as to bring out the reason why the electric railway motor is built as it is to-day. For example, field magnets of different types of motors are illustrated and compared, and their features of merit and faults pointed out. Armatures, armature windings, brush holders, suspensions and other details are similarly treated, each detail, however minute, being exhaustively considered. The last two chapters are devoted, one to the management and repair of electric railway motors, and the other to railway motor design, a complete design being worked out as an example. A table gives authoritative data of all types of railway motors in common use, both in America and Europe. **Sent postpaid on receipt of price.**

THE BEST ANSWER TO A QUESTION
On Wiring, can be found in the New Book,
"WIRING TABLES,"
"How They are Made and How to Use Them."
BY THOS. C. CRIER.
Whenever you are asked a question on Wiring, refer the questioner to this book, and he will find what he desires.
THE BOOK CONTAINS: The Law of Resistance, Electromotive Force and Current Fully Explained. How to Calculate the Size of Wires. The Different Methods of Wiring, with Diagrams. How to Apply the Simple Formula, in Calculating the Size of Wires Under all Conditions. Diagrams for Wiring 3 Point, 4 Point, Head Light and Heat Regulating Switches.
27 TABLES ON WIRING AND VALUABLE DATA.
Ohm's law is described in such plain and simple language that one cannot fail to clearly understand it.
Bound in Cloth, 80 Pages, Size 5x7½ In., Sent, prepaid, on receipt of price, $1.00.

FREE REFERENCE BOOK, BOUND IN CLOTH, CONTAINING
100 PAGES OF USEFUL INFORMATION.
I will send a copy of this book **FREE** on receipt of four cents postage, to anyone interested in the subjects enumerated, and who will appreciate the book; but it is not intended for waste basket distribution.
It is replete with concise tables, explicit formulæ, recognized rules, apt suggestions and standard data of inestimable value for constant everyday use to the Mechanic, Electrician, Engineer, Manufacturer, Inventor and other practical business men. A serviceable companion and a persistent educator.
A handsome morocco leather card-case and book cover, like above cut, for preserving this most valuable compendium of useful information, has been especially designed for this purpose and will be furnished at wholesale rates of 25 cents each.

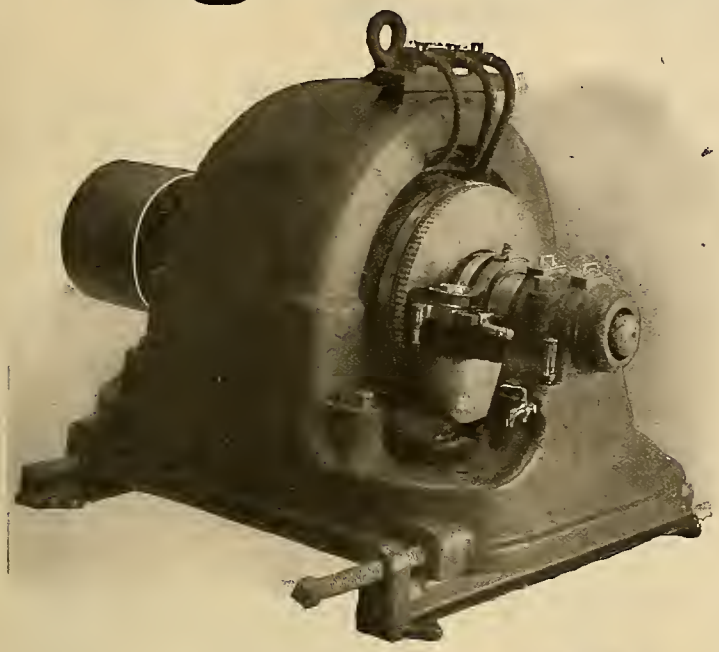
Wagner Electric Mfg. Co.'s

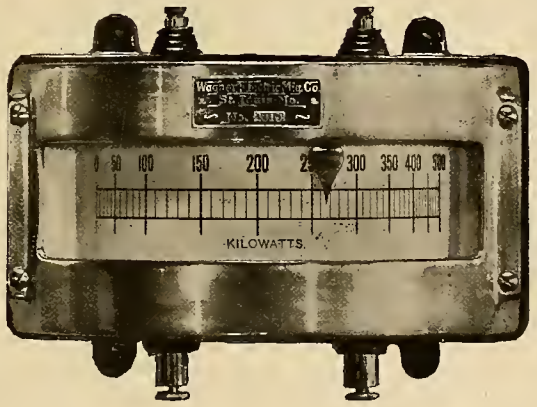


SINGLE PHASE SELF STARTING A. C. MOTORS,

Built for any frequency and 104, 208 or 500 volts.

Simply close a main switch and the motor takes care of itself.

Our indicating Wattmeters, Voltmeters and Ammeters are also built for back of the board with illuminated dial.



Their dead-beatness does not in the least affect their sensibility and accuracy.

TRANSFORMERS

That can be relied upon are what we build and they also embody the highest degree of efficiency and regulation of any in the market.

Reprint of

Electrician Publishing Co.'s

BOOK CATALOGUE.

PART I.

ALTERNATING CURRENTS.

Bedell, Fredk., and Albert C. Crehore. Alternating Currents. An Analytical and Graphical Treatment for Students and Engineers. Third edition. 112 illustrations. 8vo, cloth.....$2.50

Blakesley, T. H. Papers on Alternating Currents of Electricity for the Use of Students and Engineers. Third edition, enlarged, 12mo, cloth.....$1.50

Desmond, Chas. Electricity for Engineers. Constant Currents. A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps, Indicators and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with, Alternate Electrical Currents. Illustrated. Revised edition. 12mo, cloth.....$2.50

Emmett, Wm. L. Alternating Current Wiring and Distribution. 16mo, cloth. Illustrated.....$1.00

Fleming, J. A. The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents. 500 pages. Fully illustrated and with copious index. Fifth issue. 8vo, cloth..$5.00

Vol. II. The Utilization of Induced Currents. Third issue. 8vo, cloth. Over 300 illustrations.....$5.00

Forbes, G. Alternating and Interrupted Electric Currents, being based upon three lectures delivered to the members of the Royal Institution. 12mo, cloth. Illustrated $1.00

Franklin & Williamson's Alternating Currents. $1.75

Hay, A. Principles of Alternate Current Working. Illustrated. 8vo, cloth. London, 1897.....$2.00

Hospitalier, E. Polyphased Alternating Currents. Illustrated. 8vo, cloth.....$1.50

Houston, E. J., and Kennelly, A. E. Alternating Electric Currents (Elementary Electro-Technical Series). 16mo, cloth. Illustrated $1.00

Jackson, Dugald C. Alternating Currents and Alternating Current Machinery.....$3.50

Kapp, Gisbert. Alternate Current Machinery. Illustrated. 16mo, boards $0.50
(Vol. 96, Van Nostrand's Science Series.)

Kapp, Gisbert. Alternating Currents of Electricity. Their Generation, Measurement, Distribution and Application. Authorized American edition. With an introduction by William Stanley, Jr. Illustrated. 12mo, cloth $1.00
(Reprinted from Professional Papers of the Corps of Royal Engineers.)

Loppe and Bouquet. Alternate Currents in Practice. Translated from the French by Francis J. Moffett, B. A. (Lond.), Electrical Engineer to the Colony of Lagos, West Africa; Associate Member of the Institution of Electrical Engineers. With 288 illustrations. 12mo, cloth. New York, 1898..$5.00
This work treats in a practical manner of the whole range of Alternating Currents of Electricity. The information given has been derived impartially from English, French, German and American sources, and will be found of inestimable value to the electrician.

Maycock, W. Perren. The Alternating Current Circuit. An Introductory and Non-Mathematical Book for Students and Engineers. With 51 illustrations, index and ruled pages for notes. 16mo, cloth..$1.00

Oudin, Maurice A., M. S., Member American Institute Electrical Engineers. Standard Polyphase Apparatus and Systems. 12mo, cloth. 200 pages with 154 illustrations. New York, 1899.....$3.00
CONTENTS:
Introductory. Generators. Generators—Concluded. Induction Motors. Synchronous Motors. Rotary Converters. Static Transformers. Station Equipment and General Apparatus. Two-phase System. Three-phase System. Monocyclic System. Frequency. Relative Weights of Copper. Calculation of Transmission Line.

Steinmetz, Charles P. Alternating Current Phenomena. Third edition, revised and enlarged..$4.00

Still, Alfred. Alternating Currents of Electricity and the Theory of Transformers. With numerous Diagrams. The Specialists' Series. 12mo, cloth. New York, 1898.....$1.50
On account of the unsuitability of analytical methods for the solution of alternating current problems, graphical methods have been used throughout, and the introduction of mathematics has been entirely avoided in the present work.

Tesla, Nikola. Experiments with Alternate Currents of High Potential and High Frequency. A Lecture delivered before the Institution of Electrical Engineers, London. With a Portrait and Biographical Sketch of Author. Illustrated. 12mo, cloth $1.00

Thompson, Silvanus P. Polyphase Electric Currents, and Alternate Current Motors. 8vo, cloth. 508 pages. 358 illustrations.....$5.00

Weekes, R. W. The Design of Alternate Current Transformers. Illustrated. 12mo, cloth. London, 1893 .....$1.00

CENTRAL STATION MANAGEMENT.

Coerper's Central Stations of Cologne and Amsterdam gives all the details relating to the design of two of the finest central stations in the world, and includes everything relating to the systems of distribution employed. Large pages, 15x21 inches in size, and the greater part of the book consists of double page plates on cardboard. Morocco binding $25.00

Foster, Horatio A. Central Station Bookkeeping and Suggested Forms. With an Appendix for Street Railways. 8vo, cloth $2.50

Foster, Horatio A. Central Station Management and Finance. 8vo, paper $1.00
Cloth $1.50

Guy, Arthur F. Electric Light and Power, giving the result of practical experience in Central Station Work. 8vo, cloth. Illustrated $2.50

Hedges, Killingworth. Continental Electric Light Central Stations. With Notes on the Methods in Actual Practice for Distributing Electricity in towns. Compiled in part from the Reports made for the Congress of the German Municipal Authorities on the occasion of their visit to the International Electrical Exhibition at Frankfort, 26th-29th August, 1891. Illustrated. 4to, cloth.....$6.00

DICTIONARIES OF ELECTRICAL TERMS. — ELECTRICAL DIRECTORIES.

Electrical Trades Directory and Handbook, for 1901 (fourteenth year). Thick 8vo, cloth.....$5.00

Houston, Prof. E. J. A Dictionary of Electrical Words, Terms and Phrases. Fourth edition, rewritten and greatly enlarged. Large 8vo, 980 pages and 582 illustrations. Cloth.....$7.00
One of the features of the dictionary is that it is not a mere word-book. The words, terms and phrases are invariably followed by a short, concise definition, giving the sense in which they are correctly employed.

Houston, Edwin J. A Pocket Dictionary of Electrical words, terms and phrases, being the supplemental matter to, or an epitome of, the fourth edition of a Dictionary of Electrical Words, Terms and Phrases. 12mo, leather. New York, 1898....$3.00
Or bound in cloth $2.50

Sloane, T. O'Connor. The Standard Electrical Dictionary. A popular Dictionary of Words and Terms used in the Practice of Electric Engineering. 350 illustrations. 12mo, cloth $3.00

DYNAMOS AND MOTORS.

Arnold, E. Armature Windings of Direct Current Dynamos. Extension and application of a general winding rule. Translated from the original German by Francis B. DeGress, M. E.

Atkinson, Philip. Power Transmitted by Electricity, 1899. 241 pages. (Second edition fully revised). $2.00

Atwood, L. C. Practical Dynamo Building. With Detail Drawings and Instructions for Winding, giving correct sizes of Wire, Dimensions of Iron, etc., etc. Also Diagram for House Wiring. Illustrations and Plates. 4to, cloth. St. Louis, 1893.....$3.00

Badt, Lieut. F. B. New Dynamo Tender's Handbook. This is, as the name indicates, a New Book, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Line Men, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 220 pages. 140 illustrations, cloth binding. Size of type page, 5½x3 inches $1.00
Contents: General Electrical Data. The Electrical Current. Coulomb. Ampere. Ohm's Law. Conductors and Insulators. Conductivity. Divided Circuits. Joule. Joule's Law. Watt. Ampere-Hour. Watt-Hour. Farad. Recapitulation of Practical Electrical Units. Direction of the Current. Detector Galvanometer. Magneto Bell. Theory of Dynamos. Electro Magnetism. Induction. Magnetic Lines of Force. Magnetic Field. Magneto Electric Machines. Dynamo Electric Machines. Armatures. Dynamo Electric Machines. Description of a Dynamo. Direct Current Dynamo. The Series Dynamo. The Shunt Dynamo. The Compound Dynamo. Right and Left Hand Dynamos. Coupling Dynamos in Parallel. Coupling Dynamos in Series. Recapitulation. Alternating Current Dynamos. Multiphase Alternating Current Dynamos. Rating of Dynamos. Motor Generators. Preparation of a New Dynamo for Operation. Setting Up a Dynamo. Starting a New Dynamo. Cleaning a New Dynamo. Brushes. Commutator. Repairs. Testing the Wire Coils of a Dynamo for Contact Against the Iron Frame. Diseases of Dynamo. Non-Generation of Currents. Static Electricity. Excessive Sparking of Brushes. Arc Lamps. Theory and Construction of Arc Lamps. Suspension of Arc Lamps. Trimming and Cleaning Arc Lamps. Incandescent Lamps. Superiority Over Other Illuminants. Multiple Arc System. Multiple Series System. Three-wire System. Series Multiple System. Incandescent Lamps on Arc Circuits. Arc Lamps on Incandescent Circuits. Alternating System. Instructions. Handling Arc Lamps. Summary of Instructions for the Guidance of Dynamo Tenders and Lamp Trimmers. For Arc Dynamos. For Incandescent and Power Generators. Station Equipment. Measuring Instruments. Edison Pressure Indicator. Weston Voltmeter. Siemens' Dynamometer. Edison Ampere-Hour Meter. Thomson Recording Wattmeter. Instructions for Installing the Thomson Recording Watt-Hour Meter. Regulators for Current and Pressure. Lightning Arrester. Ground Detector. Safety Devices. Switches. Switchboard. Circuits or Lead. Pole Line. Outdoor Conductors. Insulators. Inside Wiring. Calculating Sizes of Wire. Wire Gauges. Rules for Sizes of Wire. Mormulæ and Tables for Determining Sizes of Conductors. Table for Branch Incandescent Wiring. Table Showing Volts and Horse Power Lost in One Mile of Copper Wire. Storage Battery. Theory of Accumulators. Grouping of Cells. Setting Up Storage Batteries. Dynamos for Charging Accessory Apparatus. Arrangement of Power. Dynamo Room. Motor Power. Pulleys. Belts. Shafting. Foundation for Dynamos. Safety Regulations. Appendices. Phoenix Fire Office Rules. New England Insurance Exchange Rules. Chicago Electric Light Laws. New York Board of Electrical Control Rules. (Overhead Conductors.) Requirements of the Electric Mutual Insurance Company for Electric Light and Power Stations.

Bottone, S. R. The Dynamo, How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations. 12mo, cloth. $1.00

Bottone, S. R. Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Many illustrations. 12mo, cloth..$0.50

Bottone, S. R. How to Manage The Dynamo. A Handbook for Ship Engineers, Electric Light Engineers and Electro-Platers. Illustrations and Folding Plate. 12mo, cloth $0.60

Carus-Wilson, Chas. A. Electro-Dynamics. The Direct-Current Motor. 12mo, cloth. New York, 1898. .....$1.75
"To apply the principles of Electro-dynamics to the Direct-Current Motor is the aim of this book."—Preface.

Cox, Frank P. Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated. 12mo, cloth.....$2.00

Crocker, F. B., and Wheeler, S. S. The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Third edition, revised and enlarged. 12mo, cloth. $1.00

Crofts, Alfred. How to Make a Dynamo. A Practical Treatise for Amateurs. Containing numerous illustrations and detailed instructions for constructing a small dynamo to produce the electric light. Fourth edition. 12mo, cloth.....$0.75

Fisher, Hinnen, J. Continuous-Current Dynamos in Theory and Practice. With details of Method and Formula used in Construction. A practical handbook for Designers, Manufacturers and Users. Illustrated with nearly 300 diagrams. 8vo, cloth. London, 1899 .....$4.50

Halliday, G. Notes on Design of a Small Dynamo. Illustrations, and Plates of Working Drawings in separate packet. 8vo, cloth.....$1.00

Husiuck's. Dynamos and Motors. How to Make and Run Them $0.50

Hawkins, C. C., and F. Wallis. The Dynamo. Its Theory, Design and Manufacture. 190 Illustrations. Thick 12mo, cloth $3.00

Hering, Carl. Principles of Dynamo-Electro Machines (in press).

Hopkinson, Dr. John. Original Papers on Dynamo Machinery and Allied Subjects. Illustrated. 12mo, cloth $1.00

Houston, E. J., and Kennelly, A. E. Electro-Dynamic Machinery. 8vo, cloth. 232 Illustrations. New York, 1896.....$2.50

Houston, E. J., and Kennelly, A. E. The Electric motor. (Elementary Electro-Technical Series). 16mo, cloth. Illustrated.....$1.00

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators, How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation, Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator.—CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator; Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form, Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Current Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel, Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.

Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

State your Head and send for 124 page pamphlet.

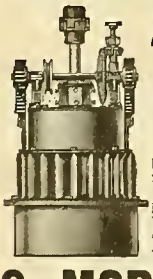
New Dynamo Tenders' Hand-Book.

By F. B. BADT.

226 Pages, 140 Illustrations. Flexible Cloth Binding. Size of Type Page 5 1-2x3 inches. Price $1.00.

This is, as the name indicates, a NEW BOOK, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 9,000 copies of the old Dynamo Tenders' Hand-Book sold, and over 10,000 of the new.

Electrician Publishing Co.,
510 Marquette Building, CHICAGO.



M'CORMICK TURBINE.

On Vertical or Horizontal Shaft.
Especially Adapted for Electrical Work.

Gives a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with us, as we are willing to guarantee results where others have failed, no matter what make of turbine has been in use. A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

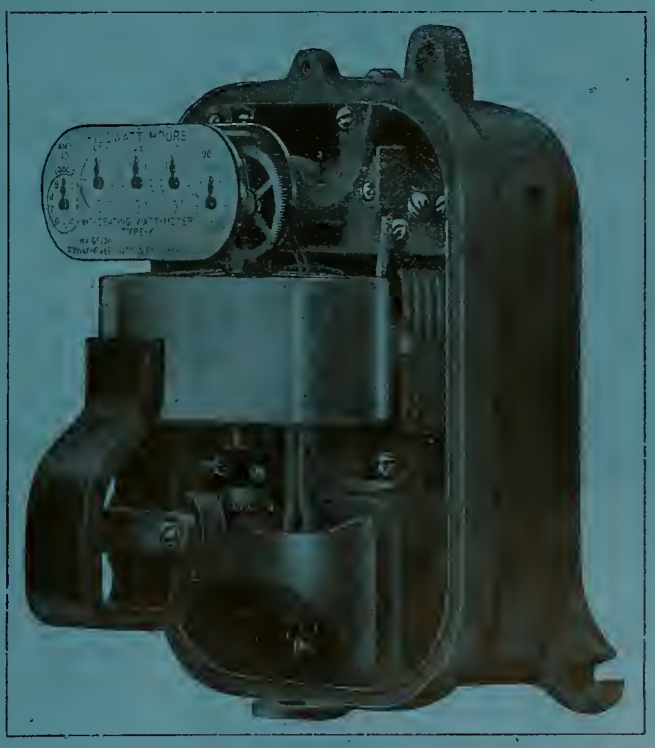
SOMETHING NEW

OUR

TYPE K INTEGRATING WATTMETER

Weighs less than 13 pounds and can be installed in a space

6 3-4 inches by 8 3-4 inches.



SOME INTERESTING POINTS.

This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.

It can be Quickly Adjusted for Either HIGH OR LOW FREQUENCY.

No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.

CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.

ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

WRITE FOR BULLETIN 1012.

For Street Railway Work

THERE ARE NO BETTER LAMPS THAN

KENTUCKY INCANDESCENT LAMPS.

OUR RAILWAY LAMP has a special filament, consuming 4 watts per candlepower, and cannot fail to meet the severe conditions imposed by railway service. They give a pure white light, have long life, their efficiency and maintained candlepower is guaranteed. Each lamp is individually exhausted, insuring a perfect vacuum.

All voltages from 45 to 125. All candlepowers from 4 to 50.

Barrel lots, 16 c. p., 17c each. Special prices on annual contracts.

A trial order solicited; it will convince you that our lamps are all we claim.

Look into the merits of KENTUCKY DYNAMOS and MOTORS before placing your orders.

KENTUCKY ELECTRICAL COMPANY,

JOHN W. BROOKS, Gen'l Western Sales Agent,
605 Plymouth Bldg., Chicago, Ill.

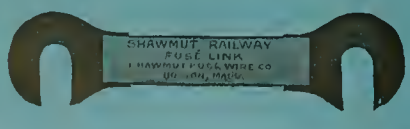
Owensboro, Kentucky.

REWARD.

Any Street Railway by using

"Shawmut" Standard Fuses

will be amply rewarded and protected.



Protect your Lighting circuits and car heaters with

"Cartwright" Enclosed Fuses

and your troubles will cease.

Chase-Shawmut Co.,

Boston, Mass.

WHY IS IT

THAT
THE "BELDEN" SYSTEM
OF ARC LIGHTING
Is so far superior to any other system on the market?

BECAUSE
It embodies features that are not to be found in any other lamp.

We have convinced hundreds who have had arc lamp troubles. We can convince you.
Our catalog explains the fine points of the "Belden" and it will be sent on request.

WAR IS ON!

For Principle and Honest Prices.

We stand for IMPROVEMENT and REASONABLE PRICES. The Association says: "Make your bells like ours or raise your price 33⅓ per cent."

If you want to help us maintain our stand, don't buy of any member of the Association, as you only help them carry out their threat to run us out of business and give them a chance to market old style and inferior bells at exorbitant prices.

WE MANUFACTURE THE

Boston Office, No. 268 Massachusetts Ave., Boston, Mass.

Sole Agents and Licensed Manufacturers in the United States of America for

De Dion-Bouton & Co., FRANCE.

Motors, Motorcycles, Motorettes.

Our New York Type Motorette, Weight 700 pounds. Capacity 3 Persons. Price $1,200.00.

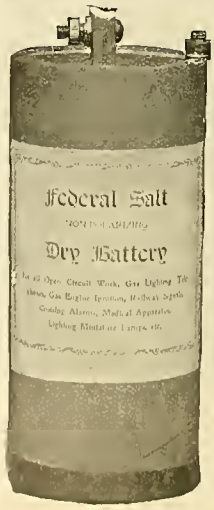
SIMPLICITY, FLEXIBILITY, LIGHTNESS, STRENGTH, RELIABILITY, EASILY OPERATED, PERFECTLY CONTROLLED, ABSOLUTELY SAFE, ABSENCE OF ALL OIL AND DIRT, ECONOMY.

Not an EXPERIMENT, but a TRIED and PROVED SUCCESS.

Over 20,000 DE DION-BOUTON MOTORS operating Motorcycles and Motorettes.

GENERAL OFFICES AND FACTORY: CHURCH LANE AND 37TH ST., BROOKLYN, N. Y.

De Dion Motor Supplies and Batteries Always in Stock.



Wonderful Recuperation.

Higher Voltage and Amperage.

Will do more Hard Work than any Dry Battery on the Market.

No more Running Down on the Shelf.

FEDERAL SALT.

FOR CARBON CYLINDER and CARBON-MANGANESE BATTERIES.

Gives More Current, Longer Life, Absolutely No Crystals.

Both salts have a depolarizer in the mixture. Federal Salt No. 1 has more depolarizer than Federalite, and so will last longer. That's the only difference.

It's the DEPOLARIZER that INCREASES the STRENGTH, GIVES LONGER LIFE, and DOES AWAY ABSOLUTELY WITH CRYSTALLIZATION and CREEPING SALTS.

Made by

FEDERAL BATTERY CO., 11 Pine St., N. Y.

TO establish the superior merits of its courses, the trustees of the **American School of Correspondence** have to award to a few well recommended, ambitious men in each manufacturing plant in the country a **free scholarship.**

IN ELECTRICAL, MECHANICAL, MARINE, STATIONARY or LOCOMOTIVE (Including MECHANICAL DRAWING) ENGINEERING

THE holders of these **free scholarships** will be asked to answer inquiries as to the benefit and value of the instruction, and also to recommend the school to their friends, thus establishing an endless chain of enthusiastic students who will advertise the school more thoroughly than tons of printed matter or an army of agents. Application blank on request.

(Mention WESTERN ELECTRICIAN.)

American School of Correspondence

Chartered by the Commonwealth of Massachusetts.

BOSTON, MASS., U. S. A.

Code of Moral Suasion and Correct Procedure To Establish a Claim.

AMERICAN ELECTRIC COMPANY,
56 E. 6th St., St. Paul, Minn.,

vs.

JOHN DOE ET AL.

Greeting:—The purchasing agent of your plant is hereby cited and summoned to hold a conference with himself, immediately upon receipt of this document, to then and there decide and determine that the claims herein set forth are true, viz.:

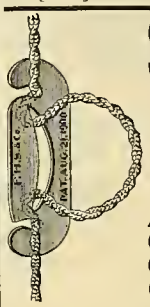
That the undersigned carry the largest stock of up-to-date electrical supplies in the great Northwest; that they are the exclusive selling agents in your territory for the Western Electric Arc and Incandescent Dynamos, Fan Motors, Petite Enclosed Arc Lamps, for both direct and alternating currents, for Simplex Rubber Covered Wires and Cables and Sunbeam Incandescent Lamps; that they are prepared to furnish anything and everything electrical, promptly as the circumstances will warrant, and always at the right price; that they carry in stock at St. Paul, besides all the "knicknacks" in Supplies, a large quantity of Weather Proof and Rubber Covered Wires, Circular Loom, Iron Armored and Loricated Conduit, Cross-Arms, Cross-Arm Braces, Lag Screws, Pole Steps, Insulators, etc.; that they are out for business and want your orders; that their constantly increasing trade is evidence of the appreciation of a thoroughly equipped electrical supply house in the Northwest; that this concern is tireless in its efforts to please, and that this is being done can easily be established.

It, therefore, behooves you to get in line with others and send your orders where they will receive the best attention.

Dated this 20th day of October, 1900.

AMERICAN ELECTRIC COMPANY, St. Paul, Minn.

[Seal.]



Stewart Patent Cord ADJUSTER.

(Patented August 21, 1900.)

Cuts illustrate two methods of adjustment.

A device everyone wants.
Can be used on any size of cord.
Can be adjusted easily.
Can be used after rosette and socket are connected.
Made of fiber.
Sold as cheap as common wood adjusters.
Order from your supply house or us.
Same price everywhere.

SAMPLES FREE.

CREAM FLUX
AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your **Cream Flux** severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goebel, Constr. Supt. CHICAGO EDISON CO."

AUCTION SALE.

Postponed Till Nov. 10.——Bankrupt Sale.

Entire Property of The Suburban Electric Co., Covington, Ky., Offered For Sale.

Notice is hereby given that pursuant to an order in bankruptcy, in the matter of the Suburban Electric Company, a corporation organized under the laws of the state of Kentucky, bankrupt, No. 276, in the District Court of the United States for the District of Kentucky, I will, on the 10th day of November, 1900, at 10 o'clock a. m., at the Scott street entrance of the United States Court in Covington, Ky., sell at public auction to the highest bidder, all the property, real and personal, of every kind and description belonging to the Suburban Electric Company, bankrupt, including all the rights, privileges and franchises, except the franchise to be a corporation, and also its electric lighting plant, power station, machinery, engines, boilers, dynamos, electric machine, electric lamps and other appliances and appurtenances, poles, lines, wires and all contracts, claims and demands, and all other property of every kind and description, also the following described real estate belonging to the said bankrupt, situated in the city of Covington, Kenton County, Kentucky, and bounded as follows:

1. Beginning at a point on the east line of Madison avenue at the northeast corner of Madison avenue and an alley running parallel to and between Fourth and Fifth streets; thence northwardly along the east line of said Madison avenue toward Fourth street ninety (90) feet; thence at right angles to Madison avenue one hundred and ninety (190) feet to another alley; thence with said other alley and at right angles to said first-named alley ninety (90) feet to said first-named alley; thence westwardly along the same one hundred and ninety (190) feet to the place of beginning.

And also the following described piece of real estate belonging to said bankrupt, situated in the city of Newport, Campbell County, Kentucky, to wit:

2. Lot No. 260 in the Cote Brilliant Lot & Home Company's subdivision, fronting thirty (30) feet on the west side of Park avenue, and extending back one hundred and twenty (120) feet to an alley.

The first tract of real estate above described will be sold subject to such lien as Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, or either of them, may have upon said real estate, which lien is as yet undetermined in amount.

The property above described will be sold free from any and all liens or encumbrances, except the lien or encumbrance in favor of Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, upon the said first described real estate aforesaid.

The second piece of real estate described aforesaid will be sold separately.

All the balance of the real estate, and all the other property and assets of every kind, and the rights, privileges and franchises of the Suburban Electric Company will be sold as an entirety and as a going concern.

The terms of the sale will be one-third (⅓) cash, to be paid upon the confirmation of the sale, the balance in equal installments of six and twelve months from date of sale, deferred payments to draw six (6) per cent interest and to be secured by lien upon the property sold and also by bond with sureties satisfactory to the referee in bankruptcy herein; or purchaser may pay cash for said property upon the confirmation of the sale. No bid for said property will be received from any bidder who shall not place in the hands of the undersigned at the time of making said bid, as a pledge that said bidder will make good his bid if the sale is confirmed, the sum of fifteen thousand ($15,000) dollars, which sum of fifteen thousand dollars will be credited upon the first payment of the purchase money for said sale.

Inspection of property invited. Full information given upon application at the office of the bankrupt in Covington, Ky.

CHARLES H. SHAW,
Trustee in Bankruptcy of the Suburban Electric Company.

2500 genuine Edison keyless sockets, good condition ..... .07

ELECTRICAL MACHINERY.

ALL WARRANTED IN EVERY WAY.

PRICES ON APPLICATION.

1 500-light National, 1000 volts, alternating exciter, attached to shaft complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.
1 Thomson-Houston 400-light compound-wound dynamo, new, 110 volts, 200 amperes, complete with sliding base, belt tighteuer and regulator.
1 Thomson-Houston, 500-light, compound-wound dynamo, 110-volt 200-ampere, complete with sliding base, belt tightener and regulator.
1 United States Weston dynamo, 150-light, 100-volt, 75-ampere, complete with sliding base, belt tightener and regulator.
2 generators, 80 K. W. type, U. S. Westinghouse bipolar, 350 revolutions per minute, 550 volts, size of pulley, 54x18 inches; paper rim; side rails complete.
2 Field Rheostats Westinghouse three-jaw switches for throwing generators in multiple.
1 voltmeter Westinghouse, 0 to 600.
2 amp.-meters Westinghouse, capacity 0 to 160.
1 amp.-meter Westinghouse, capacity 0 to 300.
2 Westinghouse circuit-breakers.
3 Westinghouse lightning arresters.
3 Westinghouse switches, double throw.
1 electric elevator, manufactured by Keystone Electric company of Erie, Pa.; self-oiler, 60-ampere, No. 324, 220-volt, 1025 revolutions; worm gear and cog are solid brass; 53 grooves for ⅝-inch cable on drum; drum 30-inch diameter by 22-inch face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 horsepower; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.
1 Baxter 110-volt motor, 2-horsepower, good as new; complete and starting box and tightener. Price $50.00
1 1000-light Slattery alternating-current dynamo, 1000-volt, complete with exciter and instrument. Practically as good as new.
1 50 K. W. C. and C. 500-volt multipolar ring armature, compound wound, direct connected to a 100-horsepower tandem, compound McEwen engine, 8½x14x12. Only used 14 months, and guaranteed in perfect condition, and 1 Sterling 100-horsepower boiler, 1 Duplex steam pump, and 1 copper-tube heater.
1 2-horsepower Baxter motor, 100-volt, complete with starting box, base with belt tightener and pulley. First-class condition.

INCANDESCENT LAMPS.

We have over 20,000 Brand New

Genuine New Type Edison,

104-Volt Lamps on hand—8 and 16 candle-power. Price, each.....9c

We also carry in stock other kinds—ask about them.

We are the largest machinery dealers on earth. Our stock of Engines, Boilers, Pumps, Hoisting Apparatus, Dynamos, Motors, etc., etc., is all listed in Catalogue No. 156. Ask for it.

Chicago House Wrecking Co.,

THE STRONG POINTS OF

KELLOGG

TELEPHONES and SWITCHBOARDS

Portable Desk 'Phone.

are their simplicity of construction, durability and economy of operation, due to the attention paid to design and to the details of manufacture. All our apparatus is made of the best material by skilled workmen, is carefully tested and is sent out with our guarantee as to efficiency and non-infringement. It can be used with the magneto system, local batteries at subscribers' stations, or an entirely

CENTRAL BATTERY.

The best proof of merit is actual operation. Send us a trial order and be convinced.

OUR STUDENTS SUCCEED

INCREASED SALARY.
I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.
R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.
I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.
WM. R. HORNER,
Philadelphia, Pa.

$12 to $70, in Small Monthly Installments, pays for a

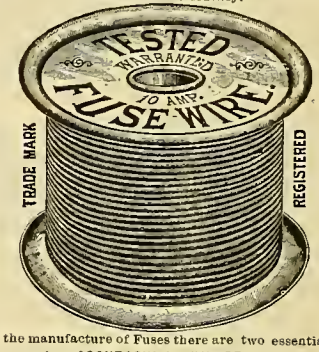
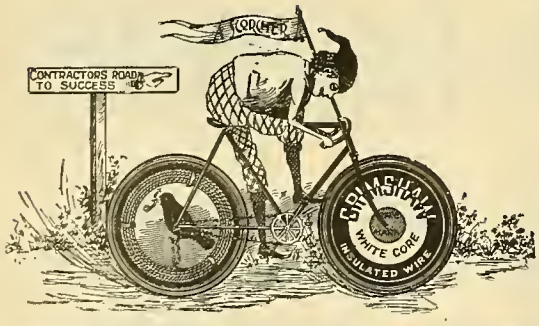
New York Agents Wirt Electric Co. Rheostats and Brushes.

TRADE MARK.
Tested Fuse Wire and Fuse Links.
Standard for Accuracy.



In the manufacture of Fuses there are two essentials.
1ST, ACCURACY; 2D, UNIFORMITY.
The steady increase in our business during the past twelve years is the best evidence that our goods meet all requirements.
All kinds of Telephone Fuses and Bases, well made and at low prices.
CHICAGO FUSE WIRE & MFG. CO.,
58-64 N. Jefferson St., Chicago. 369 Broadway, New York.



Grimshaw White Core,
RAVEN WHITE CORE, RAVEN BLACK CORE, COMPETITION LINE WIRE, GRIMSHAW AND COMPETITION TAPES AND SPLICING COMPOUNDS.
New York Insulated Wire Company,
MAIN OFFICE: 12-17 Cortlandt St., New York.
BRANCHES: CHICAGO: 320 Dearborn St. BOSTON: 134 Congress St. SAN FRANCISCO: 71 Flood Building.

Success
Comes only to those telephone exchanges which use the BEST material. If you use our goods success is assured.
We can supply EVERYTHING USED WITH TELEPHONES.
No order too small for attention or too large for our capacity. Rapid deliveries our rule, and each order filled with care. Large stocks always on hand.
Telephones, every style and grade. Long and short backboards. Elegant finish and design. Prices that will suit. Hard rubber receivers. Oak or walnut woodwork. New ideas in magneto bells. Each instrument guaranteed.
All kinds of telephone supplies. New parts for old telephones. Double-pole receivers.
Electricians' tools. Lightning arresters, carbon and fuse. Extension bells—standard and bridging. Circuit closers. Transmitters of various styles. Repeating coils, induction coils, construction material of all kinds.

Central Telephone & Electric Co.,
909 MARKET STREET, ST. LOUIS, MO.

A Few Reasons Why You Should Use the
WARNER DRY BATTERY
RINGING OUTFIT.
BECAUSE:
No exchange is complete without one.
It is the cheapest way to secure power.
There are no bearings to oil.
There is no water to spill.
There are no delays or stops.
It is absolutely reliable under all conditions.
It will ring where all other ringers fail.
There are no belts to slip.
There are no commutators to keep clean.
There are no power bills to pay.
It is always ready for duty.
Your operators can give better service with a good signaling device.
Every Outfit is Shipped Complete Ready for Immediate Use.
Every outfit is thoroughly tested and fully guaranteed. This machine is in use in some of the largest exchanges, both in this country and abroad. The net price for the complete outfit is
$45 F. O. B. Factory.
Prompt shipments guaranteed. For further information, address
THE WARNER ELECTRIC CO.,
MUNCIE, INDIANA, U. S. A.

BOOK CATALOGUE.

PART II.

DYNAMOS AND MOTORS.

(CONTINUED.)

Houston, E. J., and Kennelly, A. E. Recent types of dynamo-electric machinery. A complete guide for the electrician, engineer, student and professor. Being a valuable history of the extraordinary advance in the building of American Dynamo Machines and their application. Profusely illustrated with over 600 magnificent engravings by the best known processes shown in color, including tables of exceptional value. 8vo, half leather, gilt top. New York, 1898.....$5.00

Hunting, F. S. Dynamos, being a practical explanation of the construction, operation, maintenance, care and management of dynamos. 16mo, paper. 26 illustrations.....$0.25

Jackson, D. C. A Text Book of Electro-Magnetism and the Construction of Dynamos. Vol. I.—Electro-Magnetism and the Construction of Continuous Current Dynamos. 8vo, cloth $2.25

Kapp, Gisbert. Dynamo Construction.....$8.50

Kapp, Gisbert. Dynamos. Alternators and Transformers. 138 illustrations. 12mo, cloth.....$4.00

Kennelly, A. E. The Theoretical Elements of Electro-Dynamo Machinery. 8vo, cloth $1.50

Lummis-Patterson, G. W. The Management of Dynamos. A Handbook of Theory and Practice for the use of mechanics, engineers, students, and others in charge of dynamos. 12mo, cloth, with numerous illustrations $1.50

Parham, Eugene C., and Shedd, John C. Shop and Road Testing of Dynamos and Motors. A Practical Manual. 12mo, cloth. New York, 1898. .....$2.00

The present work has a twofold object: I. To give a complete theory of the commercial testing floor, with its multitudinous applications of theory to practice. II. To meet the growing demand on the part of operating companies for a manual that shall enable them to do their own repair work and consequent testing without elaborate or expensive instruments.

Parkhurst, C. D. Electric Motor Construction for Amateurs. Illustrated. 8vo. cloth $1.00

Parkhurst, C. D. Dynamo and Motor Building for Amateurs, with working drawings. 12mo, cloth. $1.00

Parshall, H. F., and Hobart, H. M. Armature Windings of Electric Machines. With 140 full-page plates, 65 tables and descriptive letterpress. 4to, cloth. New York, 1895.....$7.50

Paterson, G. W. L. Management of Dynamos. A handbook by an English author, intended for the use of those in charge of dynamos. Also contains simple applications of electrical principles. 214 pages. 81 illustrations. 12mo, cloth. New York, 1896 .....$1.00

Prescott, G. B. Dynamo-Electricity, Its Generation, Application, Transmission, Storage and Measurement. With 545 illustrations. 8vo, cloth. $5.00

Schellen, Dr. H. Magneto-Electric and Dynamo-Electric Machines: Their construction and practical application to Electric Lighting and the Transmission of Power. Translated from the third German edition, with large Additions and Notes relating to American Machines, by N. S. Keith. Third edition, Vol. 1, with 353 illustrations. 8vo, cloth $5.00

Swoope, C. Walton. The Practical Running of Dynamos 16mo, paper. Philadelphia, 1897....$0.10

Thompson, Silvanus P. Dynamo-Electric Machinery. A manual for students of Electrotechnics. 8vo, cloth $4.25

This new edition has been rewritten and thoroughly revised throughout, and is an entirely new book.

Thompson, Silvanus P. Dynamo-Electric Machinery. A series of Lectures, with an introduction by Franklin L. Pope. 16mo, numerous illustrations, fancy boards. (Van Nostrand's Science Series, No. 36.) Third edition, revised.....$0.50

Thompson, Silvanus P. Recent Progress in Dynamo-Electric Machines, being a Supplement to Dynamo-Electric Machinery. 16mo. (Van Nostrand's Science Series, No. 75.).....$0.50

Trevert, Edward. How to Build Dynamo-Electric Machinery, Embracing Theory, Designing and the Construction of Dynamos and Motors. With appendices on Field Magnet and Armature Winding, Management of Dynamos and Motors, and Useful Tables of Wire Gauges. Illustrated. 8vo, cloth. $2.50

Trevert, Edward. Dynamos and Electric Motors and all about them. 100 Illustrations. 12mo, cloth. $0.50

Trevert, Edward. How to make a Dynamo. Illustrated. 12mo, paper.....$0.10

Trevert, Edward. Practical Directions for Armature and Field-Magnet Winding. Illustrated. 12mo, cloth. Lynn, 1892 .....$1.50

Urquhart, J. W. Dynamo Construction. A Practical Hand-Book for the use of Engineer Constructors and Electricians in Charge, embracing Framework Building, Field Magnet and Armature Winding and Grouping, Compounding, etc., with Examples of leading English, American and Continental Dynamos, and Motors, with numerous illustrations. Second edition, enlarged. 12mo, cloth..$3.00

Walker, F. Practical Dynamo Building, for Amateurs. How to wind for any output. With numerous illustrations. 16mo, boards. New York, 1890. (Van Nostrand Science Series, No. 98.).....$0.50

Watson, A. E. How to Build a One-Horse Power Motor or Dynamo, Folding plate, and illustrations. 16mo, cloth $0.50

Watson, A. E. How to Build a One-Fourth Horse Power Motor or Dynamo. Illustrated with Working Drawings. 16mo, flexible cloth $0.50

Watson, A. E. How to Build a 1,000-Watt Alternating Current Dynamo or Motor. Illustrated with Working Drawings. 16mo, flexible cloth....$0.50

Watson, A. E. How to Build a One-Half Horse Power Dynamo or Motor. Illustrated with Working Drawings. 16mo, flexible cloth.....$0.50

Watson, A. E. How to Build a Fifty Light Dynamo or Four H. P. Motor. Illustrated with full working drawings, giving directions for windings for different voltages, whereby any amateur may build this machine. 12mo, cloth $0.50

Wiener, Alfred E. Practical Calculation of Dynamo-Electric Machines. A Manual for Electrical and Mechanical Engineers, and a Text Book for Students of Electro-Technics. 8vo, cloth. Illustrated. New York, 1896.....$2.50

Based upon the practical data and tests of nearly two hundred of the best modern dynamos, including the machines used at the recent World's Fair and those in the largest and most modern central-stations, a complete and entirely practical method of dynamo-calculations is developed.

Weymouth, F. Martin. Drum Armatures and Commutators. (Theory and Practice.) A complete Treatise on the Theory and Construction of Drum Winding, and of commutators for closed-coil armatures, together with a full resume of some of the principal points involved in their design, and an exposition of armature reactions and sparking. Enlarged and revised from a series of articles. 8vo, cloth. Illustrated $3.00

ELECTRIC BELLS AND DOMESTIC ELECTRICITY.

Allsop, F. C. Electric Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and Similar apparatus. 177 illustrations. 12mo, cloth $1.25

Allsop, F. C. A Practical Treatise on the Fitting up and Maintenance of Electric Bells, and all the necessary Apparatus. Nearly 150 illustrations. 8vo, cloth. London, 1889.....$1.25

The engravings show in detail the various kinds of push buttons, buzzer buttons, window connections, floor connections, switches, bells (with contrivance for continuous ringing), buzzers, relays, indicators, batteries, magneto-bells. The method of connecting-up for one or a number of pushes for indicators, ringing a number of bells, signalling in both directions with one wire and two batteries, closed and open circuit, elevator connections, etc.

Badt, F. B. Bell Hangers' Hand-Book. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages. 97 illustrations, cloth binding. Type page 5½x3 inches $1.00

Table of Contents: Voltaic Electricity. Contact Series. The Voltaic or Galvanic Cell. Generation of Current. Local Action. Polarization. Description of Batteries. The Smee Battery. The Grenet Battery. The Daniell Battery. The Grove Battery. The Bunsen Battery. The Carbon Battery. Nickel Plating Battery. Fuller's Mercury Bichromate Battery. The Leclanche Battery. The Diamond Carbon Battery. The Law Battery. Gravity Battery. Dry Batteries. Classification of Batteries. Elementary Data. The Electric Current. Ohm's Law. Conductors and Insulators. Direction of the Current. Connecting Batteries. Cells Connected in Series. Cells Connected in Multiple Arc. Recapitulation. Work. External Resistance. Rules for Connecting Batteries. Data Regarding Batteries. Divided Circuits. Electro-magnets. Induction Coils. Electric Bells. Single Stroke Bells. Long-Distance Call Bell System. Push Buttons. Buzzer. Indicating Box Bell. Electric Alarm. Annunciators. Hotel Fire Alarm and Room Call. The Hess System. The Western Electric Company's System. The Double-Wire System. Partridge & Carter's System. The Electro-Mercurial Alarm. The Metallic Thermostat. Burglar Alarms. Desk and Safe Alarms. Electric Gas Lighting Apparatus. Portable Gas Lighters. Apparatus for Public Buildings. Apparatus for Residences. A Novel Automatic Burner. Connections of Gas Lighting systems. Electric Heat Regulators. Running Electric Wires. Proper Installation. How to Fish Wires. Wiring Fixtures for Gas Lighting. Wiring Elevator Annunciators. Best Time for Wiring. Extra Insulation. Testing Instruments. Detector Galvanometer and the Magneto-Bell. Tests for Faults. Bell Hangers' Tools. Wire Tables. Specifications for Wiring a Hotel.

Bottone, S. R. Electric Bells and all about them. A Practical Book for practical men, with more than 100 illustrations. Fifth edition, revised and enlarged. 12mo, cloth $0.50

Trevert, Edward. Practical Directions for Electric Gas Lighting and Bell Fitting for Amateurs. Third edition, revised. Illustrated. 16mo, paper. Lynn, 1895 .....$0.25

Wiltbecker, W. A. Domestic Electrical Work. Concise and Practical Explanations for Plumbers, Tinners and Hardware Dealers on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting from Batteries. Illustrated with 22 diagrams. 12mo, paper $0.25
Cloth $0.50

ELECTRIC LIGHT AND ELECTRIC LIGHTING.

Alglave, Em., and Boulard, J. The Electric Light: Its History, Production and Applications. Translated from the French by T. O'Connor Sloane, E. M. Edited, with notes and additions, by C. M. Lungren, C. E. Illustrated with 252 woodcuts. 8vo, cloth $4.00

Allsop, F. C. Practical Electric Light Fitting. A Treatise on the Wiring and Fitting-up of Buildings, Deriving Current from Central Station Mains, and the Laying Down of Private Installations, including the latest Edition of the Phoenix Fire Office Rules. 324 illustrations. 12mo, cloth..$1.50

Atkinson, Philip. The Elements of Electric Lighting, Including Electric Generation, Measurement, Storage and Distribution. Ninth edition, fully revised and new matter added. 104 illustrations. 260 pages. 12mo, cloth $1.50

Badt, F. B. Incandescent Wiring Hand-Book, with 42 illustrations and five tables. Fourth edition. 12mo, cloth $1.00

A timely book, containing full instructions for Incandescent Wiring, and complete information concerning Methods of Running Wires, Location of Safety Devices and Switches, Splices, Insulation and Testing for Faults. Wire Gauges, General Electrical Data, Calculating Size of Wires, Wiring of Fixtures, Elevators, Buildings, Isolated and Central Station Plants.

Contents: Introductory.—The Multiple Arc System. The Three-Wire System. Methods of Running Wires. Cleat Work. Molding Work. Concealed Work.—a. When the Building is Being Constructed.—b. In a completed Building. Location of Safety Devices and Switches. The Tree System. The Closet System. Safety Devices. Switches Splices. Safety Rules. Insulation and Testing for Faults. Wiring of Fixtures. Wiring of Elevators. Wire Gauges. General Electrical Data. Coulomb. Ampere. Volt. Ohm. Conductors and Insulators. Ohm's Law. Conductivity. Divided Circuits. Work. Energy. Calculating Sizes of Wires. Plans and Symbols. Drop of Potential and Loss of Energy. Practical Rules for Determining Sizes of Wires. Safe Carrying Capacity. The Three-Wire System. Explanation of Tables: Table No. 1—Gauges in Circular Mils. Table No. 2—Electric Light Conductors. Table No. 3—50-Volt Lamps. Table No. 4—75-Volt Lamps. Table No. 5—110-Volt Lamps.

Bax, Capt. E. I. Popular Electric Lighting, being Practical Hints to Present and Intending Users of Electric Energy for Illuminating Purposes, with a chapter on Electric Motors. Illustrated. 12mo, cloth $1.00

Bottone, S. R. A Guide to Electric Lighting, for the Use of Householders and Amateurs. Illustrated. 12mo., cloth $0.75

Bower, G. S., and Webb, W. The Law relating to Electric Lighting. 2nd edition being the Electric Lighting Acts, 1882 and 1888, with a general Introduction, a continuous Commentary, and Appendices. 12mo, cloth $5.00

Buckley, W. J. Electric Lighting Plants, Their Cost and Operation. Data Compiled from Station Reports of Electric Lighting Plants employing overhead circuits, with suggestions pertaining to the information usually desired by the non-technical purchaser. 12mo, cloth. Illustrated.....$2.00

Crocker, F. B. Electric Lighting. A Practical Exposition of the Art for the use of Electricians, Students and others interested in the Installation or Operation of Electric Lighting Plants. Volume I. The Generating Plant. 8vo, cloth.....$3.00

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have **four** factories with **new** and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

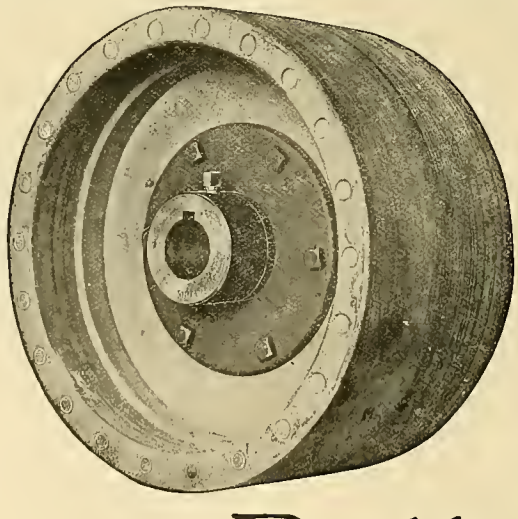
The Popularity of
Rockwood's Patent Compressed

Non-Slipping.
Non-breakable.
Economical.
Durable.
Balanced.
Neat design.
Light-weight.
Non-Magnetic.



Six thousand various sizes partly finished carried constantly in stock. Hubs any shape, any position.

Paper Pulleys

("For one-sixth century the standard for durability and efficiency.")

arises in a measure from their stability.

Engineers and users should not fail to specify Rockwood Patent Compressed Paper Pulleys on all contracts.

Fort Wayne Electric Works.

(INCORPORATED.)

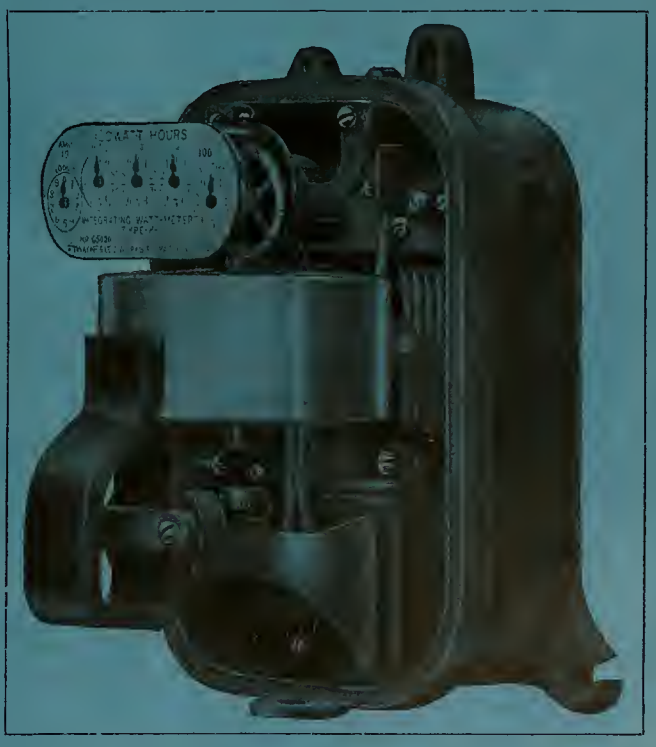
SOMETHING NEW

OUR

TYPE K INTEGRATING WATTMETER

Weighs less than 13 pounds and can be installed in a space

6 3-4 inches by 8 3-4 inches.



SOME INTERESTING POINTS.

This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.

It can be Quickly Adjusted for Either HIGH OR LOW FREQUENCY.

No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.

CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.

ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

WRITE FOR BULLETIN 1012.

MAIN OFFICE AND FACTORY

FORT WAYNE, - - - - INDIANA.

OKONITE IT NEVER DISAPPOINTS

"FACTS ARE SOMETIMES STUBBORN THINGS."

OKONITE IT NEVER DISAPPOINTS

Okonite Wires and Cables.

Having been so long and favorably known to the trade, we respectfully call to their attention the following

FACTS

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES have the indorsement of the best electrical authorities in the world.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not deteriorate, but improve with age.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not crack when exposed to the severest changes in temperature.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not deteriorate when placed in lime or mortar.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are not affected when immersed in sulphuric acid.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will stand a greater amount of kinking and torsion without permanent injury to the insulation than any other wire in the market.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are submerged in water for three days (72 hours), and then carefully tested with Thompson's Reflecting Galvanometer.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are tested, in addition to the Galvanometer test, with a dynamo current of not less than 2,000 volts.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES, when used in constructing telephone, telegraph, electric light and railway lines or feeders, owing to their high insulating qualities and efficiency, prove a paying investment, though the original cost may be somewhat higher than for lines constructed of cheaper material.

As General Western Agents of the OKONITE COMPANY, LIMITED, we carry in Chicago stock a complete line of their products, and thus are in position to fill all orders promptly.

CENTRAL ELECTRIC COMPANY,

OKONITE IT NEVER DISAPPOINTS

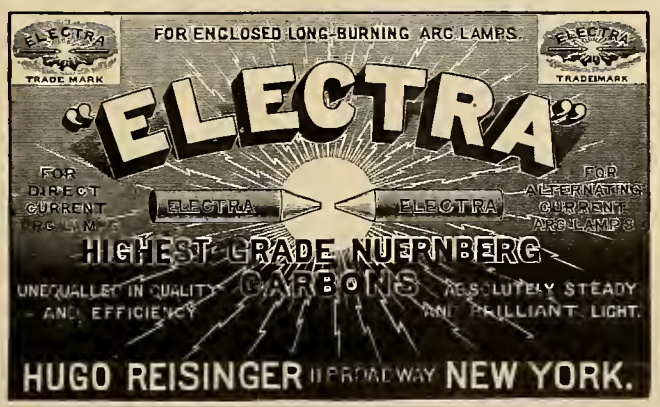
OKONITE IT NEVER DISAPPOINTS

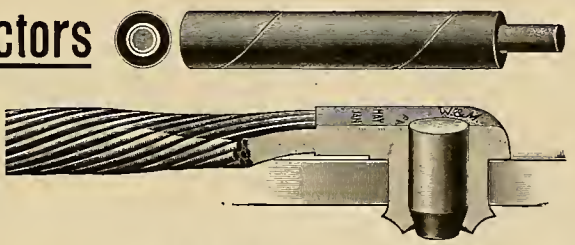
CARBONS CARBONS CARBONS

The "Electra" Carbons are the recognized standard all the world over.



There are no Carbons better than the "Electra" and none "just as good."

"CROWN" Insulated Conductors AND Rail Bonds ARE THE



Perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

Perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

Code of Moral Suasion and Correct Procedure To Establish a Claim.

AMERICAN ELECTRIC COMPANY,
56 E. 6th St., St. Paul, Minn.,

vs.

JOHN DOE ET AL.

Greeting:—The purchasing agent of your plant is hereby cited and summoned to hold a conference with himself, immediately upon receipt of this document, to then and there decide and determine that the claims herein set forth are true, viz.:

That the undersigned carry the largest stock of up-to-date electrical supplies in the great Northwest; that they are the exclusive selling agents in your territory for the Western Electric Arc and Incandescent Dynamos, Fan Motors, Petite Enclosed Arc Lamps, for both direct and alternating currents, for Simplex Rubber Covered Wires and Cables and Sunbeam Incandescent Lamps; that they are prepared to furnish anything and everything electrical, promptly as the circumstances will warrant, and always at the right price; that they carry in stock at St. Paul, besides all the "knicknacks" in Supplies, a large quantity of Weather Proof and Rubber Covered Wires, Circular Loom, Iron Armored and Loricated Conduit, Cross-Arms, Cross-Arm Braces, Lag Screws, Pole Steps, Insulators, etc.; that they are out for business and want your orders; that their constantly increasing trade is evidence of the appreciation of a thoroughly equipped electrical supply house in the Northwest; that this concern is tireless in its efforts to please, and that this is being done can easily be established.

It, therefore, behooves you to get in line with others and send your orders where they will receive the best attention.

Dated this 20th day of October, 1900.

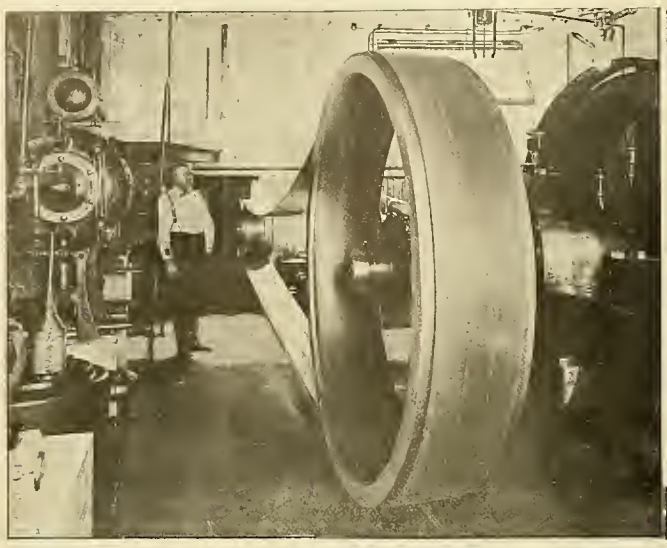
CROCKER-WHEELER COMPANY,

General Office and Works, Ampere, N. J.



CLINC-SURFACE Has allowed this belt to run slack, stopped its slipping, increased its bearing on the pulleys, increased its power, preserved the belt and saved them money all around, besides relieving the engineer and his employers from the constant trouble of a slipping belt.

CLINC-SURFACE will do all this for you. If it fails you need not pay for your order. It is worth trying when you risk nothing. Let us hear from you.

Cling-Surface Mfg. Co.
177-182 Virginia Street,
BUFFALO, N. Y.

Chicago, Boston,
New York, St. Louis,
Philadelphia, New Orleans.

THE GENERAL ELECTRIC COMPANY'S

... Enclosed Arc Lamps...

For 220 Volt Circuits.

May be used on 110 volt D. C. or A. C. Circuits by changing only five parts.

Burn singly on 210-250 volt circuits. Made in two capacities—for 2 3-4 and 3 1-2 amperes. Furnished with antique copper finish and black enamel casings. Equipped with single or double globes.

General Office: Schenectady, N. Y.

Chicago Office, Monadnock Building.

Sales Offices in All Large Cities.

Siemens & Halske Electric Co. of America,

GENERAL OFFICES, CHICAGO.

ELECTRICAL APPARATUS,

Railway, Lighting, Power Transmission.

IMPROVED DUNCAN INTEGRATING WATTMETERS.

DISTRICT OFFICES:

Boston, Chicago, Cincinnati, Denver, New York, Philadelphia, St. Louis, San Francisco.

Constant Current Series Long Burning Arc Lamps.

Differentially Controlled Direct Carbon Feed.

Easily Adjusted to Different Currents and Voltages.

Self-Adjusting Gas Check Regulates Air Admission. Burns 150 hours with Single Trimming.

Write for our "Petite Arc Lamp" Catalogue.

PART III.

ELECTRIC LIGHT AND ELECTRIC LIGHTING.

(CONTINUED.)

Cunynghame, Henry. A Treatise on the Law of Electric Lighting, to which is added a description of the principal apparatus used in Electric Lighting with illustrations. 8vo, cloth.....$5.00

Curtis-Hayward, A. C. Digest of the Law of Electric Lighting. 4to, paper $1.25

Cushing, H. C., Jr. Standard Wiring for Electric Light and Power. A compilation of formulae, rules and requirements from the most modern practice, and in accordance with the rules and requirements of the Boston Fire Underwriters' Union, the New England Insurance Exchange, and as recommended by the Underwriters' International Electric Association. 12mo, leather.....$1.00

De Segundo, E. C. Domestic Electric Lighting treated from the Consumer's Point of view. 16mo, sewed $0.50

Dibdin, W. J. Practical Photometry; a Guide to the Study of the Measurement of Light, with numerous illustrations. 12mo, cloth.....$3.00

Electric Lighting and Transmission of Power. Manual for Preparing Approximate Schemes and Estimates. Edited by the Allgemeine Elektricitaets-Gesellschaft, Berlin. Bound in celluloid, red edges $5.00

Electric Lighting Act, 1882. Minutes of Evidence given before the Select Committee of the House of Commons, and Full Text of the Act, 12mo, half roan $2.00

Fleming, J. A. Electric Lamps and Electric Lighting. Being a Course of Four Lectures delivered at the Royal Institution, April-May, 1894. 8vo, cloth. London, 1894 .....$3.00

Foster, Horatio A. Central Station Management and Finance. 8vo, cloth.....$1.50

Francisco, M. J. Municipalities vs. Private corporations $1.00

Gentsch, Wilhelm. The Incandescent Gas Light; Its History, Character and Operation. Translated by Sidney A. Reeve $1.50

Gordon, J. E. H. A Practical Treatise on Electric Lighting. With 23 full-page plates and many illustrations. 8vo, cloth $4.50

Gordon, Mrs. J. E. H. and J. E. H. Decorative Electricity With a chapter on Fire Risks. 8vo, cloth. Illustrated $2.50

Guy, Arthur F. Electric Light and Power, giving the result of practical experience in Central Station Work. 8vo, cloth. Illustrated.....$2.50

Hedges, Killingworth. Continental Electric Light Central Stations. With notes on the Methods in Actual Practice for Distributing Electricity in towns. Compiled in part from the Reports made for the Congress of the German Municipal Authorities on the occasion of their visit to the International Electrical Exhibition at Frankfort, 26th-29th August, 1891. Illustrated. 4to, cloth. London, 1892. .....$6.00

The various installations are grouped under the headings of Part I.—High Pressure; Part II.—Low Pressure;

In Part III. is a description of the pioneer enterprise of transmitting the power of the waterfalls at Lauffen as electrical energy to Frankfort, a distance of 108 miles.

Hering, Carl. Universal Wiring Computer for determining the size of Wires for Incandescent Electric Lamps, Leads and for distribution in general, without calculation, formula or knowledge of Mathematics, with some notes on wiring and a set of auxiliary tables. 12mo, cloth.....$1.00

Holmes, A. Bromley. The Electric Light popularly explained. 30 illustrations. Fifth edition. 12mo, boards. Illustrated.....$0.50

Hopkinson, Dr. John. Dynamic Electricity: Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy; including (I.) some Points in Electric Lighting. II. On the Measurement of Electricity for Commercial Purposes. By J. N. Schoolbred. III. Electric Light Arithmetic. By R. E. Day. 16mo, boards. (Van Nostrand's Science Series No. 71).....$0.50

Houston, Prof. E. J., and Kennelly, A. E. Electric Arc Lighting (Elementary Electro-Technical Series). 16mo, cloth. 155 illustrations..$1.00

Houston, Prof. E. J., and Kennelly, A. E. Electric Incandescent Lighting. (Elementary Electro-Technical Series). 16mo, cloth. 140 illustrations.....$1.00

Inglis, James. Artistic Lighting. To which is added "At Home" Portraiture with Daylight and Flashlight. By F. Dundas Todd. 12mo, cloth. $1.00

Kennedy, Rankin. Photographic and Optical Electric Lamps. A Treatise for Photographers, Photo-Electric Printers, Etchers and Engravers. And including Apparatus for copying Purposes for Engineers and Architects. 12mo, cloth. Illustrations $1.00

Knight, J. H. Electric Light for Country Houses. A Practical Hand-Book on the Erection and Running of Small Installations, with Particulars of the Cost of Plant and Working. 12mo, paper. $0.50

Latimer, L. H., Field, C. J. and Howell, J. W. Incandescent Electric Lighting. A Practical Description of the Edison System, to which is added the Design and Operation of Incandescent Stations, by C. J. Field, a description of the Edison Electrolytic Meter, by A. E. Kennelly, and a Paper on the Maximum Efficiency of Incandescent Lamps, by J. W. Howell. Illustrated. 16mo, boards. (No. 57 Van Nostrand's Science Series.) $0.50

Marine Electric Lighting. Electricity in Ships of War, Vessels of the Mercantile Marine, Yachts, Lighthouses, Harbors and Docks. Being Special Number of "Electric Plant" Jan. 1st, 1893. Numerous illustrations, 8 plates. 4to, paper..$2.00

Martin, T. C. Inventions, Researches and Writings of Nikola Tesla. With special reference to his work in polyphase currents and high potential lighting. 8vo, cloth. 500 pages. 300 illustrations. 2d edition $7.50

May, Dr. O. Popular Instructor for the Management of Electric Lighting Plants. Pocket size $1.00

An indispensable handbook for persons in charge of Electric Lighting plants, more particularly those who have had little or no technical training.

May, Dr. O. Table of Electric Conductors. Showing the relation between (1) The sectional area, diameter of conductors, loss of potential, strength of current, and length of conductors; (2) The economics of incandescent lamps, their candle-power, potential, and strength of current; (3) The Sectional area, diameters of conductors, and strength of current per square inch. For office use, printed on cardboard, with metal edges and suspended, or for the pocket, mounted on linen, in strong case, each $1.00

Maycock, W. Perren. Electric Lighting and Power Distribution. An elementary manual for students preparing for the ordinary grade examination of the City and Guilds of London Institute. Part I. With original questions, and ruled pages for notes. 123 illustrations and diagrams. 12mo, paper.....$0.75

Part II. 12mo, paper. London, 1893.....$1.00

Part III (Final). 12mo, paper. N. Y., 1893..$0.75

Merrill, E. A. Electric Lighting Specifications for the use of Engineers and Architects. 12mo, cloth. N. Y., 1896.....$1.50

Noll, Augustus. How to Wire Buildings: A Manual of the art of interior wiring. Fourth edition. 8vo, cloth. Illustrated. N. Y., 1895..$1.50

Palaz, A. (Sc. D., Professor of Industrial Electricity in the Science Faculty of the University of Lausanne). Treatise on Industrial Photometry, specially applied to Electric Lighting. Translated from the French by Professor G. W. Patterson, Jr., M. A., B. S., Assistant Professor of Physics in the University of Michigan, and M. R. Patterson, B. A. 2d edition, revised. Fully illustrated. 8vo, cloth. $4.00

Pope, F. L. Evolution of the Electric Incandescent Lamp. 91 pages, with illustrations. 8vo, cloth. New York, 1889.. .....$1.00

Pritchard, G. The Manufacture of Electric Light Carbons. 8vo, paper. London, 1890..... ....$0.60

Ram, Gilbert S. The Incandescent Lamp and its Manufacture. 8vo, cloth. 218 pages, with 69 illustrations. London, 1893..... .....$3.00

Randall, J. E. A Practical Treatise on the Incandescent Lamp. 16mo, cloth. Lynn, 1891..$0.50

A practical hand-book, giving information as to the origin, development, manufacture and future of the incandescent lamp.

Raphael, F. C. Localization of Faults in Electric Light Mains. 8vo, cloth.....$2.00

Regan, H. C. Electrical Engineers' and Students' Chart and Hand-Book of the Brush Arc Light System. London, 1895. .....$1.00

Report on Lighting by Electricity. Ordered by the House of Commons to be printed, June, 1879. Small folio, with illustrations and plates. London, 1879.... .....$2.00

Russell, Stuart A. Electric Light Cables and the Distribution of Electricity. 107 illustrations. 8vo, cloth. London, 1892.....$2.25

Salomons, Sir David. Electric Light Installations. Vol. I. The Management of Accumulators. A practical hand-book. 7th edition, revised and enlarged. With illustrations. 12mo, cloth....$1.50

Salomons, Sir David. Electric Light Installations. Vol. II. Apparatus. A practical hand-book. 7th edition, revised and enlarged. With 296 illustrations. 12mo, cloth.....$2.25

Salomons, Sir David. Electric Light Installations. Vol. III. Application. A practical hand-book. 7th edition, revised and enlarged. With illustrations. 12mo, cloth.....$1.50

Sawyer, W. E. Electric Lighting by Incandescence, and its Application to Interior Illustrations. A practical treatise, with 96 illustrations. 8vo, cloth. New York, 1881. (Scarce).....

Scrutton, Percy E. Electricity in Town and Country Houses. 12mo, cloth. Illustrated. London, 1898. .....$1.00

Slingo, W., and Brooker, A. Electrical Engineering for Electric Light Artisans and Students. 8vo, cloth. With 307 illustrations. New revised edition. London, 1895..... .....$3.50

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goohst, Constr. Supt. CHICAGO EDISON CO."

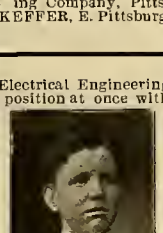
OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.



I enrolled in the Electrical Engineering Course and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill.

ELECTRICAL COURSES:

ELECTRICAL ENGINEERING,
ELECTRICAL,
ELECTRIC POWER AND LIGHTING,
ELECTRIC RAILWAYS,
ELECTRIC LIGHTING,
ELECTRIC CAR RUNNING,
TELEGRAPHY,
TELEPHONY.

Also courses in Steam, Mechanical, Civil and Mining Engineering, Architecture, Drawing and Designing, Chemistry, English and Commercial Branches.

INFORMATION

FOR MACHINERY USERS.

We are headquarters for Rebuilt Motive Power. Our machinery is absolutely warranted in every way. We cover all sales by a binding guarantee. Our stock is the most extensive in the land.

WE OFFER THE FOLLOWING, SUBJECT TO PRIOR SALE.

ENGINES.

S900 1 E. P. Allis Company tandem compound condensing engine.
H. P., nominal, 500.
Flywheel, 2 feet diameter by 40-inch face.
Cylinders, 22 and 42x48.
Guaranteed to operate on 15 pounds of steam per indicated horsepower.
This engine is in excellent condition. It is at present installed at Omaha, Neb.

S901 1 pair Williams automatic engines, coupled together.
Size, 17¾x24.
Revolutions, 200; builders' rating, 200; H. P., 200.

S902 2 Westingbouse compound engines, 13x22x13.
Revolutions, 290; H. P., 125.

S903—1 horizontal tangye bed, side crank automatic steam engine, made by Russel & Co.
Steam cylinder, 13x18.

S904 1 Wright automatic Corliss, 23x36.
S905 1 10x9 Westingbouse.
S906 1 8x12 Lansing automatic.
S907 1 7x12 Rice automatic.
S908 1 16x24 horizontal box bed, side crank.
S909 1 12x16 F. C. Wells horizontal tangye bed, side crank.
S910 10 9x12 engines, manufactured by George W. Tifft & Sons of Buffalo, N. Y.
S911 1 10x22 box bed, right baud, side crank.
S912 1 16x36-inch Corliss, left baud.
S913 1 9x16 Rice automatic.
S914 1 11x16x16 McEwen tandem compouud.
S915 1 8x10 Atlas automatic, center crank.
S916 1 11x18 Sinker, Davis & Co.
S917 1 12x16 horizontal, box bed, side crank.
S918 1 10x14 automatic Wright & Adams.
S919 1 12x12 bigh-speed automatic Ideal.
S920 1 20x24 box bed, balance valve.

In addition to the above, we have on band at all times a complete assortment of all size engines, ranging in power from 1 to 500 horsepower. Ask for our complete list.

BOILERS.

We still have on hand a few of Armour's 54x16, 60x16, 66x16, 66x18 and 72x18 horizontal tubular boilers. They are in excellent condition.

AIR COMPRESSORS.

S921 1 Duplex straight-line Clayton, 9x9.
S922 1 4½x6-inch Clayton.
S923 2 12x16. Will compress air up to 60 pounds' pressure, with 80 to 100 pounds' steam.

BELTING.

We carry at all times a complete stock of short-lap, double-thick leather belting, both new and second-band. Our quotatibns are always 30 per cent. below lowest market values.

SHAFTING.

We carry a stock of all sizes of shafting.

STEAM PUMPS.

Ask for our complete list of steam pumps. We have all kinds.

Electrical Apparatus.

See our list of supplies in the Western Electrician of October 27.

A COMPLETE OUTFIT.

We purchased the following outfit:

S924 1 McEwen tandem compound engine, 8½x14x12, with a direct-connected multipolar compound-wound dynamo, capacity, 50 K. W. Included in this outfit is a 100-horsepower Sterling water-tube boiler, with full front grate bars, etc. Also a Duplex steam pump and a copper-tube heater.
It was used about 2½ years and replaced, owing to a necessary increase in power.

DYNAMOS, ETC.

1 500-light National, 1000 volts, alternating exciter, attached to shaft, complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.
1 Thomson-Houston, 400-light, compound-wound dynamo, new, 110 volts, 200 amperes, complete with sliding base, belt tightener and regulator.
1 Thomson-Houston, 500-light, compound-wound dynamo, 110-volt, 200-ampere, complete with sliding base, belt tightener and regulator.
1 United States Weston dynamo, 150-light, 100-volt, 75-ampere, complete with sliding base, belt tightener and regulator.
2 generators, 80 K. W. type, U. S. Westingbouse bipolar, 350 revolutions per minute, 550 volts, size of pulley, 54x18 inches; paper rim; side rails complete.
2 Field Rheostats Westingbouse three-jaw switches for throwing generators in multiple.
1 voltmeter Westingbouse, 0 to 600.
2 amp.-meters Westinghouse, capacity 0 to 100.
1 amp.-meter Westingbouse, capacity 0 to 300.
2 Westingbouse circuit-breakers.
3 Westingbouse lightning arresters.
3 Westingbouse switches, double throw.
1 electric elevator, manufactured by Keystone Electric company of Erie, Pa.; self-oiler, 60-ampere, No. 324, 220-volt, 1,025 revolutions; worm gear and cog are solid brass; 53 grooves for ⅝-inch cable on drum; drum 30-inch diameter by 22-inch face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 horsepower; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.
1 Baxter 110-volt motor, 2-horsepower, good as new; complete and starting 60x base and tightener. Price.....$50.00
1 1000-light Slattery alternating-current dynamo, 1000-volt, complete with exciter and instrument. Practically as good as new.
1 2-horsepower Baxter motor, 100-volt, complete with starting box, base with belt tightener and pulley. First-class condition.

Our Machinery Hall is 200 X 360 feet.

Our complete list of items is contained in CATALOGUE No. 156.

Standard Electrical Dictionary.

BY PROF. T. O'CONOR SLOANE.
Author of "Arithmetic of Electricity," "Electricity Simplified," "Electric Toy Making," Etc.

682 Pages, 393 Illustrations. Handsomely bound in cloth, 8vo, $3.

An Entirely New Edition, Brought Up to Date and Greatly Enlarged.

COMPLETE—CONCISE—CONVENIENT.

In publishing the "Standard Electrical Dictionary," the author has adhered to what the work purports to be, exhausting the subject of electrical terms, giving each title the clearness of explanation necessary to make the understanding of it complete without unnecessary elaboration. In this work, every electrical word, term, or phrase will be found intelligently defined.

A practical handbook of reference, containing definitions of about 5,000 distinct words, terms and phrases.

The work is absolutely indispensable to all in any way interested in electrical science, from the higher electrical expert to the everyday electrical workman. In fact, it should be in the possession of all who desire to keep abreast with the progress of this branch of science.

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER
1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.

CHAPTER
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.

CHAPTER
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

The universally adopted National Electrical Code explained and illustrated in this year's edition of the hand-book.

STANDARD WIRING

For Electric Light and Power.

By H. C. CUSHING, Jr., A. I. E. E., Electrical Engineer and Inspector.

ADOPTED

By the Fire Underwriters of the United States.
By Cornell University, Stanford University and other Technical Colleges and Schools.
By over 27,000 Electrical Engineers, Central Station Managers and Wiremen.

BECAUSE

It is the only book on Wiring and Construction kept strictly up to date.
It contains all the necessary Tables, Rules, Formulas and Illustrations.
It settles disputes, and if referred to before wiring will prevent disputes.

Flexible Leather Cover (pocket size), $1.00.

MODERN ELECTRIC RAILWAY MOTORS.

BY GEO. T. HANCHETT, M. E.

FIRST PRACTICAL WORK ON RAILWAY MOTORS.

CONTENTS.—Chapter I.—Forms of Field Magnets. II.—Armature Winding Diagrams. III.—Field Coil Construction and Arrangement. IV.—Armature Construction. V.—Commutator and Brush Holder Construction. VI.—Motor Casings. VII.—Motor Suspensions. VIII.—Bearings and Gears. IX.—Lubrication. X.—General Dimensions and Data. XI.—Management and Repair. XII.—Railway Motor Design.

200 Pages. 157 Illustrations and Table. Price $2.00.

THIS is a book unique in its treatment of electric railway equipment. The first ten chapters are devoted to minute description of the details of electric railway motors that are in use to-day. Each organ of an electric railway motor is taken up in turn, described and illustrated by examples of present and past practice, and its operation explained in the light of practical experience. In short, the review of current practice is of such a nature as to bring out the reason why the electric railway motor is built as it is to-day. For example, field magnets of different types of motors are illustrated and compared, and their features of merit and faults pointed out. Armatures, armature windings, brush holders, suspensions and other details are similarly treated, each detail, however minute, being exhaustively considered. The last two chapters are devoted, one to the management and repair of electric railway motors, and the other to railway motor design, a complete design being worked out as an example. A table gives authoritative data of all types of railway motors in common use, both in America and Europe. Sent postpaid on receipt of price.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

SOMETHING ABSOLUTELY NEW

IN

ARC LAMPS.

A-B Solid Copper Case

AND

Pressed Steel Case Arc Lamps

FOR ALL CIRCUITS.

Twenty-Five Different Types.

Perfect in Regulation, Long Life, Easy Accessibility to Mechanism.

In all competitive tests they have been proven 50 per cent the best lamp made.

WESTERN ELECTRICAL SUPPLY CO.,

ST. LOUIS, U. S. A.

Full Particulars and Descriptive Matter Mailed on Application.

THE "CHLORIDE ACCUMULATOR"

IS OPERATED IN FORTY-NINE EDISON STATIONS.

When selecting apparatus for work of this character, purchasers generally give first consideration to the features of

RELIABILITY, EFFICIENCY, DURABILITY.

DESCRIPTIVE BULLETINS UPON REQUEST.

THE ELECTRIC STORAGE BATTERY COMPANY,

19th Street and Allegheny Avenue, PHILADELPHIA, PA.

SALES OFFICES:

NEW YORK, 100 Broadway. BOSTON, 60 State St. CHICAGO, 1424 Marquette Bldg. HALTIMORE, 641 Equitable Bldg. SAN FRANCISCO, Parrott Bldg.

ALTERNATING-CURRENT POWER MOTORS,

1-20 TO 2 1-2 ACTUAL HORSEPOWER.

SIMPLE, RELIABLE, SATISFACTORY.

Send for bulletins just issued describing new types.

Branch Office and Warehouse: 136 Liberty St., New York City.

The Emerson Electric Mfg.Co.,
714-716-718 St. Charles St., ST. LOUIS, MO.

A NOVELTY—JUST OUT!

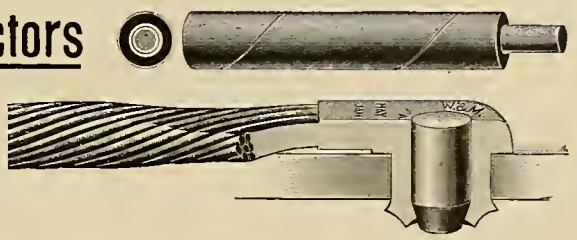
UNIVERSAL CORD SPOOL.

This is a neat and novel device for adjusting the length of cord of your drop light. Quickly attached; always hangs straight; cannot slip; no loop to dangle about; no socket to be removed. Made of hardwood, natural green or cherry finish. Prices on application. Manufactured and patented by the

CRESCENT MFG. CO., 52 W. Jackson Boulevard, Chicago, Ill., U. S. A.

For Sale by All Dealers in Electrical Supplies.

"CROWN" Insulated Conductors AND Rail Bonds ARE THE



Perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

Perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

"FACTS ARE SOMETIMES STUBBORN THINGS."

Okonite Wires and Cables.

Having been so long and favorably known to the trade, we respectfully call to their attention the following

FACTS

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES have the indorsement of the best electrical authorities in the WORLD.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not deteriorate, but improve with age.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not crack when exposed to the severest changes in temperature.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will not deteriorate when placed in lime or mortar.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are not affected when immersed in sulphuric acid.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES will stand a greater amount of kinking and torsion without permanent injury to the insulation than any other wire in the market.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are submerged in water for three days (72 hours), and then carefully tested with Thompson's Reflecting Galvanometer.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES are tested, in addition to the Galvanometer test, with a dynamo current of not less than 2,000 volts.

IT IS A FACT that OKONITE INSULATED WIRES AND CABLES, when used in constructing telephone, telegraph, electric light and railway lines or feeders, owing to their high insulating qualities and efficiency, prove a paying investment, though the original cost may be somewhat higher than for lines constructed of cheaper material.

As General Western Agents of the OKONITE COMPANY, LIMITED, we carry in Chicago stock a complete line of their products, and thus are in position to fill all orders promptly.

CENTRAL ELECTRIC COMPANY,

Stewart Patent Cord ADJUSTER.

(Patented August 21, 1900.)

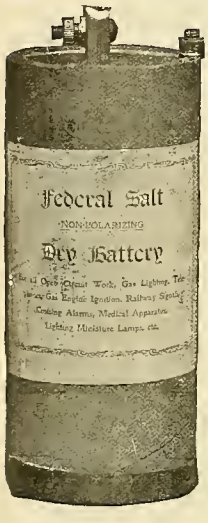
Cuts illustrate two methods of adjustment.

A device everyone wants.
Can be used on any size of cord.
Can be adjusted easily.
Can be used after rosette and socket are connected.
Made of fiber.
Sold as cheap as common wood adjusters.
Order from your supply house or us.
Same price everywhere.

SAMPLES FREE.

FRANK H. STEWART & CO.,

Manufacturers and dealers in
ALL ELECTRICAL SUPPLIES.
35 N. 7th St., Philadelphia, Pa.



Wonderful Recuperation.

Higher Voltage and Amperage.

Will do more Hard Work than any Dry Battery on the Market.

No more Running Down on the Shelf.

FEDERAL SALT.

FOR CARBON CYLINDER and CARBON-MANGANESE BATTERIES.

Gives More Current, Longer Life, Absolutely No Crystals.

Both salts have a depolarizer in the mixture. Federal Salt No. 1 has more depolarizer than Federalite, and so will last longer. That's the only difference.

It's the DEPOLARIZER that INCREASES the STRENGTH, GIVES LONGER LIFE, and DOES AWAY ABSOLUTELY WITH CRYSTALLIZATION and CREEPING SALTS.

Made by

FEDERAL BATTERY CO., 11 Pine St., N. Y.

OUR STUDENTS SUCCEED

INCREASED SALARY.

I was getting $30 a month as assistant in an Electric Lighting Plant when I took up the Electrical Engineering Course. Since that time, I have passed four Civil Service Examinations, and have had my salary raised four times. I am now getting $87 per month, and can truthfully say that I owe my success to correspondence instruction.

R. G. ELLIOTT,
Dannemora, N. Y.

MACHINIST TO ENGINEER.

I recommend The International Correspondence Schools as being one of the best means through which to obtain an education. The method employed is simple and easily understood. At the time I enrolled, I was holding a position as machinist and steam fitter. I am now chief engineer for J. S. & T. Elkinton, Philadelphia, Pa.

WM. R. HORNER,
Philadelphia, Pa.

$12 to $70, in Small Monthly Installments, pays for a

Salary-Raising Education

In Electrical Engineering, Electric Light and Power, Telephony, Telegraphy, Steam, Mechanical, and Civil Engineering.

Mention this paper. BOX 200

"YOUR SCALE OF WAGES DEPENDS UPON YOUR EFFICIENCY" . . . .

EDGAR P. BENJAMIN, With Manufacturers and Inventors' Electric Co., New York, writes:
"I commenced my course earning a salary of $6.00 per week of 57 hours. Now I receive three times that per week of 45 hours. Could I claim to be dissatisfied when I have only been about one-third way through my course?"

To establish the superior merits of its courses the Trustees of the *American School of Correspondence* have voted to award to a few well recommended, ambitious men in each manufacturing plant in the United States a

FREE SCHOLARSHIP

IN ELECTRICAL MECHANICAL STATIONARY MARINE OR LOCOMOTIVE ENGINEERING

(INCLUDING A COMPLETE COURSE IN MECHANICAL DRAWING)

INSTRUCTION ABSOLUTELY FREE.

The holders of these Free Scholarships will be asked to answer inquiries as to the benefit and value of the instruction, and also to recommend the school to their friends, thus establishing an endless chain of enthusiastic students who will advertise the School more thoroughly than tons of printed matter or an army of agents. Application blank on request.

SECOND-HAND ELECTRICAL MACHINERY.
WALSH'S SONS & CO.,
150 WASHINGTON ST., NEWARK, N. J.

WANTED TO BUY.

One hundred to two hundred dynamos, from 50 to 100 lights, for export trade. Will pay spot cash. Address "EXPORTER," care Western Electrician 510 Marquette Bldg., Chicago.

FOR SALE—A BARGAIN.

Thirty 200-ampere-hour storage-battery elements, Chloride Accumulator make. Also 150 hard rubber cells, 7x7x10½ inches. THOMAS ALEXANDER, 183 E. Randolph St., Chicago.

EXCEPTIONAL BARGAINS!

4—45-K. W., Edison, bipolar, 110-volt dynamos.
1—New 40 K. W., Stanley, two-phase, 2,000-volt alternator.
1—400-ampere-hour, Chloride Accumulator Co., storage battery.
1—15 x 14 Ideal engine.
1—14½ x 15 McIntosh & Seymour engine.
2—18½ x 18 Ideal engines.
1—20x36x18 Ball, cross-compound engine.
1—7½ x 5 x 6 Duplex feed pump.
1—1,000-H. P. Austin open heater.

Write for our latest price list No. 40.

PROPOSALS FOR ELECTRIC LIGHTING.

Bids are hereby invited for the electric lighting of the city of Shreveport, La., for a period of five years, from June 1, 1901.

The system shall be the Thomson-Houston, the General Electric, or equally as good.

The number of arc lights to be not less than one hundred, and subject to be increased to two hundred.

Bids shall specify the charge for arc lights, and also for incandescent lights. Bids shall also specify the maximum charge to be made for private consumers of arc and incandescent lights.

A certified check for $2,500 to accompany each bid.

The city reserves the right to reject any and all bids

The successful bidder shall be required to give bond for faithful performance.

The arc lights for street lighting shall burn every night, and shall be at least 2,000 candlepower.

All bids shall be in the hands of the comptroller by 6 p. m. of December 1, 1900.

N. B. MURFF, Comptroller,
City of Shreveport, La.

Latest Type Brand New Siemens & Halske Machines—Multipolar Generators.

1 55-light type B, 125-volt generator, self-oiler, M. P., slow speed.
2 80-light Ironclad type, 125-volt generators, self-oilers, M. P.
1 80-light bipolar type, 125-volt generator, self-oiler.
1 110-light Churchward type, slow speed, 125-volt generator, M. P., 650 R. P. M.
2 180-light Ironclad type, 125-volt generators, M. P., self-oilers.
2 210-light-type B, 12 K. W., 125-volt generators, M. P., self-oilers.
2 350-light bipolar type, 20 K. W., 125-volt generators, self-oilers.
2 500-light bipolar type, 125-volt generators, 30 K. W., self-oilers.
1 700-light Ironclad type, 125-volt generator, self-oiler, slow speed.
1 Ironclad type, 30 K. W., 250-volt, slow speed, M. P., self-oiler.
2 Churchward type, 25 K. W., 500-volt, slow speed, M. P., self-oilers, 475 R. P. M.
1 Churchward type, 50 K. W., 250-volt, slow speed, for direct connection.
1 Churchward type, 100 K. W., 250-volt, slow speed, for direct connection.
1 marble panel switchboard for same, extra.
1 type six-pole, 100 K. W., 125 volts, for direct connection.
1 Churchward, 50 K. W., 1,100 volts, 60-cycle alternator, single phase, with exciter.
1 Churchward, 50 K. W., two-phase, 60-cycle, rotary transformer, with exciter, 1,000 volts alternating to 250 volts, direct current, with one marble panel switchboard, all complete.
1 Ironclad type, booster set, 90 amp., 110 volts to 275 amp., at 25 volts. Very fine; big bargain.

Latest Type Brand New Siemens & Halske Machines—Multipolar Motors.

Less than Cost of Manufacture.

1 4 H. P. 110-volt, type B, M. P., self-oiler.
2 5 H. P. 110-volt, Ironclad type, M. P., self-oilers.
1 5 H. P. 110-volt, bipolar type, self-oiler.
2 7½ H. P. 110-volt, Churchward type, M. P., self-oilers, slow speed, 650 R. P. M.
1 12 H. P. 110-volt, Ironclad type, M. P., self-oiler.
3 15 H. P. 110-volt, type B, M. P., self-oilers.
1 50 H. P. 110-volt, Ironclad type, M. P., self-oiler, slow speed.

GREGORY ELECTRIC CO.
54-62 S. CLINTON ST. CHICAGO.

TWO GREAT PURCHASES

THE ENTIRE STOCK OF
COMPLETED MACHINES, INSTRUMENTS AND SUPPLIES
...OF THE...
SIEMENS & HALSKE ELECTRIC CO.
OF AMERICA,
Contained in Their Immense Grant Works Chicago, Ill.

This company was one of the largest manufacturers of Electrical Apparatus in the world, and built high-grade apparatus only which always sold for higher figures than almost any other make. The General Electric Co recently obtained control of these works, closed them up and sold off the entire stock to the highest bidders. It was only by our offering to take the WHOLE STOCK that our offer was accepted. All ready for immediate shipment and delivered f. o. b. Chicago.

LESS THAN COST OF MANUFACTURE.

1 25 H. P. 220-volt, Ironclad type, M. P., self-oiler.
1 7½ H. P. 500-volt, Churchward type, M. P., self-oiler, slow speed.
1 15 H. P. 500-volt, Churchward type, M. P., self-oiler, slow speed.
2 40 H. P. 500-volt, Churchward type, M. P., self-oilers, slow speed, 425 R. P. M.
1 25 H. P. 125-volt, bipolar type, self-oiler.
2 35 H. P. 125-volt, bipolar type, self-oilers.

The following are NEARLY NEW, having been but slightly used for testing, etc.

Dynamos—Siemens & Halske.

1 100 K. W. motor-generator, 125 to 600 volts, direct-coupled on same base.
4 210-light bipolar type, self-oilers, 12 K. W., 125 volts.
6 350-light bipolar type, self-oilers, 20 K. W., 125 volts.
12 500-light bipolar type, self-oilers, 30 K. W., 125 volts.
1 1,350-light type I, M. P., self-oiler, 80 K. W., 125 volts, for direct connection.
1 1,200-light bipolar type, self-oiler, 70 K. W., 125 volts.
3 1,500-light bipolar type, self-oilers, 100 K. W., 125 volts.
1 1,000-light 50 K. W., single-phase, 60-cycle, inductor alternator, 1,100 volts. Fine.

Motors—Siemens & Halske.

4 15 H. P. 110-volt, bipolar type, self oilers, 12 K. W.
8 25 H. P. 110-volt, bipolar type, self-oilers, 20 K. W.
9 35 H. P. 110-volt, bipolar type, self oilers, 30 K. W.
1 90 H. P. 110-volt, bipolar type, self-oiler, 70 K. W.
2 125 H. P. 110-volt, bipolar type, self-oilers, 100 K. W.

ANOTHER GREAT PURCHASE.

We were the highest bidders for the entire stock of completed machines of the
GIBBS ELECTRICAL MFG. CO., Milwaukee,
and secured the whole lot. All these are brand new, latest type multipolar machines, ready for immediate shipment.

110-VOLT GIBBS, M. P. DYNAMOS—brand new.

4 35-light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
2 55-light Gibbs, multipolar, self-oiling bearings, moderate speed, comp. wound.
4 55-light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
4 110 light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
3 150-light Gibbs, multipolar, self-oiling bearings, moderate, comp. wound.
1 160-light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
4 210-light Gibbs, multipolar, self-oiling bearings, slow speed.
4 300-light Gibbs, multipolar, self-oiling bearings, slow speed.

110-VOLT MOTORS—brand new.

4 3 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
2 4 H. P. Gibbs, multipolar, self-oiling bearings, moderate speed.
3 4 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
1 6 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
2 7½ H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
3 10 H. P. Gibbs, multipolar, self-oiling bearings, moderate speed.
2 10 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
3 15 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
2 20 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.

220-VOLT MOTORS—slightly used—excellent condition fully guaranteed.

25 5 H. P. Gibbs, multipolar, self-oiling bearings.

Special Sale of Fine Testing Instruments From the Engineering Department of Siemens & Halske.

Probably the Finest Equipment of Testing Apparatus Ever Installed in Any Factory.

Most of these instruments were purchased just prior to the absorption of this company by the General Electric company, and have never been used. This exceptional lot of instruments should appeal especially to colleges and schools desiring to increase their equipment with the finest instruments at a small expenditure.

INFORMATION

FOR MACHINERY USERS.

We are headquarters for Rebuilt Motive Power. Our machinery is absolutely warranted in every way. We cover all sales by a binding guarantee. Our stock is the most extensive in the land.

WE OFFER THE FOLLOWING, SUBJECT TO PRIOR SALE.

ENGINES.

S900 1 E. P. Allis Company tandem compound condensing engine.
H. P., nominal, 500.
Flywheel, 2 feet diameter by 40-inch face.
Cylinders, 22 and 42x48.
Guaranteed to operate on 15 pounds of steam per indicated horsepower.
This engine is in excellent condition. It is at present installed at Omaha, Neb.

S901 1 pair Williams automatic engines, coupled together.
Size, 17¾x24.
Revolutions, 200; builders' rating, 200; H. P., 200.

S902 2 Westinghouse compound engines, 13x22x13.
Revolutions, 290; H. P., 125.

S903—1 horizontal tangye bed, side crank automatic steam engine, made by Russel & Co.
Steam cylinder, 13x18.

S904 1 Wright automatic Corliss, 23x36.
S905 1 10x9 Westinghouse.
S906 1 8x12 Lansing automatic.
S907 1 7x12 Rice automatic.
S908 1 16x24 horizontal box bed, side crank.
S909 1 12x16 F. C. Wells horizontal tangye bed, side crank.
S910 10 9x12 engines, manufactured by George W. Tifft & Sons of Buffalo, N. Y.
S911 1 10x22 box bed, right hand, side crank.
S912 1 16x36-inch Corliss, left hand.
S913 1 9x16 Rice automatic.
S914 1 11x16x16 McEwen tandem compound.
S915 1 8x10 Atlas automatic, center crank.
S916 1 11x18 Sinker, Davis & Co.
S917 1 12x16 horizontal, box bed, side crank.
S918 1 10x14 automatic Wright & Adams.
S919 1 12x12 high-speed automatic Ideal.
S920 1 20x24 box bed, balance valve.

In addition to the above, we have on hand at all times a complete assortment of all size engines, ranging in power from 1 to 500 horsepower. Ask for our complete list.

BOILERS.

We still have on hand a few of Armour's 54x16, 60x16, 66x16, 66x18 and 72x18 horizontal tubular boilers. They are in excellent condition.

AIR COMPRESSORS.

S921 1 Duplex straight-line Clayton, 9x9.
S922 1 4½x6-inch Clayton.
S923 2 12x16. Will compress air up to 60 pounds' pressure, with 80 to 100 pounds' steam.

BELTING.

We carry at all times a complete stock of short-lap, double-thick leather belting, both new and second-hand. Our quotations are always 30 per cent. below lowest market values.

SHAFTING.

We carry a stock of all sizes of shafting.

STEAM PUMPS.

Ask for our complete list of steam pumps. We have all kinds.

Electrical Apparatus.

See our list of supplies in the Western Electrician of October 27.

A COMPLETE OUTFIT.

We purchased the following outfit:

S924 1 McEwen tandem compound engine, 8½x14x12, with a direct-connected multipolar compound-wound dynamo, capacity, 50 K. W. Included in this outfit is a 100-horsepower Sterling water-tube boiler, with full front grate bars, etc. Also a Duplex steam pump and a copper-tube heater.
It was used about 2½ years and replaced, owing to a necessary increase in power.

DYNAMOS, ETC.

1 500-light National, 1000 volts, alternating exciter, attached to shaft, complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.
1 Thomson-Houston, 400-light, compound-wound dynamo, new, 110 volts, 200 amperes, complete with sliding base, belt tightener and regulator.
1 Thomson-Houston, 500-light, compound-wound dynamo, 110-volt, 200-ampere, complete with sliding base, belt tightener and regulator.
1 United States Weston dynamo, 150-light, 100-volt, 75-ampere, complete with sliding base, belt tightener and regulator.
2 generators, 80 K. W. type, U. S. Westinghouse bipolar, 350 revolutions per minute, 550 volts, size of pulley, 54x18 inches; paper rim; side rails complete.
2 Field Rheostats Westinghouse three-jaw switches for throwing generators in multiple.
1 voltmeter Westinghouse, 0 to 600.
2 amp.-meters Westinghouse, capacity 0 to 160.
1 amp.-meter Westinghouse, capacity 0 to 300.
2 Westinghouse circuit-breakers.
3 Westinghouse lightning arresters.
3 Westinghouse switches, double throw.
1 electric elevator, manufactured by Keystone Electric company of Erie, Pa.; self-oiler, 60-ampere, No. 324, 220-volt, 1,025 revolutions; worm gear and cog are solid brass; 53 grooves for ⅝-inch cable on drum; drum 30-inch diameter by 22-inch face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 horsepower; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.
1 Baxter 110-volt motor, 2-horsepower, good as new; complete and starting box base and tightener. Price.....$50.00
1 1000-light Slattery alternating-current dynamo, 1000-volt, complete with exciter and instrument. Practically as good as new.
1 2-horsepower Baxter motor, 100-volt, complete with starting box, base with belt tightener and pulley. First-class condition.

Our Machinery Hall is 200 X 360 feet.

Our complete list of items is contained in CATALOGUE No. 156.

CHICAGO HOUSE WRECKING CO.,
W. 35th and Iron Sts., Chicago.

LIGHTING—POWER—RAILWAY ELECTRICAL MACHINERY.

A Few Reasons Why You Should Use the
WARNER DRY BATTERY

RINGING OUTFIT.

BECAUSE:

No exchange is complete without one.
It is the cheapest way to secure power.
There are no bearings to oil.
There is no water to spill.
There are no delays or stops.
It is absolutely reliable under all conditions.
It will ring where all other ringers fail.
There are no belts to slip.
There are no commutators to keep clean.
There are no power bills to pay.
It is always ready for duty.

Your operators can give better service with a good signaling device.

Every Outfit is Shipped Complete Ready for Immediate Use.

Every outfit is thoroughly tested and fully guaranteed. This machine is in use in some of the largest exchanges, both in this country and abroad. The net price for the complete outfit is

$45 F. O. B. Factory.

50-FOOT TO 80-FOOT POLES OUR SPECIALTY

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

IMPROVED DUNCAN INTEGRATING WATTMETERS.

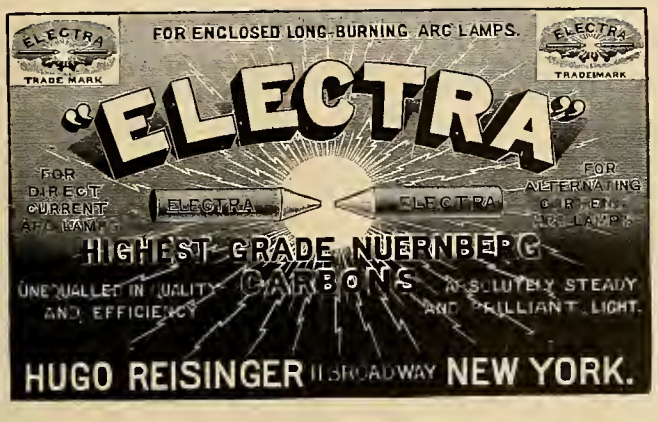
Many thousands of these Wattmeters are in daily use. Our sales are increasing. All electrical instruments should be perfect and register accurately. The large use of and increasing demand for our meters indicate that they meet these important requirements.

DISTRICT OFFICES:

Boston. Chicago. Cincinnati. Denver.
New York. Philadelphia. St. Louis. San Francisco.

The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

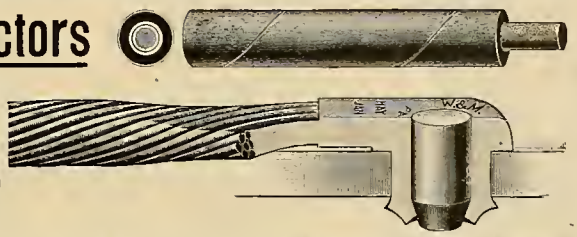
All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

WHY IS IT

THAT

THE **"BELDEN"** SYSTEM

OF ARC LIGHTING

Is so far superior to any other system on the market?

BECAUSE

It embodies features that are not to be found in any other lamp.

We have convinced hundreds who have had arc lamp troubles. We can convince you.

Our catalog explains the fine points of the "Belden" and it will be sent on request.

KANSAS CITY Electric Light Company.
GENERAL OFFICE.
KANSAS CITY, MO.

Nov 9 1900

Helios-Upton Company
Chicago ILL

Mr King Upton,

My dear Sir:

Your favor of recent date received and in answer would say that up to date the battery installed by your company for the Kansas City Electric Light Company has worked in an entirely satisfactory manner and is of the greatest assistance to us on the peaks of our load . While it has not been in operation but a comparatively short time, the general construction of the battery, the manner in which it has been installed and workmanship would indicate that we have an equipment second to none in the country.

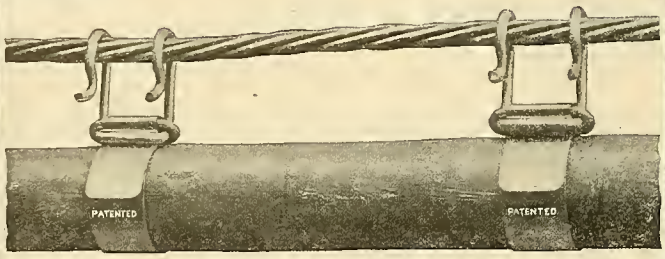
Very truly yours,

Kansas City Electric Light Company

C. B. Richardson
General Manager

IT IS AN ACCOMPLISHED FACT, AS THE ABOVE LETTER SHOWS.

BOSTON CABLE CLIP!



The largest telephone companies in the country are using them exclusively

BECAUSE THEY ARE:

THE BEST.
THEY WILL NOT SLIP.
THE MOST ECONOMICAL.
ADJUSTABLE TO ANY SIZE CABLE.
THE MOST DURABLE.

(Millions NOW in use.)

CHASE-SHAWMUT CO. (Sole Mfrs.)

A TESTIMONIAL OF MERIT.

(Taken from the Army and Navy Magazine.)

An exhibit at the Paris Exposition showing ingenuity and skill in its compilation was that of the Pacific Electric Company of La Crosse, Wisconsin, in group V, class 25, consisting of incandescent desk lamps. There they showed goods of this character in the many different patterns and designs for which their products are noted – in fact, they far surpassed many similar kinds of foreign manufacture shown in the same group.

Americans who saw this display could not but feel proud of the display of the company, for it showed to all visitors what an enterprising firm can do when it tries and what kind of products they can produce for their patrons. As a result of this fine exhibit, the above company is now the recipient of increased orders from abroad and at home. Government officials should write for prices.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goebel, Constr. Supt. CHICAGO EDISON CO."

WANTED.

A FIRST-CLASS ELECTRICIAN.

WRITE

A. G. WHITNEY,

ST. CLOUD, MINN.

WANTED.

Position as electrician, engineer or superintendent of a lighting or railway plant. Have good practical experience and a thorough technical training. Thoroughly familiar with construction work. Am willing to invest in well located plant or will lease. First-class references. Address "L. M. S.," care Western Electrician, 510 Marquette Bldg., Chicago.

SITUATION WANTED

By electrician and engineer. 16 years' experience operating Lighting and Street Railway Systems. Good armature winder. References furnished. Address "ARMATURE," care Western Electrician, 510 Marquette Bldg., Chicago.

WANTED.

Position as superintendent, electrician or assistant, in a power or lighting plant. Have had 4 years' experience in power and lighting plant. Am single, do not drink, and can give good references. Address "E. F.," care of Western Electrician. 510 Marquette Bldg., Chicago

WANTED TO BUY.

We are in the market for good second-hand high-speed Automatic and Corliss engines. We want several such at once. Write us, giving full particulars.

CAMP ENGINEERING CO.,

18 South Canal Street, Chicago, Ill.

FOR SALE.

Ninety second-hand telephone instruments of best make. Are comparatively new and in good condition. Would consider proposition to place them in new exchange for part interest. W. C. DUGAN, Searcy, Ark.

WE BUY AND SELL

SECOND-HAND ELECTRICAL MACHINERY.

WALSH'S SONS & CO.,

150 WASHINGTON ST., NEWARK, N. J.

WANTED TO BUY.

One hundred to two hundred dynamos, from 50 to 100 lights, for export trade. Will pay spot cash. Address "EXPORTER," care Western Electrician 510 Marquette Bldg., Chicago.

FOR SALE—A BARGAIN.

Thirty 200-ampere-hour storage-battery elements, Chloride Accumulator make. Also 150 hard rubber cells, 7x7x10½ inches. THOMAS ALEXANDER, 183 E. Randolph St., Chicago.

EXCEPTIONAL BARGAINS!

4—45-K. W., Edison, bipolar, 110-volt dynamos.
1—New 40-K. W., Stanley, two-phase, 2,000-volt alternator.
1—400-ampere-hour, Chloride Accumulator Co., storage battery.
1—15 x 14 Ideal engine.
1—14½ x 15 McIntosh & Seymour engine.
2—18½ x 18 Ideal engines.
1—20x36x18 Ball, cross-compound engine.
1—7½ x 5 x 6 Duplex feed pump.
1—1,000-H. P. Austin open heater.

Write for our latest price list No. 40.

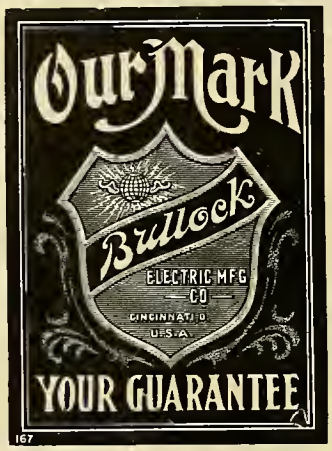
SCHUREMAN & HAYDEN,

140 S. Clinton St., Chicago.

BIDS FOR LIGHTING.

The City of Big Rapids will receive bids to and including December 3d next, at seven o'clock P. M., for the furnishing of not less than fifty street lights. Bids to be made for twelve hundred and two thousand candlepower lights. Bids to be made upon the midnight, moonlight and all-night schedules, and for one, three or five year contract. All bids to be accompanied by certified check for $300 00. The right is reserved to reject any or all bids.

Address correspondence to City Clerk,
Dated Oct. 25, 1900. Big Rapids, Mich.



PROPOSALS FOR ELECTRIC LIGHTING.

Bids are hereby invited for the electric lighting of the city of Shreveport, La., for a period of five years, from June 1, 1901.

The system shall be the Thomson-Houston, the General Electric, or equally as good.

The number of arc lights to be not less than one hundred, and subject to be increased to two hundred.

Bids shall specify the charge for arc lights, and also for incandescent lights. Bids shall also specify the maximum charge to be made for private consumers of arc and incandescent lights.

A certified check for $2,500 to accompany each bid.

The city reserves the right to reject any and all bids.

The successful bidder shall be required to give bond for faithful performance.

The arc lights for street lighting shall burn every night, and shall be at least 2,000 candlepower.

All bids shall be in the hands of the comptroller by 6 p. m. of December 1, 1900.

N. B. MURFF, Comptroller,
City of Shreveport, La.

Latest Type Brand New Siemens & Halske Machines—Multipolar Generators.

1 65-light type B, 125-volt generator, self-oiler, M. P., slow speed.
2 80-light Ironclad type, 125-volt generators, self-oilers, M. P.
1 80-light bipolar type, 125-volt generator, self-oiler.
1 110-light Churchward type, slow speed, 125-volt generator, M. P., 650 R. P. M.
2 180-light Ironclad type, 125-volt generators, M. P., self-oilers.
2 210-light-type B, 12 K. W., 125-volt generators, M. P., self-oilers.
2 350-light bipolar type, 20 K. W., 125-volt generators, self-oilers.
2 500-light bipolar type, 125-volt generators, 30 K. W., self-oilers.
1 700-light Ironclad type, 125-volt generator, self-oiler, slow speed.
1 Ironclad type, 30 K. W., 250-volt, slow speed, M. P., self-oiler.
2 Churchward type, 35 K. W., 500-volt, slow speed, M. P., self-oilers, 475 R. P. M.
1 Churchward type, 50 K. W., 250-volt, slow speed, for direct connection.
1 Churchward type, 100 K. W., 250-volt, slow speed, for direct connection.
1 marble panel switchboard for same, extra.
1 type six-pole, 100 K. W., 125 volts, for direct connection.
1 Churchward, 50 K. W., 1,100 volts, 60-cycle alternator, single phase, with exciter.
1 Churchward, 50 K. W., two-phase, 60-cycle, rotary transformer, with exciter, 1,000 volts alternating to 250 volts, direct current, with one marble panel switchboard, all complete.
1 Ironclad type, booster set, 90 amp., 110 volts to 275 amp., at 26 volts. Very fine; big bargain.

Latest Type Brand New Siemens & Halske Machines—Multipolar Motors.

Less than Cost of Manufacture.

2 5 H. P. 110-volt, Ironclad type, M. P., self-oilers.
1 5 H. P. 110-volt, bipolar type, self-oiler.
2 7½ H. P. 110-volt, Churchward type, M. P., self-oilers, slow speed, 650 R. P. M.
1 12 H. P. 110-volt, Ironclad type, M. P., self-oiler.
3 15 H. P. 110-volt, type B, M. P., self-oilers.
1 50 H. P. 110-volt, Ironclad type, M. P., self-oiler, slow speed.

GREGORY ELECTRIC CO.

54-62 S. CLINTON ST. CHICAGO.

TWO GREAT PURCHASES

THE ENTIRE STOCK OF

COMPLETED MACHINES, INSTRUMENTS AND SUPPLIES

...OF THE...

SIEMENS & HALSKE ELECTRIC CO.

OF AMERICA,

Contained in Their Immense Grant Works Chicago, Ill.

This company was one of the largest manufacturers of Electrical Apparatus in the world, and built high-grade apparatus only which always sold for higher figures than almost any other make. The General Electric Co recently obtained control of these works, closed them up and sold off the entire stock to the highest bidders. It was only by our offering to take the WHOLE STOCK that our offer was accepted. All ready for immediate shipment and delivered f. o. b. Chicago.

LESS THAN COST OF MANUFACTURE.

1 35 H. P. 220-volt, Ironclad type, M. P., self-oiler.
1 7½ H. P. 500-volt, Churchward type, M. P., self-oiler, slow speed.
1 15 H. P. 500-volt, Churchward type, M. P., self-oiler, slow speed.
2 40 H. P. 500-volt, Churchward type, M. P., self-oilers, slow speed, 425 R. P. M.
1 25 H. P. 125-volt, bipolar type, self-oiler.
2 35 H. P. 125-volt, bipolar type, self-oilers.

The following are NEARLY NEW, having been but slightly used for testing, etc.

Dynamos—Siemens & Halske.

1 100 K. W. motor-generator, 125 to 500 volts, direct-coupled on same base.
4 210-light bipolar type, self-oilers, 12 K. W., 125 volts.
6 350-light bipolar type, self-oilers, 20 K. W., 125 volts.
12 500-light bipolar type, self-oilers, 30 K. W., 125 volts.
1 1,350-light type I. M. P., self-oiler, 80 K. W., 125 volts, for direct connection.
1 1,200-light bipolar type, self-oiler, 70 K. W., 125 volts.
3 1,500-light bipolar type, self-oilers, 100 K. W., 125 volts.
1 1,000-light 50 K. W., single-phase, 60-cycle, inductor alternator, 1,100 volts. Fine.

Motors—Siemens & Halske.

4 15 H. P. 110-volt, bipolar type, self-oilers, 12 K. W.
8 25 H. P. 110-volt, bipolar type, self-oilers, 20 K. W.
9 35 H. P. 110-volt, bipolar type, self-oilers, 30 K. W.
1 90 H. P. 110-volt, bipolar type, self-oiler, 70 K. W.
2 125 H. P. 110-volt, bipolar type, self-oilers, 100 K. W.

ANOTHER GREAT PURCHASE.

We were the highest bidders for the entire stock of completed machines of the

GIBBS ELECTRICAL MFG. CO., Milwaukee,

and secured the whole lot. All these are brand new, latest type multipolar machines, ready for immediate shipment.

110-VOLT GIBBS, M. P. DYNAMOS—brand new.

4 25-light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
2 55-light Gibbs, multipolar, self-oiling bearings, moderate speed, comp. wound.
4 55-light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
4 110 light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
3 150-light Gibbs, multipolar, self-oiling bearings, moderate, comp. wound.
1 150-light Gibbs, multipolar, self-oiling bearings, slow speed, comp. wound.
4 210-light Gibbs, multipolar, self-oiling bearings, slow speed.
4 300-light Gibbs, multipolar, self-oiling bearings, slow speed.

110-VOLT MOTORS—brand new.

4 3 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
2 4 H. P. Gibbs, multipolar, self-oiling bearings, moderate speed.
3 4 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
1 6 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
2 7½ H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
3 10 H. P. Gibbs, multipolar, self-oiling bearings, moderate speed.
2 10 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
3 15 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.
2 20 H. P. Gibbs, multipolar, self-oiling bearings, slow speed.

220-VOLT MOTORS—slightly used—excellen condition fully guaranteed.

25 5 H. P. Gibbs, multipolar, self-oiling bearings.

Special Sale of Fine Testing Instruments From the Engineering Department of Siemens & Halske.

Probably the Finest Equipment of Testing Apparatus Ever Installed in Any Factory.

Most of these instruments were purchased just prior to the absorption of this company by the General Electric company, and have never been used. This exceptional lot of instruments should appeal especially to colleges and schools desiring to increase their equipment with the finest instruments at a small expenditure.

L. D. Telephone, Main 5114. 141 S. Clinton Street, CHICAGO.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.
ANDREW A. STEWART,

INFORMATION

FOR MACHINERY USERS.

We are headquarters for Rebuilt Motive Power. Our machinery is absolutely warranted in every way. We cover all sales by a binding guarantee. Our stock is the most extensive in the land.

WE OFFER THE FOLLOWING, SUBJECT TO PRIOR SALE.

ENGINES.

S900 1 E. P. Allis Company tandem compound condensing engine.
H. P., nominal, 500.
Flywheel, 2 feet diameter by 40-inch face.
Cylinders, 22 and 42x48.
Guaranteed to operate on 15 pounds of steam per indicated horsepower.
This engine is in excellent condition. It is at present installed at Omaha, Neb.

S901 1 pair Williams automatic engines, coupled together.
Size, 17¾x24.
Revolutions, 200; builders' rating, 200; H. P., 200.

S902 2 Westinghouse compound engines, 13x22x13.
Revolutions, 290; H. P., 125.

S903—1 horizontal tangye bed, side crank automatic steam engine, made by Russel & Co.
Steam cylinder, 13x18.

S904 1 Wright automatic Corliss, 23x36.

S905 1 10x9 Westinghouse.

S906 1 8x12 Lansing automatic.

S907 1 7x12 Rice automatic.

S908 1 16x24 horizontal box bed, side crank.

S909 1 12x16 F. C. Wells horizontal tangye bed, side crank.

S910 10 9x12 engines, manufactured by George W. Tifft & Sons of Buffalo, N. Y.

S911 1 10x22 box bed, right hand, side crank.

S912 1 16x36-inch Corliss, left hand.

S913 1 9x16 Rice automatic.

S914 1 11x16x16 McEwen tandem compound.

S915 1 8x10 Atlas automatic, center crank.

S916 1 11x18 Sinker, Davis & Co.

S917 1 12x16 horizontal, box bed, side crank.

S918 1 10x14 automatic Wright & Adams.

S919 1 12x12 high-speed automatic Ideal.

S920 1 20x24 box bed, balance valve.

In addition to the above, we have on hand at all times a complete assortment of all size engines, ranging in power from 1 to 500 horsepower. Ask for our complete list.

BOILERS.

We still have on hand a few of Armour's 54x16, 60x16, 66x16, 66x18 and 72x18 horizontal tubular boilers. They are in excellent condition.

AIR COMPRESSORS.

S921 1 Duplex straight-line Clayton, 9x9.

S922 1 4½x6-inch Clayton.

S923 2 12x16. Will compress air up to 60 pounds' pressure, with 80 to 100 pounds' steam.

BELTING.

We carry at all times a complete stock of short-lap, double-thick leather belting, both new and second-hand. Our quotations are always 30 per cent. below lowest market values.

SHAFTING.

We carry a stock of all sizes of shafting.

STEAM PUMPS.

Ask for our complete list of steam pumps. We have all kinds.

Electrical Apparatus.

See our list of supplies in the Western Electrician of October 27.

A COMPLETE OUTFIT.

We purchased the following outfit:

S924 1 McEwen tandem compound engine, 8½x14x12, with a direct-connected multipolar compound-wound dynamo, capacity, 50 K. W. Included in this outfit is a 100-horsepower Sterling water-tube boiler, with full front grate bars, etc. Also a Duplex steam pump and a copper-tube heater. It was used about 2½ years and replaced, owing to a necessary increase in power.

DYNAMOS, ETC.

1 500-light National, 1000 volts, alternating exciter, attached to shaft, complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.

1 Thomson-Houston, 400-light, compound-wound dynamo, new, 110 volts, 200 amperes, complete with sliding base, belt tightener and regulator.

1 Thomson-Houston, 500-light, compound-wound dynamo, 110-volt, 200-ampere, complete with sliding base, belt tightener and regulator.

1 United States Weston dynamo, 150-light, 100-volt, 75-ampere, complete with sliding base, belt tightener and regulator.

2 generators, 80 K. W. type, U. S. Westinghouse bipolar, 350 revolutions per minute, 550 volts, size of pulley, 54x18 inches; paper rim; side rails complete.

2 Field Rheostats Westinghouse three-jaw switches for throwing generators in multiple.

1 voltmeter Westinghouse, 0 to 600.

2 amp.-meters Westinghouse, capacity 0 to 160.

1 amp.-meter Westinghouse, capacity 0 to 300.

2 Westinghouse circuit-breakers.

3 Westinghouse lightning arresters.

3 Westinghouse switches, double throw.

1 electric elevator, manufactured by Keystone Electric company of Erie, Pa.; self-oiler, 60-ampere, No. 324, 220-volt, 1,025 revolutions; worm gear and cog are solid brass; 53 grooves for ¾-inch cable on drum; drum 30-inch diameter by 22-inch face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 horsepower; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.

1 Baxter 110-volt motor, 2-horsepower, good as new; complete and starting 60x base and tightener. Price.....$50.00

1 1000-light Slattery alternating-current dynamo, 1000-volt, complete with exciter and instrument. Practically as good as new.

1 2-horsepower Baxter motor, 100-volt, complete with starting box, base with belt tightener and pulley. First-class condition.

Our Machinery Hall is 200 X 360 feet.

Our complete list of items is contained in CATALOGUE No. 156.

CHICAGO HOUSE WRECKING CO.,

EUREKA ELECTRIC CO.

The most progressive Telephone Manufacturers of Centralized Energy, Magneto System, Cable Heads, Lightning Arresters, and everything requisite for Exchange Construction.

No. 33, Desk.

Kellogg Telephones Talk!

A FEW FEATURES OF OUR INSTRUMENTS:

RECEIVERS:
Unaffected by changes of temperature.
Permanent adjustment of pole pieces and diaphragm.
No binding posts. Single piece special steel magnet.
Best grade hard rubber shell.

TRANSMITTERS:
Adapted for either local or long-distance work.
Great power without harshness.
Perfect quality of tone.

HOOK SWITCH:
Platinum contact points. Best grade German silver and brass.
Hook entirely independent of 'phone circuits.
All parts in plain sight.

PART IV.

ELECTRIC RAILWAYS.

(CONTINUED.)

Clark, D. K. Tramways. Their Construction and Working. Embracing a Comprehensive History of the System, with Accounts of the various Modes of Traction (including Horse-Power, Steam, Heated-Water and Compressed-Air Locomotives, Cable Traction and Electric Traction), a Description of the Varieties of Rolling Stock and ample Details of Cost and Working Expenses, with special reference to the Tramways of the United Kingdom. Second edition, rewritten and greatly enlarged, with upwards of 400 illustrations. Thick 8vo, cloth. $9.00

Dawson, P. Electric Railways and Tramways: Their Construction and Operation. A Practical Hand-book setting forth at length the modern application of Electricity as a Motive Power for Railways and Tramways; containing Complete Financial and Engineering Data as to Design, Construction, Equipment and Working; fully illustrating all modern and accepted types of Machinery and Apparatus and describing in detail the principal Installations of Europe and America. Small 4to. 300 pages. Illustrated. London, 1897.....$12.50

The Book is illustrated most fully throughout, and especial care has been taken in the preparation of the numerous Diagrams, Working Drawings, and Tables. Many representative installations are described at great length. The data given has been personally collected by the author, who, with this end in view, has visited almost every great city of the United States and Europe during the past eighteen months.

Gayetty, J. W. Motorman's Guide. A Practical Treatise on Street Railway Motors. Car Wiring. The Proper way to cut out Motors. Operation and Care of K Controllers. Short Circuits and How to Locate Them. Incandescent Light Circuits. Westinghouse Motors, General Electric, 800 Railway Motor and Series Parallel Controller, etc. Illustrations and Diagrams. 16mo, cloth. Chicago, 1898. .....$0.50

Gutmann, Ludwig. The Motorman and His Duties. 145 pages. 84 illustrations. Cloth..$1.00

Kanehett, Geo. T. Modern Electric Railway Motors. 200 pages, with 184 illustrations. Price $2.00

Hedges, Killingworth. American Electric Street Railways. Their Construction and Equipment, with notes as to the cost of installation and of maintenance. Also the advantages of electric traction compared with other methods. 4to, cloth. Numerous illustrations $5.00

Hering, Carl. Recent Progress in Electric Railways, being a Summary of Current Periodical Literature Relating to Electric Railway Construction, Operation, Systems, Machinery, Appliances, etc. Compiled by Carl Hering. Illustrated. 12mo, cloth. $1.00

THE WALLACE BARNES CO.,

ESTABLISHED 1857 BRISTOL, CONN., U. S. A.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.

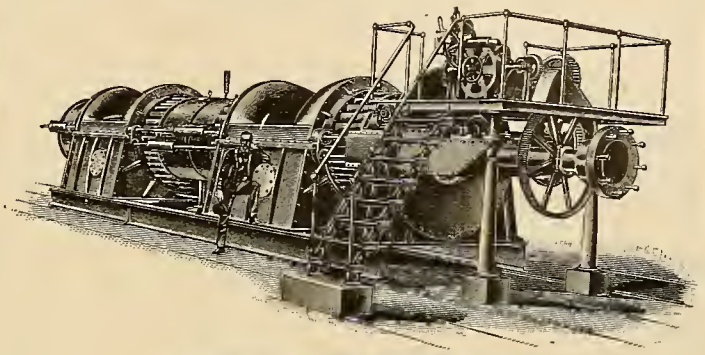
VICTOR TURBINES

OPERATING DYNAMOS.

That there are more Victor Turbines in use supplying power for electric generators than any other is due to the many points of superiority possessed by this Turbine.



FEATURES WORTH REMEMBERING:

High Speed, Great Capacity, Perfect Cylinder Gate, Close Regulation, High Efficiency, Steady Motion.

We Also Have a Full Line of Modern Patterns for Gears and Power Transmission Machinery.

WHOLESALE PRODUCERS

50-FOOT TO 80-FOOT POLES OUR SPECIALTY

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have **four** factories with **new** and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

Branch Office: 10 Temple Court Building, Chicago, W. H. QUAW, Mgr. 'Phone, Harrison 2018.

Or the home office at Beaumont, Texas, is where you write for more information and a pretty and useful pamphlet.

FORT WAYNE ELECTRIC WORKS.

(INCORPORATED.)

SOMETHING NEW

Our TYPE K Integrating Wattmeter

Weighs less than 13 pounds and can be installed in a space 6¾ inches by 8¾ inches.

SOME INTERESTING POINTS.

This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.

It can be quickly Adjusted for Either HIGH OR LOW FREQUENCY.

No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.
CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.
ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

Write for Bulletin 1012.

ELECTRICITY FOR ENGINEERS.

Latest Edition, Now Published in One Complete Volume, 424 Pages, Profusely Illustrated.
Just the Work for Engineers, Electricians, Dynamo Tenders, etc.

PART I. CONTENTS.—CHAPTER I: Electricity; Positive and Negative; Conductors, Non-Conductors and Insulators; Electro-Motive Force; Volts; Resistance; Ohms; Current; Amperes.—CHAPTER II: Dynamos; Magnets; Field Coils; Electro Magnets; Permanent Magnets.—CHAPTER III: Armatures, Construction of, Different Kinds of; Commutators. How Made and Connected; Heating of Armatures; Eddy Currents.—CHAPTER IV: The Current; How Produced; Induction; Series Wound Dynamos; Shunt Wound Dynamos; Exciting the Fields; Constant Current and Constant Potential Dynamos; Series and Parallel; Parallel or Multiple Arc System.—CHAPTER V: Incandescent Lamps; Filaments; Connections; Flashing; Exhausting; Testing; Candle Power; Operated in Series; Automatic Cut-Out; In Multiple Arc or Parallel; Multiple Series; Multiple Series Cut-Out; Three Wire System.—CHAPTER VI: The Arc Light; How Formed; Causes of Unsteadiness; Remedy; Effect of Shades or Globes; Shape of Carbons Under Different Conditions of Burning; Arc Lamps; Regulating and Cut-Out Mechanism; Action of Current; Clutch Lamps; Clockwork Lamps; Double Lamps; Troubles in Lamps.—CHAPTER VII: Commutators and Brushes; The Brush Commutators; Brushes; Different Styles of Brushes; Double Brushes; Single Brushes; Troubles with Commutators and Brushes; Correct Position of Brushes; Sparking at Brushes; Care of Brushes and Commutators; Flashing.—CHAPTER VIII: Current Regulation; Hand Regulation; By Position of Brushes; Resistance Box; Resistance Coils.—CHAPTER IX: American System of Automatic Current Regulation; The Dynamo; Regulator; Action of Regulator. CHAPTER X: Brush System of Automatic Current Regulation; Brush Armature; Diagram of Circuits through Dynamo, Regulator and Lamps; Dial or Regulator; Care and Adjustment of Dial; Dial Controller; Circuits and Connections of No. 8 Brush Dynamo; Circuits of Compound Wound Constant Potential Brush Dynamo.—CHAPTER XI: The Edison System; Automatic Regulator; Circuits of Regulator: Circuits of Dynamo; Action of Regulator; Howell Pressure Indicator; Diagram of Circuits; Description of Parts and Operation.—CHAPTER XII: Excelsior System of Automatic Current Regulation; Dynamo; Armature; Diagram of Circuits; The Regulator and Motor; Action of Regulator.—CHAPTER XIII: Schuyler System of Automatic Current Regulation; Dynamo; Armature, Commutator and Brushes; Diagram of Circuits in Armature and Field; Regulator; Circuits in Regulator.—CHAPTER XIV: Thomson-Houston System of Automatic Current Regulation; Dynamo; Armature; Commutator and Brushes; Controlling Magnet; Wall Controller; Diagram of Circuits; Air Blast.—CHAPTER XV: Waterhouse System of Three-Brush Automatic Current Regulation; Dynamo; Extra Brush; Resistance Coils and Regulator. CHAPTER XVI: Ampere Meters; Tangential Scale; Solenoid Meters.—CHAPTER XVII: Voltmeters; Pressure and Potential Indicators.—CHAPTER XVIII: Testing; Galvanometers; Astatic Needle; Differential Apparatus.—CHAPTER XIX: Wheatstone Bridge or Electrical Balance; Diagram of Circuits and Methods of use; Bridge and Rheostat; Round Form; Square Form.—CHAPTER XX: The Magneto as a Testing Instrument; Armature; Field; Bell; Diagram of Circuits.—CHAPTER XXI: Coupling Dynamos Together; In Series; In Shunt; Series, Shunt and Compound Wound Machines.—CHAPTER XXII: Switches and Switchboards; Loop Switch; Plug and Socket; Change Over Plug and Socket; Conclusion. CHAPTER XXXIII: Electric Motors; General Principles the Same as in Dynamos; Types; Shunt and Series Motors Suitable for all General Purposes; Regulation of Shunt Motors; Of Series Motors; Counter E. M. F.; Direction of Rotation and Direction of Current; Starting Motors; Diagram of Connection.

PART II. CONTENTS.—CHAPTER I: Alternate Current Dynamos; Principles of the Field; Field Current Armature; Winding; Connections; Lamination; Different Types of Alternators; Regulation; Leading Systems; The Brush Generators; Magnets; Armature; Principles of Induction.—CHAPTER II: Dynamos, Continued; The Mordey Alternator; Stationary Armatures; Field Magnets; Ferranti Armature; Field Magnets; Winding; Collectors.—CHAPTER III: Dynamos Concluded; Siemens Dynamo; Best Magnetic Circuits; Stanley Constant Current Dynamo; The Armature; Self Induction; Regulation.—CHAPTER IV: Induction Coils; Converters; Transformers; Economy of Distribution; An Electrical H. P.; Losses in Conductor; Induction Coils; Effect of Induction; Transformers.—CHAPTER V: Transformers Continued; Induction Coils; Converters; Transforming Up and Down; Design of Transformers; The Static Charge; Protection Against; Grounding the Secondary; Other Devices; The Foil Protector; Different Types of Transformers.—CHAPTER VI: Transformers, Concluded; Fuses; Regulation; Winding of Transformers; Connecting to Circuit; Regulation; Safety Fuses.—CHAPTER VII: Parallel System; Series Arc Light System; Diagram of Circuits; Parallel System; Primary Circuit; Secondary Circuit; Placing of Transformers; Fuses; Diagram of Series Arc Light Circuit.—CHAPTER VIII: Lines of Force; Hysteresis; Magnetic Penetration; The Circuit of Lines of Force; Experiments with Magnet; Rapidity of Reversals and Hysteresis.—CHAPTER IX: Arc Lamps; In Series; The Westinghouse Arc Lamp; Diagram of Circuits in Lamp; Action of the Mechanism; Flat Carbons.—CHAPTER X: Arc Lamps, in Multiple; Slattery Differential Lamp; Mechanism of Lamp; Its Operation.—CHAPTER XI: Measuring and Indicating Apparatus; Instruments for Use with Alternating Currents Differ from those used with Continuous Currents; Ammeters; Voltmeters; Description of Several Forms of Instruments.—CHAPTER XII: Measuring Instruments, Continued; Hot Wire Instruments; The Cardew Voltmeter; Details of the Instrument; Low Potential Voltmeter.—CHAPTER XIII: Voltmeters; Double Coil Voltmeter; Two Types.—CHAPTER XIV: Spring Meters; Curled Spring Meter.—CHAPTER XV: Twisted Strip Instruments; Diagram of Connections and Operation of Instrument.—CHAPTER XVI: Recording Meters; Stanley Meter; Construction and Principles of Operation; Diagrams of Parts; Slattery Induction Meter; Description of Parts and Principles of Operation; Watt Meter; Thomson Meter.—CHAPTER XVII: Generators in Parallel; Difficulties in Operating; Alternate Current Generators in Parallel; Arrangements of Circuits and Machines for Operating in Parallel; Diagram of Common Arrangement of Machines and Circuits.—CHAPTER XVIII: Ohm's Law; Strength of Current; Formulas and Examples; Power and Heating Effects of Currents.—CHAPTER XIX: Ground Alarms and Leak Detectors.

PRICE, $2.50.

Orders for above book, or any electrical work published promptly sent on receipt of price, postage prepaid.

ELECTRICIAN PUBLISHING CO., 510 Marquette Bldg., CHICAGO.

ELECTRICAL OR MECHANICAL.

We have fine facilities for light manufacturing, and solicit correspondence. Estimates given on quantity or small lots. PUNCH PRESS AND SCREW MACHINE WORK.

SPIES & COMPANY,
87-89 W. Van Buren St., Chicago, Ill.

EDWARD P. BURCH,

ARC LAMPS, KNIFE SWITCHES, GLOBES, FLUSH PUSH, AND SNAP SWITCHES, SHADES, CARBONS, RUBBER COVERED WIRES, CORDS AND CABLES, ELECTRIC LIGHTING SUPPLIES OF ALL KINDS.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

Columbia Lamps.

Unequaled in Quality.

BEFORE placing your orders for fall and early winter requirements in Incandescent Lamps we respectfully invite the attention of Central Stations and Isolated Plants to the high quality of the Columbia. We guarantee the highest uniformity in initial readings as well as the highest maintenance of candlepower.

Special prices to consumers on future delivery orders for 1,000 or more covering full annual requirements.

Trial order solicited.

CENTRAL ELECTRIC COMPANY,

GENERAL SALES AGENTS,

264-266-268-270 Fifth Avenue,

CHICAGO.

YOU CAN DEPEND Upon C. & H. rheostats operating satisfactorily. The material and workmanship are the best and all apparatus is given two independent and severe tests before shipping. Send for catalogue W.

The Cutler-Hammer Mfg. Co.,

Main Offices and Factory: MILWAUKEE, WIS.

EASTERN FACTORY: Westfield, N. J. NEW YORK OFFICE: 136 Liberty Street.

The largest and oldest manufacturers of Rheostats in the world.

"WITHOUT A PEER"

That's the Endorsement Given

THE **"BELDEN"** SYSTEM OF ARC LIGHTING.

MECHANICALLY PERFECT, ARTISTIC IN DESIGN.

If you're open to conviction send for our catalog, which tells what an Arc Lamp **should** be and what the **Belden** is.

IT IS NO WONDER

you are fighting mad when you see 85 per cent. of the money paid for fuel to run your electric plant passing into the atmosphere.

1,000,000

cubic feet of space in stores, offices, churches and dwellings can be comfortably heated by every 100 H. P. of exhaust steam. By means of our system of

STEAM HEATING

every 100 H. P. of this exhaust steam can be sold for $2,500.00 to $3,500.00.

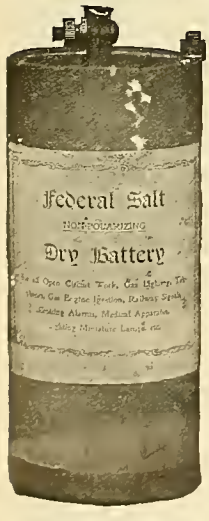
Lea-Hooven Manufacturing Co.,

ALDEN ELECTRIC CO., Chicago Agents.

ANDERSON, IND., U. S. A.

Mention this paper. BOX 200



Wonderful Recuperation.

Higher Voltage and Amperage.

Will do more Hard Work than any Dry Battery on the Market.

No more Running Down on the Shelf.

FEDERAL SALT.

FOR CARBON CYLINDER and CARBON-MANGANESE BATTERIES.

Gives More Current, Longer Life, Absolutely No Crystals.

Both salts have a depolarizer in the mixture. Federal Salt No. 1 has more depolarizer than Federalite, and so will last longer. That's the only difference.

It's the DEPOLARIZER that INCREASES the STRENGTH, GIVES LONGER LIFE, and DOES AWAY ABSOLUTELY WITH CRYSTALLIZATION and CREEPING SALTS.

Made by

FEDERAL BATTERY CO., 11 Pine St., N. Y.

COLUMBIA CARBONS

FOR ENCLOSED ARCS

PROPOSALS FOR ELECTRIC LIGHTING.

Bids are hereby invited for the electric lighting of the city of Shreveport, La., for a period of five years, from June 1, 1901.

The system shall be the Thomson-Houston, the General Electric, or equally as good.

The number of arc lights to be not less than one hundred, and subject to be increased to two hundred.

Bids shall specify the charge for arc lights, and also for incandescent lights. Bids shall also specify the maximum charge to be made for private consumers of arc and incandescent lights.

A certified check for $2,500 to accompany each bid.

The city reserves the right to reject any and all bids

The successful bidder shall be required to give bond for faithful performance.

The arc lights for street lighting shall burn every night, and shall be at least 2,000 candlepower.

All bids shall be in the hands of the comptroller by 6 p. m., of December 1, 1900.

N. B. MURFF, Comptroller,
City of Shreveport, La.

INFORMATION

FOR MACHINERY USERS.

We are headquarters for Rebuilt Motive Power. Our machinery is absolutely warranted in every way. We cover all sales by a binding guarantee. Our stock is the most extensive in the land.

WE OFFER THE FOLLOWING, SUBJECT TO PRIOR SALE.

ENGINES.

S900 1 E. P. Allis Company tandem compound condensing engine.
H. P., nominal, 500.
Flywheel, 2 feet diameter by 40-inch face.
Cylinders, 22 and 42x48.
Guaranteed to operate on 15 pounds of steam per indicated horsepower.
This engine is in excellent condition. It is at present installed at Omaha, Neb.

S901 1 pair Williams automatic engines, coupled together.
Size, 17¾x24.
Revolutions, 200; builders' rating, 200; H. P., 200.

S902 2 Westinghouse compound engines, 13x22x13.
Revolutions, 290; H. P., 125.

S903—1 horizontal tangye bed, side crank automatic steam engine, made by Russel & Co.
Steam cylinder, 13x18.

S904 1 Wright automatic Corliss, 23x36.

S905 1 10x9 Westinghouse.

S906 1 8x12 Lansing automatic.

S907 1 7x12 Rice automatic.

S908 1 16x24 horizontal box bed, side crank.

S909 1 12x16 F. C. Wells horizontal tangye bed, side crank.

S910 10 9x12 engines, manufactured by George W. Tifft & Sons of Buffalo, N. Y.

S911 1 10x22 box bed, right hand, side crank.

S912 1 16x36-inch Corliss, left hand.

S913 1 9x16 Rice automatic.

S914 1 11x16x16 McEwen tandem compound.

S915 1 8x10 Atlas automatic, center crank.

S916 1 11x18 Sinker, Davis & Co.

S917 1 12x16 horizontal, box bed, side crank.

S918 1 10x14 automatic Wright & Adams.

S919 1 12x12 high-speed automatic Ideal.

S920 1 20x24 box bed, balance valve.

In addition to the above, we have on hand at all times a complete assortment of all size engines, ranging in power from 1 to 500 horsepower. Ask for our complete list.

BOILERS.

We still have on hand a few of Armour's 54x16, 60x16, 66x16, 66x18 and 72x18 horizontal tubular boilers. They are in excellent condition.

AIR COMPRESSORS.

S921 1 Duplex straight-line Clayton, 9x9.

S922 1 4½x6-inch Clayton.

S923 2 12x16. Will compress air up to 60 pounds' pressure, with 80 to 100 pounds' steam.

BELTING.

We carry at all times a complete stock of short-lap, double-thick leather belting, both new and second-hand. Our quotations are always 30 per cent. below lowest market values.

SHAFTING.

We carry a stock of all sizes of shafting.

STEAM PUMPS.

Ask for our complete list of steam pumps. We have all kinds.

Electrical Apparatus.

See our list of supplies in the Western Electrician of October 27.

A COMPLETE OUTFIT.

We purchased the following outfit:

S924 1 McEwen tandem compound engine, 8½x14x12, with a direct-connected multipolar compound-wound dynamo, capacity, 50 K. W. Included in this outfit is a 100-horsepower Sterling water-tube boiler, with full front grate bars, etc. Also a Duplex steam pump and a copper-tube heater.
It was used about 2½ years and replaced, owing to a necessary increase in power.

DYNAMOS, ETC.

1 500-light National, 1000 volts, alternating exciter, attached to shaft, complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.

1 Thomson-Houston, 400-light, compound-wound dynamo, new, 110 volts, 200 amperes, complete with sliding base, belt tightener and regulator.

1 Thomson-Houston, 500-light, compound-wound dynamo, 110-volt, 200-ampere, complete with sliding base, belt tightener and regulator.

1 United States Weston dynamo, 150-light, 100-volt, 75-ampere, complete with sliding base, belt tightener and regulator.

2 generators, 80 K. W. type, U. S. Westinghouse bipolar, 350 revolutions per minute, 550 volts, size of pulley, 54x18 inches; paper rim; side rails complete.

2 Field Rheostats Westinghouse three-jaw switches for throwing generators in multiple.

1 voltmeter Westinghouse, 0 to 600.

2 amp.-meters Westinghouse, capacity 0 to 160.

1 amp.-meter Westinghouse, capacity 0 to 300.

2 Westinghouse circuit-breakers.

3 Westinghouse lightning arresters.

3 Westinghouse switches, double throw.

1 electric elevator, manufactured by Keystone Electric company of Erie, Pa.; self-oiler, 60-ampere, No. 324, 220-volt, 1,025 revolutions; worm gear and cog are solid brass; 53 grooves for ⅝-inch cable on drum; drum 30-inch diameter by 22-inch face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 horsepower; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.

1 Baxter 110-volt motor, 2-horsepower, good as new; complete and starting box and tightener. Price.....$50.00

1 1000-light Slattery alternating-current dynamo, 1000-volt, complete with exciter and instrument. Practically as good as new.

1 2-horsepower Baxter motor, 100-volt, complete with starting box, base with belt tightener and pulley. First-class condition.

Our Machinery Hall is 200 X 360 feet.

Our complete list of items is contained in CATALOGUE No. 156.

CHICAGO HOUSE WRECKING CO.,

A Few Reasons Why You Should Use the

WARNER DRY BATTERY

RINGING OUTFIT.

BECAUSE:

No exchange is complete without one.
It is the cheapest way to secure power.
There are no bearings to oil.
There is no water to spill.
There are no delays or stops.
It is absolutely reliable under all conditions.
It will ring where all other ringers fail.
There are no belts to slip.
There are no commutators to keep clean.
There are no power bills to pay.
It is always ready for duty.

Your operators can give better service with a good signaling device.

Every Outfit is Shipped Complete Ready for Immediate Use.

Every outfit is thoroughly tested and fully guaranteed. This machine is in use in some of the largest exchanges, both in this country and abroad. The net price for the complete outfit is

$45 F. O. B. Factory.

Prompt shipments guaranteed. For further information, address

WHOLESALE PRODUCERS

50-FOOT TO 80-FOOT POLES OUR SPECIALTY

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

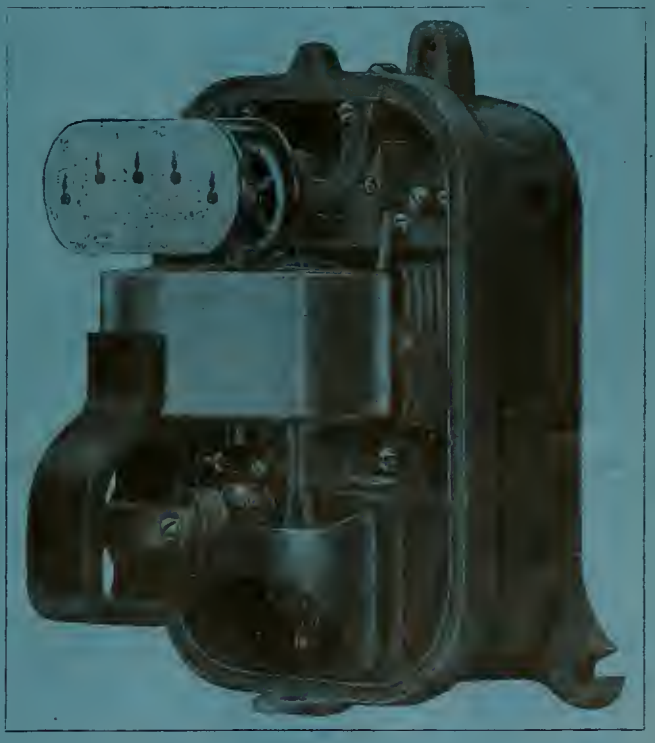
OUR

TYPE K INTEGRATING WATTMETER

Weighs less than 13 pounds and can be installed in a space

6 3-4 inches by 8 3-4 inches.



SOME INTERESTING POINTS.

This Meter will Record Accurately the Energy of Alternating Current Circuits Regardless of the POWER FACTOR.

It can be Quickly Adjusted for Either HIGH OR LOW FREQUENCY.

No Constants or Multipliers Used. Meters are DIRECT READING.

THE CALIBRATION IS PERMANENT AND RELIABLE.

CONVENIENT TO HANDLE, EASY TO INSTALL AND REPAIR.

ALL PARTS ARE STANDARD AND INTERCHANGEABLE.

WRITE FOR BULLETIN 1012.

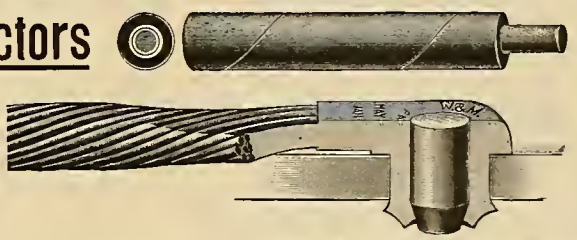
CARBONS CARBONS CARBONS

The "Electra" Carbons are the recognized standard all the world over.

There are no Carbons better than the "Electra" and none "just as good."

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

Talk it over

on the way to your office. It's a good subject, pregnant with possibilities of better work and larger profits. If you have decided to discard the expensive, inefficient, out-of-date lines of shafting and the loose pulleys and wobbling hangers, it means that you have absorbed some of the progressive spirit of the day—have probably recognized the economy and convenience of **electric drive**—and—well, write to us about it. Ask all the questions you please. We are ready and anxious to answer or to be of service in any way. We build all sizes of **Generators** and **Motors** for either **Alternating or Direct Current.**

The "S. K. C." and Northern systems are unequaled for simplicity of design and thorough reliability.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,

AUCTION SALE.

Postponed Till Dec. 10.——Bankrupt Sale.

Entire Property of the Suburban Electric Co., Covington, Ky., Offered For Sale.

Notice is hereby given that pursuant to an order in bankruptcy, in the matter of the Suburban Electric Company, a corporation organized under the laws of the state of Kentucky, bankrupt, No. 276, in the District Court of the United States for the District of Kentucky, I will, on the 10th day of December, 1900, at 10 o'clock a. m., at the Scott street entrance of the United States Court in Covington, Ky., sell at public auction to the highest bidder, all the property, real and personal, of every kind and description belonging to the Suburban Electric Company, bankrupt, including all the rights privileges and franchises, except the franchise to be a corporation, and also its electric lighting plant, power station, machinery, engines, boilers, dynamos, electric machine, electric lamps and other appliances and appurtenances, poles, lines, wires and all contracts, claims and demands, and all other property of every kind and description, also the following described real estate belonging to the said bankrupt, situated in the city of Covington, Kenton County, Kentucky, and bounded as follows:

1. Beginning at a point on the east line of Madison avenue at the northeast corner of Madison avenue and an alley running parallel to and between Fourth and Fifth streets; thence northwardly along the east line of said Madison avenue toward Fourth street ninety (90) feet; thence at right angles to Madison avenue one hundred and ninety (190) feet to another alley; thence with said other alley and at right angles to said first-named alley ninety (90) feet to said first-named alley; thence westwardly along the same one hundred and ninety (190) feet to the place of beginning.

And also the following described piece of real estate belonging to said bankrupt, situated in the city of Newport, Campbell County, Kentucky, to wit:

2. Lot No. 260 in the Cote Brilliant Lot & Home Company's subdivision, fronting thirty (30) feet on the west side of Park avenue, and extending back one hundred and twenty (120) feet to an alley.

The first tract of real estate above described will be sold subject to such lien as Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, or either of them, may have upon said real estate, which lien is as yet undetermined in amount.

The property above described will be sold free from any and all liens or encumbrances, except the lien or encumbrance in favor of Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, upon the said first described real estate aforesaid.

The second piece of real estate described aforesaid will be sold separately.

All the balance of the real estate, and all the other property and assets of every kind, and the rights, privileges and franchises of the Suburban Electric Company will be sold as an entirety and as a going concern.

The terms of the sale will be one-third (⅓) cash, to be paid upon the confirmation of the sale, the balance in equal installments of six and twelve months from date of sale, deferred payments to draw six (6) per cent interest and to be secured by lien upon the property sold and also by bond with sureties satisfactory to the referee in bankruptcy herein; or purchaser may pay cash for said property upon the confirmation of the sale. No bid for said property will be received from any bidder who shall not place in the hands of the undersigned at the time of making said bid, as a pledge that said bidder will make good his bid if the sale is confirmed, the sum of fifteen thousand ($15,000) dollars, which sum of fifteen thousand dollars will be credited upon the first payment of the purchase money for said sale.

Inspection of property invited. Full information given upon application at the office of the bankrupt in Covington, Ky.

1 75 K. W. Westinghouse, Kodak set, Westinghouse generator and Westinghouse compound engine, 14 x 24 x 14, all complete, fine.

Alternating Generators.

1 350-light Thomson-Houston, A. 18.
1 600-light Thomson-Houston, A. 6.
1 600-light Thomson-Houston, 30 K. W., two-phase.
1 600-light Thomson-Houston, 30 K. W., slotted armature.
2 600-light General Electric, A. 30, toothed armature.
2 650-light Thomson-Houston, A. 35.
2 750-light Westinghouse, 37½ K. W.
1 900-light Warren, 45 K. W., 1100 volts.
1 1000-light Wood, 50 K. W., self-oiler.
1 1000-light Siemens & Halske, 50 K. W., self-oiler, 60 cycle.
1 1200-light National, with exciter.
1 1200-light Siemens & Halske, 60 K. W., Churchward type, brand new, 60 cycle, single-phase, 1100 volts, with exciter.
1 50 K. W. Siemens & Halske, Churchward type, brand new, 60 cycle, two-phase, rotary transformer, 1100 volts, alt. to 250 volts direct, complete, with marble panel switchboard.
1 1200-light Westinghouse, 60 K. W.
1 1200-light Thomson-Houston, 60 K. W.
1 1200-light Warren, 60 K. W., self-oiler.
1 1200-light General Electric, A. 60.
2 1300-light Thomson-Houston, A. 70, 1100 or 2200 volts.
1 1500-light Wood, 75 K. W., self-oiler.
1 1500-light General Electric, monocyclic, 75 K. W., self-oiler, 60 cycle.
1 1800-light National, 90 K. W.
1 4000-light Wood, 200 K. W., self-oiler.

Arc Dynamos.

1 20-light 2000 C. P. Western Electric.
1 30-light 1200 C. P. T.-H., K. 12.
1 30-light 2000 C. P. Brush, No. 7.
2 35-light 2000 C. P. T.-H., L. D. 2.
1 35-light 1200 C. P. Wood No. 6.
3 40-light 2000 C. P. Western Electric, self-oilers.
2 45-light 1200 C. P. T.-H., M. 12, ball arm.
2 45-light 1200 C. P. Brush, No. 7.
1 50-light 1200 C. P. T.-H., L. D. 12.
1 50-light 2000 C. P. T.-H., M. D. 2.
2 60-light 2000 C. P. Western Electric, self-oilers.
1 60-light 2000 C. P. Westinghouse.
3 60-light 2000 C. P. Wood, No. 8.
1 65-light 800 C. P. Ball, 4 amp.
1 65-light 2000 C. P. Brush, No. 8.
2 75-light 1200 C. P. Wood, with new arm'e.
2 75-light 1200 C. P. Standard, self-oilers.
2 75-light 2000 C. P. Westing'se, self-oilers.
3 125-light 1200 C. P. Excelsior, latest type.

WE DO REPAIRING.

The satisfactory kind that brings your second order.

Armatures, transformers and fields rewound. Commutators refilled. Machines rebuilt. All work guaranteed. Low prices. Write us.

GENERAL ELECTRICAL REPAIR CO.,

L. D. Telephone, Main 5114. 141 S. Clinton Street CHICAGO.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.

ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill

ELECTRICAL COURSES:

ELECTRICAL ENGINEERING,
ELECTRICAL,
ELECTRIC POWER AND LIGHTING,
ELECTRIC RAILWAYS,
ELECTRIC LIGHTING,
ELECTRIC CAR RUNNING,
TELEGRAPHY,
TELEPHONY.

Also courses in Steam, Mechanical, Civil and Mining Engineering, Architecture, Drawing and Designing, Chemistry, English and Commercial Branches.

INFORMATION

FOR MACHINERY USERS.

We are headquarters for Rebuilt Motive Power. Our machinery is absolutely warranted in every way. We cover all sales by a binding guarantee. Our stock is the most extensive in the land.

WE OFFER THE FOLLOWING, SUBJECT TO PRIOR SALE.

ENGINES.

S900 1 E. P. Allis Company tandem compound condensing engine.
H. P., nominal, 500.
Flywheel, 2 feet diameter by 40-inch face.
Cylinders, 22 and 42x48.
Guaranteed to operate on 15 pounds of steam per indicated horsepower.
This engine is in excellent condition. It is at present installed at Omaha, Neb.

S901 1 pair Williams automatic engines, coupled together.
Size, 17¾x24.
Revolutions, 200; builders' rating, 200; H. P., 200.

S902 2 Westinghouse compound engines, 13x22x13.
Revolutions, 290; H. P., 125.

S903—1 horizontal tangye bed, side crank automatic steam engine, made by Russel & Co.
Steam cylinder, 13x18.

S904 1 Wright automatic Corliss, 23x36.

S905 1 10x9 Westinghouse.

S906 1 8x12 Lansing automatic.

S907 1 7x12 Rice automatic.

S908 1 16x24 horizontal box bed, side crank.

S909 1 12x16 F. C. Wells horizontal tangye bed, side crank.

S910 10 9x12 engines, manufactured by George W. Tifft & Sons of Buffalo, N. Y.

S911 1 10x22 box bed, right hand, side crank.

S912 1 16x36-inch Corliss, left hand.

S913 1 9x16 Rice automatic.

S914 1 11x16x16 McEwen tandem compound.

S915 1 8x10 Atlas automatic, center crank.

S916 1 11x18 Sinker, Davis & Co.

S917 1 12x16 horizontal, box bed, side crank.

S918 1 10x14 automatic Wright & Adams.

S919 1 12x12 high-speed automatic Ideal.

S920 1 20x24 box bed, balance valve.

In addition to the above, we have on hand at all times a complete assortment of all size engines, ranging in power from 1 to 500 horsepower. Ask for our complete list.

BOILERS.

We still have on hand a few of Armour's 54x16, 60x16, 66x16, 66x18 and 72x18 horizontal tubular boilers. They are in excellent condition.

AIR COMPRESSORS.

S921 1 Duplex straight-line Clayton, 9x9.

S922 1 4½x6-inch Clayton.

S923 2 12x16. Will compress air up to 60 pounds' pressure, with 80 to 100 pounds' steam.

BELTING.

We carry at all times a complete stock of short-lap, double-thick leather belting, both new and second-hand. Our quotations are always 30 per cent. below lowest market values.

SHAFTING.

We carry a stock of all sizes of shafting.

STEAM PUMPS.

Ask for our complete list of steam pumps. We have all kinds.

Electrical Apparatus.

See our list of supplies in the Western Electrician of October 27.

A COMPLETE OUTFIT.

We purchased the following outfit:

S924 1 McEwen tandem compound engine, 8½x14x12, with a direct-connected multipolar compound-wound dynamo, capacity, 50 K. W. Included in this outfit is a 100-horsepower Sterling water-tube boiler, with full front grate bars, etc. Also a Duplex steam pump and a copper-tube heater. It was used about 2½ years and replaced, owing to a necessary increase in power.

DYNAMOS, ETC.

1 500-light National, 1000 volts, alternating exciter, attached to shaft, complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.

1 Thomson-Houston, 400-light, compound-wound dynamo, new, 110 volts, 200 amperes, complete with sliding base, belt tightener and regulator.

1 Thomson-Houston, 500-light, compound-wound dynamo, 110-volt, 200-ampere, complete with sliding base, belt tightener and regulator.

1 United States Weston dynamo, 150-light, 100-volt, 75-ampere, complete with sliding base, belt tightener and regulator.

2 generators, 80 K. W. type, U. S. Westinghouse bipolar, 350 revolutions per minute, 550 volts, size of pulley, 54x18 inches; paper rim; side rails complete.

2 Field Rheostats Westinghouse three-jaw switches for throwing generators in multiple.

1 voltmeter Westinghouse, 0 to 600.

2 amp.-meters Westinghouse, capacity 0 to 160.

1 amp.-meter Westinghouse, capacity 0 to 300.

2 Westinghouse circuit-breakers.

3 Westinghouse lightning arresters.

3 Westinghouse switches, double throw.

1 electric elevator, manufactured by Keystone Electric company of Erie, Pa.; self-oiler, 60-ampere, No. 324, 220-volt, 1,025 revolutions; worm gear and cog are solid brass; 53 grooves for ⅝-inch cable on drum; drum 30-inch diameter by 22-inch face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 horsepower; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.

1 Baxter 110-volt motor, 2-horsepower, good as new; complete and starting box and tightener. Price.....$50.00

1 1000-light Slattery alternating-current dynamo, 1000-volt, complete with exciter and instrument. Practically as good as new.

1 2-horsepower Baxter motor, 100-volt, complete with starting box, base with belt tightener and pulley. First-class condition.

Our Machinery Hall is 200 X 360 feet.

Our complete list of items is contained in CATALOGUE No. 156.

CHICAGO HOUSE WRECKING CO.,

BOOK CATALOGUE.

PART V.

ELECTRICITY FOR AMATEURS.

(CONTINUED.)

Practical Electrics. A Universal Handy book on every-day electrical matters, including connections, alarms, batteries, bells, carbons, induction, intensity and resistance coils, dynamo-electric machines, fire risks, measuring, microphones, motors, phonographs, photophones, storage and telephones. Being the Electrical portion of the "Third Series of Workshop Receipts." Fourth edition. 135 pages. 12mo, cloth.....$0.75

Sloane, T. O'Connor. Electric Toy Making for Amateurs, including Batteries, Magnets, Motors, Miscellaneous Toys and Dynamo Construction. Fully illustrated. Second edition. 12mo, cloth $1.00

Trevert, Edward. How to make a Dynamo. Illustrated. 12mo, paper $0.10

Trevert, Edward. Electricity and Its Recent Applications. A Practical Treatise for students and amateurs, with an illustrated Dictionary of electrical terms and phrases. 175 illustrations. 12mo, cloth $2.00

Trevert, Edward. Practical Directions for Electric Gas Lighting and Bell Fitting for Amateurs. Third edition, revised. Illustrated. 16mo, paper....$0.25

Trevert, Edward. How to make Electric Batteries at Home. Illustrated. 12mo, paper..$0.25

Walker, F. Practical Dynamo Building, for Amateurs. How to wind for any output. With numerous Illustrations. 16mo, boards. (Van Nostrand Science Series, No. 98.).....$0.50

Walker, Sidney F. Electricity in our Homes and Workshops. A Practical Treatise on auxiliary electrical apparatus. With numerous illustrations. Third edition. 12mo, cloth. London, 1895....$2.00

Watson, A. E. How to Make a One-Horse Power Motor or Dynamo. Folding plate and illustrations. 16mo, cloth $0.50

Watson, A. E. How to Build a One-Fourth Horse Power Motor or Dynamo. Illustrated with Working Drawings. 16mo, flexible cloth.....$0.50

Watson, A. E. How to Build a 1,000-Watt Alternating Current Dynamo or Motor. Illustrated with Working Drawings. 16mo, flexible cloth.....$0.50

Watson, A. E. How to Build a One-Half Horse Power Dynamo or Motor. Illustrated with Working Drawings. 16mo, flexible cloth.....$0.50

Watson, A. E. How to Build a Fifty-Light Dynamo or Four H. P. Motor. Illustrated with full working drawings, giving directions for windings for different voltages, whereby any amateur may build this machine. 12mo, cloth.....$0.50

Wittbecker, W. A. Domestic Electrical Work. Concise and practical explanations for plumbers, tinners and hardware dealers on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting from Batteries. Illustrated with 22 diagrams. 12mo, paper.....$0.25
Cloth $0.50

ELECRO-METALLURGY, ELECTRO-CHEMISTRY, ELECTRO-PLATING.

Bonney, G. E. Electro-Plater's Hand Book. A Manual for Amateurs and young Students in Electro-Metallurgy. 60 illustrations. 208 pages. Second edition, enlarged by an appendix on electrotyping. 12mo, cloth. London, 1894.....$1.25

Borchers, Dr. W. Electric Smelting and Refining. The Extraction and Treatment of Metals, by means of the Electric Current. Translated from the second German edition (1896) with additions, by Walter G. McMillan. With three plates and numerous illustrations in the text. 8vo, cloth. London, 1897. .....$6.50

Dr. Borchers' treatise is practical throughout. It confines itself to one branch of Electro-Chemistry, viz.:—Electrolysis, a subject which is daily becoming of more and more importance to the Practical Metallurgist and Manufacturer. Already in the extraction of Aluminum, the refining of Copper, the treatment of Gold and other metals, Electrical Processes are fast taking the place of the other methods. Dr. Borchers' work is acknowledged as the standard authority on the subject in Germany, and the English version, from the able pen of Mr. W. G. McMillan (author of the well-known Treatise on Electro-Deposition and Electro-Plating), will, it is believed, take equal rank in English-speaking countries.

Brunor, Martin. The Practical Electroplater. A Comprehensive Treatise on Electroplating, with notes on ancient and modern gilding, and formulae for new solutions. 8vo, half leather. Illustrated. $6.00

Classen, Dr. Alex. Quantitative Chemical Analyses by Electrolysis, according to Original Methods. Translated by W. H. Herrick. Second thousand. 8vo, cloth. Illustrated $3.00

Fontaine, H. Electrolysis; a Practical Treatise on Nickeling, Coppering, Gilding, Silvering and Refining of Metals and Treatment of Ores by Means of Electricity. Translated from the French by J. A. Berly. With 34 illustrations. 8vo, cloth. London, 1885. (Scarce.).....$3.50

Gore, G. The Art of Electro-Metallurgy, including All Known Processes of Electro-Deposition. Fifth edition. 12mo, cloth. Illustrated.....$2.00

Gore, G. Theory and Practice of Electro-Deposition, including every known mode of depositing Metals—Preparing Metal for Immersion—Inking Molds and rendering them Conducting. 12mo, cloth. $0.80

Gore, G. Electro-Chemistry, Inorganic. Second edition. 8vo, cloth. London, 1888.....$0.80

Gore, G. The Art of Electrolytic Separation of Metals, Theoretical and Practical. Fully illustrated. 8vo, cloth. London, 1894.....$3.50
No book entirely devoted to the Electrolytic Separation and Refining of Metals exists at present in any language; those on Electro-Metallurgy hitherto published being more or less solely devoted to Electroplating. The present book contains both the science and the art of the subject, i. e., both the theoretical principles upon which the art is based, and the practical rules and details of technical application on a commercial scale, being thus suitable both for student and manufacturer.

Langbeln, Dr. G., and Brannt, W. T. Electro-Deposition of Metals. A complete treatise on the Electro-Plating and Galvanoplastic Operations, the Deposition of Metals by the contact and immersion processes, the coloring of metals, the methods of Grinding and Polishing, as well as Descriptions of the Electric Elements, Dynamo Electric Machines, Thermo-Piles, and of the materials and processes used in every department of the Art. 38 illustrations. 8vo, cloth. Second edition, revised and enlarged $4.00

Lupke, Dr. Robert. Elements of Electro-Chemistry Treated Experimentally. Translated from the second edition, revised and enlarged by M. M. Pattison Muir. 8vo, cloth. 54 figures in the text..$2.50

McMillan, W. G. A Treatise on Electro-Metallurgy, Embracing the application of Electrolysis to the Plating, Depositing, Smelting and Refining of various metals, and to the reproduction of Printing Surfaces and Art Work, etc. 12mo, cloth..$3.50

Oettel, Dr. Felix. Practical Exercises in Electro-Chemistry. Translated by Edgar F. Smith. 12mo, cloth. Philadelphia, 1897 .....$0.75

Trevert, Edward. A Practical Hand-Book of Electro-Plating. Illustrated. 16mo, cloth. Lynn, ...$0.50

Urquhart, J. W. Electrotyping. A Practical Manual. 12mo, cloth. Illustrated $2.00

Urquhart, J. W. Electro-Plating. A Practical Hand-Book on the Deposition of Copper, Silver, Nickel, Gold, Aluminum, Brass, Platinum, etc. With descriptions of the Chemicals, Materials, Batteries and Dynamo Machines used in the Art. Third edition; carefully revised, with additions. 12mo, cloth. London, 1894.....$2.00

Watt, A. Electro-Deposition; a Practical Treatise on the Electrolysis of Gold, Silver, Copper, Nickel and other Metals and Alloys, with Descriptions of Voltaic Batteries. Magnets and Dynamo-Electric Machines. Thermo-Piles and of the Material and Processes used in every Department of the Art, and Several Chapters on Electro-Metallurgy. Third edition, revised and corrected. 12mo, cloth. Illustrated $3.50

Watt, A. Electro-Metallurgy Practically Treated. Tenth edition. 12mo, cloth $1.00

Wilson, F. J. T. Stereotyping and Electrotyping. A Guide for the Production of Plates by the Papier-Mache and Plaster Processes, with Instructions for Depositing Copper by the Battery or by the Dynamo Machine; also Hints on Steel and Brass Facing, etc. Illustrated. 12mo, cloth.....$2.00

ELECTRO-THERAPEUTICS.

Beard, G. M., and Rockwell, A. D. A Practical Treatise on the Medical and Surgical Uses of Electricity. 8vo, cloth. 200 illustrations. Eighth edition. London, 1803 .....$5.50

Bigelow, Horatio R. Plain Talks on Medical Electricity and Batteries, with a Therapeutic Index and a Glossary. Prepared for Practitioners and Students of Medicine. Second edition. 12mo, cloth. $1.00

Houston, E. J., and Kennelly, A. E. Electricity in Electro-Therapeutics (Elementary Electro-Technical Series). 16mo, cloth. 128 illustrations $1.00

International System of Electro-Therapeutics. For Students, General Practitioners and Specialists. 8vo, cloth. Illustrated.....$6.00

Liebig, G. A., and Rohe, G. H. Practical Application of Electricity in Medicine and Surgery. 8vo, cloth, profusely illustrated $2.00

Mason, Chas. F. Compend. of Electricity, and Its Medical and Surgical Uses. Second edition. 12mo, cloth. Illustrated. Philadelphia, 1895.....$0.75

Morgan's Electro-Therapeutics and Physiology. 714 pages. Illustrated $6.50

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.

Especially adapted to all kinds of

ELECTRIC POWER AND LIGHTING PLANTS.

Recent tests at Holyoke enable us to guarantee:

The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

THE WALLACE BARNES CO.,

ESTABLISHED 1857 BRISTOL, CONN., U. S. A.

THE TELEPHONE HAND-BOOK

NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.

BY HERBERT LAWS WEBB.

Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."

160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.

Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."

No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Nenmayer and Böttcher Receivers.
13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cutlriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines: The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

A PRETTY STORY.

Eight months ago the Texas Arm & Pin Co. began manufactnring things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-haad machine, in a broken-down factory, was used, but now they have four factories with new aad late machinery aad are shipping more cross-arms thao the law allows. But they cao ship more. They are uatapped, long-leaf, yellow pine.

Full Particulars and Descriptive Matter Mailed on Application.

The Word Peak

virtually means the hardest part of your power station's day's work. Provision must be made for the peak, although but a fraction of the amount of energy represented by it is normal.

By taking a large portion of the peak and smoothing out the load fluctuations, a storage battery will increase the capacity of an Electric Railway Power Station and decrease the cost of operation. The Chloride Accumulator represents the latest development of Storage Battery Construction.

ARC LAMPS, KNIFE SWITCHES, GLOBES, FLUSH PUSH, AND SNAP SWITCHES, SHADES, CARBONS, RUBBER COVERED WIRES, CORDS AND CABLES, ELECTRIC LIGHTING SUPPLIES OF ALL KINDS.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

THREE IMPORTANT POINTS:

SIMPLICITY, DURABILITY, REFINEMENT OF DESIGN

are the first points considered by prospective arc lamp buyers. **The Belden Arc Lamp** excels, not only in the above points but in many others. Users pronounce it the most satisfactory lamp on the market.

It burns a minimum of 250 hours.
No alignment necessary.
Trims easier than an open arc lamp.
Allows easy access to every part of lamp.
Gives absolutely steady light.

Our bulletins give further reasons why **The Belden** should receive your careful consideration before placing your next order.

BELDEN-LARWILL ELECTRIC & MFG. CO.,
FORT WAYNE, IND.

AGENTS: M. B. Austin & Co., 58 W. Van Buren St., Chicago. C. E. Wilson, 1000 Betz Bldg., Philadelphia, Pa. R. N. Stewart & Co., Denver, Colo.

We are now in a position to establish desirable agencies in all principal cities in this and foreign countries.

AUCTION SALE.

Postponed Till Dec. 10.——Bankrupt Sale.

Entire Property of the Suburban Electric Co., Covington, Ky., Offered For Sale.

Notice is hereby given that pursuant to an order in bankruptcy, in the matter of the Suburban Electric Company, a corporation organized under the laws of the state of Kentucky, bankrupt, No. 276, in the District Court of the United States for the District of Kentucky, I will, on the 10th day of December, 1900, at 10 o'clock a. m., at the Scott street entrance of the United States Court in Covington, Ky., sell at public auction to the highest bidder, all the property, real and personal, of every kind and description belonging to the Suburban Electric Company, bankrupt, including all the rights privileges and franchises, except the franchise to be a corporation, and also its electric lighting plant, power station, machinery, engines, boilers, dynamos, electric machine, electric lamps and other appliances and appurtenances, poles, lines, wires and all contracts, claims and demands, and all other property of every kind and description, also the following described real estate belonging to the said bankrupt, situated in the city of Covington, Kenton County, Kentucky, and bounded as follows:

1. Beginning at a point on the east line of Madison avenue at the northeast corner of Madison avenue and an alley running parallel to and between Fourth and Fifth streets; thence northwardly along the east line of said Madison avenue toward Fourth street ninety (90) feet; thence at right angles to Madison avenue one hundred and ninety (190) feet to another alley; thence with said other alley and at right angles to said first-named alley ninety (90) feet to said first-named alley; thence westwardly along the same one hundred and ninety (190) feet to the place of beginning.

And also the following described piece of real estate belonging to said bankrupt, situated in the city of Newport, Campbell County, Kentucky, to wit:

2. Lot No. 250 in the Cote Brilliant Lot & Home Company's subdivision, fronting thirty (30) feet on the west side of Park avenue, and extending back one hundred and twenty (120) feet to an alley.

The first tract of real estate above described will be sold subject to such lien as Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, or either of them, may have upon said real estate, which lien is as yet undetermined in amount.

The property above described will be sold free from any and all liens or encumbrances, except the lien or encumbrance in favor of Caroline B. Smith, Frank F. Smith, her husband, and George M. Casey, upon the said first described real estate aforesaid.

The second piece of real estate described aforesaid will be sold separately.

All the balance of the real estate, and all the other property and assets of every kind, and the rights, privileges and franchises of the Suburban Electric Company will be sold as an entirety and as a going concern.

The terms of the sale will be one-third (⅓) cash, to be paid upon the confirmation of the sale, the balance in equal installments of six and twelve months from date of sale, deferred payments to draw six (6) per cent interest and to be secured by lien upon the property sold and also by bond with sureties satisfactory to the referee in bankruptcy herein; or purchaser may pay cash for said property upon the confirmation of the sale. No bid for said property will be received from any bidder who shall not place in the hands of the undersigned at the time of making said bid, as a pledge that said bidder will make good his bid if the sale is confirmed, the sum of fifteen thousand ($15,000) dollars, which sum of fifteen thousand dollars will be credited upon the first payment of the purchase money for said sale.

Inspection of property invited. Full information given upon application at the office of the bankrupt in Covington, Ky.

INFORMATION

FOR MACHINERY USERS.

We are headquarters for Rebuilt Motive Power. Our machinery is absolutely warranted in every way. We cover all sales by a binding guarantee. Our stock is the most extensive in the land.

WE OFFER THE FOLLOWING, SUBJECT TO PRIOR SALE.

ENGINES.

S900 1 E. P. Allis Company tandem compound condensing engine. H. P., nominal, 500. Flywheel, 2 feet diameter by 40-inch face. Cylinders, 22 and 42x48. Guaranteed to operate on 15 pounds of steam per indicated horsepower. This engine is in excellent condition. It is at present installed at Omaha, Neb.

S901 1 pair Williams automatic engines, coupled together. Size, 17¾x24. Revolutions, 200; builders' rating, 200; H. P., 200.

S902 2 Westinghouse compound engines, 13x22x13. Revolutions, 290; H. P., 125.

S903—1 horizontal tangye bed, side crank automatic steam engine, made by Russel & Co. Steam cylinder, 13x18.

S904 1 Wright automatic Corliss, 23x36.

S905 1 10x9 Westinghouse.

S906 1 8x12 Lansing automatic.

S907 1 7x12 Rice automatic.

S908 1 16x24 horizontal box bed, side crank.

S909 1 12x16 F. C. Wells horizontal tangye bed, side crank.

S910 10 9x12 engines, manufactured by George W. Tifft & Sons of Buffalo, N. Y.

S911 1 10x22 box bed, right hand, side crank.

S912 1 16x36-inch Corliss, left hand.

S913 1 9x16 Rice automatic.

S914 1 11x16x16 McEwen tandem compound.

S915 1 8x10 Atlas automatic, center crank.

S916 1 11x18 Sinker, Davis & Co.

S917 1 12x16 horizontal, box bed, side crank.

S918 1 10x14 automatic Wright & Adams.

S919 1 12x12 high-speed automatic Ideal.

S920 1 20x24 box bed, balance valve.

In addition to the above, we have on hand at all times a complete assortment of all size engines, ranging in power from 1 to 500 horsepower. Ask for our complete list.

BOILERS.

We still have on hand a few of Armour's 54x16, 60x16, 66x16, 66x18 and 72x18 horizontal tubular boilers. They are in excellent condition.

AIR COMPRESSORS.

S921 1 Duplex straight-line Clayton, 9x9.

S922 1 4½x6-inch Clayton.

S923 2 12x16. Will compress air up to 60 pounds' pressure, with 80 to 100 pounds' steam.

BELTING.

We carry at all times a complete stock of short-lap, double-thick leather belting, both new and second-hand. Our quotations are always 30 per cent. below lowest market values.

SHAFTING.

We carry a stock of all sizes of shafting.

STEAM PUMPS.

Ask for our complete list of steam pumps. We have all kinds.

Electrical Apparatus.

See our list of supplies in the Western Electrician of October 27.

A COMPLETE OUTFIT.

We purchased the following outfit:

S924 1 McEwen tandem compound engine, 8½x14x12, with a direct-connected multipolar compound-wound dynamo, capacity, 50 K. W. Included in this outfit is a 100-horsepower Sterling water-tube boiler, with full front grate bars, etc. Also a Duplex steam pump and a copper-tube heater. It was used about 2½ years and replaced, owing to a necessary increase in power.

DYNAMOS, ETC.

1 500-light National, 1000 volts, alternating exciter, attached to shaft, complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.

1 Thomson-Houston, 400-light, compound-wound dynamo, new, 110 volts, 200 amperes, complete with sliding base, belt tightener and regulator.

1 Thomson-Houston, 500-light, compound-wound dynamo, 110-volt, 200-ampere, complete with sliding base, belt tightener and regulator.

1 United States Weston dynamo, 150-light, 100-volt, 75-ampere, complete with sliding base, belt tightener and regulator.

2 generators, 80 K. W. type, U. S. Westinghouse bipolar, 350 revolutions per minute, 550 volts, size of pulley, 54x18 inches; paper rim; side rails complete.

2 Field Rheostats Westinghouse three-jaw switches for throwing generators in multiple.

1 voltmeter Westinghouse, 0 to 600.

2 amp.-meters Westinghouse, capacity 0 to 160.

1 amp.-meter Westinghouse, capacity 0 to 300.

2 Westinghouse circuit-breakers.

3 Westinghouse lightning arresters.

3 Westinghouse switches, double throw.

1 electric elevator, manufactured by Keystone Electric company of Erie, Pa.; self-oiler, 60-ampere, No. 324, 220-volt, 1,025 revolutions; worm gear and cog are solid brass; 53 grooves for ⅝-inch cable on drum; drum 30-inch diameter by 22-inch face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 horsepower; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.

1 Baxter 110-volt motor, 2-horsepower, good as new; complete and starting 60x base and tightener. Price.....$50.00

1 1000-light Slattery alternating-current dynamo, 1000-volt, complete with exciter and instrument. Practically as good as new.

1 2-horsepower Baxter motor, 100-volt, complete with starting box, base with belt tightener and pulley. First-class condition.

Our Machinery Hall is 200 X 360 feet.

Our complete list of items is contained in CATALOGUE No. 156.

CHICAGO HOUSE WRECKING CO.,

A Few Reasons Why You Should Use the
WARNER DRY BATTERY

RINGING OUTFIT.

BECAUSE:

No exchange is complete without one.
It is the cheapest way to secure power.
There are no bearings to oil.
There is no water to spill.
There are no delays or stops.
It is absolutely reliable under all conditions.
It will ring where all other ringers fail.
There are no belts to slip.
There are no commutators to keep clean.
There are no power bills to pay.
It is always ready for duty.

Your operators can give better service with a good signaling device.

Every Outfit is Shipped Complete Ready for Immediate Use.

Every outfit is thoroughly tested and fully guaranteed. This machine is in use in some of the largest exchanges, both in this country and abroad. The net price for the complete outfit is

$45 F. O. B. Factory.

A PRETTY STORY.
Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.
Branch Office: 10 Temple Court Building, Chicago, W. H. QUAW, Mgr. 'Phone, Harrison 2018.
Or the home office at Beaumont, Texas, is where you write for more information and a pretty and useful pamphlet.

WHIRL ROUND YOUR HEAD

A CLOSED VESSEL FILLED WITH WET STEAM The water particles will be deposited on the farther end. Why? Simply because water is nearly 1600 times heavier than steam and is therefore thrown outward with 1600 times the centrifugal force.

Change the experiment and admit exhaust steam to the bottom of the STURTEVANT EXHAUST HEAD. It passes up the interior pipes, is discharged tangentially close to the shell, and is thereby given a vigorous whirling motion. The entrained water—likewise the oil—flies outward, strikes the cool side and trickles down to the outlet at the bottom. The steam, now perfectly dry, finds ready escape through the central opening above. The action is positive and absolute. PERFECT SEPARATION MUST BE THE RESULT No spray; no rotting roofs.

THE STURTEVANT EXHAUST HEAD

CONTAINS
NO BAFFLE PLATES

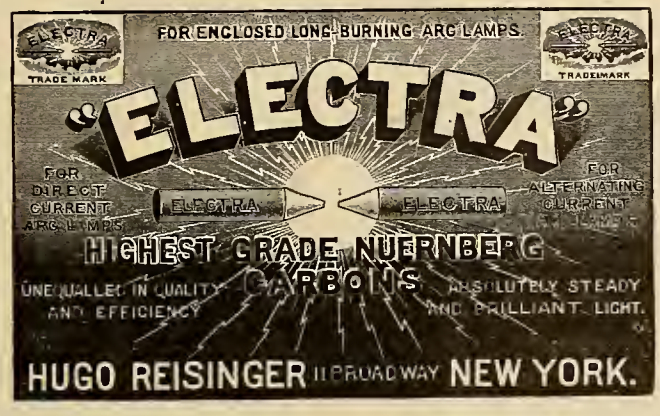
The "ELECTRA" Highest Grade Nuernberg Carbons are recognized as standard all the world over.

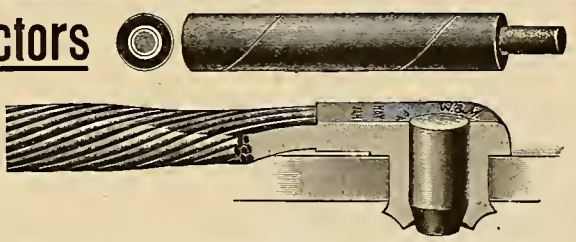
All genuine "ELECTRA" carbons are put up in packages bearing the label with the trade mark "ELECTRA."



Good carbons mean less cost for current.

All the excellence in dynamos and arc lamps counts for but little where poor carbons are used in lamps.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

ARC LAMPS, KNIFE SWITCHES, GLOBES, FLUSH PUSH, AND SNAP SWITCHES, SHADES, CARBONS, RUBBER COVERED WIRES, CORDS AND CABLES, ELECTRIC LIGHTING SUPPLIES OF ALL KINDS.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

THE

BELDEN SYSTEM

. . OF . .

Arc Lighting

Possesses features which appeal to every conservative buyer of arc lamps. It will burn the greatest number of hours without attention, will deposit the least amount of ashes on inner globe.

WORKMANSHIP,
SIMPLICITY,
DURABILITY,
LIFE OF CARBON

and the many other features found only in our lamp account for its popularity.

BELDEN-LARWILL ELECTRIC & MFG. CO.,
FT. WAYNE, IND.

AGENTS: M. B. AUSTIN & CO., 58 W. Van Buren St., Chicago; C. E. WILSON, 1000 Betz Bldg., Philadelphia, Pa.; R. N. STEWART & CO., Denver, Colo.

We are now in a position to establish desirable agencies in all principal cities in this and foreign countries.

Columbia Lamps....

QUALITY UNEXCELLED

Columbia Lamps embody all the features so essential to the satisfactory and profitable operation of CENTRAL STATIONS and ISOLATED PLANTS, namely: Full rated candlepower and initial uniformity, high efficiency and maintenance of candlepower.

If you are not entirely satisfied with the lamp which you are using at present, be persuaded by us to try a barrel of COLUMBIAS. You will find them satisfactory in every respect.

Special lamps for series burning on ELECTRIC STREET RAILWAY circuits.

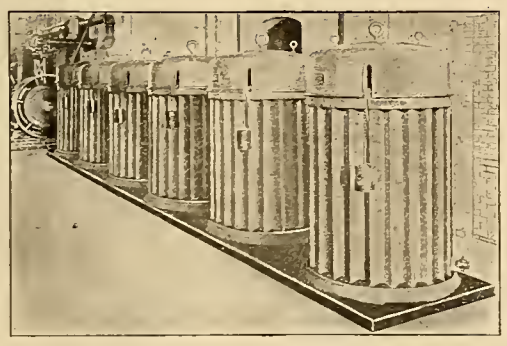
Special prices to consumers on FUTURE DELIVERY ORDERS for 1,000 lamps or more covering full annual requirements.

Central Electric Co., Sales Agents.

264-266-268-270 Fifth Avenue, CHICAGO, U. S. A.

THE GENERAL ELECTRIC COMPANY'S

Series Alternating Street System, Constant Current Transformers and Enclosed Arc Lamps.



Series Incandescent Lamps can be operated on the same circuits with the arc lamps because the transformers do not "pump" at full load.

The Lamp Circuits are entirely insulated from the primary circuit.

12,000 Arc Lamps successfully operating from 290 transformers in 155 different stations.

GENERAL OFFICE: SCHENECTADY, N. Y.

Chicago Office, Monadnock Bldg. Sales Offices in All Large Cities.

SNUFF IT OUT!

THIS TERRIBLE LOSS,

as you would a candle, by adopting the Holly System, which utilizes your exhaust steam (now wasted) for general heating purposes, and enables you to sell same for three times the cost of production, thus securing your electric current at the station free of cost.

Our pamphlet explains our plan. Send for it.

Contents: Electricity in the Service of Man. The Electric Motor. The Electric Railway. Lighting. The Telegraph. Cable Laying. Electricity in Warfare. In the Household. Applied to the Human Body.

Ferguson, R. M. Electricity. New edition. 12mo, cloth $1.50

Fleming, J. A. Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations. 12mo, cloth $1.50

Foster, G. C., and Atkinson, E. Elementary Treatise on Electricity and Magnetism. Founded on Jouvert's "Traite Elementaire d'Electricitc." 12mo, cloth $2.25

Haskins, C. C. Electricity Made Simple, 233 pages, 108 illustrations, cloth, $1.00; paper covers $0.50
A valuable, non-technical work for those whose opportunities for gaining information on the branches treated have been limited.

Hawkins, N. New Catechism of Electricity. A Practical Treatise Relating to the Dynamo and Motor, Wiring, The Electric Railway, Bell Fitting, etc., etc. Red leather, pocketbook form. 95 illustrations $2.00

Houston, E. J., and Kennelly, A. E. Algebra Made Easy $0.75

Houston, E. J., and Kennelly, A. E. Electrical Engineering Leaflets. Three Grades: Elementary, Intermediate and Advanced. 8vo, cloth. New York, 1895. 3 volumes, each.....$1.50

Houston, E. J., and Kennelly, A. E. Electricity made easy by Simple Language and Copious Illustrations. 12mo, cloth. New York, 1898..$1.50

Houston, E. J. Electricity and Magnetism. Being a Series of Advanced Primers of Electricity. 115 illustrations. 12mo, cloth $1.00

Houston, E. J., and Kennelly, A. E. Electro-Magnetism. (Elementary Electro-Technical Series). 16mo, cloth. Illustrated $1.00

Jamieson, A. Elementary Manual of Magnetism and Electricity. Specially arranged for the use of First-Year Science and Art Department and other Electrical Students. With numerous illustrated experiments and examination questions. Third edition. 12mo, cloth $1.25

Kennelly, A. E., and Wilkinson, H. D. Practical notes for Electrical Students. Vol. I., Laws, Units and Simple Measuring Instruments. 8vo, cloth $2.50

Knott, C. G. Electricity and Magnetism. Elementary Course. Adapted to the Syllabus of the South Kensington Science Department. 12mo, cloth..$0.75

Larden, W. Electricity for Public Schools and Colleges. With 215 illustrations and a Series of Examination Papers with Answers. Second edition. 12mo, cloth $1.75

Maxwell, J. Clerk. An Elementary Treatise on Electricity. Edited by Wm. Garnett. 8vo..$2.00

Maycock, W. Perren. A First Book of Electricity and Magnetism, for the use of Elementary Science and Art Engineering Students, and general readers. Illustrated. 8vo, cloth.....$0.60

Maycock, W. Perren. Electric Lighting and Power Distribution. An Elementary Manual for Students preparing for the Ordinary Grade Examination of the City and Guilds of London Institute. Part I. With Original Questions, and Ruled Pages for Notes. 123 illustrations and Diagrams. 12mo, paper $0.75

Maycock, W. Perren. Part II. of above. 12mo, paper $1.00

Maycock, W. Perren. Part III. of above. (Final.) 12mo, paper $0.75

Meadowcroft, W. H. The A, B, C of Electricity. 36 illustrations. 12mo, cloth.....$0.50

Miller, W. A. Magnetism and Electricity Static, Dynamic, Electro-Magnets, Thermo, Animal, etc. 8vo, cloth $1.50

Morrow, J. F., and Reid, Thorburn. Arithmetic of Magnetism and Electricity. 16mo, cloth. Lynn, Mass., 1893.....$1.00

Murdock, Lieut. J. B., U. S. N. Notes on Electricity and Magnetism. Designed as a companion to S. P. Thompson's Elementary Lessons. With illustrations. 16mo, cloth.....$0.00

Nichols, Edward L. A Laboratory Manual of Physics and Applied Electricity. In two volumes. Vol. I. Junior Course in General Physics, by Ernest Merritt and Frederick J. Rogers. 294 pages. 107 illustrations. 8vo, cloth $3.00
Vol. II. Senior Courses and Outline of Advanced Work, by George S. Moler, Frederick Bedell, Homer K. Hotchkiss, Charles P. Matthews and E. N. Nichols. 454 pages. 245 illustrations. 8vo, cloth. New York, 1894.....$3.25

Noad, H. M. The Student's Text Book of Electricity. A new edition, carefully revised by W. H. Preece. 8vo, cloth. Illustratcd.....$4.00

Overend, J. Elementary Experiments in Magnetism and Electricity. Second edition. 18mo, paper..$0.40

Poyser, A. W. Magnetism and Electricity. With 235 diagrams and illustrations, and a set of exercises at the end of each chapter. Third edition. 12mo, cloth $0.80

Slingo, W., and Brooker, A. Problems and Solutions in Elementary Electricity and Magnetism. With 67 original illustrations. 12mo, cloth..$0.75

Sloane, T. O'Connor, and Others. Questions and Answers About Electricity. A First Book for Students. Theory of Electricity and Magnetism. Edited by E. T. Bubier, Second. 12mo, cloth. Illustrated. New York, 1892.....$0.50

Stewart, R. W. An Elemeotary Text Book of Magnetism and Electricity. 150 illustrations and numerous examples. 12mo, cloth.....$1.50

Stewart, R. W. A Text Book of Magnetism and Electricity. 160 illustrations and numerous examples. 12mo, cloth $1.00

Tarn, H. C. Magnetism and Electricity for the Use of Students in Schools. 12mo, cloth.....$0.80

Thompson, Silvanus P. Elementary Lessons in Electricity and Magnetism. 12mo, cloth. Illustrated. New edition, revised throughout, with additions. $1.50

Thompson, Silvanus P. Notes on Electricity and Magnetism, Designed as a companion to the above. By J. B. Murdock, U. S. N. 16mo, cloth.....$0.60

Thomson, J. J. Elements of the Mathematical Theory of Electricity and Magnetism. 12mo, cloth. $2.60

Trevert, Edward. Electricity for Students. 12mo, cloth. Illustrated. Lynn, Mass., 1895..$1.00
This work explains in simple language the theory and practical application of Electricity up to date, and will be found invaluable to everybody who is interested in this mysterious force.

Tumlirz, Dr. Potential, and its application to the explanation of Electrical Phenomena. Translated by D. Robertson, M. D. 12mo, cloth.....$1.50

Turner, H. H. A Collection of Examples on Heat and Electricity. 12mo, cloth.....$0.75

Walmsley, R. M. The Electric Current. How produced and how used. With 379 illustrations. 12mo, cloth $3.00

Watson, A. E. Electrician's Handy-Book of Useful Information. Illustrated. 523 pages. Cloth..$2.50
Compiled from the works of many standard authorities with large number of rules and tables.

Wormell, R. Magnetism and Electricity. An Elementary Text Book for Students. Revised and enlarged edition. 12mo, cloth $1.25

HISTORY AND BIBLIOGRAPHY OF ELECTRICITY.

Adams, Geo. An Essay on Electricity, explaining the Principles of that Useful Science, etc., etc. 8vo, with plates. Old sheep. London, 1792 (scarce) $4.00

Barrett, J. P. Electricity at the Columbian Exposition. Including an account of the exhibits in the Electricity Building, the Power Plant in Machinery Hall, the Arc and Incandescent Lighting of the Grounds and Buildings, the Transmission of Power for the Operation of Machinery, the Subway and Conduit, Electric Fountain, Search Lights, Intramural Road, Electric Launches, Electric Elevators, Lighting of the Ferris Wheel, Corona Lighting of the Manufactures Building, etc. 8vo, cloth. Numerous illustrations $2.50

Benjamin, Park. The Age of Electricity. From Amber-soul to Telephone. 12mo, cloth.....$2.00

Benjamin, Park. The Intellectual Rise in Electricity. A History. 8vo, cloth, with portraits.$3.00
The object of this work is to show how the knowledge of electricity came into the world, and how it developed from the mere conception of an isolated effect—the attraction exerted by the magnet upon iron, or by amber upon dust—to the recognition of a great force pervading the whole physical universe.

Brennan, M. S. A Popular Exposition of Electricity; with Sketches of some of Its Discoverers. 12mo, cloth $0.75

Cavendish, H. Electrical Researches. Edited by J. Clerk Maxwell. 8vo, cloth. Cambridge, 1879. .....$4.50

Cooke, Sir W. F. Extracts from the Private Letters of the late Sir William Fothergill Cooke, relating to his invention of the electric telegraph. Also a memoir by Latimer Clark, with portrait. 8vo, cloth $1.25

Denslow, O. B., and J. M. Parker. Lives of Thos. A. Edison and Samuel F. B. Morse. Portraits. 12mo, cloth $0.50

Dickson, W. K. L., and Antonia. Life and Inventions of Thomas Alva Edison. With Drawings and Photographs. 4to, cloth.....$4.50

Farnday, M. Experimental Researches in Electricity. 3 volumes. 8vo, cloth. London, 1839-55. .....$20.00

Francis, G. Electrical Experiments. 8vo, cloth. London, 1844 .....$2.50

Franklin, Ben. Experiments and Observations on Electricity, made at Philadelphia, with his Letters and Papers on Philosophical Subjects. Fifth edition. Quarto, many plates. London, 1774. (Scarce).

Frith, H., and Rawson, S. Coil and Current; or, the Triumphs of Electricity. 8vo, cloth. Illustrated $1.25

Gilbert, William. De Magnete. On the Loadstone and Magnetic Bodies and on the Great Magnet the Earth. A New Physiology. Demonstrated with many Arguments and Experiments. A Translation by P. Fleury Mottelay. Portrait and numerous illustrations. 8vo, cloth $4.00

Heap, Major D. P. Electrical Appliances of the Present Day. Being a Report on the Paris Electrical Exhibition of 1881. 8vo, cloth, fully illustrated $2.00

Hering, Carl. Electricity at the Paris Exposition of 1889. 8vo, cloth. 250 pages and 62 illustrations. $2.00

Houston, E. J. Electricity One Hundred Years Ago and To-day. Illustrated. New York, 1894....$1.00
Embracing the progress made by electric science practically from its birth to the present day, this work will be found of unusual interest in tracing the various steps by which the distinctively modern science has reached its present pre-eminent position.

Jeans, Wm. T. Lives of the Electricians; Tyndall, Wheatstone and Morse. First series. 12mo, cloth. $2.25

Kenyan, E. C. Thos. A. Edison, The Telegraph Boy Who Became a Great Inventor. 12mo, cloth. London, 1897 .....$0.50

Lodge, Oliver J. Modern Views of Electricity. With illustrations. 12mo, cloth $2.00

Lodge, Oliver J. The Work of Hertz and some of his successors. Being the Substance of a Lecture delivered at the Royal Institution, June 1, 1894. With additions and appendices. 8vo, cloth. Fully illustrated. With steel-plate portrait....$1.00

Martin, T. C. Inventions, Researches and Writings of Nikola Tesla. With special reference to his work in polyphase currents and high potential lighting. 8vo, cloth. 500 pages. 300 illustrations. Second edition $7.50

May, G. A Bibliography of Electricity and Magnetism, 1860 to 1883. With special reference to Electro-Technics. 8vo, cloth $2.50

McClure, J. B. Edison and his Inventions, with Full Explanations of the Telephone. Phonograph. Tasemeter, Electric Light and all his Principal Discoveries, etc. 12mo, cloth. Illustrated....$1.00

Mendenhall, T. C. A Century of Electricity. Second edition. Illustrated. 16mo, cloth.....$1.25

Osterberg, Max. Synopsis of Current Electrical Literature, compiled from Technical Journals and Magazines during 1895. 8vo, cloth.....$1.00

Priestly, J. History and Present State of Electricity, with Original Experiments. 2 volumes, calf. London, 1769. (Scarce.)

Siemens, Sir W. von. Scientific Works. A collection of papers and discussions. Edited by E. T. Bamber. 3 volumes. 8vo, cloth.....$15.00

Siemens, Sir W. von. Personal Recollections of. Translated by W. C. Coupland. Portrait. 8vo, cloth $5.00

Singer, Geo. J. Elements of Electricity and Electro-Chemistry. 8vo, calf. London, 1814 (scarce). $4.00

(To be Continued.)

Talk it over

on the way to your office. It's a good subject, pregnant with possibilities of better work and larger profits. If you have decided to discard the expensive, inefficient, out-of-date lines of shafting and the loose pulleys and wobbling hangers, it means that you have absorbed some of the progressive spirit of the day—have probably recognized the economy and convenience of **electric drive**—and—well, write to us about it. Ask all the questions you please. We are ready and anxious to answer or to be of service in any way. We build all sizes of **Generators** and **Motors** for either **Alternating or Direct Current.**

The "S. K. C." and Northern systems are unequaled for simplicity of design and thorough reliability.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goebel, Constr. Supt. CHICAGO EDISON CO."

1 60-light Westinghouse.
1 80-light Siemens & Halske, type L. H., self-oiler, brand new.
2 80-light Siemens & Halske, ironclad type, M. P., self-oilers, brand new.
1 100-light Bain, compound, self-oiler.
1 100-light J. & C., self-oiler.
4 110-light Gibbs, M. P., compound, self-oilers, slow speed, brand new, 1000 R. P. M.
1 110-light Siemens & Halske, M. P., Churchward type, compound, extra slow speed, brand new, 650 R. P. M.
3 150-light Gibbs, M. P., compound, self-oilers, speed 1650.
1 150-light Gibbs, M. P., shunt, self-oiler, slow speed, 825 R. P. M.
1 160-light Card, self-oiler.
2 180-light Siemens & Halske, M. P., self-oilers, brand new.
1 200-light Western Electric, self-oiler, comp.
2 210-light Edison, self-oilers, 12 K. W.
4 210-light Siemens & Halske, 12 K. W.
2 210-light Siemens & Halske, M. P., brand new, type B., self-oilers.
4 210-light Gibbs, M. P., self-oilers, very slow speed, 725 R. P. M., brand new.
1 250-light Westinghouse.

110-Volt Incandescent Dynamos.—Continued.

1 250-light Commercial, comp., self-oiler.
1 250-light Eddy, self-oiler.
1 270-light General Electric, 15 K. W., M. P., direct-connected to Case engine, compound.
2 270-light Westinghouse, M. P., slow speed, 15 K. W.
1 300-light Columbian, multipolar, comp., self-oiler, slow speed.
4 300-light Gibbs, M. P., self-oilers, slow speed, 725 R. P. M., brand new.
1 340-light Eddy, self-oiler, compound.
2 350-light Hawkeye, compound.
1 350-light National, self-oiler, compound.
1 350-light Edison, 20 K. W., self-oiler.
6 350-light Siemens & Halske, type L. H., self-oilers.
1 360-light Duplex, multipolar, self-oiler, compound, slow speed.
3 500-light Siemens & Halske, type L. H., self-oilers, brand new.
4 540-light Edison, 30 K. W., self-oilers, compound.
1 600-light Eickmeyer.
2 700-light Westinghouse, 10 pole, slow speed, 40 K. W., self-oilers, 575 R. P. M., brand new.
2 800-light Edison, 46 K. W., self-oilers.
1 1200-light Siemens & Halske, type L. H., 70 K. W., self-oiler.
1 1350-light Siemens & Halske, Type I, 80 K. W., for direct connection, 8 pole.
3 1500-light Siemens & Halske, type L. H., self-oilers, 100 K. W.
1 1500-light Siemens & Halske, 100 K. W., type I., 6 pole, for direct connection, brand new.

220-Volt Generators.

Rheostat, base-frame and pulley accompany each machine.

1 8½ K. W. Westinghouse, multipolar, self-oiler.
1 9 K. W. Lundell, self-oiler.
1 10 K. W. Lundell, self-oiler, multipolar, slow speed.
1 12 K. W. Edison, self-oiler.
1 15 K. W. Edison, compound, self-oiler.
1 30 K. W. Siemens & Halske, M. P., Ironclad type, self-oiler, brand new.
1 45 K. W. Edison, compound, self-oiler, new armature.
1 50 K. W. Siemens & Halske, M. P., Churchward type, self-oiler, brand new, for direct connection.
1 marble panel switchboard for above.
1 100 K. W. Siemens & Halske, M. P., Churchward type, self-oiler, brand new, for direct connection.

500-Volt Generators.

2 15 K. W. Edison, self-oilers.
1 15 K. W. T.-H., self-oiler.
1 35 K. W. Mather, self-oiler.
2 35 K. W. Siemens & Halske, brand new, M. P., Churchward type, self-oilers, very slow speed, 475 R. P. M.
1 45 K. W. Edison, compound, self-oiler.
1 76 K. W. Westinghouse, Kodak set, Westinghouse generator and Westinghouse compound engine, 14 x 24 x 14, all complete, fine.

Alternating Generators.

1 350-light Thomson-Houston, A. 18.
1 600-light Thomson-Houston, A. 6.
1 600-light Thomson-Houston, 30 K. W., two-phase.
1 600-light Thomson-Houston, 30 K. W., slotted armature.
2 600-light General Electric, A. 30, toothed armature.
2 650-light Thomson-Houston, A. 35.
2 750-light Westinghouse, 37½ K. W.
1 900-light Warren, 45 K. W., 1100 volts.
1 1000-light Wood, 50 K. W., self-oiler.
1 1000-light Siemens & Halske, 50 K. W., self-oiler, 60 cycle.
1 1200-light National, with exciter.
1 1200-light Siemens & Halske, 60 K. W., Churchward type, brand new, 60 cycle, single-phase, 1100 volts, with exciter.
1 60 K. W. Siemens & Halske, Churchward type, brand new, 60 cycle, two-phase, rotary transformer, 1100 volts, alt. to 250 volts direct, complete, with marble panel switchboard.
1 1200-light Westinghouse, 60 K. W.
1 1200-light Thomson-Houston, 60 K. W.
1 1200-light Warren, 60 K. W., self-oiler.
1 1200-light General Electric, A. 60.
2 1300-light Thomson-Houston, A. 70, 1100 or 2200 volts.
1 1500-light Wood, 75 K. W., self-oiler.
1 1500-light General Electric, monocyclic, 75 K. W., self-oiler, 60 cycle.
1 1800-light National, 90 K. W.
1 4000-light Wood, 200 K. W., self-oiler.

Arc Dynamos.

1 20-light 2000 C. P. Western Electric.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.

ANDREW A. STEWART,
135 77th St., Sta. S, Chicago, Ill

ELECTRICAL COURSES:

ELECTRICAL ENGINEERING,
ELECTRICAL,
ELECTRIC POWER AND LIGHTING,
ELECTRIC RAILWAYS,
ELECTRIC LIGHTING,
ELECTRIC CAR RUNNING,
TELEGRAPHY,
TELEPHONY.

Also courses in Steam, Mechanical, Civil and Mining Engineering, Architecture, Drawing and Designing, Chemistry, English and Commercial Branches.

When writing state subject in which interested.

International Correspondence Schools,

Box 1002, Scranton, Pa.

BARGAINS IN ENGINES, DYNAMOS, BOILERS, PUMPS, BELTING, AIR COMPRESSORS AND ELECTRICAL SUPPLIES.

We are headquarters for Rebuilt Motive Power. Our machinery is absolutely warranted in every way. We cover all sales by a binding guarantee. Our stock is the most extensive in the land.

We Offer the Following, Subject to Prior Sale:

DYNAMOS, ETC.

1 500-lt. Nat'l, 1000 v., alternating exciter, attached to shaft, complete with sliding base regulator and pulley, in first-class condition. Full description on application; also photograph.
1 T.-H., 400-lt., comp.-wound dynamo, new, 110 v., 200 amp., complete with sliding base, belt tightener and regulator.
1 T.-H., 500-lt., comp.-wound dynamo, 110 v., 200 amp., complete with sliding base, belt tightener and regulator.
1 U. S. Weston dynamo, 150-lt., 100-v., 75-amp., complete with sliding base, belt tightener and regulator.
2 generators, 80 K. W., type U. S. Westinghouse bipolar, 350 r. p. m., 550 v., size of pulley, 54x18 in.; paper rim; side rails complete.
2 Field Rheostats Westinghouse three-jaw switches for throwing generators in multiple.
1 voltmeter Westinghouse, 0 to 600.
2 amp.-meters Westinghouse, capacity 0 to 160.
1 amp.-meter Westinghouse, capacity 0 to 300.
2 Westinghouse circuit-breakers.
3 Westinghouse lightning arresters.
3 Westinghouse switches, double throw.
1 electric elevator, manufactured by Keystone Elec. Co., Erie, Pa.; self-oiler, 60-amp., No. 324, 220-v., 1,025 rev.; worm gear and cog are solid brass; 53 grooves for ⅝-in. cable on drum; drum 30-in. diam. by 22-in. face; the motor and gearing set on a cast-iron base; this outfit cost $1,400; the worm screw and shaft are cut from solid forging and are steel; the motor is 15 h. p.; the machine is geared to give a speed to the car of 150 feet per minute; was only in operation about four months.
1 Baxter 110-v. motor, 2 h. p., good as new; complete and starting box, base and tightener. Price $50.00
1 1000-lt. Slattery a.-c. dynamo, 1000-v., complete with exciter and instrument. Practically as good as new.
1 2 h. p. Baxter motor, 100-v., complete with starting box, base with belt tigbtener and pulley. First-class condition.

A COMPLETE OUTFIT.

We purchased the following outfit:

S924 1 McEwen tandem comp. engine, 8½x14x12, with a direct-connected multipolar compound-wound dynamo, capacity, 50 K. W. Included in this outfit is a 100 h. p. Sterling water-tube boiler, with full front grate bars, etc. Also a Duplex steam pump and a copper-tube heater.

It was used about 2½ years and replaced, owing to a necessary increase in power.

ELEC'L APPARATUS

See our list of supplies in the Western Electrician of October 27.

ENGINES.

S900 1 Allis tandem comp. condensing engine; h. p., nominal, 500; flywheel, 2 ft. diam. by 40-in. face; cylinders, 22 and 42 x48; guaranteed to operate on 15 lb. of steam per indicated h. p. This engine is in excellent condition. It is at present installed at Omaha, Neb.
S901 1 pair Williams automatic engines, coupled together; size, 17¾x24; 200 rev.; builders' rating, 200; h. p., 200.
S902 2 Westinghouse comp. engines, 13x22x13; rev., 290; h. p., 125.
S903 1 horizontal tangye bed, side crank automatic steam engine, made by Russel & Co.; steam cylinder, 13x18.
S904 1 Wright automatic Corliss, 23x36.
S905 1 10x9 Westinghouse.
S906 1 8x12 Lansing automatic.
S907 1 7x12 Rice automatic.
S908 1 16x24 horizontal box bed, side crank.
S909 1 12x16 F. C. Wells horizontal tangye bed, side crank.
S910 10 9x12 engines, manufactured by George W. Tifft & Sons, Buffalo, N. Y.
S911 1 10x22 box bed, right hand, side crank.
S912 1 16x36-in. Corliss, left hand.
S913 1 9x16 Rice automatic.
S914 1 11x16x16 McEwen tandem comp.
S915 1 8x10 Atlas automatic, center crank.
S916 1 11x18 Sinker, Davis & Co.
S917 1 12x16 horizontal, box bed, side crank.
S918 1 10x14 automatic Wright & Adams.
S919 1 12x12 high-speed automatic Ideal.
S920 1 20x24 box bed, balance valve.

In addition to the above, we have on hand at all times a complete assortment of all size engines, ranging in power from 1 to 500 h. p. Ask for our complete list.

BOILERS.

We still have on hand a few of Armour's 54x16, 60x16, 66x16, 66x18 and 72x18 horizontal tubular boilers. They are in excellent condition.

STEAM PUMPS.

Ask for our complete list of steam pumps. We have all kinds.

BELTING.

We carry at all times a complete stock of short-lap, double-thick leather belting, both new and second-hand. Our quotations are always 30 per cent. below lowest market values.

SHAFTING.

We carry a stock of all sizes of shafting.

OUR MACHINERY HALL IS 200 X 360 FEET.

THE TELEPHONE HAND-BOOK
NEW AND REVISED EDITION, WITH A NEW CHAPTER ON "RECENT PROGRESS," BRINGING THE BOOK UP TO DATE.
BY HERBERT LAWS WEBB.
Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London. Author of "A Practical Guide to the Testing of Insulated Wires and Cables." Joint Author of "Electricity in Daily Life."
160 Pages, 133 Illustrations, Cloth, Hand-Book Size, Price $1.00.
Extract from Preface.—"This little book has no pretension to be considered a complete treatise on telephony as it exists in America. The time for such a work is not yet come. But it is felt that there is a demand for a practical book on telephone working and management, and the TELEPHONE HAND-BOOK is an attempt at meeting that demand. With the exception of a few chapters dealing with certain forms of transmitters and receivers used in Europe, which are given for the information of those who may wish to engage in the manufacture of telephones, the book is based entirely on standard American practice; and most of the material, apparatus and methods described are peculiar to or have originated in this country."
No pains have been spared to make it the best book of its kind. It is right up to date, intensely practical, and so plain and clear in its language that anyone can understand and learn from it everything regarding telephone work and management. It conforms in size and style to our other Hand-Books which have been so favorably received by the entire electrical fraternity.

CONTENTS

CHAPTER 1. The Invention of the Telephone.
2. Sound Waves. Articulate Speech.
3. Electric Telephony. The Bell Telephone.
4. The Microphone.
5. Current Induction. Electromagnetic Induction.
6. The Induction Coil: Its Use in the Telephone Transmitter.
7. The Complete Telephone Circuit.
8. Magnet Telephones.
9. The Bell Telephone Receiver.
10. Other forms of Magnet Telephones.
11. The Gower, Ader and D'Arsonval Receivers, Mercadier's Bi-Telephone.
12. The Siemens, Kotyra, Neumayer and Böttcher Receivers.
CHAPTER 13. Carbon Transmitters.
14. The Blake Transmitter.
15. The Long Distance Transmitter.
16. The Solid-back Transmitter.
17. The Berliner Transmitter.
18. The Cuttriss Transmitter.
19. Various European Transmitters.
20. The Efficiency of Carbon Transmitters.
21. Batteries for Telephone Work.
22. Open Circuit Batteries.
23. Closed Circuit Batteries.
24. The Practical Management of Batteries.
25. Magneto Bell.
26. Automatic Switches.
27. Telephone Line Construction.
CHAPTER 28. Metallic Circuit.
29. Underground Wires.
30. Lightning Arresters.
31. Inside Wiring.
32. Installation of Telephone Instruments.
33. Inspection and Maintenance.
34. The Condenser; Its Use in Telephony.
35. Electromagnetic Retardation.
36. Exchange Working.
37. Small Exchanges.
38. Party Lines; The Bridging Bell.
39. Long Distance Telephony.
40. Duplex Telephony.
41. Simultaneous Telegraphy and Telephony.
42. Recent Progress. Appendix.

A PRETTY STORY.
Eight months ago the Texas Arm & Pin Co. began manufacturing things inclined electrically wooden, like cross arms, pins and brackets. An old, no-account, second-hand machine, in a broken-down factory, was used, but now they have four factories with new and late machinery and are shipping more cross-arms than the law allows. But they can ship more. They are untapped, long-leaf, yellow pine.

Although a Storage Battery Does Not Generate

Electricity, it does reduce the amount of generating machinery required, and effects a very great economy, by keeping the apparatus installed running fully loaded and under the most efficient conditions.

Street Railway Companies will do well to investigate the **Chloride Accumulator.** There are 120 Storage Battery Installations in the United States operating as regulators on Electric Railway Circuits—120 *Chloride Accumulator* Installations. Their reliability, efficiency and economy is vouched for by the continued purchases of their largest users.

Investigation is invited. Engineering advice at the service of those interested. Bulletins illustrating and describing various Chloride Accumulator installations mailed, upon request, to any address. L-23-1.

THE ELECTRIC STORAGE BATTERY COMPANY,
19th Street and Allegheny Avenue, Philadelphia, Pa.

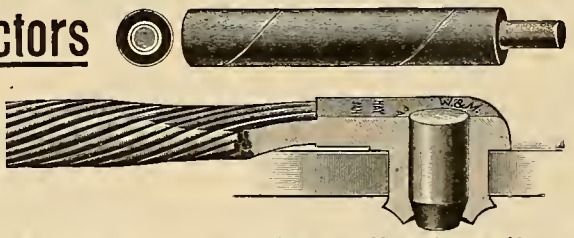
SALES OFFICES: NEW YORK: 100 Broadway; BOSTON: 60 State Street; BALTIMORE: Equitable Bldg.; CHICAGO: Marquette Bldg.; DETROIT: Michigan Electric Co.

"AMERICAN" STORAGE CELLS
ARE THE BEST. Send for descriptive Circular.
Absolutely Non-Infringing. Protection Guaranteed.
AMERICAN BATTERY CO.,
ESTD 1888. 17 S. Clinton St., Chicago, Ill.

This Trade-Mark on Sockets, Receptacles, Rosettes, Mains and Branches, Edison Cut-Outs Knife Switches, Jenkins Snap Switches, etc. Guarantees Satisfaction
PHILADELPHIA. H. T. PAISTE CO. CHICAGO.

HENRY H. HUMPHREY,
Consulting Electrical Engineer.
CENTRAL LIGHTING STATIONS, ELECTRIC POWER TRANSMISSION.
Suite 1305, Chemical Bldg., St. Louis.

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

ARC LAMPS, KNIFE SWITCHES, GLOBES, FLUSH PUSH, AND SNAP SWITCHES, SHADES, CARBONS, RUBBER COVERED WIRES, CORDS AND CABLES, ELECTRIC LIGHTING SUPPLIES OF ALL KINDS.

WRITE FOR PRICES.

CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.

..ARC LAMP TROUBLES..

REDUCED TO A MINIMUM WHERE THE

BELDEN SYSTEM IS USED.

When you put in a Belden Arc Lamp you can rest assured that it will do just as we say it will, viz.:

Burn a Minimum of 250 Hours.
Give a Steady White Light.
Work Perfectly Regardless of Alignment.
Cast no Shadows from Carbon Points.
Pick up Immediately when Carbons have Fallen Together.
Trim Easier than an Open Arc Lamp.

It is ARTISTIC, SIMPLE, DURABLE.

Send for our new Bulletins. They will prove interesting.

BELDEN-LARWILL ELECTRIC & MFG. CO.,
FORT WAYNE, IND.

AGENTS: M. B. Austin & Co., 58 W. Van Buren St., Chicago. C. E. Wilson, 1000 Betz Bldg., Philadelphia, Pa. R. N. Stewart & Co., Denver, Colo.

We are now in a position to establish desirable agencies in all principal cities in this and foreign countries.

Columbia Lamps....

QUALITY UNEXCELLED

Columbia Lamps embody all the features so essential to the satisfactory and profitable operation of CENTRAL STATIONS and ISOLATED PLANTS, namely: Full rated candlepower and initial uniformity, high efficiency and maintenance of candlepower.

If you are not entirely satisfied with the lamp which you are using at present, be persuaded by us to try a barrel of COLUMBIAS. You will find them satisfactory in every respect.

Special lamps for series burning on ELECTRIC STREET RAILWAY circuits.

Special prices to consumers on FUTURE DELIVERY ORDERS for 1,000 lamps or more covering full annual requirements.

OUR 20th CENTURY Souvenir Number

FOR DOMESTIC AND FOREIGN CIRCULATION.

The WESTERN ELECTRICIAN'S Twentieth Century Souvenir Number will be the best and handsomest number we have ever issued. It will be especially prized by its host of readers, owing to the valuable statistical information and other timely and interesting articles it will contain. From an artistic standpoint it will rival anything ever attempted by even the best literary magazines. No effort or expense will be spared to make it truly representative of the progress of electricity.

This important issue offers advertisers an unequaled opportunity to make their products better known ALL OVER THE WORLD. It will be sent to every prospective buyer, not only at home, but in the most remote portions of the civilized globe. It will obtain a circulation perhaps never before given an electrical journal.

This number, therefore, should be well worth the consideration and patronage of every wide-awake advertiser. It will be an issue that will be kept and constantly referred to. No extra charge will be made for space. A liberal special advertising announcement will bring you most gratifying results. Send in your copy and order **NOW.**

Packard lamps are adapted for railroad and commercial work because their makers understand the true conditions under which they are to be used, and because they manufacture lamps for all purposes and know their product. Each Packard Lamp is tested individually for voltage, wattage and candle power. They are carefully selected for uniformity, and therefore give uniform service. Packard lamps are made in all candle powers and all voltages; are made of the very best material, and the superior workmanship greatly increases their range of usefulness.

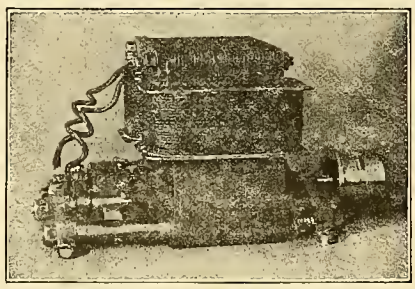
NEW FRANKLIN MODEL DYNAMO.



As some amateur constructors may not be equipped with tools to finish parts, sets of castings and material are furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron and contains eight slots for armature coils; driving pulley for either round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Ends of connecting wires soldered to sheet metal terminals. Run as a motor will drive a sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 2-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with one of these machines. Full size detail blue prints furnished with each set of material, showing how to connect up the machine for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. ***We guarantee it and if not satisfactory money will be refunded.***

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your **Cream Flux** severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,

TECHNICAL EDUCATION

For the purpose of quickly introducing and demonstrating the superior merits of its courses, the Trustees of THE AMERICAN SCHOOL OF CORRESPONDENCE have voted to award a

FREE SCHOLARSHIP IN
Electrical, Steam, Mechanical, Marine or Locomotive
ENGINEERING,

including a complete course in MECHANICAL DRAWING, to a few well-recommended, ambitious men in each manufacturing plant in the United States.

The holders of these FREE SCHOLARSHIPS will be asked to answer any inquiries as to the benefit and value of the instruction and also recommend the School to their friends, thus establishing an endless chain of enthusiastic students who will advertise the School more thoroughly than tons of printed matter or an army of agents. Application blank on request (mention WESTERN ELECTRICIAN).

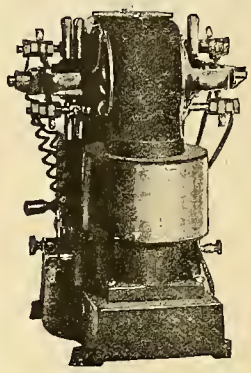
ROTH CHARGING MOTOR DYNAMOS AND TELEPHONE RINGERS.



Telephone Ringer.

Motors direct connected to dynamos for charging storage batteries. Ringers for ringing telephone call bells, built to run on any direct current system of 110, 220 or 500 volts.

We make a specialty of machines for telephone work and will be glad to hear from telephone exchange managers in regard to their requirements in this line.

Send for Bulletin No. 146.

ROTH BROS. & CO., MANUFACTURERS,

86-92 West Jackson Blvd., CHICAGO, ILL.

A Few Reasons Why You Should Use the WARNER DRY BATTERY

RINGING OUTFIT.

BECAUSE:

No exchange is complete without one.
It is the cheapest way to secure power.
There are no bearings to oil.
There is no water to spill.
There are no delays or stops.
It is absolutely reliable under all conditions.
It will ring where all other ringers fail.
There are no belts to slip.
There are no commutators to keep clean.
There are no power bills to pay.
It is always ready for duty.

Your operators can give better service with a good signaling device.

Every Outfit is Shipped Complete Ready for Immediate Use.

Every outfit is thoroughly tested and fully guaranteed. This machine is in use in some of the largest exchanges, both in this country and abroad. The net price for the complete outfit is

$45 F. O. B. Factory.

Prompt shipments guaranteed. For further information, address

WATER WHEELS

For all Heads from 3 Ft. to 2000 Ft.
Especially adapted to all kinds of
ELECTRIC POWER AND LIGHTING PLANTS.
Recent tests at Holyoke enable us to guarantee:
The Largest Power ever obtained from a wheel of the same diameter. The highest speed ever obtained for the same power. The highest mean efficiency ever realized when running from half to full gate. We guarantee also: *A runner of the greatest possible strength. A gate unequaled in quickness and ease of opening and closing. Tests show over 81 per cent. average efficiency with half to full water.*

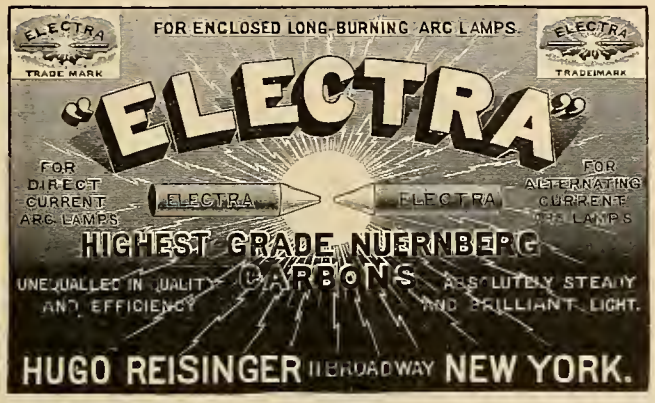
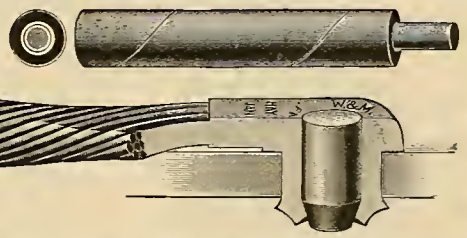
CARBONS CARBONS CARBONS

The "Electra" Carbons are the recognized standard all the world over.



There are no Carbons better than the "Electra" and none "just as good."

"CROWN" Insulated Conductors AND Rail Bonds



"Crown" wires are the perfection of Rubber Insulation for high or low voltage, direct or alternating currents, solid or stranded conductors up to 2,500,000 circular mils' capacity.

"Crown" bonds are the perfection of simplicity and economy in rail bonding, together with perfection of contact.

In "CROWN" WIRES or "CROWN" BONDS you secure the best attainable results, electrically and mechanically.

Solid or stranded bare copper conductors; also lead-encased and armored for aerial, underground and submarine work.

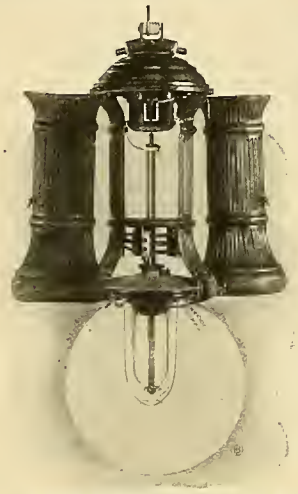
CHICAGO EDISON COMPANY, 139 Adams St., CHICAGO.



PERFECTION IN ARC LIGHTING

ATTAINED WHERE

THE "BELDEN" SYSTEM IS USED.

Among the many features which have made the **Belden Arc Lamp** so superior to any other, the following are particularly noteworthy:

It is long burning, simple, durable, mechanically and electrically correct. Trims easier than an open arc. Doesn't flicker. Needs no alignment, etc., etc.

A TRIAL ORDER will readily convince you of its superior qualities. Let us send you our bulletins.

Columbia Lamps....

QUALITY UNEXCELLED

Columbia Lamps embody all the features so essential to the satisfactory and profitable operation of CENTRAL STATIONS and ISOLATED PLANTS, namely: Full rated candlepower and initial uniformity, high efficiency and maintenance of candlepower.

If you are not entirely satisfied with the lamp which you are using at present, be persuaded by us to try a barrel of COLUMBIAS. You will find them satisfactory in every respect.

Special lamps for series burning on ELECTRIC STREET RAILWAY circuits.

Special prices to consumers on FUTURE DELIVERY ORDERS for 1,000 lamps or more covering full annual requirements.

Central Electric Co., Sales Agents.

OUR 20th CENTURY Souvenir Number

FOR DOMESTIC AND FOREIGN CIRCULATION.

The WESTERN ELECTRICIAN'S Twentieth Century Souvenir Number will be the best and handsomest number we have ever issued. It will be especially prized by its host of readers, owing to the valuable statistical information and other timely and interesting articles it will contain. From an artistic standpoint it will rival anything ever attempted by even the best literary magazines. No effort or expense will be spared to make it truly representative of the progress of electricity.

This important issue offers advertisers an unequaled opportunity to make their products better known ALL OVER THE WORLD. It will be sent to every prospective buyer, not only at home, but in the most remote portions of the civilized globe. It will obtain a circulation perhaps never before given an electrical journal.

This number, therefore, should be well worth the consideration and patronage of every wide-awake advertiser. It will be an issue that will be kept and constantly referred to. No extra charge will be made for space. A liberal special advertising announcement will bring you most gratifying results. Send in your copy and order NOW.

WESTERN ELECTRIC COMPANY

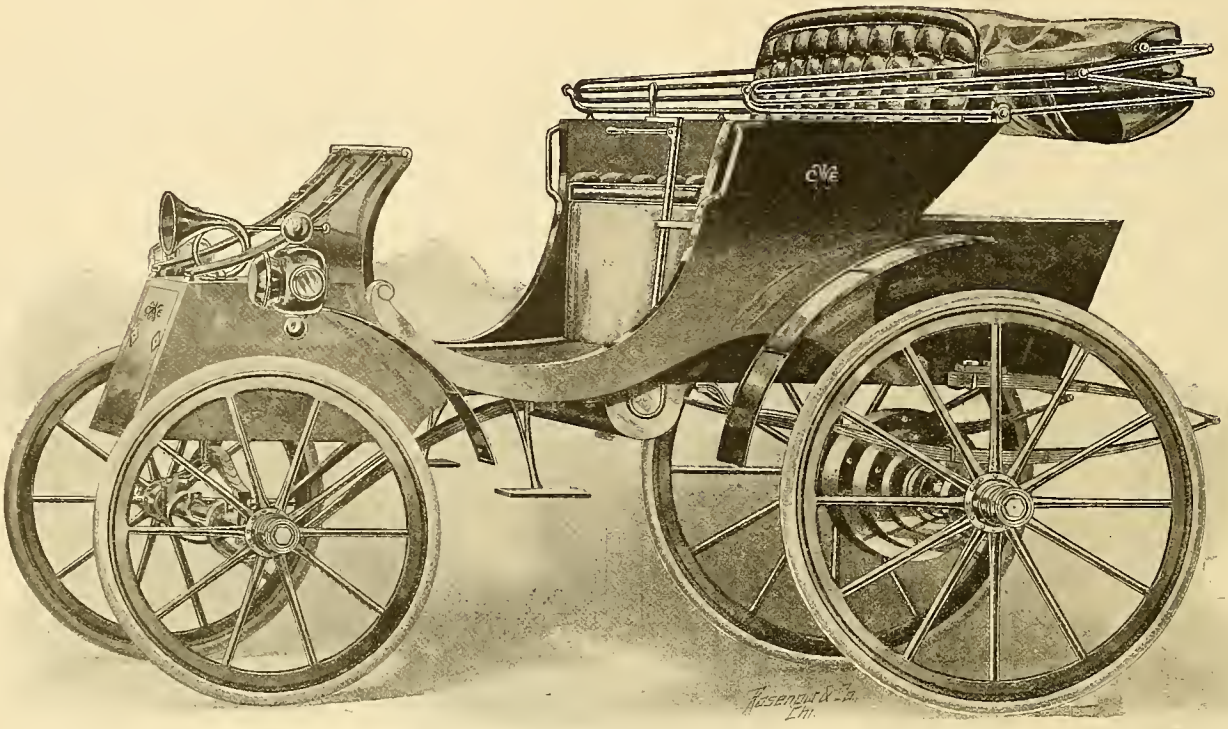
CHICAGO. NEW YORK.

AMERICAN ELECTRIC COMPANY, Northwestern Agents, St. Paul, Minn.
ST. LOUIS, MO., Security Building.

ANTWERP, 32 Rue Boudewyns.
LONDON, Bridge Chambers, 171 Queen Victoria St., E. C., and North Woolwich, E.
PARIS, 46 Avenue de Breteuil.

WE all believe that ELECTRICITY is the great power that DRIVES the wheels of PROGRESS—perhaps the wheels of Time; but we all know that Electricity drives the wheels of an Automobile more successfully than any other power that can be applied to them; but it did not feel at home in a "horseless carriage." It wanted the REAL THING—an AUTOMOBILE—in which to exhibit its best prowess, and

HERE IT IS



With every improvement in electrical, mechanical and carriage construction that science, long experience and absolute necessity have suggested, and the electricians of the world need no longer hesitate to own the foster child of their profession. Its entire conception and construction, mechanically and electrically, is as much of a departure from methods heretofore adopted as is its general design, and its operation is as pleasing to the purchaser as is the completeness of its appearance to the eye. All moving parts thoroughly protected in dust and waterproof casings. One electric and two friction brakes on every vehicle, giving as much comfort in hill coasting as in riding on level roads. Forty miles on one charge of the batteries and an *absolute guarantee* of the vehicle in every particular. PRICES REDUCED. A GOOD THING for electric light and power companies to interest themselves in the sale of. THINK IT OVER. Responsible agents wanted everywhere. Address all communications to

SENSE AND DOLLARS.

You can save a dollar or more by buying other meters than the Gutmann. In the end you will save many times that by installing Gutmann Alternating Current Integrating Wattmeters. Give them a trial. It's a proposition of sense and dollars.

Have we sent you our little booklet "Skepticism?"

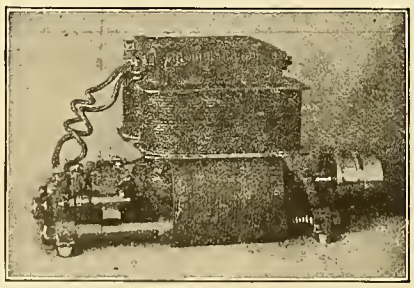
NEW FRANKLIN MODEL DYNAMO.



Sets of castings and material furnished in various stages of completion. Wrought iron fields; armature formed of punchings of sheet iron contains eight slots. Pulley for round or flat belt. Terminal wires to binding screws set in fibre connection board at top of pole pieces. Run as motor will drive sewing machine, dental engine or watchmaker's lathe. Ten-volt current. Run as a generator will light four 6-candle lamps. This machine is not a toy but is designed for use. Many interesting experiments can be performed with these machines. Full size detail blue prints furnished with each set of material, showing how to connect for both SERIES and SHUNT windings.

The change can be made from one winding to the other whenever desired.

Write for Dynamo Circular No. 16.

CREAM FLUX

AN ABSOLUTELY NON-CORROSIVE INSULATING SOLDERING FLUX FOR ALL METALS.

Contains no acid or any element injurious to electrical connections.

ENDORSED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS AND ALL USERS.

YOU CAN make more than double the number of perfect connections in one-half the time with Cream Flux than you can with the same amount of any other flux. Put up in cans at 15c., 25c., 50c. and 75c. Special prices in quantity. Send 15c. for trial box. *We guarantee it and if not satisfactory money will be refunded.*

THIS IS WHAT ONE USER HAS TO SAY OF IT:

"AFTER having tried the various soldering salts on the market, and after giving your Cream Flux severe tests on heavy cable connections, and on the finest stranded flexible drop cord work, we can safely say it meets all claims you make for it. I consider it one of the best ever offered for sale. Very truly,
"Per J. H. Goebel, Constr. Supt. CHICAGO EDISON CO."

4 55-light Gibbs, M. P., compound, brand new, slow speed, 1100 R. P. M.
1 55-light Siemens & Halske, type B., M. P., slow speed, self-oiler, brand new.
1 60-light Thomson-Houston.
1 60-light Westinghouse.
1 80-light Siemens & Halske, type L. H., self-oiler, brand new.
2 80-light Siemens & Halske, Ironclad type, M. P., self-oilers, brand new.
1 100-light Bain, compound, self-oiler.
1 100-light J. & C., self-oiler.
4 110-light Gibbs, M. P., compound, self-oilers, slow speed, brand new, 1000 R. P. M.
1 110-light Siemens & Halske, M. P., Churchward type, compound, extra slow speed, brand new, 650 R. P. M.
3 150-light Gibbs, M. P., compound, self-oilers, speed 1650.
1 150-light Gibbs, M. P., shunt, self-oiler, slow speed, 825 R. P. M.
1 160-light Card, self-oiler.
2 180-light Siemens & Halske, M. P., self-oilers, brand new.
1 200-light Western Electric, self-oiler, comp.
2 210-light Edison, self-oilers, 12 K. W.
4 210-light Siemens & Halske, 12 K. W.
2 210-light Siemens & Halske, M. P., brand new, type B., self-oilers.
4 210-light Gibbs, M. P., self-oilers, very slow speed, 725 R. P. M., brand new.
1 250-light Westinghouse.

110-Volt Incandescent Dynamos.—Continued.

1 250-light Commercial, comp., self-oiler.
1 250-light Eddy, self-oiler.
1 270-light General Electric, 15 K. W., M. P., direct-connected to Case engine, compound.
2 270-light Westinghouse, M. P., slow speed, 15 K. W.
1 300-light Columbian, multipolar, comp., self-oiler, slow speed.
4 300-light Gibbs, M. P., self-oilers, slow speed, 725 R. P. M., brand new.
1 340-light Eddy, self-oiler, compound.
2 350-light Hawkeye, compound.
1 360-light National, self-oiler, compound.
1 350-light Edison, 20 K. W., self-oiler.
6 350-light Siemens & Halske, type L. H., self-oilers.
1 360-light Duplex, multipolar, self-oiler, compound, slow speed.
3 500-light Siemens & Halske, type L. H., self-oilers, brand new.
4 540-light Edison, 30 K. W., self-oilers, compound.
1 600-light Eickmeyer.
2 700-light Westinghouse, 10 pole, slow speed, 40 K. W., self-oilers, 575 R. P. M., brand new.
2 800-light Edison, 45 K. W., self-oilers.
1 1200-light Siemens & Halske, type L. H., 70 K. W., self-oiler.
1 1350-light Siemens & Halske, Type I, 80 K. W., for direct connection, 8 pole.
3 1500-light Siemens & Halske, type L. H., self-oilers, 100 K. W.
1 1500-light Siemens & Halske, 100 K. W., type I., 6 pole, for direct connection, brand new.

220-Volt Generators.

Rheostat, base-frame and pulley accompany each machine.

1 8½ K. W. Westinghouse, multipolar, self-oiler.
1 9 K. W. Lundell, self-oiler.
1 10 K. W. Lundell, self-oiler, multipolar, slow speed.
1 12 K. W. Edison, self-oiler.
1 15 K. W. Edison, compound, self-oiler.
1 30 K. W. Siemens & Halske, M. P., Ironclad type, self-oiler, brand new.
1 45 K. W. Edison, compound, self-oiler, new armature.
1 50 K. W. Siemens & Halske, M. P., Churchward type, self-oiler, brand new, for direct connection.
1 marble panel switchboard for above.
1 100 K. W. Siemens & Halske, M. P., Churchward type, self-oiler, brand new, for direct connection.

500-Volt Generators.

2 15 K. W. Edison, self-oilers.
1 15 K. W. T.-H., self-oiler.
1 25 K. W. Mather, self-oiler.
2 35 K. W. Siemens & Halske, brand new, M. P., Churchward type, self-oilers, very slow speed, 475 R. P. M.
1 45 K. W. Edison, compound, self-oiler.
1 75 K. W. Westinghouse, Kodak set, Westinghouse generator and Westinghouse compound engine, 14 x 24 x 14, all complete, fine.

Alternating Generators.

1 350-light Thomson-Houston, A. 18.
1 600-light Thomson-Houston, A. 6.
1 600-light Thomson-Houston, 30 K. W., two-phase.
1 600-light Thomson-Houston, 30 K. W., slotted armature.
2 600-light General Electric, A. 30, toothed armature.
2 650-light Thomson-Houston, A. 35.
2 750-light Westinghouse, 37½ K. W.
1 900-light Warren, 45 K. W., 1100 volts.
1 1000-light Wood, 50 K. W., self-oiler.
1 1000-light Siemens & Halske, 60 K. W., self-oiler, 60 cycle.
1 1200-light National, with exciter.
1 1200-light Siemens & Halske, 60 K. W., Churchward type, brand new, 60 cycle, single-phase, 1100 volts, with exciter.
1 60 K. W. Siemens & Halske, Churchward type, brand new, 60 cycle, two-phase, rotary transformer, 1100 volts, alt. to 250 volts direct, complete, with marble panel switchboard.
1 1200-light Westinghouse, 60 K. W.
1 1200-light Thomson-Houston, 60 K. W.
1 1200-light Warren, 60 K. W., self-oiler.
1 1200-light General Electric, A. 60.
2 1300-light Thomson-Houston, A. 70, 1100 or 2200 volts.
1 1500-light Wood, 75 K. W., self-oiler.
1 1500-light General Electric, monocyclic, 75 K. W., self-oiler, 60 cycle.
1 1800-light National, 90 K. W.
1 4000-light Wood, 200 K. W., self-oiler.

Arc Dynamos.

XXXIV.—Automatic Exchanges. XXXV.—Storage Batteries. XXXVI.—Specifications.

518 large octavo pages, 379 Illus. Price, $3.00.

This is the first complete treatise on Telephony in the English language. The author was peculiarly qualified for the task, having been an examiner in the U. S. Patent Office in the telephonic class, and subsequently as a telephone engineer had a wide experience in every branch of telephonic work. The text is profusely illustrated by cuts of commercial apparatus and carefully prepared diagrams of circuits. No diagram is given without a full explanation. The apparatus, circuits and methods of the American Bell Telephone Company and of the various independent companies are fully described. The apparatus and methods used in making all of the tests required in commercial telephone work are fully treated.

Copies of this or any other electrical book published sent prepaid, to any address in the world, on receipt of price.

OUR STUDENTS SUCCEED

Hundreds of students in the electrical courses are receiving more salary for fewer hours' work than when they enrolled. The instruction given by these schools qualifies students for advanced positions in all branches of engineering.

When I enrolled, I was employed as repairman on electric cars. Owing to your thorough instruction, I was advanced in succession to wireman, dynamo tender and general electrician, and afterward was foreman of the electric shop of the Brooklyn Rapid Transit Company. I now hold an excellent position with the Westinghouse Electric and Manufacturing Company, Pittsburg, Pa. H. EDW. KEFFER, E. Pittsburg, Pa.

I enrolled in the Electrical Engineering Course, and secured a position at once with the Commonwealth Electric Co., at wiping machines, but was soon promoted to South Chicago Electric-Light Plant, as night dynamo tender. Through the assistance of the Schools, I secured my present position as night dynamo tender for the Pullman Company. My salary averages three times what I was getting in my first position.

Standard Electrical Dictionary.
BY PROF. T. O'CONOR SLOANE.
Author of "Arithmetic of Electricity," "Electricity Simplified," "Electric Toy Making," Etc.
682 Pages, 393 Illustrations. Handsomely bound in cloth, 8vo, $3.
An Entirely New Edition, Brought Up to Date and Greatly Enlarged.
COMPLETE—CONCISE—CONVENIENT.
In publishing the "Standard Electrical Dictionary," the author has adhered to what the work purports to be, exhausting the subject of electrical terms, giving each title the clearness of explanation necessary to make the understanding of it complete without unnecessary elaboration. In this work, every electrical word, term, or phrase will be found intelligently defined.
A practical handbook of reference, containing definitions of about 5,000 distinct words, terms and phrases.
The work is absolutely indispensable to all in any way interested in electrical science, from the higher electrical expert to the everyday electrical workman. In fact, it should be in the possession of all who desire to keep abreast with the progress of this branch of science.
ELECTRICIAN PUBLISHING CO., 510 Marquette Bldg., Chicago.

LONG-DISTANCE TELEPHONE, 2279.

JUST ISSUED.
MODERN ELECTRIC RAILWAY MOTORS.
BY GEO. T. HANCHETT, M. E.
FIRST PRACTICAL WORK ON RAILWAY MOTORS.
CONTENTS.—Chapter I.—Forms of Field Magnets. II.—Armature Winding Diagrams. III.—Field Coil Construction and Arrangement. IV.—Armature Construction. V.—Commutator and Brush Holder Construction. VI.—Motor Casings. VII.—Motor Suspensions. VIII.—Bearings and Gears. IX.—Lubrication. X.—General Dimensions and Data. XI.—Management and Repair. XII.—Railway Motor Design.
200 Pages. 157 Illustrations and Table. Price $2.00.
THIS is a book unique in its treatment of electric railway equipment. The first ten chapters are devoted to minute description of the details of electric railway motors that are in use to-day. Each organ of an electric railway motor is taken up in turn, described and illustrated by examples of present and past practice, and its operation explained in the light of practical experience. In short, the review of current practice is of such a nature as to bring out the reason why the electric railway motor is built as it is to-day. For example, field magnets of different types of motors are illustrated and compared, and their features of merit and faults pointed out. Armatures, armature windings, brush holders, suspensions and other details are similarly treated, each detail, however minute, being exhaustively considered. The last two chapters are devoted, one to the management and repair of electric railway motors, and the other to railway motor design, a complete design being worked out as an example. A table gives authoritative data of all types of railway motors in common use, both in America and Europe. **Sent postpaid on receipt of price.**

PRACTICAL FEATURES OF TELEPHONE WORK.
By A. E. DOBBS.
Cloth, 7 by 5 1-4 Inches. Illustrated. 134 pages. Appendix. 75 Cents.
THIS work is designed as a simple, plain-speaking handbook for the practical telephone man. Its author, Mr. Dobbs, has been eminently fitted by fourteen years' experience in telephony to deal with the subject in a thoroughly competent manner. This he has done, and the result is a mine of information, clearly and concisely presented, and invaluable to the manager, operator and lineman alike. The appendix contains reliable data regarding wires, resistance, inductive capacity, etc.
This or any other book on telephony or electricity sent to any address, postpaid, on receipt of price.
